Development west of the Urban Service Boundary is limited to densities which range from 1 dwelling unit per acre to 1 dwelling per 2.5 acres to and 1 dwelling unit per five acres ~~(or 0.20 dwelling units per acre~~ (~~1 dwelling unit per five acres~~). Development in excess of these densities requires an amendment to the Future Land Use Map of this plan. Any approval of such an amendment must include findings that the developer will provide the necessary services at no cost to local government and the conversion of agricultural land maintains the viability of agricultural uses on adjacent lands.

~~*Urban Service Area*~~

~~This area~~ ~~lies~~ Urban development activities lie to the east of the previously discussed Urban Service Boundary and represents the preferred regions for development at urban intensities. The area indicated is the most likely to have centralized water and wastewater services provided by either a municipal utility or a privately operated regional enterprise and other infrastructure and services. The intent of the ~~u~~Urban ~~s~~Service Boundary ~~area~~ designation is to restrict the negative impacts of a sprawling low density

development pattern and the fiscal burden that pattern of development has on the ability of the community to meet its service needs.

The Urban Service Boundary~~Area~~ is not designed to be a permanent or static limitation on growth. Rather it is intended to indicate the areas of the County that can reasonably be expected to be provided with necessary community services during the fiscal planning periods of this plan.

Future Land Use Element policies speak to the definition of the boundary of the Urban Service Boundary line. The policies provide for some flexibility in the exact location of this line by as much as 1,500 feet, without the need to amend to the Comprehensive Plan. This flexibility is based upon the recognition that as properties develop, they may in fact have boundaries that lie in part beyond the defined Urban Service B~~b~~oundary as depicted. It is not the intention of this plan to penalize these properties for being partially outside of this area.

For example, it is conceivable that a property could be divided by the Urban Service B~~b~~oundary, but through particular topographic conditions it may be possible for that entire site to receive the full range of community infrastructure and utility services. The Urban Service Boundary ~~designation~~ is not intended to be a line of absolute demarcation for the provision of these services.

Starting in 2021, the Board of County Commissioners reviewed the current Urban Service Boundary (USB) for expansion in response to significant growth in the county and anticipating more growth in the next twenty years. As noted below in Table 1-6, the County saw 38.8% of population growth between 2010-2024, 13% of population growth in unincorporated St Lucie County and the majority of the growth in the City of Port St. Lucie. In August of 2022, the Board of County Commissioners adopted Ordinance 2022-15 to expand the USB in the southwest area of the county. In Figure 2 below is the adopted USB expansion in the red dashed line, a total of 31,510 acres and 13,375 acres in the Unincorporated St. Lucie County.

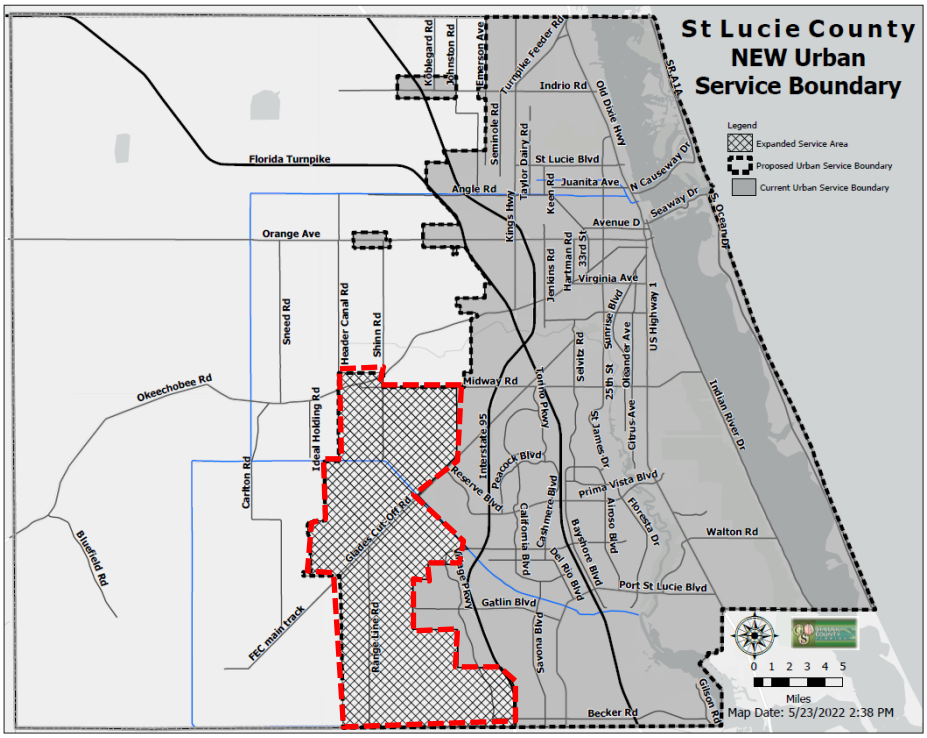

Figure 2 USB Expansion 2022, St. Lucie BOCC, 2022.

The Board of Commissioners also approved a Planning Study for potential USB expansion in the northwest portion of the county. See Figure 3 below highlighted in yellow and green.

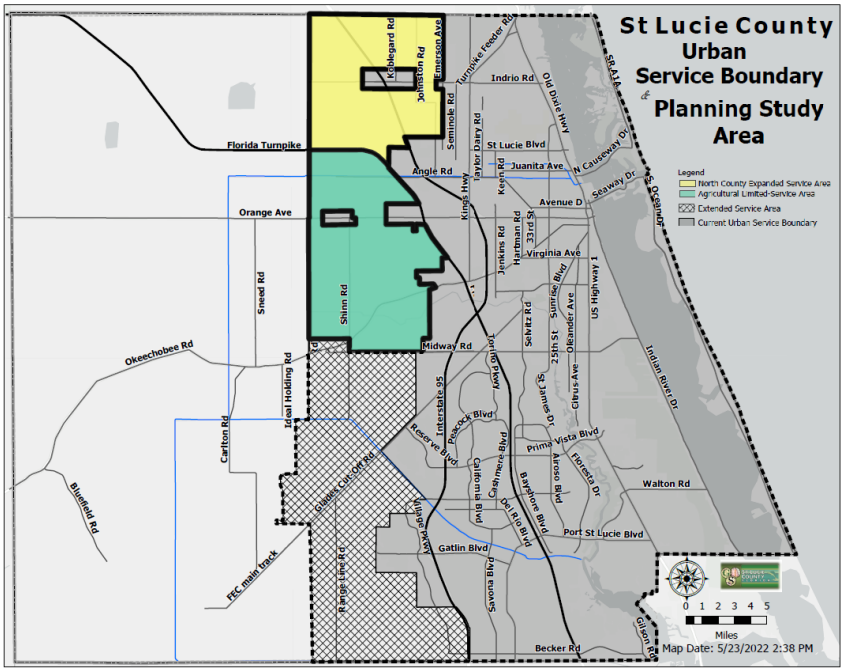

Figure 3 St. Lucie County Urban Service Boundary Planning Study Area, St. Lucie BOCC, 2022.

A Planning Study was conducted by Calvin Giordano & Associates in 2024/2025, and the results are in Tables 1-10A and 1-10B which confirms the County has enough vacant land inside the current USB to absorb the projected population increase of 157,066 people within a 10-year planning horizon. By 2035, the St. Lucie County population is projected to grow from 385,746 (4/1/2024) to 456,800 (2035). This equates to a change in population of 71,054 over 11 years or an 18.4% increase. There is currently no need to further expand the USB.

~~The Planning Study also states that the vacant parcels in the areas highlighted yellow and green in Figure 3 can absorb dwelling unit increase within a 10 and 20-year planning horizon.~~

~~***Remainder of page is left blank intentionally***~~

Population

Pursuant to Section 163.3177(1)(f)3., F.S., the County Comprehensive Plan must be based on at least the minimum amount of land required to accommodate the medium projections as published by the Office of Economic and Demographic Research for at least a 10-year planning period. Absent physical limitations on population growth, population projections for each municipality, and the unincorporated area within a county must, at a minimum, be reflective of each area's proportional share of the total county population and the total county population growth. Additionally, Section 163.3177(5)(a), F.S., requires that each local government comprehensive plan must include at least two planning periods, one covering at least the first 10-year period occurring after the plan's adoption and one covering at least a 20-year period.

The current total population estimate for St. Lucie County is 385,746, with 80,340 within the unincorporated county and distributed between the municipalities as follows:

Table 1-4 Population Estimates

County and City	Population Estimate April 1,2024	Population Change 2020-2024	Census Count April 1, 2020
St. Lucie County	385,746	56,520	329,226
Fort Pierce	50,823	3,526	47,297
Port St. Lucie	253,959	49,108	204,851
St. Lucie Village	624	11	613
Unincorporated	80,340	3,875	76,465

Source: 2024 Bureau of Economic and Business Research Florida Estimates of Population 2024

By 2035, the St. Lucie County population is projected to grow from 385,746 (4/1/2024) to 456,800 (2035). This equates to a change in population of 71,054 over 11 years or an 18.4% increase. By 2050, St. Lucie County's population is projected to grow from 385,746 to 530,700. That equates to a change in population of 144,954 over 26 years or a 37.57% increase.

Compared with the population change of 107,957 from 2010-2024, a 14-year period, the County grew quickly between 2010-2024 but growth is projected to stabilize over the next 26 years. ~~As noted~~ In ~~the below~~ Table 1-6 the overall County population grew by ~~5.4~~ 38.8% between 2010 and ~~2016~~ 2024 (BEBR). During the same period, the unincorporated population grew by 13%. The County and unincorporated County population will continue to grow and reflect development for approved, the Towns, Villages, and Countryside (TVC) designated area~~,~~ and infill development.

* Florida Population: Census Summary, 2010.

Seasonal population is evaluated by estimating the vacant units of an area. The U.S. Census, American Community Survey breaks down vacant units between units for sale, for rent, and seasonal or recreational use. Based on the vacant units, in Table 1-8, St Lucie County and Fort Pierce have the majority of the seasonal population with approximately 10 % of the units in each location for seasonal use.

Table 1-8 Seasonal Unit Estimate

Population and Need for Development

The following T~~t~~able 1-10 shows the unincorporated County's potential to accommodate the population projected for at least a 10-year planning period. By 2035, the St. Lucie County population is projected to grow from 385,746 (4/1/2024) to 456,800 (2035). This equates to a change in population of 71,054 over 11 years or an 18.4% increase.

Based upon the existing vacant lands inventory ~~only, 74,254~~ 178,195 people can be accomodated by future development over and above the existing population based on currently future land use designations and 2.53 Average Household Size based on the April 1, 2024 BEBR Number of Households and Average Household Size in Florida ~~20210 US Census average persons per household f #.## for the unicorporated County~~. Currently, most of the lands within the TVC area are considered to have an existing land use of agriculture. Potential housing development in the TVC is based a maximum allowed number of units rather than vacant land acreage and have been included in this analysis to fully represent unincorporated St. Lucie County's potential to accommodate future population.

**Closest actual population used is 2023 ACS. Population only.

If this analysis is conducted using the 2024 Bureau of Economic and Business Research - Florida Estimates of Population 2024 - April 1, 2024, Population Estimate, the following would be the result.

Table 1-10D Accommodating 10-Year and 20-Year Projected Growth

BEBR Projections	2024	2035	2045	10 Year Growth	20 Year Growth
Population	385,746	456,800	508,800	71,054	123,054
Dwelling Units*	N/A	180,553	201,107	28,085	48,638

*Based on BEBR est. of 2.53 people per dwelling unit.
**2024 Bureau of Economic and Business Research - Florida Estimates of Population 2024 - April 1, 2024, Population Estimate.

- Based on current development patterns continuing, without USB expansion, lands inside the USB have the potential to accommodate 123% of 10-year population and unit growth,
- Lands that have residential zoning, a “Vacant Residential” land use designation, or are undeveloped agricultural lands in optimal locations may accommodate roughly 41,708 units at a density of 1.0 to 2.0 units/acre over 20,854 acres.

This analysis produced the following policy recommendations:

- Expanding the USB is not warranted in the 10-year planning horizon as optimal lands exist inside the USB to accommodate residential unit projections in most scenarios..
- Should USB expansion be considered two identified areas: North County Expanded Service Area and Agriculture Limited-Service Area, are eligible and appropriate should all other policies of this comprehensive plan be met.
- The 11,644 acres needed to accommodate the remaining 20-year residential growth is most appropriately located on the combined 13,890 acres of undeveloped land within North County Expanded Service Area (5,818 acres) and Agriculture Limited-Service Area (8,073 acres), when

infrastructure and services are provided, which can accommodate 119% of the remaining 20-year projected unit growth.

- If USB expansion is considered, the North County Expanded Service Area shall be prioritized before the Agricultal Limited-Service Area.
- Expansions should be considered incrementally and project-by-project, based on current policies of expanding adjacent-to-boundary first, rather than all at once.
- If these areas are considered, no other expansion areas shall be eligible without an update to the comprehensive plan.

REDEVELOPMENT

Redevelopment is a strategy the County can utilize to address population growth and the need for diversity in housing types without extending the USB and allowing sprawl to spread westward by promoting infill development inside the USB. The County has not officially designated any areas as having conditions of slum and blight, but is continuing to monitor aging areas and implement needed programs and improvements.

Population projections indicate a population of 88,172 may be added to the county outside municipal areas, creating a ~~need~~ demand ~~to house 5,263 between 2016 and 2040~~ for roughly 34,851 units between 2025 and 2035 (2.53 people per unit). Based upon the above analysis, St. Lucie County will be able to accommodate ~~the~~ 123% of this 10 year projection ~~population growth~~ within the current USB.

Twenty-year projections indicate a population of 140,172 people and 55,404 units. Applying a similar analysis the North County Expanded Service Area and Agircultural Limited Service Area expansion areas outside the USB, an estimated 13,890 acres of developable land may accommodate an estimated 119% of remaining 20-year unit growth.

Potential USB expansion areas: In Figure 4 below the dark red areas illustrate undeveloped lands inside the USB able to accommodate 123% of 10-year population/unit growth projections, lighter red areas illustrate the 13,890 acres of undeveloped lands outside the USB and inside the targeted expansion areas with potential to accommodate 119% of 20-year growth.

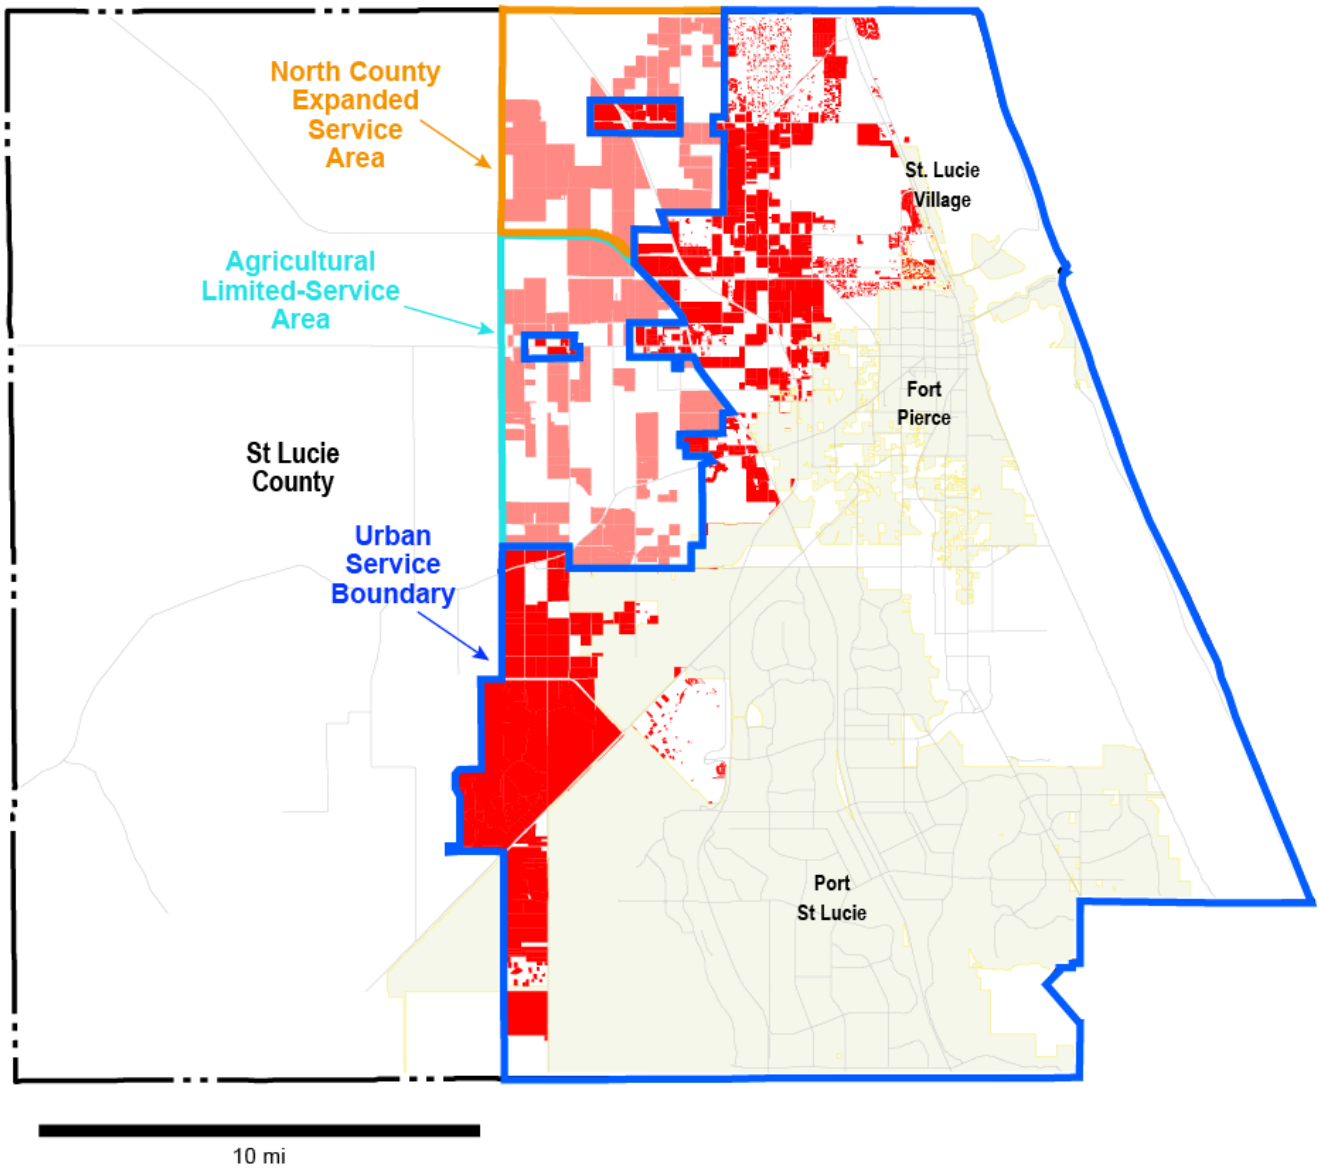

Figure 4 Map of Undeveloped Land for Future Development. Calvin Giordano, 2025.

When considering population in a region, analysis can determine what type of housing will be more likey needed in a 10-year and 20-year planning horizon. Table 1-11 shows that St. Lucie County has 35% of its population between the ages of 25 to 54 years old. Within this demographic 25 to 35 years old are typically first itme home buyers and they represent 11% of the County's population. They are looking for affordability and purchase the smaller properties that are considered starter homes. The population aged 45 to 54 years old typically are looking to upgrade their housing and want bigger property and can afford a larger property. 23% of the County's population are aged 65 to 74 years old. This demographic tends to downsize their property as they are retiring and do not need or want to maintain a larger property. Looking at the data, it is understood that the county will need to diversify its housing options.

Table 1-11 Age Cohort Percentages of County Population

Age of County Population	St. Lucie County % of Population	Unincorporated St. Lucie % of Population
Under 5 Years	4.91%	2.90%
5 to 9 Years	4.98%	3.32%
10 to 14 Years	6.17%	4.48%

Source: Census ACS 2022 5-Year Estimate DP04

In 2022, St. Lucie County and the Cities of Fort Pierce and Port St. Lucie partnered to conduct a Housing Needs Assessment to develop a full understanding of the dynamics of the local and regional housing market and to develop a flexible long-term community housing plan with specific goals and objectives to address identified local and regional housing needs. In June 2024, the Board of County Commissioners accepted the Final Housing Needs Assessment and Implementation Plan, prepared by the consulting firm Thomas P. Miller and Associates (TPMA).

This report notes that, "Since 2010, St. Lucie County's senior population has grown by nearly 25,000, from just over 55,000 to almost 80,000. Moreover, seniors represent a larger share of the total population. In 2022, seniors accounted for 23% of the total population. By 2050, this is expected to have grown to 27%. Likely, this will present specific needs for the County's housing stock moving forward…"

"A diverse housing mix is vital for the health and sustainability of a local economy. Whether a region is suburban or rural, affluent or low-income, a housing supply that meets a variety of needs for residents and workforce creates stability for the businesses and services that support the community. The housing

life cycle is broken down into 6 stages, which provides a community and its residents the flexibility and mobility necessary to meet the needs of residents with varying incomes, lifestyles, and needs." This is depicted in Figure 10, Housing Life Cycle, in the Final Housing Needs Assessment and Implementation Plan.

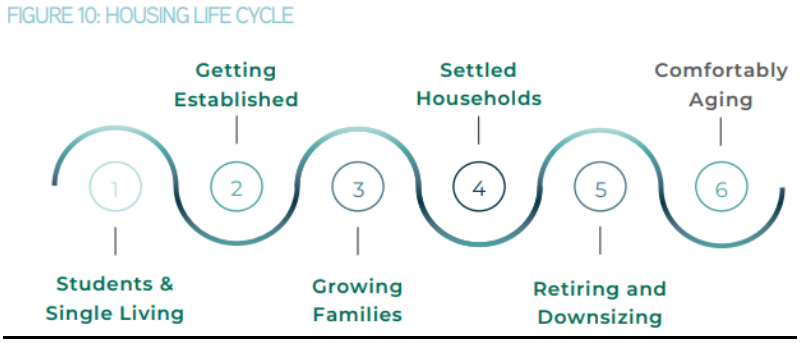

Figure 5 June 4, 2024 Housing Needs Assessment and Implementation Plan

"Ultimately, St. Lucie County offers limited options to residents across a number of these housing life cycle stages. For example, a combination of high purchase price and the prevalence of single-family detached homes limits much of the available housing stock to "growing families" and "settled households" from the table above. Younger residents who are looking for housing (those households represented above by "students and single living" and "getting established") are largely unable to find suitable accommodations for the needs of their households…. St. Lucie County would benefit from the prioritization of different kinds of housing units that meet a wider variety of needs. In fact, the needs of residents at earlier and later stages of the housing life cycle can often be met with similar unit types. For example, expanding permissions for duplexes and smaller single-family homes can present new options for first-time homebuyers, downsizing seniors, and renters alike."

PUBLIC FACILITY NEEDS

Transportation

Transportation is coordinated with St. Lucie Transportation Planning Organization (TPO) through the St. Lucie County Transportation Plan, Smart Moves 2045, a comprehensive, long-range outline of all major needed or desired transportation projects through the planning year ~~2040~~ 2045. This plan is a segment of the St. Lucie and Martin County Regional Long Range Transportation Plan (RLRTP).

Designated Strategic Intermodal System facilities in St. Lucie County include I-95, the Turnpike, the Florida East Coast Railroad, the Atlantic Intracoastal Waterway and several others as well.

Significant transportation facilities include the Treasure Coast International Airport, a commercial airport, that recently received its Part 139 Commercial Service Certification ~~general aviation facility~~ and the Port of Ft. Pierce is the region's only deep-water port, maintaining a channel depth of 28 feet. The Port of Ft. Pierce, one of Florida's 15 deepwater ports, is identified by FDOT as a Strategic Growth Seaport.

St. Lucie County offers traditional fixed-route public transit service through the Treasure Coast Connector (TCC). Additionally, the County provides paratransit services available to qualified residents that meet certain mobility needs and eligibility requirements as Transportation Disadvantaged (TD) and/or meet the criteria of the Americans with Disabilities Act (ADA). Figure 6 is a map of the three on demand zones serviced by the public transit service. ~~The fixed-route and paratransit system is operated~~

~~by Community Transit, a division of the Council on Aging of St. Lucie, Inc. (COASL) under contract to the St. Lucie County Board of County Commissioners~~.

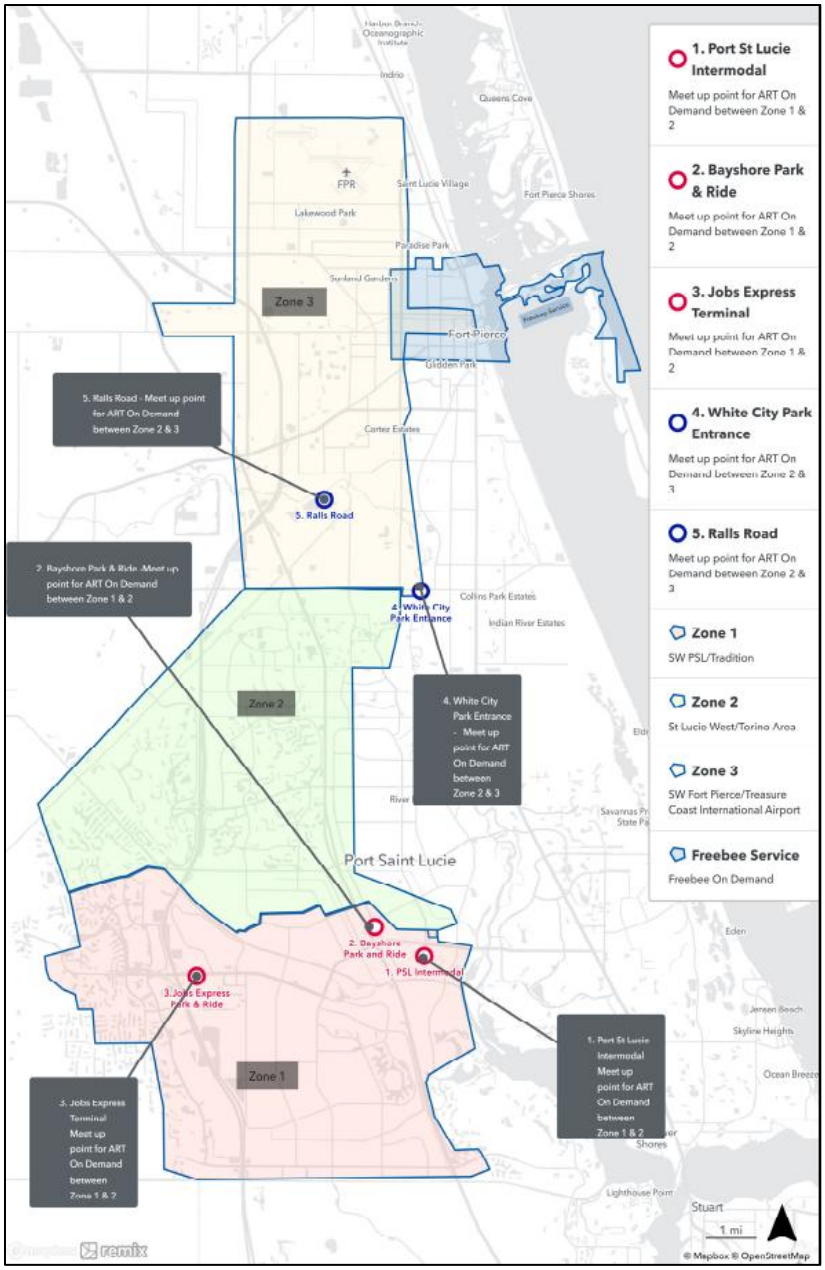

Figure 6 St. Lucie County, Copy of ART FR - Zone 1,2&3 - Freebee 10_16_2024

In 2021, ~~T~~the Board of County Commissioners adopted the long-range transportation plan, Smart Moves 2045. The walk-bike network is nationally recognized by Florida Highway Administration (FHWA) and "consists of 927 miles that connects communities with places of employment and local attraction." The County also recognizes that shared micromobility is growing rapidly and this type of transportation consists of docked and dockless bikeshare systems, electric bikes, and scooters. ~~the St. Lucie County Bicycle, Pedestrian, Greenways & Trails Master Plan completed by the St. Lucie Transportation Planning Organization (TPO) in 2008. This plan was further fortified by the Go2040 Long Range Transportation Plan (LRTP) of the St. Lucie TPO, including the St. Lucie Walk-Bike Network, which~~

~~inventoried all the existing sidewalks, bike paths, missing sidewalks, and identified projects to improve the system.~~

~~Master Plan inventoried all the existing sidewalks, bike paths, missing sidewalks, and provided suggestions to improve the system.~~

The Transportation Element provides information of existing and projected level of services standards, transportation improvement strategies, and long-term transportation planning programs. On April 2,2024, the Board of County Commissioners adopted Ordinance 2024-13 to update the Transportation Map Series (TRN maps 1 through 7) within the comprehensive plan and Ordinance 2024-12 to update the Right of Way Protection Map included within the Land Development Code. Further map series updates may be considered though evaluation and appraisal reviews.

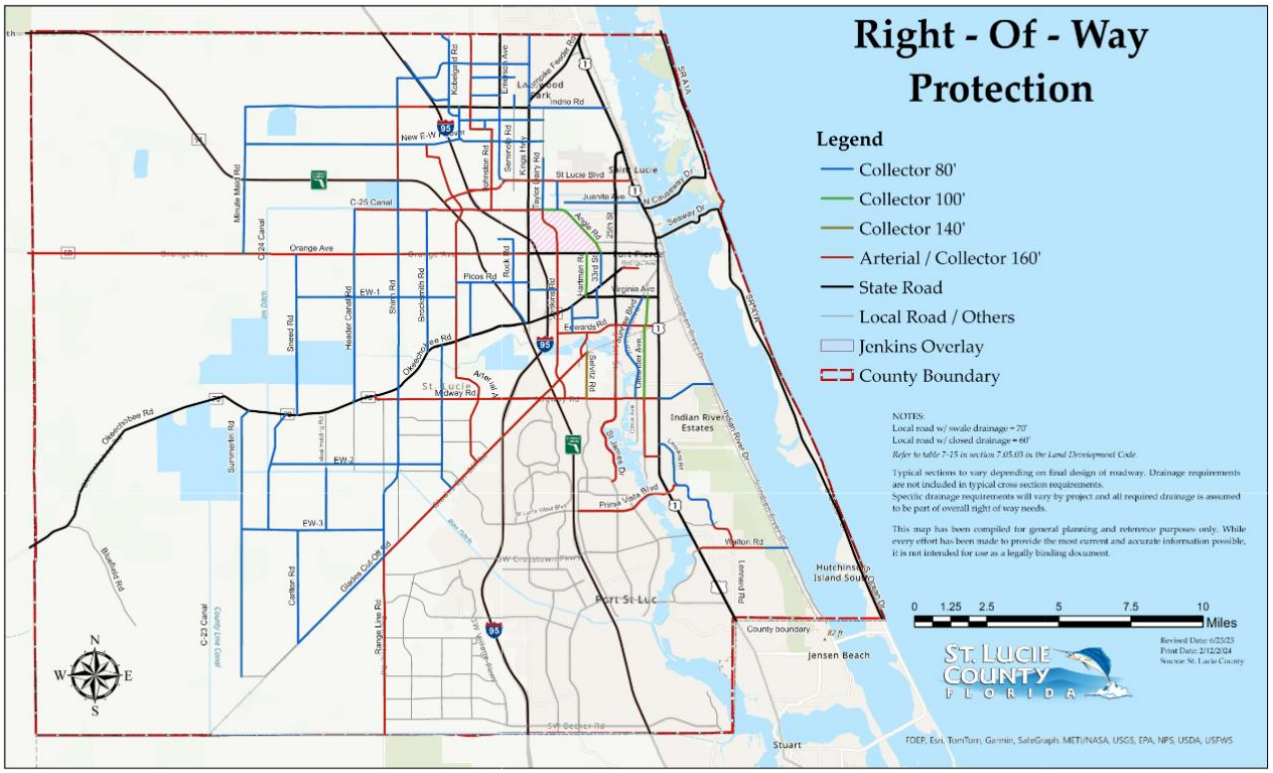

Figure 7 Ordinance 2024-12 Right of Way Protection Map

Potable Water

St. Lucie County adopted by reference the 20-year Water Supply Facilities Work Plan 2022 (Work Plan) approved by Ordinance No. 2022-01 on January 11, 2022, for a planning period of not less than 10 years. The Work Plan addresses issues that pertain to water supply facilities and requirements needed to serve current and future development within the St. Lucie County water service area. The County will review and update the Work Plan at lease every five (5) years within 18 months after the governing board of water management district approves an updated regional water supply plan. Any changes affecting the Work Plan will be included in the annual Capital Improvements Element.

The County's utility service area is currently comprised of approximately 369 square miles.

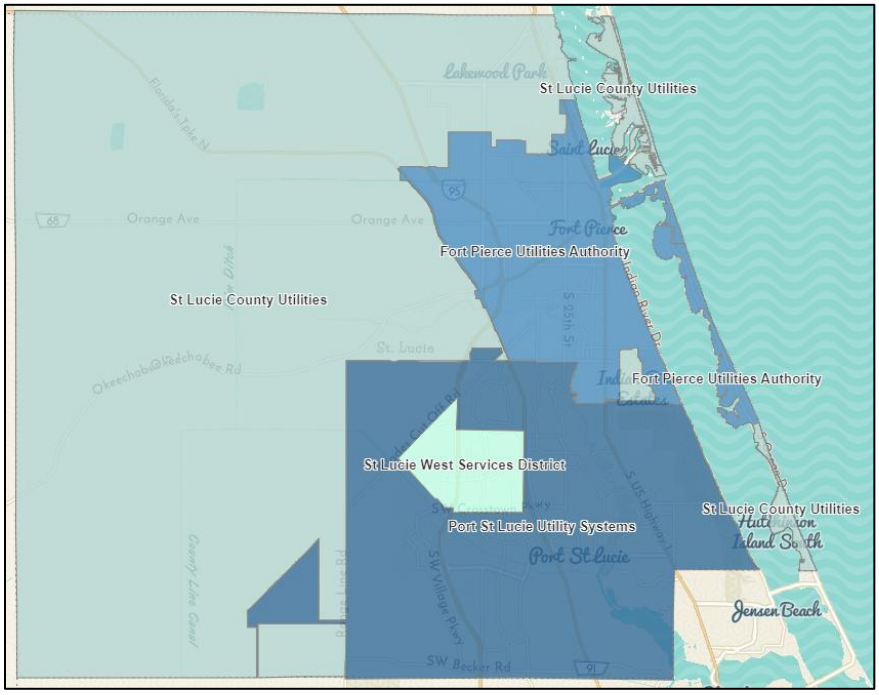

Figure 8 Map of Utility Service Boundaries. 2025 St. Lucie County

St. Lucie County adopted the ~~2010~~ 20-Year Water Supply Facilities Work Plan and the Water and Wastewater Master Plan in ~~2008~~ 2022 which will serve as the overall planning documents for potable water facilities. The two (2) major urban areas of the County, Fort Pierce and Port St. Lucie have regionalized potable water treatment and distribution systems. Unincorporated areas are serviced by St. Lucie Utilities, Fort Pierce Utility Authority (FPUA) and private suppliers.

The 2022 St Lucie County 20-year Water Supply Facilities Work Plan states SLCU (St Lucie County Utilities) servicing the unincorporated areas shall have existing and projected potable water level of service standard of 100 gpcd. The unincorporated area serviced by FPUA shall have LOS standard of 151 gpcd. The County anticipates future growth will require SLCU to have an alternative water supply/wastewater treatment plant for potable water service.

In May 2005, the County purchased approximately 38 acres adjacent to the corner of Indrio Road and Taylor Dairy Road for utility expansion. In October of 2012, the Board of County Commissioners approved Resolution No. 12-013, rezoning of the site to the U, Utilities district. The Taylor Dairy site is intended for the construction of a two million gallon per day (2mgd) water treatment facility intended to serve future development in North Unincorporated County.

The site is currently progressing with the construction of two Upper Floridan Aquifer (UFA) raw water production wells and associated surface facilities, a deep injection well system, an access road, two stormwater ponds, a water storage tank, a Reverse Osmosis (RO) system, electrical building, a degassing/odor control building, a chemical storage building, back-up power generator, employee parking, and other infrastructure to support the Utilities' operations.

Figure 9 Map of the Taylor Dairy Site

In 2022, the County purchased approximately 232 acres south of the County Fairgrounds along Peacock Road (aka Peacock Site). In November 2024, the Board of County Commissioners adopted Resolution 2024-214, amending approximately 35 acres of this purchased land from AG-5 to Utilities (U) Zoning for the construction of a water treatment facility intended to serve future development in the South and Central Unincorporated County north and west of the City of Port St. Lucie and west of the City of Fort Pierce.

Figure 10 Map of the Peacock Site

On April 2, 2024, the Board of County Commissioners approved Purchase and Sale Agreement for 90 acres from Tropicana Manufacturing Company, Inc. for wastewater treatment plant, deep injection well, ancillary facilities, and future utility purposes.

As portrayed in Figure 11 below, the County is currently planning for the design and construction of a two million gallon per day (2mgd) water plant on Peacock Road, south of the County Fairgrounds, and has acquired a 1.75 million gallon per day wastewater treatment plant on a former industrial site between I-95 and the Turnpike, just north of Midway Road (aka Tropicana Property). The potable water plant is planned to be operational by 2027/2028 and increased to a 6mgd plant in the future. The wastewater treatment plant is operational and will also be expanded. These expansion plans include

the current construction of water and wastewater lines running south on South Header Canal Road to the C-24 Canal, south along the eastern perimeter of Oak Ridge Ranch.

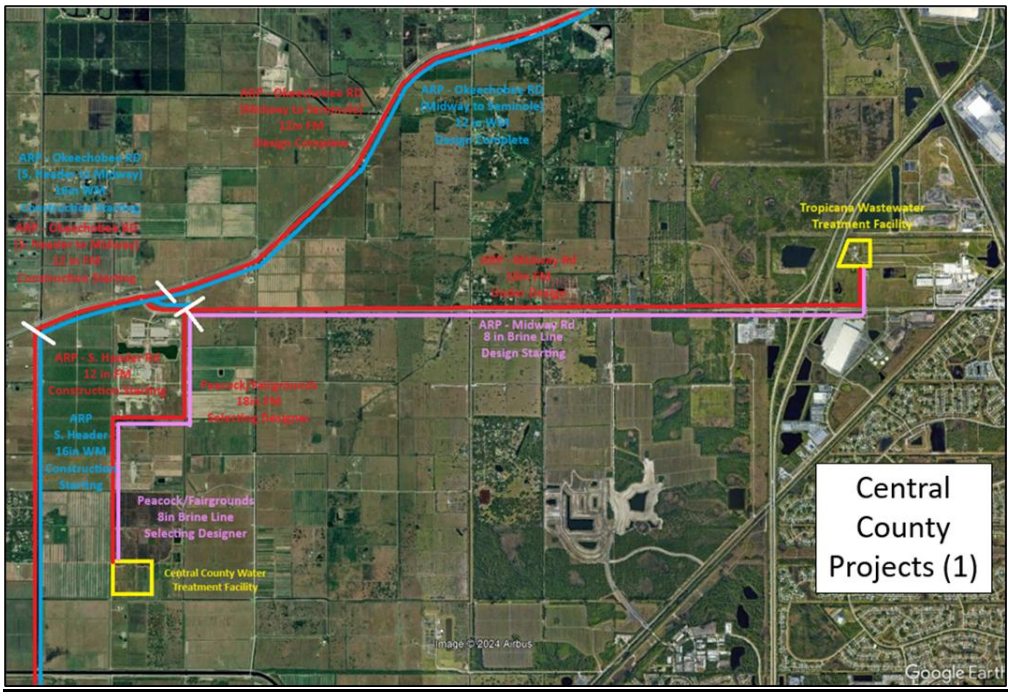

Figure 11 St. Lucie County Plan for Water and Wastewater Treatment Plants

On August 17, 2021, the Board approved allocating $37,353,459.00 in American Rescue Plan (ARP) Funds for Utility projects. On April 22, 2025, the Board approved Series 2025A and Series 2025B Non-Ad Valorem Bonds for capital improvements relating to the water and wastewater system projects and for the acquisition and construction of certain capital improvements relating to the solid waste disposal system. These bonds are being issued to secure $112.1 million in project funds for Utilities projects (Series 2025A) and $35 million in project funds for Solid Waste projects (Series 2025B).

The County's Consumptive Use Permit from South Florida Water Management District is valid through 2028 and allows withdrawal of 3.3mgd in the north and withdrawal of 1.9mgd in the central County. The County is currently updating its Water Supply Facilities Work Plan to include the central county utility projects and projected demands from development proposals in the central and southern areas of the county. Additionally, the County has an existing bulk water agreement with the Fort Pierce Utility Authority (FPUA) and FPUA's water plant has a capacity of 23mgd.

There is sufficient capacity to serve unincorporated St. Lucie County residents in the short term and long-term planning timeframes.

~~St. Lucie County is currently working on the update to its 10-Year Water Supply Facilities Work Plan based on the SFWMD 2016 Upper East Coast Water Supply Plan Update.~~

Wastewater

The County's utility service area is currently comprised of approximately 369 square miles. Figure 12 is a map of the St Lucie Utilities Service Area.

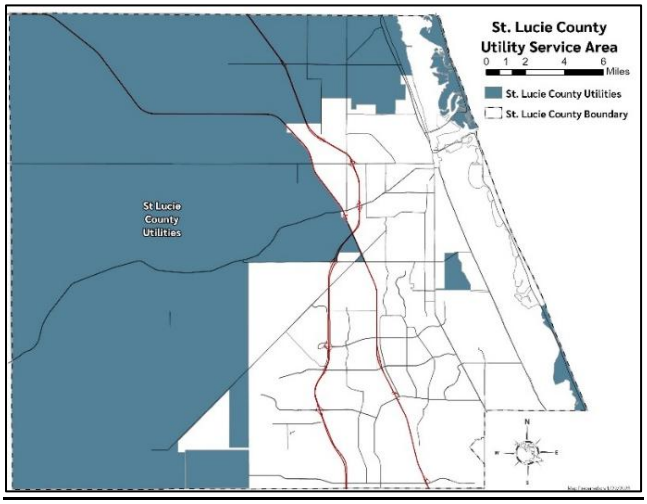

Figure 12 Map of St. Lucie Utility Service Area

~~The u~~Unincorporated County presently has wastewater service provided by St. Lucie Utilities, Fort Pierce Utility Authority, several medium sized utilities (St. Lucie West and private utilities), small package plants, and septic tanks. The standards for level of service for sanitary sewer systems other than those owned by FPUA shall be permanent & seasonal residents at 100 gpcd and for the area of unincorporated County served by FPUA shall have a LOS of 110 gpcd.

On April 2, 2024, the Board of County Commissioners approved the purchase of two parcels of land consisting of approximately 90 acres and a 1.75 million gallon per day wastewater treatment plant, deep injection well, and ancillary facilities from Tropicana Manufacturing Company for $24,500,000.00, as depicted in Figure 13.

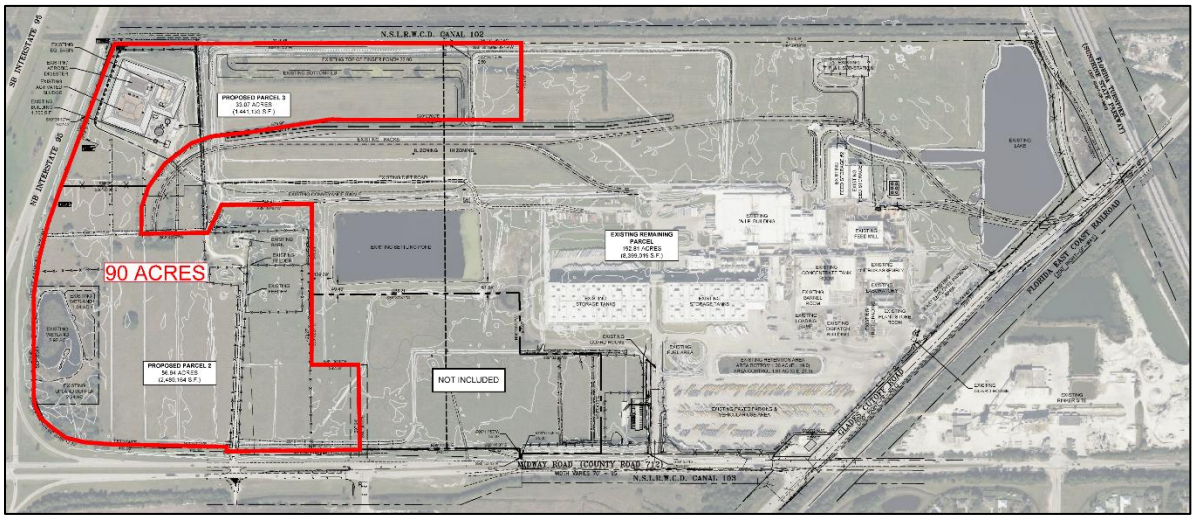

Figure 13 Map of Tropicana Property with County Purchased Highlighted. 2024 St. Lucie County

The purchase provides the following benefits to the County's utility provision:

- Water and Sewer District Benefits
  - Acquiring the Tropicana Wastewater Plant and ancillary facilities will allow the District to

defer the construction of a wastewater plant and deep injection disposal well at the County's Peacock Road site. The costs to upgrade the Tropicana plant and facilities will be considerably less than constructing a new plant and deep injection disposal well.
    - Having a wastewater treatment plant in a central location should decrease utility costumer costs over the long term.

- County Landfill Benefits
    - The county landfill may be able to benefit from the purposed purchase through potential use of the deep injection disposal well for leachate disposal and from the potential relocation of landfill administration buildings to the new site, which if approved by the Board, could substantially increase the available footprint for landfill disposal, and increase the useful life to the existing landfill.

On August 17, 2021, the Board approved allocating $37,353,459.00 in American Rescue Plan (ARP) Funds for Utility projects. On December 10, 2024, the Board approved allocating additional ARP Funds $6,000,000 towards the Tropicana Wastewater Treatment Plant project. On April 22, 2025, the Board approved Series 2025A and Series 2025B Non-Ad Valorem Bonds for capital improvements relating to the water and wastewater system projects and for the acquisition and construction of certain capital improvements relating to the solid waste disposal system. These bonds are being issued to secure $112.1 million in project funds for Utilities projects (Series 2025A) and $35 million in project funds for Solid Waste projects (Series 2025B).

The wastewater utility providers will have sufficient capacity to serve unincorporated St. Lucie County residents in the short term and long-term planning timeframes with the newly acquired wastewater treatment plant.

Drainage

Major surface drainage modifications to St. Lucie County commenced with the formation of the North St. Lucie River Water Control District (1917) and the Fort Pierce Farms Water Control District (1919). These Districts were created for the purpose of agricultural drainage and irrigation, with a secondary purpose being flood control activities.

During the 1940s, the U.S. Army Corps of Engineers (COE) channelized portions of the North Fork of the St. Lucie River in an effort to improve its water-carrying capacity and to accelerate its speed or discharge into the Atlantic Ocean. During the 1960s, the COE constructed Canals C-23, C-24, and C-25, along with their control structures. With the construction of this Primary Canal system for the South Florida Water Management District, the County was then divided into a series of Sub-Basins.

The Comprehensive Everglades Restoration Plan (CERP)/Indian River Lagoon (IRL)-South Plan projects will provide benefits to the primary drainage system and water quality. The County's Capital Improvements projects will provide benefits to the secondary and local drainage systems.

Solid Waste

St. Lucie County has been operating its present landfill since 1978. Currently, solid wastes received by the County are disposed of at the St. Lucie County Baling and Recycling Facility, which is the only solid waste disposal facility currently permitted in the County.

St. Lucie County currently has solid waste disposal facilities to satisfy the needs of the development

potential for the subject site and the County is actively assessing alternative disposal strategies and capacity renewal programs. Based upon University of Florida, medium BEBR population projections and a 5-year average per capita generation rate of 4.04 pounds per person per day, the capacity is estimated to last through 2066 (42 years).

Presently, the St. Lucie County Bailing & Recycling facility has nearly three quarters of one-million cubic yard capacity remaining in the current cells/phases, with ultimate facility capacity of over twelve million cubic yards remaining, correlating to a multiple decade service period, without accounting for waste reduction or capacity renewal programs that may be implemented.

There is sufficient capacity to serve unincorporated St. Lucie County residents in the short term and long-term planning timeframes.

Parks

The County is required to provide a minimum level of service of 5 acres per 1,000 residents ~~of~~ for Community Parks ~~for~~ in the unincorporated ~~population~~ area, 2.5 acres of Regional Park land area for every 1,000 residents countywide, and 21.2 acres of Resource-based Parks per 1,000 residents countywide. ~~Currently, the County exceeds LOS for all three types of parks.~~ The analysis from the 2022 Recreation and Open Space Master Plan shows when the County and municipal parks are combined, including preserves and golf courses, the 2020 county wide acreage LOS is 66.3 acres per 1,000 population and would drop to 54.1 acres per 1,000 population by 2030 if the County does not add any more park lands.

These acreage LOS's are well above the National Recreation and Park Association (NRPA) county benchmarks. If the preserves and golf courses are not included, the county wide 2020 acreage LOS drops to 22.6 acres per 1000 population and would further drop to 18.4 acres per 1,000 population by 2030 if the County does not add any park land. The NRPA benchmarks would drop in 2030, and the County and partner municipalities would need to acquire 1,686 acres of park land if they want to maintain the current acreage LOS.

The County will continue to evaluate strategies to provide for park lands.

School Capacity

The St. Lucie School District provides public school facilities within the County. The County adopted the Public School Facilities Element as previously required by Florida Statutes and updates the Capital Improvement Element according to the School District's five year work plan.

Schools are not to be constructed within School Zones designated on the Treasure Coast International Airport (TCIA) School Construction Zone Map, as depicted below:

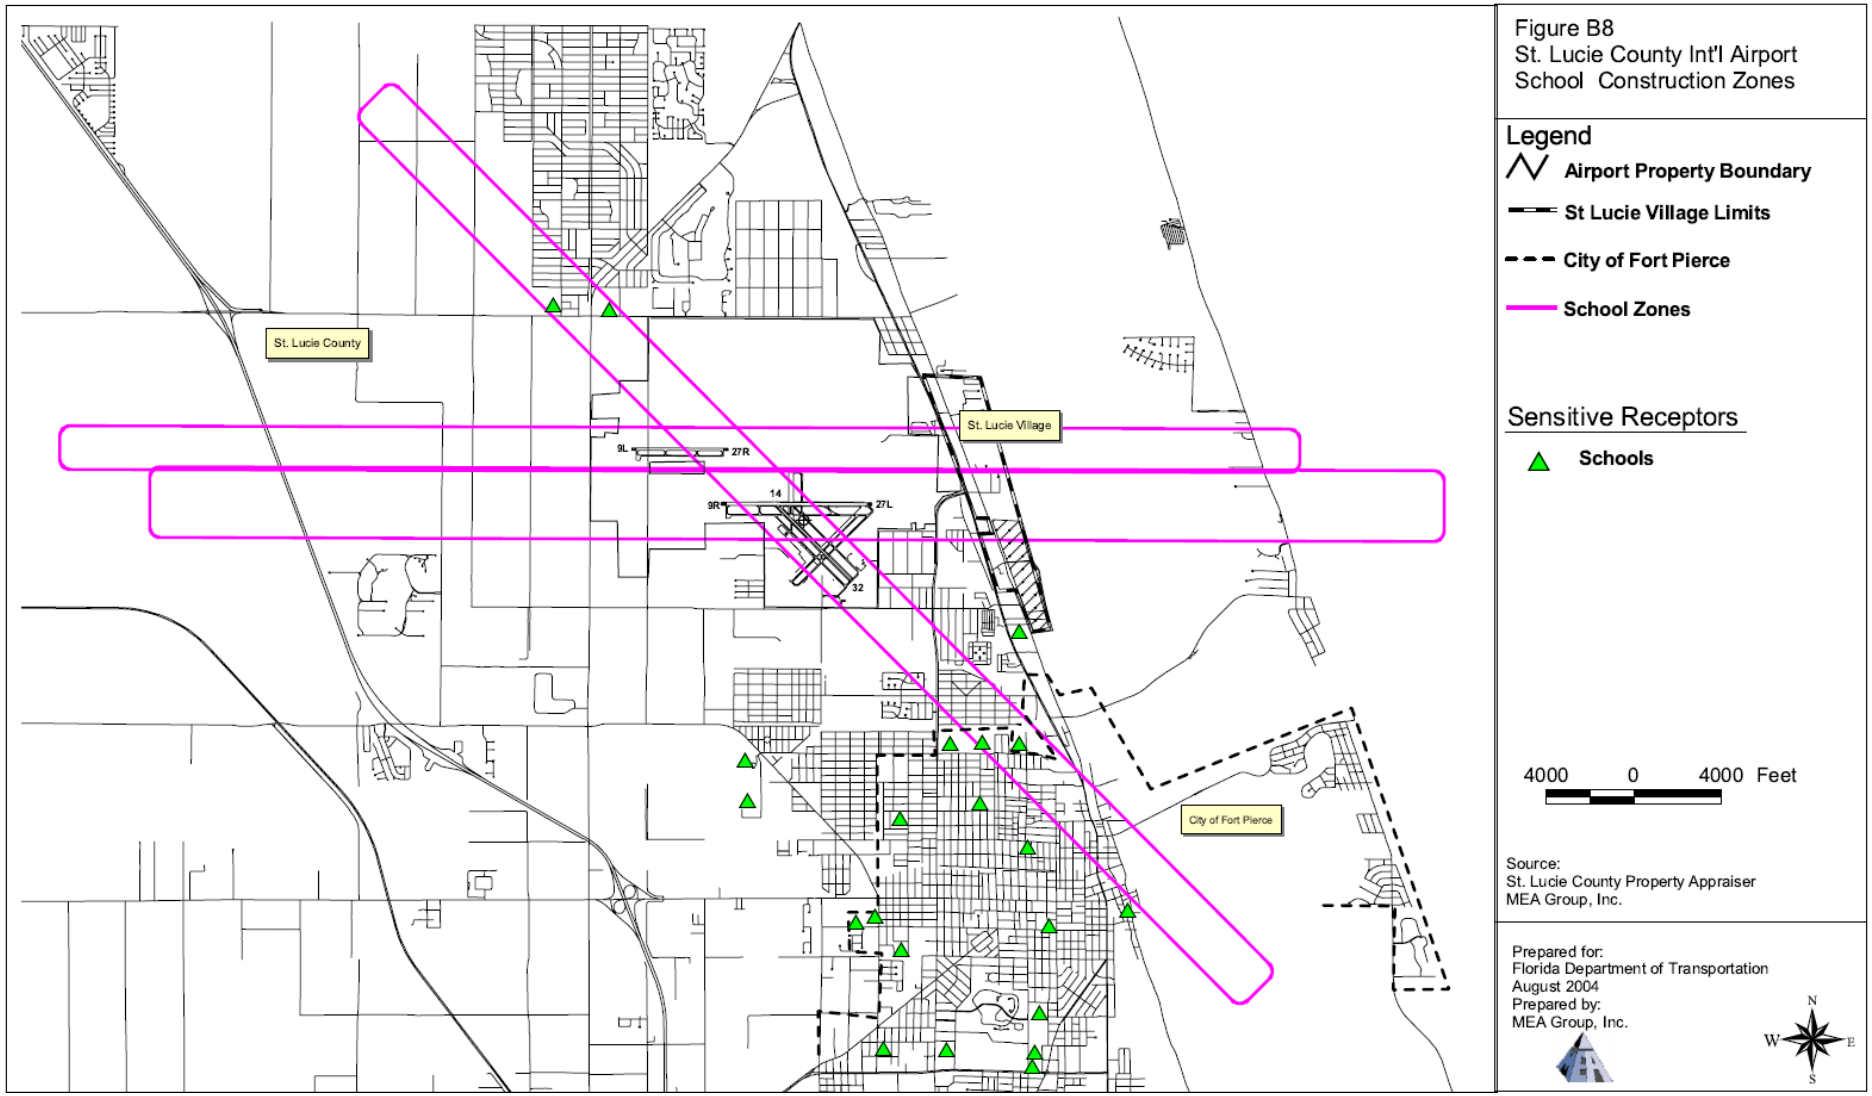

Figure 144 Map of TCIA School Construction Zones

CONSERVATION ISSUES

Natural Resources

The following Future Land Use Element Data Inventory and Analysis requirements are provided in other Comprehensive Plan Elements as follows:

- *Infrastructure*
  Wellfield Protection
- *Conservation*
  Wetlands
  Topgography
  Soils
  Water Resources
  Flood Zones
  Commercially Valuable Minerals
  Greenhouse Gas Reduction Strategies
- *Coastal Management*
  Dredge Spoil Sites
  Hazard Mitigation

Smart Growth and Greenhouse Reduction Strategies

St. Lucie County wishes to implement smart growth strategies that support the reduction of greenhouse gases. It is anticipated that many existing developed areas in eastern sections of the County will be annexed by the City of Fort Pierce and the City of Port St. Lucie. Therefore, the County has focussed on smart growth planning on undeveloped edge areas such as the North County, the Jenkins Road Area Plan Special District (LDC Section 4.12.00), ~~the Green Jobs and Innovation Corridor, the Green District,~~ and and Western Lands to ensure future development does not contribute to future sprawl and further climate change. ~~Additionally, the Smart Growth Committee provided recommendations to the Board of County Commissioners in January 2009 that support achieving an urban form of compact, mixed use based upon the American Planning Association's *A Recommended Comprehensive Smart Growth Audit Checklist*.~~

Towns, Villages, and Countryside Element (TVC Element)

The TVC Element and related overlay regulations in the land development code applies to the agricultural area of North St. Lucie County. Using the principles of Traditional Neighborhood Design (TND), the strategy for new settlement in the undeveloped areas requires a sustainable growth pattern characterized by a mix of uses, building types and income levels as well as a pedestrian-friendly block and street network. The TVC preserves a significant amount of public open space, promotes strategies for viable future agriculture, and helps mitigate the environmental impact of new development in the area.

A 2004 public process - the North St. Lucie County Charrette - resulted in a Special Area Plan and subsequent TVC implementation documents include the TVC Comprehensive Plan Element. The Treasure Coast Regional Planning Council (TCRPC) led the two-year process through the adoption of the TVC Comprehensive Plan Element and Land Development Regulations in May 2006.

Jenkins Road Area Plan Special District

<u>In 2007, </u>the County adopted land development regulations regarding the Jenkins Road Area. The intent of these regulations is to create a viable road system and supporting multi-modal facilities, and to create an innovative, walkable, mixed-use neighborhood built within the constraints of existing development, with adequate open space and recreational resources, and to protect natural resources. ~~Further, land~~

~~development regulations provide for the creation of a multi-modal transportation system suitable for motorized vehicles, mass transit, bicycles, and pedestrians; to provide adequate open space, park and recreational facilities; to provide and maintain functional road system in an area where key intersections and a major road are already failing; to create development that is compatible with existing land uses in the area; to provide a mix of land uses that increases the internal capture of trips and to include walkable scale and bicycle facilities that increase the variety of modes of transportation used to make internal trips; and to provide for innovative forms of land development.~~

In 2015, the Board of County Commissioners adopted Ordinance 14-026, amending the Jenkins Road Area Plan Special District, to eliminate land use and zoning district (use) regulations and associated design standards while adopting a specific Road and Trail System and typical street sections (design) for future right-of-way improvements within the Area. In 2022, the Board adopted Ordinance 22-31 which further amended the required internal roadway network to realign some roadway segments, eliminate some roadway segments and add some new roadway segments as well as provide the Board authority to approve alternative roadway sections. In 2024, the Board adopted Ordinance 2024-08, modifying the internal road within the Jenkins Road Area Plan Special District to eliminate Avenue Q between Jenkins Road and Angle Road, from the required internal road system.

The regulations adopted affect all land development in the unincorporated area of St. Lucie County which is proposed in the area lying south and west of Angle Road, North of Orange Avenue, and east of King's Highway, near the western boundary of the City of Ft. Pierce, Florida.

~~*Project Energy*~~
~~The County is involved in numerous activities to increase economic development based upon alternate energy. These activties include development of the Green Jobs Corridor and relationships with national and local organizations to generate a "green economy."~~

Green Jobs and Innovation Corridor Planning

Treasure Coast Education and Research Park
The Treasure Coast Education and Research Park (Research Park) is located between the Turnpike and Kings Highway north of Okeechobee Road. Currently anchored by the United States Department of Agriculture's 170,000-square-foot Horticultural Research Laboratory and the 90,000-square-foot University of Florida's Institute of Food and Agricultural Sciences' Research and Education Center, the Treasure Coast Education Research and Development Authority (TCERDA) Research Park is home to multi-disciplinary scientists, researchers and educators. Green jobs surrounding the Research Park can provide additional economic development and job creation in the county to reduce long commutes to employment centers in West Palm Beach and Vero Beach and increase jobs/housing balance ratios. The Treasure Coast Education and Research Park ~~Green Jobs and Innovation Corridor planning~~ can include an emphasis on land uses supportive of diversifying the local economy, promoting green jobs, encompass green technology, as well as introduce and expand industries that use or produce agricultural products in innovative ways ~~the Research Park, water management, green energy, energy conservation, building standards, landscaping and public meeting places so that the Park encompasses the most current green technology available~~.

Green District
St. Lucie County collaborated with the U.S. Department of Energy Oak Ridge National Laboratory, General Electric, the City of Fort Pierce, and other local organizations to create a model sustainable community. St. Lucie County is real-world test bed for new products sanctioned by the Oak Ridge National Laboratory in Tennessee. This is aided by St. Lucie County's US Department of Energy grant for the Solar Energy and Loan Fund for residences and businesses that further the County's desire to go green.

Specific partnerships/programs include:

- Energy Efficiency Program - work with St. Lucie County's $23 million Solar and Energy Loan Fund to help residents and business install energy efficiency upgrades
- Smart Grid Implementation - partner with the Fort Pierce Utility Authority and others to utilize energy-efficient home applications and solar and smart meters in the County's Green District
- Workforce Training Initiative - collaborate with Indian River State College (IRSC), the Green Collar Training Center, and local trade unions to prepare the workforce for the emerging green economy.
- Local Business Development - a GE pilot initiative that leverages GE's knowledge base, global network and existing business connections to assist the growth of St. Lucie County-based small businesses.

Western Lands

In 2009 – 2010, the County conducted a comprehensive Western Lands Study with the agricultural industry, landowners, and the public to identify strategies to preserve prime agricultural lands. The purpose of this study is to acquire significant public input addressing fundamental issues regarding the future land uses of approximately 200,000 acres of agricultural land. The study resulted in a sustainable plan for the County's western lands that will preserve and conserve a functioning network of agriculture, open space, and natural areas while providing economically viable options for agricultural landowners, now and in the future. The study includes an analysis of patterns of land uses that respect private property rights and provide opportunities for rural lifestyles and agricultural operations that are sustainable in terms of equity treatment for landowners, economic viability, infrastructure provision, water demand and usage, and environmental conservation. The study concluded with policy amendments to the Future Land Use Element that help to protect agricultural lands from large-scale residential development and to ensure that when development in the agricultural area occurs that it is consistent with utility needs as identified in the Infrastructure Element.

Mobility Fees

The County may evaluate and consider mobility fees based upon vehicle miles travelled in the future. These fees would support not just road construction projects, but all types of multi-modal improvements to reduce dependency on automobiles.

Historic Resources

In December 2006, the St. Lucie County Historic Preservation Ordinance was passed by the Board of County Commissioners. The Ordinance is consistent with the general-purpose goals, objectives, and policies of the Comprehensive Plan. The Ordinance includes definitions, and provisions for a Historic Preservation Trust Fund, Historic Preservation Officer, Historic Preservation Committee, and historic designation process and procedures. The Comprehensive Plan provides for a Historic future land use designation.

The Bureau of Archaeological Research within the Florida Office of Cultural and Historic Preservation maintains the Florida Master Site File (MSF), a database that contains information on archaeological and historic resources in Florida. The Florida Department of Historic Resources has jurisdiction over historic and archaeological sites if there are human remains or if a state or federal permit is requested. If a private property owner develops or redevelops their property and their property is listed on the MSF, the state historic preservation officer should be contacted for guidance.

Appendix 1-A provides a list of sites located within unincorporated St. Lucie County on the Florida Master Site File.

Sites on the National Register of Historic Places located within St. Lucie County include the following:

- Arcade Building
- Casa Caprona

- Cresthaven
- Old Fort Pierce City Hall
- Fort Pierce Old Post Office
- Fort Pierce Site #74002181
- Jules Frere House
- Captain Hammond House
- Zora Neale Hurston House
- Immokolee Also known as Dorothy Binney Palmer House
- Moore's Creek Bridge
- St. Anastasia High School
- St. Lucie High School
- St. Lucie Historic District
- Sunrise Theater

(Source: National Park Service, National Register of Historic Places, ~~2009~~2025)

Casa Caprona and the Captain Hammond House lie within unincorporated St. Lucie County. Another significant historic resource not on the Florida Master Site File or National Register of Historic Places is the Zora Neale Hurston Dust Tracks Heritage Trail.

Economic Development

This Comprehensive Plan includes an optional Economic Development Element as part of the County's overall vision for sustainability. There is need for job creation, capital investment, and economic development to strengthen and diversify the county's economy. Lands with Commercial or Industrial land use designations each make up ~~3.44%~~ 1.35% of the total land area. In order to achieve its economic development goals, St. Lucie County needs more commercial, industrial, and mixed-use development to provide for economic diversity and allow for more greater flexibility to ensure that services are available where people live to reduce vehicular miles. ~~has embraced two popular economic development tools, namely branding and cluster development.~~

~~Along with Indian River and Martin County, St. Lucie County now promotes itself as part of Florida's Research Coast. This branding highlights the region's desire to shift its image from an agricultural and tourist-based economy to an area that is invested in recruiting businesses that offer high-skilled, high-paying, long-term employment opportunities.~~

Further, St. Lucie County has created a Targeted Industry List which pinpoints the specific sectors it would like to see relocate to the area. This list is composed of manufacturing, research, and distribution sectors that complement each other and would encourage the creation of industry clusters. Cluster theory is based on the concept that businesses and research centers want to be located in close proximity to similar institutions so that they may take advantage of a skilled workforce, access to specialized higher learning institutions, and adjacency to specialized customers and suppliers. The County has demonstrated the concept with the recruitment of major life sciences institutes- such as the Torrey Pines Institute.

Treasure Coast Education, Research and Development Authority (TCERDA)

In 2001, the Treasure Coast Research Park (Research Park) was designated as a "Special District" within the Future Land Use Element of the St. Lucie County Comprehensive Plan. In 2005, the County created the Research and Education Park Overlay Zone District within the Land Development Code (LDC) to promote additional agricultural research and education occurring in the area. Together, with the State of Florida, the County assembled approximately +/-1,600 acres that originally made up the Research Park. This included a 2010 Interlocal Agreement between the County, Treasure Coast Education, Research and Development Authority, the Fort Pierce Utilities Authority, and the City of Fort

Pierce for water and wastewater service to the Research Park and deferred annexation into the City of Fort Pierce.

In 2005, the St. Lucie Board of County Commissioners and the University of Florida collectively created this agriculturally-and-biotechnologically-focused Research Park in unincorporated St. Lucie County including renewable energy and alternative fuel companies. This Research Park is governed by the Treasure Coast Education, Research and Development Authority (TCERDA), pursuant to Florida Statute Section 159, Part V, and the enabling Resolution and Ordinance of the Board of County Commissioners of St. Lucie County, Florida. It is envisioned as a home to multi-disciplinary scientists, researchers and educators.

The initial master plan called for over 350 developed acres of buildings and wet labs to house research, development and educational institutions, businesses and incubators, with an additional 700 acres for agricultural fields and for future Research Park expansion. USDA's 170,000 square foot Horticultural Research Laboratory and the 90,000 square foot University of Florida's Institute of Food and Agricultural Sciences' Research and Education Center will anchor the TCERDA's Research Park.

The County and partners sought to attract additional research facilities and companies to the Research Park to complement the ongoing activities of the Indian River Research & Education Center (“IRREC”) of the University of Florida’s Institute of Food & Agricultural Sciences (“IFAS”), the Hayslip Biological Control Research and Containment Laboratory, and the United States Department of Agriculture (“USDA”) Agricultural Research Service. All three continue to be tenants in the Research Park.

For a variety of reasons, including changes in federal research funding and the great recession, the original vision for the Research Park never materialized. In recognition of the changes, the TCERDA Board authorized County staff to hire a consultant and provide analysis and recommendations on the next steps to move the Research Park forward.

In 2018, John Rhodes of Moran, Stahl and Boyer was hired to provide a series of strategic recommendations to improve the likelihood of development in the Research Park. Three of the main strategic recommendations were to expand the allowable uses in the Research Park, sell rather than lease land and lessen the architectural rules for new buildings in the Park (the Research Park is subject to that certain Declaration of Covenants and Restrictions for Treasure Coast Education, Research and Development Park, dated February 7, 2012, and recorded March 16, 2012, in Official Records Book 3371, Page 2418, in the Public Records of St. Lucie County, Florida. The rationale for the changes was that the original list of allowed uses was very restrictive, potential developers prefer to buy rather than lease land and the design rules significantly increased the cost of development.

In 2020, amendments to the Land Development Code were processed to expand the list of allowable uses and amend the architectural requirements. Both the TCERDA Board and the Board of County Commissioners adopted these changes. Additionally, the County published a Request for Proposal (RFP) to offer the Research Park land for sale. The sole respondent to the RFP was Ashley Capital. In their response to the RFP, Ashley Capital proposed to develop and manage a Class A Light Industrial and Office Park for the purposes of economic development to provide high-wage jobs for the community. On October 15, 2024, the BOCC approved an Option Agreement with Ashley Capital to purchase 111 acres within the Treasure Coast Research and Education Park. In January 2025, the Board approved the First Amendment to the 2010 Interlocal which reduces the deferment period to allow annexation of the county-owned parcels into the City of Fort Pierce within two (2) years from the date of the amendment.

On December 14, 2022, the Board of County Commissioners approved an exchange agreement with the St. Lucie County Fire District for Quad 1A-Lot 3 for the development of a fire station. Further, on

May 5, 2026, the Board of County Commissioners approved an exchange agreement with the St. Lucie County Fire District for Quad 1A-Lot 4 for the development of a fire training facility

Sunshine Kitchen

St. Lucie County developed the Sunshine Kitchen Food Business Incubator (Sunshine Kitchen) in 2018 with a US Economic Development Administration grant within the Research Park. The Sunshine Kitchen was created as a community kitchen concept where food entrepreneurs could develop their products in a commercially equipped shared-use kitchen. The concept follows other business incubation methodologies that provide start-up businesses with management guidance, technical assistance, and relatively low-cost facilities in which the entrepreneur can develop their venture until the company is strong enough to secure its own brick-and-mortar or conventional commercial space. The Sunshine Kitchen continues to grow and serve numerous entrepreneurs, with over 100 clients currently.

The Sunshine Kitchen Food Business Incubator is a 10,000-square foot facility providing year-round, 24-hour-a- day access to users to prepare, produce, package, and market food business items, has been operating since September 2018.

~~The Sunshine Kitchen will be opening at the Treasure Coast Research Park. Located off Kings Highway in Fort Pierce, the Sunshine Kitchen will be a state-of-the-art food incubator where chefs, caters, food truck operators and more can hone their culinary skills. The 10,000-square-foot facility will provide year-round, 24-hour-a-day access for people to produce, package, and market food business items.~~

GROWTH MANAGEMENT HISTORY

The County's prior master plan, the *Growth Management Policy Plan (GMPP),* was adopted in 1981 in accordance with the Local Government Comprehensive Planning Act of 1975. That Plan provided a general guide for land use decisions in the unincorporated regions of the County. It recognized the importance of a mix of land uses and gave the County leverage, through its implementation, in determining the appropriateness of proposed land use activities on a case-by-case basis. The *GMPP* also set forth policies for a wide spectrum of environmental issues.

Population growth in St. Lucie County was explosive in the early and mid-1980's. A fault of the Growth Management Policy Plan was that it failed to provide the flexibility that was necessary to meet the demands of a rapidly growing community. This shortcoming resulted in the necessity to constantly consider major amendments that cumulatively served to denigrate the effectiveness of the entire plan.

The *St. Lucie County Comprehensive Plan* was first adopted in 1990, and it took the foundation laid by the County's original master plan *(GMPP) and* built upon it to meet the revised intent of the "Growth Policy Act," Part II, Chapter, Florida Statutes. In doing so, the following issues and concerns were acknowledged and addressed:

- Preservation, maintenance, and enhancement of the County's natural resources, including:
  - the Indian River Lagoon,
  - the North Fork of the St. Lucie River,
  - the Savannas,
  - the coastal barrier islands system,
  - isolated inland wetland systems,
  - aquifer recharge areas,
  - native upland habitat;
- Increased pressure of western development migration;

- Emergence of the I-95/Florida Turnpike corridor as a major force in future development consideration;
- Desire of the community to attract high-quality employers; and,
- Efficiency in traffic circulation associated with providing residential areas near employment hubs.

Evaluation and Appraisal Reviews (EAR)
Pursuant to Section 163.3191, Florida Statutes, at least once every seven years, each local government shall evaluate its comprehensive plan to determine if plan amendments are necessary to reflect changes in state requirements and local conditions. If amendments are deemed necessary by the local government, then they have one year to prepare and transmit amendments to the state for review.

Previous EAR-based Amendments were adopted in 2002 (finalized through a stipulated settlement agreement with DCA in 2004), ~~and~~ 2010, ~~-~~ and 2018.

CHAPTER 2

TRANSPORTATION ELEMENT

DATA, INVENTORY AND ANALYSIS

Calvin, Giordano & Associates, Inc.
EXCEPTIONAL SOLUTIONS™

TRANSPORTATION ELEMENT

DATA, INVENTORY AND ANALYSIS

INTRODUCTION

This element addresses the requirements of Section 163.3177, Florida Statutes for the development of the Transportation Element of the St. Lucie County Comprehensive Plan. The purpose of the Transportation Element is to plan for a coordinated, multi-modal transportation system for all of St. Lucie County. This element has been developed in coordination with the St. Lucie Transportation Planning Organization (TPO) plans and documentation and in consideration of the Transportation elements of the City of Ft. Pierce and Port St. Lucie Local Comprehensive Plans. This Element provides for the coordination between the Future Land Use Element of the County's Comprehensive Plan and both the short- and long-term transportation needs for St. Lucie County.

EXISTING ROADWAY CONDITIONS

Table 2-1 provides a summary of the major traffic arteries in the County and their functional classification. The roadway information identified in Table 2-1 is not intended to be inclusive of all roadways in the community. St. Lucie County, Port St. Lucie, and Fort Pierce maintain complete lists of all roadways in the county indicating their functional classification and maintenance responsibility.

Strategic Intermodal System (SIS) Facilities:

In 2003, the Strategic Intermodal System (SIS) was established through Florida legislation. The roadway portion of the SIS is composed of interconnected limited and controlled access roadways including interstate highways, Florida's Turnpike, selected urban expressways and major arterial highways. It is a statewide transportation network that provides for high-speed and high-volume traffic movement within the state. The primary functions of SIS roadways and connectors are to serve interstate and regional commerce and other long-distance trips. The system is intended to accommodate High-Occupancy Vehicles (HOVs), express bus transit and, in some corridors, passenger rail service.

It is strongly recommended by the Florida Department of Transportation (FDOT) that local governments involve the FDOT in development review process at an early stage if the proposed development impacts any SIS facility.

A list of all designated and emerging SIS facilities in St. Lucie County is shown in Table 2-2.

Table 2-2 SIS FACILITIES IN ST. LUCIE COUNTY

Facility	Designated SIS	Emerging SIS
Highway Corridors	I-95	SR 70 - West of Turnpike
	Turnpike	
	SR 70 -Turnpike to I-95	
Highway Connectors	SR 70 - I-95 to US-1	
	US-1 - SR 70 to Avenue H	
Railway Corridors	Florida East Coast Railroad (FEC)	South Central Florida Express
Waterways	Atlantic Intracoastal Waterway	
Waterway Connectors	Port of Fort Pierce Channel

Area Regional Transit (ART):

St. Lucie County offers traditional fixed-route public transit service through Area Regional Transit (ART). Additionally, ART provides paratransit services available to qualified residents that meet certain mobility needs and eligibility requirements as Transportation Disadvantaged (TD) and/or meet the criteria of the Americans with Disabilities Act (ADA). ART also offers microtransit service, which is a shared ride door-to-door transportation service and is available for residents over the age of fourteen.

The County also offers non-traditional public transportation services. ART offers a program called Direct Connect which provides trips for early morning or late hour dialysis. It also provides trips for work and education to qualified residents. This program was established to fill evening and weekend service gaps enabling the County's TD population to have access to public transportation services twenty-four hours a day, seven days per week. This program is currently full and has a waiting list. Riders who receive eligibility for work and education have access to this service for one year and then must reapply, giving way for other residents to have an opportunity to use this service.

St. Lucie County's ART also partners with Senior Resource Association (SRA) of Indian River County for the Advantage Ride Program which provides trips throughout the Treasure Coast for Individuals with Intellectual and Developmental Disabilities. The program is funded through a grant from the Florida Commission for the Transportation Disadvantaged. This service began in 2020, and St. Lucie County has been paying the grant match for this award-winning service, while SRA has been providing the service and Indian River County administering the program. This program removes county barriers and helps residents get to other counties located in the Treasure Coast. Advantage Ride provides close to 4,000 trips per month and 90% of these trips are for day training and employment.

St. Lucie County also partners with PalmTran for the Port St Lucie Express (PSLX) service. PSLX provides an express service from the Job Express Terminal located on Gatlin Blvd to downtown West Palm Beach. This service operates Monday through Friday and has two morning trips and two evening trips. Residents can utilize this service for $3 per trip by purchasing paradise passes through PalmTran's website palmtran.org/PSL-express.

Lastly, ART is partnering with Enterprise commute and South Florida Commuter Services for a commuter vanpool program. This program is designed to help employees that are transportation disadvantaged get to places of employment with their co-workers. A contract should be in place by June/July of 2025 and has already gained interest from a few manufacturing companies and large warehouses in St. Lucie County where transportation is an issue for employees.

ART's fixed route service consists of eight fixed routes. Two ART routes provide regional transit connections with Martin and Indian River Counties' transit systems. Routes 1,2,3,4,5 and 6 operate from 6 am to 8 pm Monday through Friday, and Saturday from 8am to 12pm and 1pm to 4pm. Route 7 operates from 7am to 6pm Monday through Friday only. Route 8 is an express route; it runs from 7 am to 11 am and 3 pm to 7 pm Monday-Friday only. There is no fixed-route bus service on Sundays.

- **Route 1** was initiated in 2002. Route 1 begins near Downtown Fort Pierce at the Ft. Pierce Intermodal Facility located at North 8th Street and Avenue D. This route terminates at the

Treasure Coast Mall in the Jensen Beach section of Martin County. Route 1 is the system's most heavily used bus route, and it connects with every ART bus route except Route 5.

- **Route 2** began service in 2005. Route 2 connects commercial and residential areas in North Fort Pierce with the route commencing and ending at the Ft. Pierce Intermodal Facility providing immediate connections to Routes 1, 3, 7, and 8.

- **Route 3** was implemented concurrently with Route 2, serving South Fort Pierce. Route 3 connects densely developed suburban-urban residential areas with important community shopping and governmental service centers including Walmart and the Florida Department of Health. Route 3 commences and terminates at Ft. Pierce Intermodal providing immediate connections to Route 1,2, 7 and 8.

- **Route 4** began operating in 2006 serving Port St. Lucie Boulevard and City Center areas. Route 4 serves as a transit connector for many important Port St. Lucie destinations, including Town Center, PSL Community Center and the City Hall complex. Route 4 connects Routes 1, 5, 6 and 8.

- **Route 5** commenced operations in 2009 adding fixed route bus service along SW Gatlin and SW Port St. Lucie Boulevards. Route 5 is designed to connect the rapidly developing Tradition Area with the Port St. Lucie City Hall and Community Center serving residential, municipal government, and community shopping destinations. Route 5 connects with Routes 4, 6, and 8 at the Port St. Lucie Intermodal Facility.

- **Route 6** also began operating in 2009. Route 6 connects important major activity centers along the Prima Vista Boulevard/St. Lucie West Boulevard corridor including community shopping centers, recreational areas, the St. Lucie County Library, Indian River State College, and medical services. Route 6 connects Routes 1,4, 5, and 8.

- **Route 7** begins and ends at the Ft. Pierce Intermodal Facility and extends into adjacent Indian River County providing an immediate connection to their GoLine transit system. Route 7 connects with Route 1,2,3 and 8.

- **Route 8** began in 2020 and serves as an express service between the Fort Pierce and Port Saint Lucie Intermodal Facilities traveling down 25th St. to SE Airoso Blvd. It is ART's second north south route providing access for residents to get to and from Port St. Lucie and Fort Pierce without having to take the heavily traveled Rt 1 route.

~~St. Lucie County offers traditional fixed-route public transit service through the Treasure Coast Connector (TCC). Additionally, the County provides paratransit services available to qualified residents that meet certain mobility needs and eligibility requirements as Transportation Disadvantaged (TD) and/or meet the criteria of the Americans with Disabilities Act (ADA). The fixed-route and paratransit system is operated by Community Transit, a division of the Council on Aging of St. Lucie, Inc. (COASL) under contract to the St. Lucie County Board of County Commissioners.~~

~~The County also offers non-traditional public transportation services. Mid-2017, St. Lucie County Department of Community Services began operating a demand response TD service pilot program, known as Direct Connect, providing essential and life sustaining trips during hours that regular public transit and paratransit is not in operation. Direct_Connect fills evening and weekend service gaps~~

enabling the County's TD population to have access to public transportation services twenty-four hours per day, seven days per week. Last, St. Lucie County has rolled out**Treasure Coast Connector**

The TCC bus service consists of seven fixed-routes. Two TCC routes provide regional transit connections with Martin and Indian River Counties' transit systems. Routes 1,2,3,4,5 and 6 operate from 6 am to 8 pm Monday through Friday, and Saturday from 8am to 12pm and 1pm to 4pm. Route 7 operates from 7am to 6pm Monday through Friday only. There is no fixed-route bus service on Sundays.

- **Route 1 (TCC)** was initiated in 2002. Route 1 begins near Downtown Fort Pierce at the Ft. Pierce Intermodal Facility located at North 8th Street and Avenue D. This route terminates at the Treasure Coast Mall in the Jensen Beach section of Martin County. Route 1 is the systems most heavily used bus route and it connects with every TCC bus route except Route 5.

- **Route 2** began service in 2005. Route 2 connects commercial and residential areas in North Fort Pierce with the route commencing and ending at the Ft. Pierce Intermodal Facility providing immediate connections to Routes 1, 3 and 7.

- **Route 3** was implemented concurrently with Route 2, serving South Fort Pierce. Route 3 connects densely developed suburban-urban residential areas with important community shopping and governmental service centers including Walmart and the Florida Department of Health. Route 3 commences and terminates at the Ft. Pierce Intermodal providing immediate connections to Route 1,2 and 7.

- **Route 4 (City of Port St. Lucie Trolley)** began operating in 2006 serving the downtown St. Lucie Boulevard and City Center areas. Route 4 serves as a transit connector for many important Port St. Lucie destinations, including the County Annex Building, Town Center, PSL Community Center and City Hall complex. Accordingly, the Port St. Lucie Trolley has its own unique bus stop signage and bus façades demonstrating the importance of this bus route to the City. Route 4 connects with Routes 1, 5 and 6.

- **Route 5** commenced operations in 2009 adding fixed route bus service along SW Gatlin and SW Port St. Lucie Boulevards. Route 5 is designed to connect the rapidly developing Tradition Planned Unit Development with the Port St. Lucie City Hall and Community Center serving residential, municipal government, and community shopping destinations. Route 5 connects with Routes 4 and 6 at the Port St. Lucie Intermodal Facility.

- **Route 6** also began operating in 2009. Route 6 connects important major activity centers along the Prima Vista Boulevard/St. Lucie West Boulevard corridor including community shopping centers, recreational areas, library and community resources, and medical services. Route 6 connects with Routes 1,4 and 5.

- **Route 7** is the newest TCC bus route and is a pilot service established through the Florida Department Service Development funding program. Route 7 begins and ends at the Ft. Pierce Intermodal Facility, and extends into adjacent Indian River County providing an immediate connection to their GoLine transit system. Route 7 connects with Route 1,2 and 3.

A comparison of fixed route monthly ridership for the previous fiscal years is shown in Figure 2-1.

Transit Fare Structure:

On September 1, 2017, the St. Lucie County Board of County Commissioners authorized a multi-year pilot program converting the entire county transit system to fare free eliminating the fare box on both the fixed-route bus and paratransit services. ~~The realized administrative cost savings through no longer collecting transit fares, and a FDOT Service Development Grant offsets a substantial portion of the funding requirements funding this pilot initiative.~~ ART's transit system remains fare-free. ART, along

with other transit agencies, receives formula grants that are partly based on ridership and mileage. Due to the increase in ridership of almost 155% on the fixed route system since going fare-free, the grants received federally highly outweigh the collection of fares. ART has been able to sustain a fare-free system with the increase in ridership.

Paratransit Service:

The Florida Commission for the Transportation Disadvantaged has designated St. Lucie County as the Community Transportation Coordinator (CTC) for the county service area. The CTC is responsible for coordinating and/or providing transportation services to individuals that meet the requirements of Transportation Disadvantaged (TD) as a result of age, income or a disability, where the individual cannot drive or have access to other transportation options.

In St. Lucie County, a TD demand-response, ADA compliant paratransit service is delivered through the St. Lucie County Board of County Commissioners' contract operator, ~~Community Transit~~ MV Transportation. This demand response service incorporates an origin to destination reservation system requiring qualified clients to contact ~~a Community Transit agent~~ MV Transportation at least twenty-four (24) hours in advance to schedule their requested trip. Trip reservations are accepted up to two-weeks in advance.

The ADA requires that the county's paratransit service compliment the service area's fixed-route bus system. Federal Transit Administration (FTA) guidelines stipulate this paratransit service be available to provide access to the fixed-route inside of ¾-mile from each individual bus route.

A comparison of ~~on-demand~~ paratransit monthly ridership for the previous ~~two~~ fiscal years is shown in Figure 2-2.

~~Demand Response~~

~~Beginning mid-year 2017, St. Lucie County Transit initiated a personal mobility pilot program for the transportation disadvantaged. The program, marketed as Direct Connect,~~

~~provides off-hours TD trips during the evening and early morning on weekdays and Saturday, and all-day Sunday when the county's traditional public transit is idle. Trips are provided for employment, education/job-skills training, non-emergency healthcare, and life-essential destinations such as food shopping. Transportation is delivered through third-party contractors including local taxi companies, non-ambulatory mobility providers, and the Lyft transportation network company. Direct Connect clients conduct their own trip planning and make travel arrangements directly with the county's contract providers.~~

~~Direct Connect was planned and designed to be a supplementary mobility program filling regular service gaps of the county's public transit system. Demand for this program has been extremely robust demonstrating a significant need for expanding public transit service hours and suggesting the implementation of a comprehensive transit optimization analysis. In less than one-year of operation, Direct Connect has exhausted its initial grant funding cycle expending $299,950 in travel expenses. The county transit staff is instituting measures to reduce average trip costs and is vigorously seeking additional operating funds to support this now essential transportation service.~~

~~Figure 2-3 shows monthly and cumulative Direct Connect client enrollments from May 2017 through February, 2018~~

ART-on-Demand (Microtransit):

The on-demand service began in 2019 as a pilot program with one zone and has grown to three zones, providing over 55,000 trips per year. Residents can utilize the microtransit service by downloading the app ART-on-Demand which is available on Apple and Android products or call (772) 462-1778 to register and book a reservation. Trips are provided door-to-door within each specific zone, or riders can transfer from zone to zone at one of ART's transfer location points that are strategically placed at the borders of each zone. These services are available through St. Lucie County's Transit Department and currently operated by the County's contractor, MV Transportation.

A comparison of microtransit ridership for the past eighteen months is shown in Figure 2-3.

Figure 2-3 Art-on-Demand Microtransit

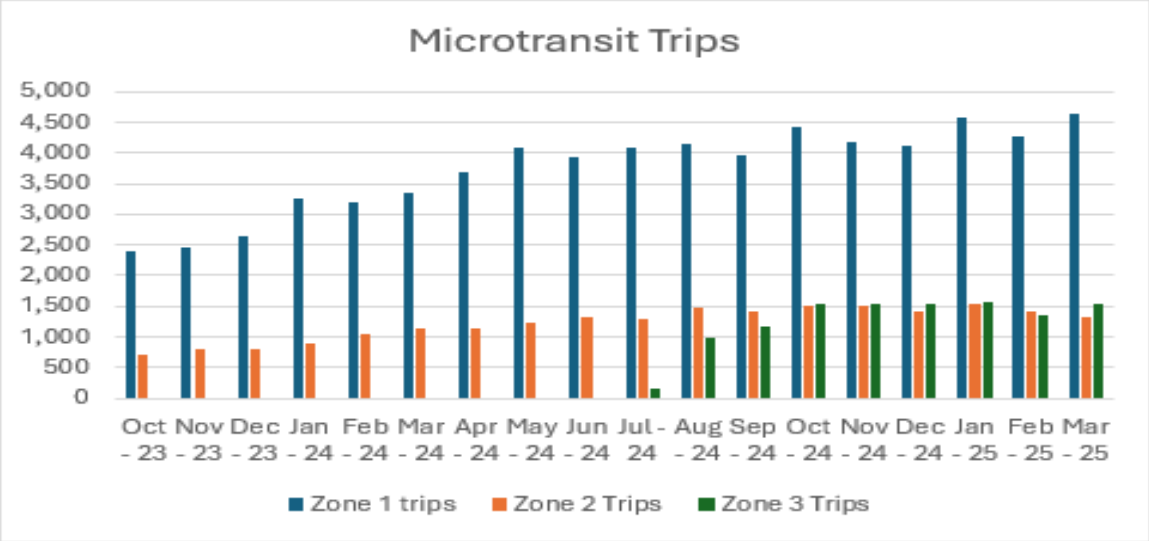

Figure 2-3 Art-on-Demand Microtransit. St. Lucie County, 2025.

Figure 2-4 Microtransit Zones:

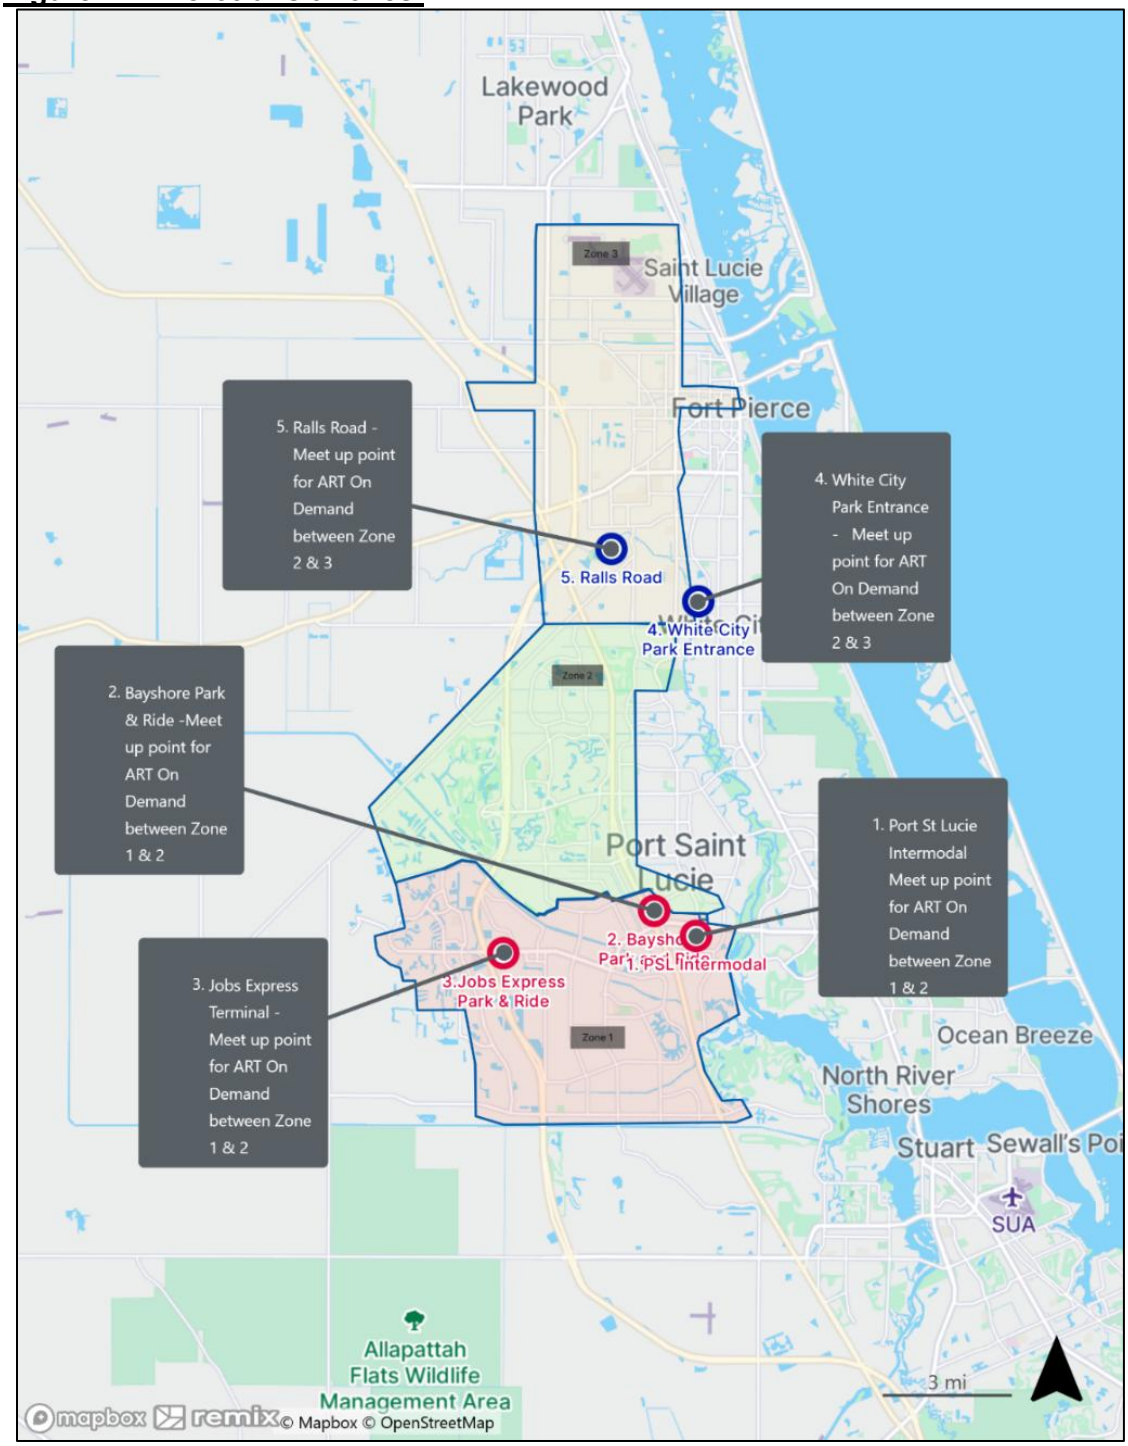

Figure 2-4 Microtransit Zones. St. Lucie County Planning and Development Services, 2025.

~~**Non-Conventional Public Transportation**~~

~~St. Lucie County, in partnership with FDOT, and the Cities of Fort Pierce and Port St. Lucie, began operating a countywide bike share early this year. The first phase of the bike share consists of nine stations supported by fifty bicycles. Stations are located at recreational destinations, including the Fort Pierce Marina Square (Figure 2-4), South Hutchinson Island and the Port St. Lucie Civic Center. Other~~

~~stations are strategically located in proximity to the county's busy bus routes to help eliminate first/last mile transit access barriers. County transit staff are currently working with state and potential private sponsors to provide a sustainable bike share system and allow for future expansion.~~

Park and Ride:

Park and ride lots are dedicated (joint use or stand-alone) locations for private automobiles for carpooling and, in some cases, transit. Table 2-4 lists the locations of park and ride lots in St. Lucie County.

Table 2-4 Locations of Park and Ride Lots in St. Lucie County

Name	Adress	City	Lot Type	# of Parking Spaces
Bayshore Blvd Park and Ride	1918 Bayshore Blvd	Port St. Lucie	General Users	64

City of Fort Pierce (City Hall Garage)	100 N US 1	Fort Pierce	General Users	Entire Garage
Fort Pierce Intermodal Center	434 N 8th Street	Fort Pierce	General Users	7

Source: St. Lucie County Planning and Development Services.

~~In addition to the existing park and ride lots described above, FDOT is in the process of constructing a regional bus terminal with a park and ride component on Gatlin Boulevard near I-95. The project, known as the Jobs Express Terminal, will accommodate multiple transit providers and will add more than 150 park and ride spaces to the County's~~ inventory

Table 2-4

Parking:

Generally, St. Lucie County has sufficient capacity of public and private parking facilities. One of the largest public parking facilities is located in downtown Ft. Pierce behind City Hall and has a capacity of 465 parking spaces.

Existing Bicycle/Pedestrian Conditions:

St. Lucie County recognizes the need for pedestrian and bicycle accommodations as an integral component of a Countywide transportation System. The development of bicycle and pedestrian facilities and the encouragement of their use serves several important purposes which benefit all the citizens of St. Lucie County.

St. Lucie County currently requires that pedestrian and bicycle accommodations be incorporated into all urban roadway construction/improvement projects. Federal and State guidelines also address the provision of bicycle and pedestrian facilities in conjunction with roadway improvement projects.

On May 6, 2008, the Board of County Commissioners adopted the St. Lucie County Bicycle, Pedestrian, Greenways & Trails Master Plan. This plan was further fortified by the ~~Go2040~~ SmartMoves 2045 Long Range Transportation Plan (LRTP) of the St. Lucie TPO, including the St. Lucie Walk-Bike Network, which inventoried all the existing sidewalks, bike paths, missing sidewalks, and identified projects to improve the system.

Through the St. Lucie Walk-Bike Network, the St. Lucie TPO seeks to prioritize funding for bicycle and pedestrian improvements that will complete missing gaps in bike lane and sidewalk networks that will serve areas of the County that experience higher bicycle and pedestrian usage. The improvements will address areas of potential safety concerns and will enhance the network around schools. In addition, FDOT funds can be used to implement bicycle and pedestrian improvements along roadways that connect to the state roadway system. The County would like to continue to work towards the implementation of the St. Lucie Walk-Bike Network. Table 2-5 contains current ~~desired sidewalk projects that are unfunded~~ list of Transportation Alternatives (TA) Projects.

Table 2-5 Transportation Alternative Projects 2023-2024

Facility	Project Limits		Project Description	Estimated Cost
	From	To		
St. Lucie TPO			Planning/administration as detailed in the Unified Planning Work Program.	$400,000
Midway Road	Glades Cut off Road	Jenkins Road	Add 2 lanes, sidewalks, bicycle lanes.	$551,860,000
Midway Road Turnpike Interchange			New interchange with southbound off-ramp and northbound off-ramp	$20,000,000
Kings Highway	Angle Road	Indrio Road	Add 2 lanes, sidewalks, bicycle lanes.	$142,162,000
Northern/Airport Connector	Florida's Turnpike	Kings Highway	New Multimodal corridor with interchanges at Florida's Turnpike and I-95	$137,110,000
Jenkins Road	Midway Road	Orange Drive	Add 2 lanes to existing segments, construct 4 lanes for new segments, and add sidewalks and bicycle lanes	$51,890,000
California Blvd	Del Rio Blvd	Crosstown Parkway		$4,760,000
St. Lucie West Blvd	Peacock Blvd	Cashmere Blvd	Add 2 lanes and multimodal paths	$22,000,000

Source: St. Lucie County TPO Amended February 7, 2024

The St. Lucie Walk-Bike Network considers both on-road facilities and off-road bicycle and pedestrian pathways. The ultimate goal is to develop an interconnected network of greenways, trails, bike lanes, and sidewalks to enhance non-motorized transportation options in St. Lucie County.

Port/Airport/Rail/Waterway:
St. Lucie County is home to the Port of Ft. Pierce and the Treasure Coast International Airport. Heavy rail freight service in the County is provided by the Florida East Coast (FEC) Railroad. The Atlantic Intracoastal Waterway passes through the eastern part of the county via the Indian River Lagoon.

Treasure Coast International Airport:
The Treasure Coast International Airport (FPR) is located north of Fort Pierce, at 3000 Curtis King Blvd. It is currently operating as a general aviation airport that serves dozens of tenants including aeronautic businesses such as aircraft maintenance, storage, and manufacturing as well as a flight training school, air taxi and charter services, medical transport, and a missionary flights operation. Users experience a well-equipped airport offering a full-service fixed-based operator with fuel services, oxygen and a restaurant. The airport also houses a U.S. Customs and Border Protection office and Aircraft Rescue & Fire Fighting Services (ARFF). The airport is also designated within Foreign Trade Zone 218. ~~several flight schools, an airplane manufacturer, and several businesses ancillary to airport and flight operations. It serves charter flights to and from the Bahamas, as well as flights throughout the continental United States. Federal Express and United Parcel Services have flight operations from here.~~

On October 4, 2024, Treasure Coast International Airport received its Part 139 Commercial Service Certification from the FAA. It is anticipated by the end of 2025 that the airport will be offering commercial passenger service, after completion of a terminal renovation and a parking lot expansion. This certification also positions the airport as a competitive player in the aviation industry, ready to meet the demands of growing air travel. With more commercial flights, residents and businesses in the Treasure Coast region will enjoy greater access to destinations, facilitating travel and commerce.

The Airport Industrial Park, just to the east of the airport, also benefits from the proximity to the airport and its services. The vast 3,844-acre airport property is owned by the St. Lucie County Board of County Commissioners (BOCC), and is managed by the County's Airport Department. ~~Because of~~ With the availability of developable airport property, a strong potential for both aviation and non-aviation related growth exists at the airport

The ~~2011~~ 2018 Master Plan Update for the Treasure Coast (fka St. Lucie County) International Airport contains a complete discussion of existing conditions, projected demand, facility requirements, and recommended alternatives and funding sources.

Residential development is normally not compatible with 65 DNL (average day/night sound level) or greater unless soundproofing is incorporated into the structure, or the community determines that this type of development is necessary in this noise environment. Future noise contours, which consider expansion of the airport facilities, show that the 65 DNL (average day/night sound level) encompasses a portion of the residential development to the east and southeast of the Airport. An FAR Part 150 Noise Compatibility Study was completed in 2005 which included a detailed noise study to specifically identify noise sensitive areas around the Airport. With an approved Part 150 Study, the FAA and FDOT may provide funding to the Airport in sponsoring noise abatement and mitigation projects such as the purchase, relocation, or soundproofing of homes, and noise abatement measures, and other noise mitigation measures.

Certain recommendations were approved including 4-mile Airport notification to residential developers requiring the disclosure of the existence of the airport and aircraft operating in the area, limitation of school development where F.S. Chapter 333 prohibits schools off the ends of runways, and noise easements and/or sound insulation for new residential development in the 60 DNL noise contour. The Airport also instituted Voluntary Noise Abatement Procedures for aircraft in consideration of residential uses south and east of the airport.

Additional issues to airport operators are wildlife hazards, tall structures, towers that may create electrical interference with radio transmissions or Navaids, and lighting or glare that could create hazard for pilots using the airport. Furthermore, as a condition of accepting grants for the Airport, the County is required to protect the Airport from incompatible development.

The County does have an Airport Overlay Zone in the Land Development Code (LDC), which helps address issues dealing with incompatible land uses. The Treasure Coast International Airport protection zones are shown in Figure 2-5.

Figure 2-5 Treasure Coast International Airport - Runway Protection Zones

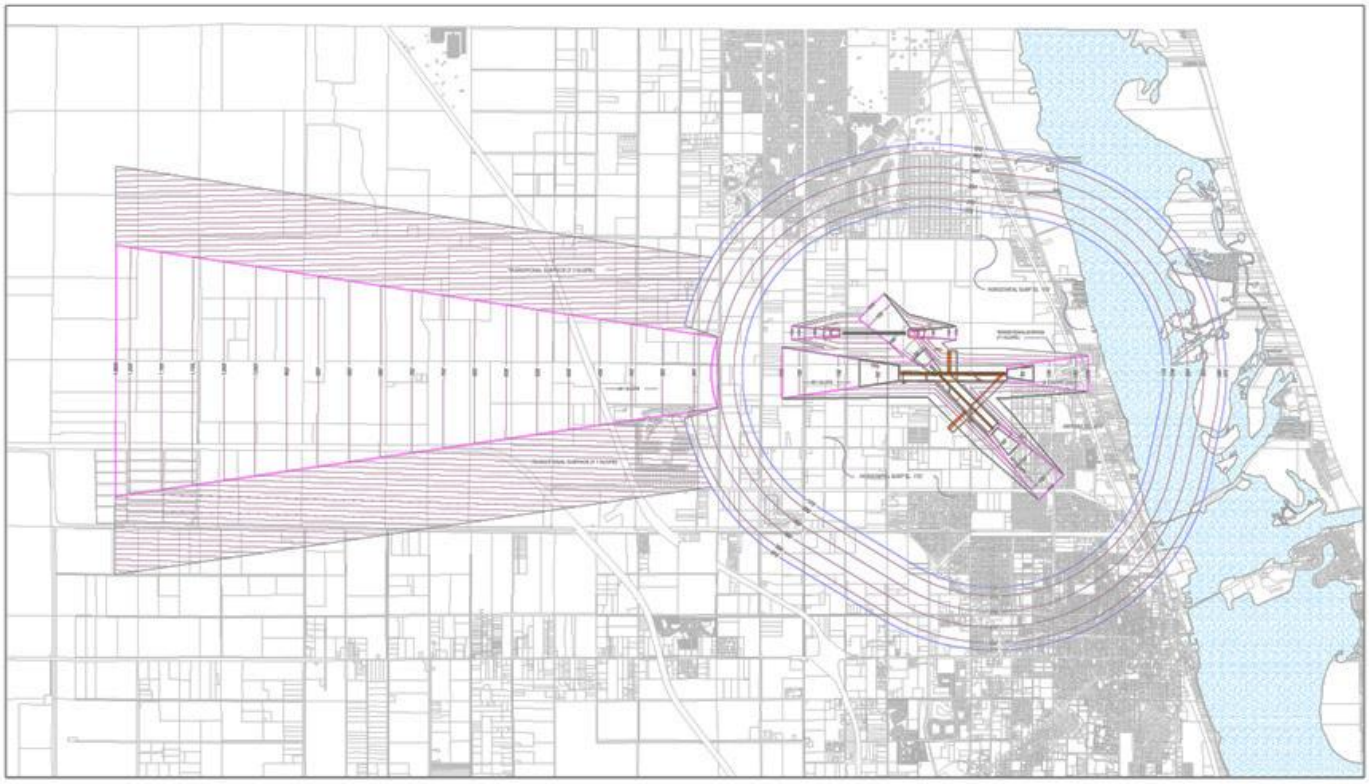

Figure 5 Treasure Coast International Airport - Runway Protection Zones. St. Lucie County Planning and Development Services Department, 2025.

Port of Ft. Pierce:

The Port of Fort Pierce, approximately 290 acres, is the region's only deep-water port. The Port of Ft. Pierce is one of Florida's 15 deepwater ports and is identified by FDOT as a Strategic Growth Seaport. The Port's shipping channel maintains an authorized U.S. Army Corps of Engineers depth of 28-feet. Much of the Port Planning Area lies within the City of Fort Pierce and the Fort Pierce Community Redevelopment Area. A small portion of the Port Planning Area lies within unincorporated St. Lucie County and development of this portion is governed by the County's Future Land Use Element, the Port Sub-element, and the County's LDC. The remaining land within the Port Planning Area is governed by the City of Fort Pierce's comprehensive plan and land development code. Both jurisdictions jointly developed and accepted the 2020 Master Plan for the Port of Fort Pierce and future development is intended to be consistent with the master plan.

~~A consolidated master plan for the Port of Fort Pierce was undertaken by FDOT, District 4, Office of Modal Development at the request of the Port of Fort Pierce and St. Lucie County. The consolidation of plans included the Port of Fort Pierce 2002 Port Master Plan, the 2012 update to the 2002 master plan~~

~~and two studies recently performed for development of the Port's Fisherman's Wharf area in 2015 and 2016.~~ In May 2020, St. Lucie County's Board of County Commissioners approved an update to the Master Plan for the Port of Fort Pierce, establishing a roadmap to achieve a diverse working waterfront. The master plan embraces new industries and opportunities aligned with the goals of expanding economic and social benefits to the citizens and businesses found in St. Lucie County and the Treasure Coast.

~~The consolidated master plan is not intended as an update to the master plan, nor does it reflect any changes to the overall vision, goals, objectives or policies of the Port. It is intended as a first step to provide a consolidated planning document for the County (Port) to use as a basis for a strategic plan for implementing the stated vision for the Port.~~

St. Lucie County owns ~~20~~ over 32 acres at the Port, including ~~and recently acquired an additional 12.3 acres,~~ the property formerly known as the "Indian River or King Terminal". Currently, Derecktor Shipyards operates a megayacht maintenance, repair, and overhaul (MRO) facility on the Indian River Terminal site. The goal of St. Lucie County for the port is to broaden and strengthen the economic base of the regional community by providing adequate infrastructure and development processes for water-dependent port development; with particular focus on a marine complex for mega yacht maintenance overall and refitting (MRO). Fisherman's Wharf, a 24.5-acre mixed use track of land, located at the southern end of the Port, is intended to act as a buffer between the industrial port area and historic downtown Fort Pierce. The idea is to transform the Fisherman's Wharf area into an economically diverse "Transition Zone" with uses that are compatible and complementary to the area.

The Port is bounded by the State Road A1A causeways on the north and the south, on the west by US 1 - State Road 5/Florida East Coast Railroad (FEC) and on the east by the Indian River Lagoon. The area can be accessed from the intersections of US 1 & Second Street, Seaway Drive at the Indian River Drive, and US 1/Ave H and Seaway Drive/Indian River Drive. The principal arteries in the region, both I-95 and the Turnpike, are easily accessible from the Port via Avenue H to U.S. Highway 1 to Virginia Avenue/SR 70 (Okeechobee Road), which together are a designated SIS Connector. Currently, the Port is not designated a SIS facility, but is identified as a Strategic Growth Seaport. The Port has on-site direct access to the Florida East Coast Railroad.

Existing Rail and Freight Conditions:

Heavy rail freight service in St. Lucie County is provided by the Florida East Coast (FEC) Railroad which serves the east coast of Florida from Jacksonville to Miami. The FEC Railroad runs through eastern Fort Pierce parallel to US 1. The FEC is a SIS-Designated Railway Corridor in St. Lucie County.

The South-Central Florida Express (SCXF) is an independent short line railroad, owned and operated by US Sugar, along Glades Cutoff Road. The SCXF provides service from southwest to northeast portions of St. Lucie County. It is designated as an Emerging SIS Railway Corridor.

Atlantic Intracoastal Waterway:

The Atlantic Intracoastal Waterway traverses the eastern edge of St. Lucie County via the Indian River Lagoon and is designated as a SIS Waterway. The Waterway is maintained by the U.S. Army Corps of Engineers and, there is one drawbridge crossing at the SR A1A access to North Hutchinson Island.

The Intracoastal Waterway serves as a means of access to the Fort Pierce Inlet for both recreational and business uses. The nearest ocean inlets north and south of the Fort Pierce Inlet are the Sebastian Inlet to the north and the St. Lucie Inlet to the south. Of these three area inlets, the Fort Pierce Inlet is generally recognized as being the safest to navigate due to limited shoaling and predictable currents.

Hurricane Evacuation:

In 2006, the Florida Legislature acted in response to the devastating hurricane seasons of 2004 and 2005 by passing House Bills 1359 and 7121 redefining the Coastal High Hazard Area (CHHA) as a means of balancing coastal protection with development and focusing on the need to improve the State's disaster response infrastructure for the purposes of effective planning and preparedness. In further support of these measures, the Florida Division of Emergency Management (FDEM) contracted with the Regional Planning Councils (RPCs) to develop the Statewide Regional Evacuation Study initiative to produce an integrated multi-regional statewide evacuation dynamic using a single methodology.

The Statewide Regional Evacuation Study Program updated their regional transportation analyses in 2016 and 2020. This study includes an evaluation of the Treasure Coast region and its ability to properly evacuate the area in response to a hurricane.

The 2021 results provided the following clearance time scenarios in Figure 6 below :

Scenario Type	Clearance Time Type	County	Evacuation Level A	Evacuation Level B	Evacuation Level C	Evacuation Level D	Evacuation Level E
2020 Base Scenario	Clearance Time to Shelter (Zone Clearance Time)	St. Lucie	12.5	12.5	13.5	14	17
2020 Base Scenario	In-County Clearance Time	St. Lucie	14.5	14.5	18	21.5	29
2020 Base Scenario	Out Of County Clearance Time	St. Lucie	14.5	14.5	18	21.5	29

Figure 6: 2021 Results from Statewide Regional Evacuation Study Program. Treasure Coast Regional Planning Council.

The In-County Clearance time for St. Lucie County, under the worst-case operational scenario in 2025~~0~~, is ~~26~~ 22 hours. The Out of County Clearance time under the worst-case operational scenario in 2025~~0~~ is ~~30~~22 hours.

Regional clearance times are considered to be a truer indication of the evacuation needs in the event that a Category 3 or high storm were to approach the Treasure Coast. The Regional Clearance time for the Treasure Coast region under the worst-case operational scenario in 2025~~0~~ is 34.5~~5~~ hours.

Level Of Service Analysis:

Level of Service (LOS) is a method of describing the operating condition of a roadway in relation to the volume of traffic using that roadway. Factors which influence level of service include the number of vehicle lanes, the number of vehicles on the roadway, speed of these vehicles, traffic interruptions, ability to maneuver freely and safely as well as the driving comfort and convenience of the public. Level of Service Standards are to be used as a guide for transportation planning purposes and to identify roadway needs and to provide a measure for determining time and type of roadway improvement.

Tables 2-6 and 2-7 shows the level of service standards for roadways in St. Lucie County.

~~**Table 2-6**~~
~~**Non-SIS Minimum Level of Service Standards for Urban and Non-Urban Roadways in St. Lucie County**~~

Facility Type	Peak Hour

Source: St. Lucie County TPO 2024 for FDOT recommended LOS.

FDOT does not adopt LOS standards, but they do have LOS targets for the State Highway System, with LOS C applying outside of urbanized areas and LOS D applying within urbanized areas.

The County wishes to maintain a LOS D or better for all non-SIS roadways but recognizes that allowing a LOS E for non-state arterial roadways allows development to proceed while a minimum of LOS D might cause severe constraints on private development. Therefore, the County has adopted a minimum LOS E for all non-state arterial roadways. However, a LOS D will be utilized for all non-state arterial roadways when establishing transportation impact/multimodal fees.

Existing Level of Service Analysis:

St. Lucie County and FDOT collect the traffic counts on the state and major roadways within the county. Table 2-8 shows the most recent generalized peak hour traffic volumes and level of service conditions for the County's roadway network based on the minimum levels of service standards identified in Tables 2-6 and 2-7.

Source: Traffic Counts and Level of Service Report 2025. St. Lucie Transportation Planning Organization, June 20, 2025.

Roadway Improvement Strategies:
The County works to secure federal and state funding to ensure that the adopted level-of-service standards are achieved and maintained.

Impact/Multimodal Fees:
The County's primary funding source for capacity adding projects, such as new road construction and lane addition improvements, is transportation impact fees/multimodal fees. To develop a transportation fee, the County uses a systemwide approach, including demand/travel, costs and credits associated with county and state roads within the county. This approach is appropriate since the county and state roads jointly provide regional access as well as connecting neighborhoods to other areas. State and county roads that are parallel to each other alleviate traffic by providing travel options. County roads tend to play a greater role in connecting neighborhoods to state roads, which then provide a higher level of regional access.

Transportation Regional Incentive Program (TRIP)
The Transportation Regional Incentive Program (TRIP) was enacted by the Florida Statues through Senate Bill 360 in 2005. To encourage regional planning and improvements of regional facilities, the State matches funds with regional partners. To meet the requirements of TRIP funding, the local authorities have to enter into an interlocal agreement and need to develop a regional plan. The St. Lucie TPO along with the Martin and Indian River MPOs entered into an interlocal agreement in April 2006. As with the new legislation, new regional transportation projects may be eligible for TRIP if they meet the regional needs identified in the ~~2040~~ SmartMoves 2045 Treasure Coast Regional LRTP.

Transportation Demand Management (TDM)
TDM strategies and techniques can be used to increase the efficiency of the transportation system. Demand management focuses on ways of influencing the amount and demand for transportation by encouraging alternatives to the single-occupant automobile and by altering peak hour travel demand. These strategies and techniques include: ridesharing programs, flexible work hours, telecommuting, shuttle services, and parking management. TDM also is effective at lower residential densities than are required for most public transit and pedestrian and bicycle programs TDM/TSM projects could replace a widening project.

Transportation System Management (TSM)
TSM means improving roads, intersections, and other related facilities to make the existing transportation system operate more efficiently.

Congestion Management Process (CMP)
Congestion Management Processes are required by all MPOs in the state of Florida. The objective of a CMP is to develop processes for short- and long-term solutions for congested corridors utilizing a wide range of strategies. The most recent St. Lucie TPO CMP was developed in ~~2018~~2024 and includes an Implementation Plan that identifies the CMP strategies and projects for the County.

Backlogged Facilities/ Constrained Corridors
The St. Lucie TPO has identified U.S. Highway 1 as a constrained corridor~~s~~ where additional lanes are not feasible. The ~~Go~~2040 SmartMoves 2045 LRTP includes the US-1 Corridor Retrofit Project that involves a context sensitive approach to develop strategic alternatives to roadway widening.

Proportionate Fair Share~~:~~
As required by Section 163.3180, F.S., the County also provides for binding agreements for proportionate share contributions of required improvements from proposed development. The proportionate-share contribution is calculated based upon the number of trips from the proposed

development expected to reach roadways during the peak hour from the stage or phase being approved, divided by the change in the peak hour maximum service volume of roadways resulting from construction of an improvement necessary to maintain or achieve the adopted level of service, multiplied by the construction cost, at the time of development payment, of the improvement necessary to maintain or achieve the adopted level of service. St. Lucie County has adopted a Proportionate Fair Share Ordinance which requires new developments to mitigate its project impacts if the roadway's projected capacity is lower than the adopted LOS.

Energy Conservation and Reduction of Greenhouse Gas Emissions
Greenhouse gas emissions can be reduced by minimizing the number of vehicles on the roadway and the time spent on the roadway. Effective strategies to reduce greenhouse gas emissions include increased transit ridership, more efficient roadways, and promoting transportation by walking and bicycling.

Strategies such as TDM and TSM can effectively increase the efficiency of the County roadways. Congested roadways and the time vehicles spend idling at intersections greatly increase the production of greenhouse gases into the environment. The implementation of the St. Lucie Advanced Transportation Management System (ATMS) can provide a great benefit to the reduction of greenhouse gases by minimizing the number of vehicle stops.

The County intends to promote multi-modal transportation through the means of new sidewalks, bicycle lanes, and greenways as outlined in the St. Lucie Walk-Bike Network, which identifies gaps and missing links in the network, and demand for bicycle and pedestrian facilities.

Mobility Fee
St. Lucie County may consider implementing a mobility fee to encourage in-fill development in urbanized areas. A mobility fee is "a charge on all new development to provide mitigation for its impact on the transportation system. However, a mobility fee is not a substitute for site related improvements for safety, access and internal circulation, which may still be required under local Land Development Code."

Future Conditions:

Capital Improvement Projects
The Capital Improvement Element identifies funded and partially projects for St. Lucie County for the next 5 years.

~~Go2040~~ SmartMoves 2045 Long Range Transportation Plan
~~Go2040~~ SmartMoves 2045 is the LRTP prepared by the St. Lucie TPO. ~~Go2040~~ The SmartMoves 2045 LRTP is intended to guide the investment in multimodal transportation options and identify projects to be completed over the next 25 years. It includes a vision and goals and answers the following questions:

- Where do people live, work, and play now?
- Where will people be living, working, and playing in 204~~0~~5?
- How does the community want the transportation system to function in 204~~0~~5 to accommodate current and future development needs?
- What transportation options will be needed, such as transit, bicycle, pedestrian, trails or roads, and which are the most important in 204~~0~~5?
- How will these transportation options be paid for?
- What are the keys to successful implementation of the ~~Go2040~~SmartMoves 2045 LRTP?

The ~~Go2040~~ SmartMoves 2045 LRTP is a comprehensive, multimodal "blueprint" aimed at meeting the transportation needs of the TPO planning area, including the incorporated cities of Port St. Lucie, Fort Pierce, and St. Lucie Village.

As a multimodal transportation plan, SmartMoves 2045 ~~Go2040~~ considers not only needed road improvements, but also public transportation, bicycle, pedestrian, freight, and other transportation projects. SmartMoves 2045 ~~Go2040~~ relies heavily on input from the public to help identify and prioritize multimodal transportation projects in the development of the plan. Additionally, SmartMoves 2045 ~~Go2040~~:

- Recognizes the tie between land use and transportation.
- Supports the economic development goals of the local communities.
- Supports regional coordination and collaboration.
- Places emphasis on maintenance and preservation of the existing transportation system.
- Looks to provide safe, convenient, and accessible transportation options for all.
- Analyzes and weighs the potential social, economic, and environmental impacts and benefits of the plan.
- Is consistent with all applicable federal and State planning requirements.
- Is a performance-based plan establishing metrics to monitor and evaluate the SmartMoves 2045 ~~Go2040~~ goals and objectives.
- Provides a fiscally-constrained financial plan to meet future transportation needs through 204~~0~~45.

Development of the SmartMoves 2045 ~~Go2040~~ LRTP

The term "SmartMoves" is representative of all modes of transportation, such as pedestrians, bicyclists, transit riders, and motorists including automated, connected, electric, and shared-use (ACES) vehicle concepts. ACES vehicles are expected to make travel safer and more efficient, but most importantly, greatly improve mobility.

The growth of population and employment in the TPO area over the next 25 years is forecasted connecting the land use and development trends with the vision for the TPO area. Areas of high growth will have an impact on the future transportation needs. The future transportation projects to meet the travel needs are identified transportation projects are developed for improving quality of life and future economic development. Included in the development of the plan is an assessment of:

- Future travel demand estimated using the Treasure Coast Regional Planning Model
- St. Lucie Walk/Bike Network
- Bus service improvements in the form of expanded hours, more frequent service, and new bus routes
- Freight and goods movement
- Transportation related safety and security improvements
- Roadway congestion measures that do not require additional lanes

The plan also includes an assessment of the potential impacts transportation projects could have on the environment and established communities. In addition, an assessment of the costs of these needs is completed using standardized costs and other information available from more detailed project specific studies.

North St. Lucie County Roadway Needs Assessment

St. Lucie County has adopted the Towns, Villages and Countryside Element. Table 2-9 shows transportation capital improvements that are needed to facilitate ultimate build-out of the TVC plan.

Cost Feasible Roadway Projects:

Table 2-11 contains the Cost Feasible projects identified in the SmartMoves 2045 ~~Go 2040~~ LRTP. They are based on the results of analyses of financial alternatives and the consideration of factors, including technical criteria, policy input, citizen input, and available financial resources as summarized in the plan

Table 2-11A ~~2045 Cost Feasible Plan Projects~~ Multi-Modal Cost Feasibility Plan Projects 2026-2045

~~Map Identifier~~	~~On Street~~	~~From~~	~~To~~	~~Improvement*~~	~~Project Source~~	~~Total Cost (YOE)~~

Future Level of Service Analysis:

The 2040 Future Level of Service Analysis is provided on Table 2-12. The 2040 AADT determined from the cost feasible roadway network was multiplied by the appropriate “K” and “D” factor to derive the peak hour, peak direction roadway volume and LOS. This data is from St. Lucie TPO Go2040 LRTP. The St. Lucie TPO SmartMoves 2045 LRTP dd not include an update to the future LOS analysis.

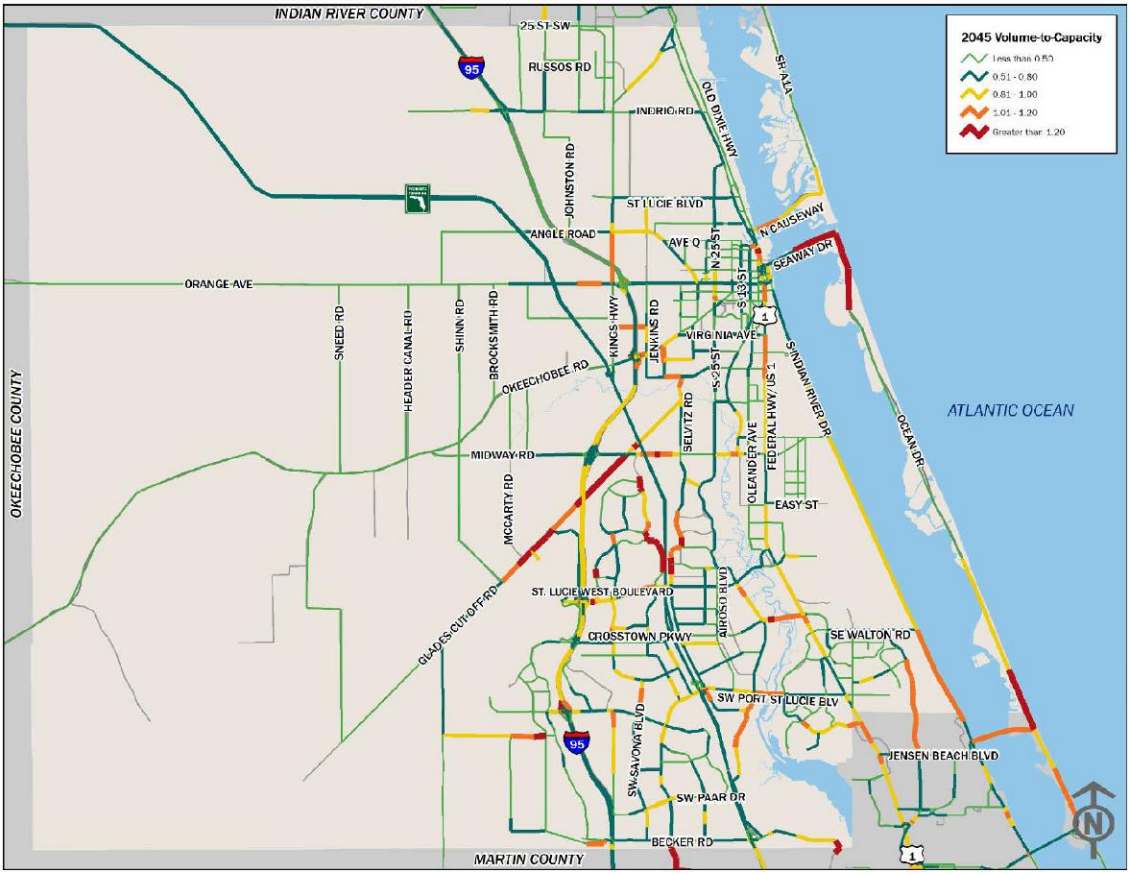
The SmartMoves 2045 LRTP included a volume-to-capacity (V/C) ratios examination to identify roadway deficiencies resulting from the growth in travel demand model projections over the 25-year period. V/C ratios greater than 0.9 were considered to be deficient and V/C ratios above 1.0 indicate congested conditions and delays. Deficient roadways are candidates for potential roadway improvements or indicators that parallel network improvements are essential. The level of service (LOS) D was utilized when estimating the V /C ratio. The following figure from the SmartMoves 2045 LRTP illustrates the 2045 traffic demand projections with the capacity of LOS D.



The Towns, Villages and Countryside (TVC) Area Traffic Study:
St. Lucie County has adopted the Towns, Villages and Countryside Element as well as the development review requirements for the TVC area. The TVC area starts from east of the Turnpike to west of Kings Highway in the northern part of the county. A long term transportation analysis prepared in 2006 evaluated the roadway capacities and identified the required improvements to support the transportation infrastructure to meet the needs of proposed land uses.

The traffic analysis showed that the roadways will be operating at an acceptable level of service with the land use changes and related roadway improvements in future conditions. The study used the Treasure Coast Regional Planning Model (TCRPM) which also accounted for internal capture. In the study, the future TCRPM travel demand model was revised and additional Traffic Analysis Zone (TAZ) socioeconomic data was included to reflect future 2030 and 2050 conditions. The following roadways within the TVC area were identified as deficient roadways in 2030 conditions without improvements:

- CR 603/ Johnston Road from 25th Street to SR 614/ Indrio Road
- SR 713/ Kings Highway from US-1 to Angle Road
- SR 614/ Indrio Road from I-95 to CR 603/ Johnston Road
- Immokolee Road from CR 607/ Emerson Avenue to SR 713/ Kings Highway
- SR 608/ St. Lucie Boulevard from SR 713/ Kings Highway to CR 611

To address the deficiencies in the Year 2030, two new flyovers at I-95 north and south of Indrio Road were identified. Other roadway improvements identified for the 2050 conditions are listed below:

- New Connector Road from Emerson Road to I-95
- New Connector Road from I-95 to Florida Turnpike
- New Interchange at I-95 and New Connector Road
- New Interchange at Florida Turnpike and New Connector Road

The future travel demand model was run with the above proposed roadway improvements for future analysis in the study area and it was illustrated that all the deficient roadways will be operating within capacity.

Transit:
The St. Lucie County Transit Development Plan ~~FY 2015-FY2024~~ 2020-2029 was ~~adopted in August 2014~~ completed and adopted in 2019. This was a major update of St. Lucie County's 10-Year Transit Development Plan (TDP), branded "Bus Plus", and was initiated by St. Lucie County and the St. Lucie Transportation Planning Organization (TPO). The Bus Plus plan represents the community's vision and goals for public transportation, resulting in an implementation plan for actions to be taken through 2029. ~~A variety of transit projects have been initiated since that time including:~~

The four goals established as part of the TDP process are listed below with their associated objectives and are consistent with the community's vision and priorities regarding transit in the County.

1. A high-quality transit service that provides a high level of service and convenience.
    - Increase the number of one-way, fixed-route passenger trips by an average of five percent annually.
    - Maintain service reliability and on-time performance.
    - Develop a system-wide performance monitoring program
    - Form partnerships with public and private entities to develop innovative services, technology programs, and pilot projects.
    - Improve accessibility to transit services and facilities.

2. A financially-efficient and affordable transit service.
    - Maintain cost efficiencies and financial stability.
    - Identify and evaluate additional opportunities to enhance revenues.
3. Widespread knowledge and awareness of the transit system through marketing and education efforts.
    - Achieve regional and local support of transit initiatives.
    - Implement a marketing plan.
4. Transit-supportive land use and policies.
    - Review/update local development codes to enhance the ability to fund and develop new transit options in growing areas.

~~1. Fort Pierce Intermodal Center and Port St. Lucie Community Center bus interconnection facilities;~~
~~2. Extended weekday and Saturday service fixed route operating hours;~~
~~3. Route 7 Lakewood Park bus route interconnection with Indian River County Go-Lines.~~
~~4. Two-year fare free pilot program eliminating the fare box for the county's fixed route and paratransit bus services;~~
~~5. Delivery of a supplementary demand response off-hours TD pilot program providing evening and early morning weekday and Saturday, and all-day Sunday service; and~~
~~6. A countywide bike share providing enhanced access to the fixed-route bus system.~~

~~New service development initiatives are planned for FY18-FY20 including:~~

~~1. Route One improved frequency to thirty-minutes;~~
~~2. New Ft. Pierce/Port St. Lucie north-south express service; and~~
~~3. Port St. Lucie Flex-Microtransit demonstration for the GDC area.~~

~~St. Lucie County Transit and the St. Lucie TPO are currently preparing a major update to the county Transit Development Plan (TDP) with a programmed summer, 2019 completion target. This TDP major update comes at an important crossroad for the county public transit system for the following reasons:~~

~~1. Demand for public transit service has grown significantly. County transit ridership has more than doubled since the last TDP major update dramatically exceeding county population growth for the same time period;~~
~~2. New technological and transit operating systems are being deployed nationwide, including smart mobile device trip reservation and vehicle routing systems, enabling public transit agencies to deliver improved cost-effective and comprehensive mobility strategies;~~
~~3. Electric and Autonomous transit vehicles are now entering the public transportation ecosystem;~~
~~4. Changing public mobility preferences shifting from private vehicle ownership to transportation services; and~~
~~5. Transit agencies are required to identify new revenue sources as the federal government seeks to decrease its share of financial support for public transit as transit agencies work to expand the types of mobility services they deliver.~~

Figure 2-6 shows the ~~concept transit network~~ Area Regional Transit (ART) overall system and Fort Pierce Freebee Service Area.

Figure 2-6~~Concept Transit Network~~ ART Overall System and Fort Pierce Freebee Service Area

Paratransit Alternatives

In addition to the ~~alternatives relating to the expansion of the~~ fixed route services, ~~the TDP~~ Area Regional Transit (ART) also provides on-demand microtransit services and federally mandated complementary paratransit service to those eligible, as required by the Americans with Disabilities Act (ADA). Identified two alternatives for the paratransit services. ~~The two paratransit service alternatives are the "General Public Dial A Ride" and "Ride Request."~~

Advantage Ride

Funded by the State of Florida, Advantage Ride is a local and regional service that provides safe, reliable, and accessible services for individuals with intellectual or development disabilities. Those who are interested fill out a form that prompts staff to contact the individual to complete an applicant. Currently, those who qualify for the service can travel anywhere in Indian River, Martin, St. Lucie, or Okeechobee counties if the ride originates or ends in St. Lucie County.

Transportation Disadvantaged Paratransit

St. Lucie County is the designated CTC and is responsible for coordinating and/or providing transportation to individuals eligible under the Florida Transportation Disadvantaged (TD) program due to age, income, disability, or lack of access to other transportation options. TD service connects qualified individuals to medical, employment, educational, nutritional, or other life-sustaining trips.

Direct Connect

The Direct Connect program was developed in 2016 to help fixed-route and paratransit riders get to and from jobs, college classes, or medical appointments when fixed-route and paratransit services are not available, such as in early mornings, evenings, and weekends. To qualify for Direct Connect service, applicants must first be TD as defined in the Transportation Disadvantaged Service Plan and be 18 years or older.

~~General Public Dial A Ride~~

~~This alternative would devote all resources to providing door to door services to anyone who requests a ride. The advantage of this alternative is that it targets those individuals who want to use the transit system. The main disadvantage is that it is significantly more expensive that a fixed route cost per passenger trip. Additionally, since no trip request can be denied, the associated cost could be difficult to control as demand increases.~~

~~Ride Request~~

~~This alternative allows the public to request a ride to a local van stationed in a specific geographical zone. The customer can request a trip to a destination within the zone or a trip to a connecting point with a regional fixed route. The van operator can then negotiate a pickup and drop off time with the customer based on demand. The advantage of this alternative is that it can extend transit services into areas where there is not a fixed bus route, and it can bring in more customers to the regional transit network. The disadvantage of this alternative is that similarly to the "General Public Dial A Ride" alternative, this service can be expensive.~~

CHAPTER 3

HOUSING ELEMENT

DATA, INVENTORY AND ANALYSIS

Calvin, Giordano & Associates, Inc.
EXCEPTIONAL SOLUTIONS™

HOUSING ELEMENT

DATA INVENTORY AND ANALYSIS

Purpose

Florida's growth management statues require the inclusion of a housing element as part of a local government's comprehensive plan. The purpose of this element, as set forth in Section 163.3177(6)(f),~~Local governments are required to prepare and adopt a Housing Element consistent with the provisions of Chapter 163, Part III of the~~ Florida Statutes (F.S.),. ~~The purpose of the Housing Element~~ is to provide principles, guidelines, standards, and strategies to address issues as the following.

- Providing for housing for all current and anticipated future residents
- Providing for adequate sites for future housing, including affordable workforce housing
- Creating and preserving affordable housing
- Eliminating substandard housing conditions
- Increase supply and diversity of housing units (distribution of housing for a range of incomes and types, including mobile and manufactured homes)
- Improve housing affordability

~~guidance for development of appropriate plans and policies to meet identified or projected deficits in the supply of housing for moderate income, low income and very low income households, group homes, foster care facilities, and households with special housing needs, including rural and farmworker housing~~. These plans and policies address government activities, as well as provide direction and assistance to the efforts of the private sector.

~~To that end, this~~ This E~~e~~lement presents an overview of the existing and projected future conditions pertinent to the preparation of the housing goals, objectives and policies for the County's Comprehensive Plan. The best available data for unincorporated St. Lucie County was obtained from the U.S. Census Bureau, and the Florida Housing Data Clearinghouse (FHDC), maintained by the Shimberg Center for Housing Studies. Where appropriate, ~~these~~ this data ~~were~~ was supplemented by research into additional sources and local knowledge.

Population

The County Comprehensive Plan must be based on at least the minimum amount of land required to accommodate the medium projections as published by the Office of Economic and Demographic Research for at least a 10-year and 20-year planning period**.** The current total population estimate for St. Lucie County is 385,746, with 80,340 within the unincorporated county and distributed between the municipalities as follows:

Table 3-1 Population Estimates

Places	Population Estimate April 1, 2024	Population Change 2020- 2024	Census County April 1, 2020
St. Lucie County	385,746	56,520	329,226
Fort Pierce	50,823	3,526	47,297
Port St. Lucie	253,959	49,108	204,851
St. Lucie Village	624	11	613
Unincorporated	80,340	3,875	76,465

Source: 2024 Bureau of Economic and Business Research Florida Estimates of Population 2024

By 2035, the St. Lucie County population is projected to grow from 385,746 (4/1/2024) to 456,800 (2035). This equates to a change in population of 71,054 over 11 years or an 18.4% increase. In 2045, the County's population is projected to be 508,800 which would be a 123,054 or 31.9% increase since 2024.

Table 3-2 Population Projections 2024-2050

Place	2024**	2025	2030	2035	2040	2045	2050
St. Lucie County	385,746	385,400	423,900	456,800	484,200	508,800	530,700
St. Lucie-Unincorporated*	80,340	78,755	80,459	81,432	81,740	81,285	80,592

Source: 2023 Bureau of Economic and Business Research Population Projections. (medium projections)
**2024 Bureau of Economic and Business Research - Florida Estimates of Population 2024 - April 1, 2024, Population Estimate,

Based upon the existing vacant land inventory in the Future Land Use Element Data and Analysis 178,195 people can be accomodated by future development over and above the existing population based on current future land use designations with 2.53 average household size based on the April 1, 2024 BEBR number of households and average household size in Florida.

St. Lucie County Housing Overview

~~In the years since the end of the Great Recession, St. Lucie County made great strides in the provision of new housing, increasing the number of dwelling units by more than 23 percent since 2009, according to information obtained from the Shimberg Center's FHDC. The diversity of housing types has expanded as well, with the share of multifamily housing increasing by 3.75 percent – in particular, multifamily buildings containing between 5 and 9 units, and those with 20 or more units.~~

When considering population in a region, analysis can determine what type of housing will be more likey needed in a 10-year and 20-year planning horizon. Table 3-3 shows St. Lucie County has 35% of its population between the ages of 25 to 54 years old. Within this demographic 25 to 35 years old are typically first time home buyers and they represent 11% of the County's population. They are looking for affordability and purchase smaller properties that are considered starter homes. The population aged 45 to 54 years old typically are looking to upgrade their housing and want bigger property and can afford a larger property. 21.9% of the County's population are aged 65 to 74 years old. This demographic tends to downsize their property as they are retiring and do not need or want to maintain a larger property. Looking at the data, it is understood that the county will need to diversify its housing options.

Table 3-3 Age Cohort Percentages of County Population

Age of County Population	St. Lucie County % of Population	Unincorporated St. Lucie % of Population
Under 5 Years	4.91%	2.90%
5 to 9 Years	4.98%	3.32%
10 to 14 Years	6.17%	4.48%
15 to 19 Years	5.58%	3.36%
20 to 24 Years	5.20%	4.33%
25 to 34 Years	11.43%	8.44%
35 to 44 Years	11.26%	8.16%
45 to 54 Years	11.98%	9.83%
55 to 59 Years	7.00%	7.41%
60 to 64 Years	7.07%	10.05%
65 to 74 Years	13.32%	19.81%
75 to 84 Years	8.60%	13.60%
85 Years and Over	2.43%	4.31%

Source: U.S. Census ACS 2022 5-Year Estimate DP05

Table 3-4 shows that the majority (70%) of the housing in St. Lucie County is detached single family residences.

Table 3-4 Types of Housing Units in St Lucie County

Units in Structure	St. Lucie County	% of Housing
1-Unit, Detached	105,617	70.40%
1-Unit, Attached	4,471	2.98%
2 Units	3,322	2.21%

Boat, RV, Van, Etc.	131	0.09%
Total Housing Units	**150,054**	**100%**

Source: Census ACS 2022 5-Year Estimate DP04

In 2022, St. Lucie County and the Cities of Fort Pierce and Port St. Lucie partnered to conduct a Housing Needs Assessment to develop a full understanding of the dynamics of the local and regional housing market and to develop a flexible long-term community housing plan with specific goals and objectives to address identified local and regional housing needs. In June 2024, the Board of County Commissioners accepted the Final Housing Needs Assessment and Implementation Plan, prepared by the consulting firm Thomas P. Miller and Associates (TPMA). The TPMA Housing Needs Assessment and Implementation Plan report is incorporated herein as referenced.

The three goals and top-level strategies identified in the plan are the following:

Goal 1: Regional governments have appropriate capacity, coordination, and resources to support housing initiatives

- Strategy 1.1: Ensure collaborative environment across jurisdictions throughout the county
- Strategy 1.2: Review the capacity of existing housing staff and departments to manage

and grow housing services and strategies
- Strategy 1.3: Commit resources to housing services and strategies
- Strategy 1.4: Advocate for changes to state-level housing strategies

Goal 2: Increased supply and diversity of housing units
- Strategy 2.1: Utilize overlay districts to incentivize targeted types of residential development
- Strategy 2.2: Prioritize middle- and high-density development
- Strategy 2.3: Expand permissions for smaller housing types
- Strategy 2.4: Activate small-scale developers
- Strategy 2.5: Increase supply of rental opportunities

Goal 3: Improved Housing Affordability
- Strategy 3.1: Implement Inclusionary Zoning
- Strategy 3.2: Promote public-private partnerships to provide workforce housing
- Strategy 3.3: Maintain existing affordable housing

This report notes that "St. Lucie County, Fort Pierce, and Port St. Lucie are experiencing dramatic growth, driving up demand for housing in the area. Port St. Lucie, the largest population center in the county, showed 4.13% year-over-year growth in 2022, its fourth consecutive year over 3% YoY growth."

"Since 2010, St. Lucie County's senior population has grown by nearly 25,000, from just over 55,000 to almost 80,000. Moreover, seniors represent a larger share of the total population. In 2022, seniors accounted for 23% of the total population. By 2050, this is expected to have grown to 27%. Likely, this will present specific needs for the County's housing stock moving forward…"

"A diverse housing mix is vital for the health and sustainability of a local economy. Whether a region is suburban or rural, affluent or low-income, a housing supply that meets a variety of needs for residents and workforce creates stability for the businesses and services that support the community. The housing life cycle is broken down into 6 stages, which provides a community and its residents the flexibility and mobility necessary to meet the needs of residents with varying incomes, lifestyles, and needs." This is depicted in below in Figure 1, from the Housing Life Cycle, in the Final Housing Needs Assessment and Implementation Plan.

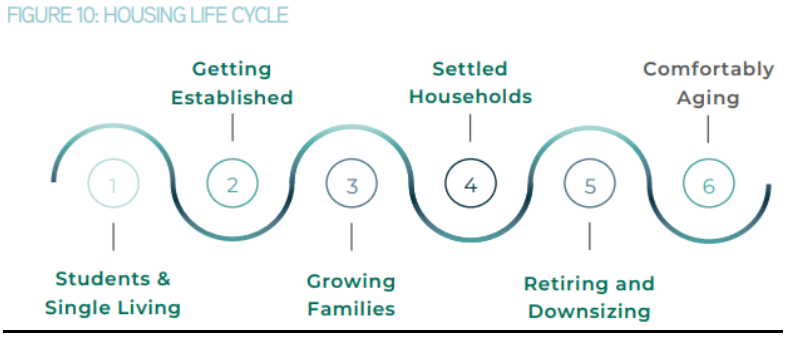

Figure 1: Figure 10 from the June 4, 2024 Housing Needs Assessment and Implementation Plan

Table 3.5- Housing Life Cycle

1. "Students and Single Living" Entry-level households		
Single or couples in their early 20s	No children, often living with roommates	Prefer inexpensive apartments
2. "Getting Established"- First-time homebuyers and move-up renters		
Often married or cohabitating couples; mid-20s to mid-30s	Some households include children	Purchase modestly priced single-family homes or relocate to upscale rental properties
3. "Growing Families" - Move-up homebuyers		
Mostly married or cohabitating families; late 30s through 40s	Many households include children	Often purchase newer, larger, and more expensive homes from previous stage
4. "Settled Households" - Mature families, emerging empty-nesters, and never-nesters		
Typically couples in their 50s and 60s	Couples whose children have left home or couples/individuals who never had children	Many prefer owning their homes, but some consider renting at this point. Prefer lower-maintenance
5. "Retiring and Downsizing" - Empty-nesters and younger independent seniors		
Typically couples and individuals in their late 60s and 70s	Couples and individuals who are able to live without significant health or lifestyle constraints	Many still prefer owning their homes, but are increasingly moving to low-maintenance options. Increasing preference for rental options
6. "Comfortably Aging" - Older seniors		
Increasing number of individuals living alone who are in their mid-70s or older	Higher percentage of females at this stage due to shorter life expectancy for males	Higher likelihood of the need to leave a single-family home due to health constraints or desire for very low-maintenance housing PAGE

Source: St. Lucie County Housing Needs Assessment and Implementation Plan.

"Ultimately, St. Lucie County offers limited options to residents across a number of these housing life cycle stages. For example, a combination of high purchase price and the prevalence of single-family detached homes limits much of the available housing stock to "growing families" and "settled households" from the table above. Younger residents who are looking for housing (those households represented above by "students and single living" and "getting established") are largely unable to find suitable accommodations for the needs of their household. St. Lucie County would benefit from the prioritization of different kinds of housing units that meet a wider variety of needs. In fact, the needs of residents at earlier and later stages of the housing life cycle can often be met with similar unit types. For example, expanding permissions for duplexes and smaller single-family homes can present new options for first-time homebuyers, downsizing seniors, and renters alike."

Data from the ~~U.S. Bureau of the Census~~ FDHC indicates that the overall homeownership rate in the County has ~~actually dropped from 75~~ increased to 77.1 percent in 2022 ACS 5-year estimates ~~2009, to 69.6 percent in 2016~~ . Ownership among occupied dwellings~~, however,~~ remains high at ~~81.5~~ 80.4 percent. But many households in the County, both homeowners and renters, struggle to cover their monthly housing expenses. These households spend 30 percent or more of their income

on rent or mortgage costs. In ~~2016~~ 2022, ~~34~~ 27.7 percent of unincorporated County households paid more than 30 percent for housing; ~~18~~ 14.2 percent of those households actually spent 50 percent or more for housing-related expenses.

At the same time, housing costs in unincorporated St. Lucie County have continued to increase during the past decade, with incomes not always keeping pace. Information from the Florida Department of Revenue shows ~~that~~ the average sales price for a single family home in ~~2016~~ 2022 was ~~$211,412~~ $423,904, with the median sales price at ~~$160,000~~ $336,119 (compared to ~~$105,000 in 2010~~ $160,000 in 2016). For condominiums, the median sales price in ~~2016~~ 2022 was ~~$235,000~~ $465,682 (compared to ~~$219,000 in 2010~~ $235,000 in 2016). The gross median monthly rent paid by renters for the same year was ~~$1,024~~ $1,363, compared to ~~$621~~ $1,024 in ~~2009~~ 2016. More than 33 percent of renter households in the County pay more between ~~$1,000~~ $1,707 and ~~$1,500~~ $2,062 per month in rent.

According to the National Low-Income Housing Coalition's (NLIHC) [1] ~~2018~~ 2024 *Out of Reach* report, renters working at minimum wage in the State of Florida need to work at least ~~104~~ 101 hours to be able to afford a 2-bedroom rental home in the state. ~~This ranks Florida as the state with the 16th widest housing/income gap~~. Florida represents the 10th highest housing wage.

In St. Lucie County specifically, renters need to earn a wage of ~~between~~ approximately ~~$17.88/hr and $28.27/hr~~ $30.25/hr in order to afford a modest 2-bedroom house. These housing wages for a two-bedroom home are ~~$10.63~~ $17.25 higher than the federal minimum wage of ~~$7.25~~ $13.00, and ~~$11.39~~ $7.07 higher than the estimated average hourly wage of ~~$16.88~~ $23.18 earned by renters nationwide. The report's information is derived on the U.S. Department of Housing and Urban Development's (HUD) Small Area Fair Market Rents (FMRs) and the U.S. Census ~~2012-2016~~ 2018-2022 American Community Survey (ACS).

Foreclosures and Affordable Housing

According to RealtyTrac data, as of ~~March 2018~~ October 2024 there were ~~785~~ 376 foreclosed properties in St. Lucie County available for sale. This represents less than 1% of residential units in the County. ~~a rate of one (1) foreclosure per every 1,664 units – a drastic drop since 2009, when the rate reached one per every 69 units, ranking the County 1st in foreclosure filings in the state. During the post-Great Recession years, foreclosed homes provided a source of affordable housing for St. Lucie County residents. According to reports filed with the U.S. Housing and Urban Development Department (HUD) Exchange (https://bit.ly/2s15wHx), in 2011, the County received approximately $1.95 million through the Neighborhood Stabilization Program, Round 3 Grantees (NSP3) to purchase of foreclosed homes for resale to St. Lucie County residents. Between 2011 and the grant project end date (2014), NSP3 funds were used to purchase, rehabilitate, and resell (to qualified homebuyers) homes in neighborhoods such as Lakewood Park, Indian River Estates, and River Park~~.

Housing Programs

The St. Lucie County Housing Division administers state and federal housing programs to preserve, maintain, and create affordable housing opportunities for very low to moderate (30%-120%) of the

[1] The National Low-Income Housing Coalition's (NLIHC) is a national non-profit dedicated to achieving socially just public policy that assures people with the lowest incomes can have affordable and decent homes. Every year, NLIHC publishes a report entitled *Out of Reach*, which documents the gap between renters' wages and the cost of rental housing. The report's Housing Wage is the hourly wage a full-time worker must earn to afford a modest rental home without spending more than 30% of his or her income on housing costs. It is based on HUD's Fair Market Rent (FMR), which is an estimate of what a family moving today can expect to pay for a modest rental home in the area. *Out of Reach* reports the housing gap at the state level; the online tool of NLIHC allows to dig into the research at the zip code level.

Area Median Income (AMI)) ~~income~~ of households. Yearly allocations of funding from the State Housing Initiative Partnership Program and HOME Investment Partnerships Program are relied on to provide services. The Housing Division actively seeks competitive grants in order to leverage its funding and expand its programs.

State Housing Initiative Partnership (SHIP) Program

SHIP funding is allocated to all 67 counties and ~~53~~ 55 cities in the State of Florida by the Florida Housing Finance Corporation. In the County Owner-Occupied Housing Rehabilitation and Demolition/New Construction are the most utilized strategies funded by the program. This is due to the age of the existing housing stock within unincorporated St. Lucie County and number of very low to moderate income households living in these units. Beginning with the FY 2009/2010 allocation, through 2021-2022 SHIP funding was drastically reduced ~~to $106,259 in comparison to the prior year's allocation of $731,610. Funding has continued to be distributed at a reduced amount at an average of $248,252 per allocation.~~ or not funded. Between 2009/2010-2021/2022, SHIP funding was drastically reduced or not funded by the Florida legislature. In 2021, Florida entitlement communities saw the return of SHIP annual allocations. St. Lucie County received an allocation of $892,601 in FY 2023-2024.

HOME Investment Partnerships Program

In 2007, St. Lucie, Martin, and Indian River counties joined forces to form the Treasure Coast HOME Consortium in an effort to bring much needed funding to residents within the unincorporated areas of their counties. Funding from HOME is allocated on a yearly basis by the U.S. Department of Housing and Urban Development (HUD). Individually, each jurisdiction does not have the population to receive direct funding from HUD. Collectively the Consortium meets the requirements and thus is awarded funding which is divided among each county based on population. St. Lucie County is the lead agency and is responsible for the administrative duties required by HUD. ~~Funding for the program was at its highest in FFY 2009 in the amount of $714,720 compared to the most recent allocation of $440,401 for FFY 2017. Programs funded utilizing HOME include Housing Rehabilitation, Purchase Assistance, and Tenant Based Rental Assistance~~.

Owner-Occupied Housing Rehabilitation provides assistance to eligible households to address repairs that pose a risk to the homeowner's health and safety or affect the ability of the homeowner to adequately utilize their home for basic day to day living. Examples of eligible repairs include but are not limited to the replacement of roofs, windows, HVAC systems, septic systems, wells, appliances and the repair of plumbing and electrical systems. Mitigating the home against future storm damage it also tied into the program.

Demolition/New Construction is considered when the cost to rehabilitate the property exceeds the value of the home. Newly built homes are constructed of concrete block and include features such as energy saving appliances and HVAC systems, hip roofs, impact resistant and energy efficient windows, and higher R-rated insulation.

Purchase Assistance provides eligible new homebuyers with the down payment and closing costs needed to purchase a home.

Tenant Based Rental Assistance (TBRA) assists eligible households at or below 50% of AMI to afford rental housing in the form of a rental subsidy. The subsidy assists the tenant with the difference between the monthly rent and 30% of the household's gross monthly income. Recipients of TBRA are encouraged to participate in programs offered by the Community Services Department that promote self-sufficiency and encourage self-reliance.

The Towns, Villages, and Countryside Element which provides for a new community in northern

St. Lucie County includes provisions for workforce housing: Per Policy 11.1.4.7, the TVC area is required to include 8 percent of the proposed number of residential units as workforce housing. Policy 11.1.4.9 provides that the affordability of workforce housing shall be maintained for a minimum of 8 years, or the period of affordability specified by the funding secured by the developer, whichever is longer.

HOUSING INVENTORY

The ~~2010~~ 2022 U.S. Census, the U.S. Census Bureau's American Community Survey and the latest datasets from the Shimberg Center for Housing Studies' Florida Housing Data Clearinghouse (FHDC) have been used to generate most of the following comparative characteristics between St. Lucie County's unincorporated area and the County as a whole. At the present time, this is the best available information for a detailed analysis of housing characteristics. ~~In order to ensure that affordable housing needs can be properly programmed and accounted for, the County may want to review housing data and inventory again after 2020 U.S. Census data is made available~~.

Housing Type: Residential use is a major development characteristic of St. Lucie County. The ~~2010 U.S. Census~~ 2022 ACS 5-year estimate reports a total of ~~137,029~~ 150,054 housing units in the County as a whole. Of that number, ~~44,795 (or 32.70 percent)~~ 45,133 (or 30.1 percent) were counted in unincorporated St. Lucie County ~~that year~~. This would represent an increase of ~~7,980~~ 338 units~~, or 21.68~~ which is less than one percent, since ~~2000~~ 2010.

~~The U.S. Census Bureau's 2012-2016 American Community Survey (ACS) 5-Year Estimates put the total number of housing units in the whole County at 137,649 with 45,382 of those in unincorporated St. Lucie County. as of July 2016.~~

GIS data indicates there are approximately ~~14,727~~ 20,436 acres that had an existing residential land use. This represents ~~5.23~~ 7.65 percent of unincorporated St. Lucie County's total land area of ~~281,873~~ 267,155.97 acres.

A review of the ~~2012-2016~~ 2018-2022 ACS, Selected Housing Characteristics, indicates ~~that approximately~~ ~~25.7~~ 24.2 percent (~~11,640~~ 10,966 units) of housing units in unincorporated St. Lucie County were multi-family (2 or more), while single-family homes made up ~~53.4~~ 56.5 percent (~~24,235~~ 25,501 units) of the housing stock. A total of ~~9,424~~ 8,535 mobile homes (or ~~20.8~~ 18.9 percent) were identified in the same dataset. These figures indicate a gradual declining trend in the number of mobile homes in the unincorporated portion of the County, as well as the County as a whole. The number of multifamily units has ~~increased~~ decreased by 5.7 since 2016. ~~particularly in the higher unit-count per structure range. In unincorporated St. Lucie County, the number of structures with 20 or more dwelling units is 59.8 percent of the total of such units in the County as a whole~~. A breakdown of dwelling units and the percentage of housing inventory by type of unit are shown in Table ~~3-1~~ 3.6

Housing Tenure: Housing tenure refers to the occupancy of a unit, which can either be owner-occupied or renter-occupied. The Shimberg Center for Housing Studies estimates that ~~81.46~~ 80.4 percent of all occupied housing units in unincorporated St. Lucie County were owner-occupied in ~~2016~~ 2022. (Statewide, Florida's homeowner occupancy rate is ~~64.8~~ 66.9 percent.) The remaining ~~18.54~~ 19.6 percent of unincorporated St. Lucie County's occupied units were renter-occupied. Housing tenure characteristics are detailed in Table 3-~~2~~7.

~~**Table 3-2**~~

Housing Vacancy: Table 3-~~3~~8 shows the housing vacancy characteristics for St. Lucie County as

reported in the ~~2010 U.S. Census~~ 2022 ACS (5-year estimate). At the time ~~of the Census~~, ~~13,024~~ 11,921 housing units in unincorporated St. Lucie County were vacant. This represents a vacancy rate of ~~28.70~~ 26.4 percent, which is statistically higher than the overall St. Lucie County rate of ~~20.7~~ 15.7 percent. This high vacancy rate is largely attributed to the area's seasonal residents. If units which had been rented or sold that were awaiting occupancy and units held for occasional/seasonal use were eliminated from this figure, the vacancy rate drops to ~~10.64~~ 4.8 percent as shown in Table ~~3-~~3-8.

Monthly Housing Rent: Table 3-510 compares the monthly gross rents for specified renter-occupied housing units in St. Lucie County for the years 2011-2015 2018-2022. Countywide, the gross median rent paid by households during that period was $993 $1,363 per month, compared to a statewide median rent of $1,002 $1,444 per month. The 2012-2016 ACS figures indicate that the median cost to rent in St. Lucie County (at $1,024) continues to increase.

In St. Lucie County and the surrounding metro area (Port St. Lucie MSA), the HUD Fair Market Rent in FY 2018 2024, representing rent for a typical modest apartment, was $786 $1,278 for a studio apartment, $825 $1,286 for a one-bedroom, $1,032 $1,573 for a two-bedroom, $1444 $2,175 for a three- bedroom, and 1,776 $2,433 for a four-bedroom unit. These prices are high compared to the national averages, being more expensive than 94% of other Fair Market Rent (FMR) areas. The Port St. Lucie FMR area is also more expensive than 83% of the state of Florida.

Housing Value: Based on figures derived from the St. Lucie County Property Appraiser, the average just value (fair market value) for a single family home in unincorporated St. Lucie County in 2016 2022 was $143,210 $336,119, which is a little bit more is lower than the countywide average ($142,827) (396,761). Statewide, the average value of a single family home in Florida in 2016 2022 was $219,681 $401,990. Condominiums also had a higher value in the unincorporated area of the County. In 2016 2022, the average value of condominiums in unincorporated St. Lucie was $198,785 $396,761, compared with the County average condominium value of $149,074 $284,585. Table 3-611 shows the of owner-occupied housing units in unincorporated St. Lucie County as summarized in the 2011-2015 2018-2022 ACS data provided by FHDC.

AFFORDABLE HOUSING NEEDS

Cost Burden: Cost-burdened households pay more than 30 percent of income for rent or mortgage costs. Using household information extrapolated from estimates and projections by the Shimberg Center for Housing Studies, and available through the Florida Housing Data Clearinghouse, the amount of income paid for housing is delineated below by tenure for ~~2016~~ 2022. The data indicates ~~11,161~~ 9,059 owner-occupied and renter-occupied households in unincorporated whereas in St. Lucie County – about ~~34~~ 27.7 percent – paid more than 30 percent of income for housing in ~~2016~~ 2022. This is ~~an increase~~ a decrease of ~~nearly~~ ~~9~~ seven (7) percent in the share of cost-burdened households since ~~2007~~ 2016. Of the total cost-burdened households, almost ~~18~~ 14 percent spend 50 percent or more of their income on housing-related costs.

As Table 3-914 indicates, households in unincorporated St. Lucie County share comparable cost burden rates as residents countywide.

Household Income: In Table 3-015, household income is measured as a percentage of the median income for the County or area, adjusted for family size. In St. Lucie County, the HUD-estimated median income for a family of four in 2017 2023 is $58,000 $87,800. Of the 32,903 33,212 households in unincorporated St. Lucie County in 2016 2022, 7,899 6,106 or 24 18.4 percent were households that were both cost-burdened and in the low or very-low income bracket. More than 8 5 percent of those households that carry a housing cost burden of 50 percent or more make 30 50 percent or less of Area Median Income (AMI).

Elderly Households: According to the same profile developed by the Shimberg Center, ~~16,637~~ 45,318 households (~~50.1~~ 37.0 percent) in ~~unincorporated~~ St. Lucie County were headed by a person age 65 or older in ~~2016~~ 2022. ~~In comparison, 30.1 percent of households statewide were headed by elderly persons. In unincorporated St. Lucie County, 15,311 (92 percent) of elderly households own their homes, while 5,054 (30 percent) of elderly households pay more than 30 percent of income for rent or mortgage costs.~~

HOUSING CONDITIONS

Substandard Housing: Individual housing units may be considered substandard if the unit lacks complete plumbing for exclusive use of the residents, lack of complete kitchen facilities, lack of central heating, and overcrowding. Table 3-~~1~~16 contains a summary of the measures of substandard housing conditions for St. Lucie County according to the FHDC county profile that summarizes data from the ~~2011-2015~~ 2018-2022 American Community Survey. In ~~2015~~ 2022, ~~the~~ 2 percent of units ~~that could be~~ were considered overcrowded in ~~unincorporated~~ St. Lucie County ~~was not statistically significant, but 1.6 percent of all units lacked complete plumbing facilities (more than the County as a whole).~~

Mobile Homes: Mobile home parks, lodging and recreational vehicle parks, and recreational camps are licensed annually by the Department of Health in accordance with Chapter 64E-15, Florida Administrative Code (F.A.C.), rules. The county health departments provide direct services in the operational aspect of the program through routine inspections, plan reviews, educational programs, and enforcement actions.

The following table lists all the licensed mobile home parks in the County.

Table 3-~~14~~19

Farmworker Housing The FHDC does not have recent data available on the need for farmworker units for unincorporated St. Lucie County.

Historically Significant Housing: Section 163.3177(f), F.S. requires local housing elements to provide an inventory of historically significant housing listed on the Florida Master Site File, National Register of Historic Places, or designated as historically significant by a local ordinance. Three historic homes on the National Register of Historic Places lie in unincorporated St. Lucie County: Casa Caprona, the Captain Hammond House, and the Dorothy Binney Palmer House on

Immokolee. There are 14 other potentially eligible residential structures located in unincorporated St. Lucie County which are listed in the Florida Master Site File. Appendix 1 A in the Future Land Use Element shows structures including residences in the Florida Master Site File.

NEEDS ASSESSMENT

Population Projections: Section 163.3177(f), F.S. requires that the principles, guidelines, standards and strategies of the housing element must be based on data and analysis prepared on housing needs. Projections for unincorporated St. Lucie County are detailed below, based on data available from the Shimberg Center's FHDC. By 2035, the St. Lucie County population is projected to grow from 385,746 (4/1/2024) to 456,800 (2035). This equates to a change in population of 71,054 over 11 years or an 18.4% increase. By 2050, St. Lucie County's population is projected to grow from 385,746 to 530,700. That equates to a change in population of 144,954 over 26 years or a 37.57% increase. ~~Overall, the data indicate modest growth of approximately 5.9 percent between 2020-2040 2025-2050.~~ Most of the projected growth occurs at top of the age pyramid (those 75 years old and up). ~~Extrapolating from the estimated 2016 average household size for unincorporated St. Lucie County (1.98), we can estimate a need for approximately 2,658 additional housing units by 2040 to serve the additional projected permanent and institutional population.~~

Based on the United Way 2025 State of ALICE (which stands for *Asset Limited, Income Constrained, Employed*) Report, households that earn more than the Federal Poverty Level, but less than the basic cost of living for the county (the ALICE Threshold) can't afford the essentials, such as housing, childcare, food, transportation, health care, technology, and taxes . As of 2023, 72,887 households (50%) were below the ALICE Threshold in St. Lucie County, as depicted below in Figure 2.

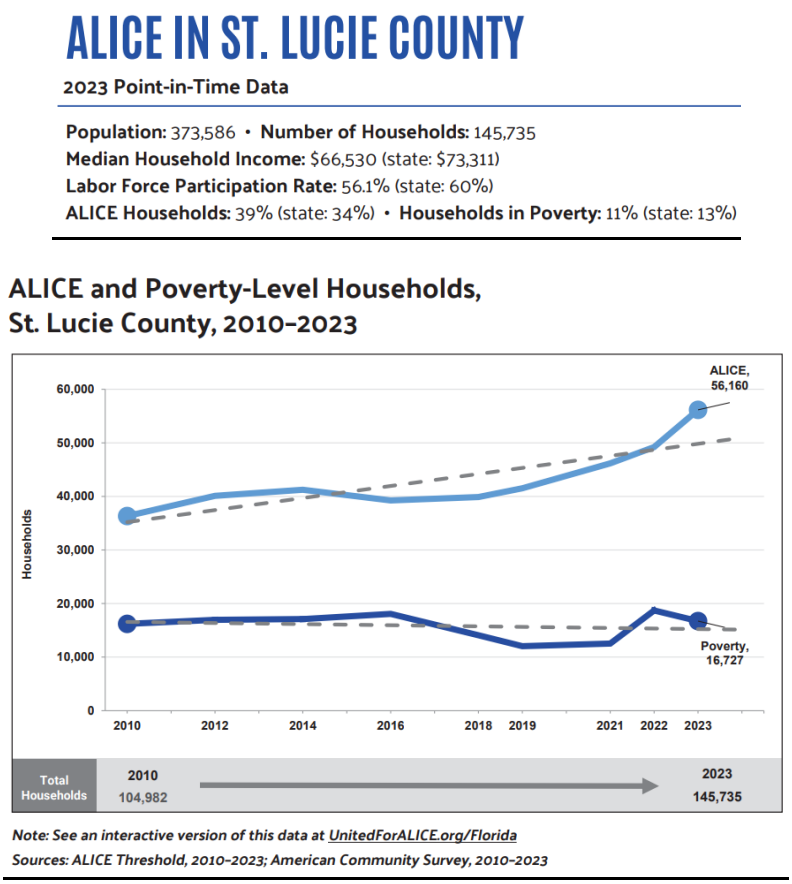

Figure 2 ALICE Threshold for St Lucie County, 2025.

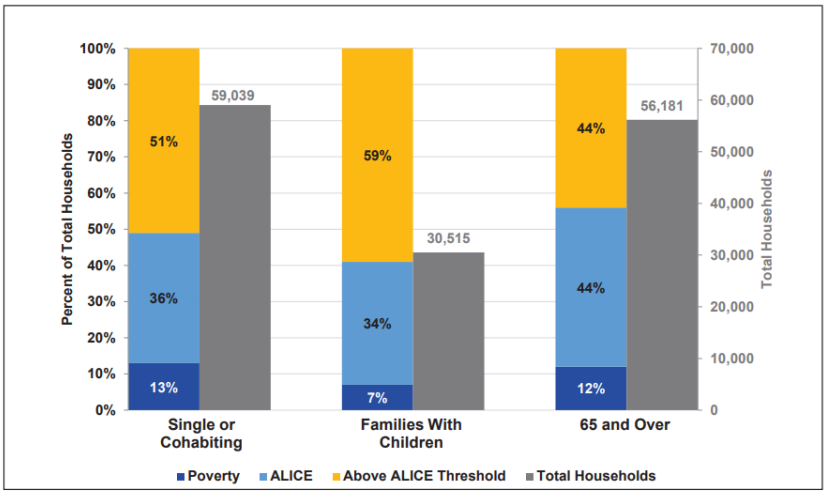
Household Financial Status by Household Type, St. Lucie County, 2023



Note: Families with children include married-parent, single-female-headed, and single-male-headed households.
Sources: ALICE Threshold, 2023; American Community Survey, 2023

Figure 3 ALICE Threshold, 2023.

~~These projections indicate that 2,867 (48 percent) of the additional 5,989 households projected through 2040 will have an income that is 80 percent or less of the area median income.~~

The following tables detail the number of households that are projected to be both cost-burdened and make less than 80 percent of the area median income for the short term (~~2040~~ 2030) and long term (~~2040~~ 2050) planning timeframes, by tenure. In ~~2020~~ 2030 ~~7,628~~ 8,203 households (~~22.3~~ 24.0 percent) could fall into this category. By ~~2040~~ 2050, the number of households that are both cost-burdened and make less than 80 percent of the area median income jumps to ~~9,129~~ 8,376, ~~or 23.5~~ 24.3 percent of all households.

At 50% or More Cost Burden	2,288	194	65	-

Conclusion

While the County acknowledges the need for affordable housing, challenges persist in the effort to increase available units. ~~This is mainly due to a lack of financial resources stemming from slow recovery of the economic recession and the reduction of funding from federal and state resources.~~ The County will continue to utilize its existing funding and partnerships while exploring innovative ways to create opportunities and incentives for affordable housing development.

INFRASTRUCTURE ELEMENT

DATA, INVENTORY AND ANALYSIS

Calvin, Giordano & Associates, Inc.
EXCEPTIONAL SOLUTIONS™

Calvin, Giordano & Associates, Inc.
EXCEPTIONAL SOLUTIONS™

INFRASTRUCTURE ELEMENT

DATA INVENTORY AND ANALYSIS

Purpose

The purpose of the Infrastructure Element is to provide for necessary public facilities and services correlated to future land use designations. This element addresses general utilities which are provided by or managed by the County. These include:

- Potable Water
- Solid Waste
- Drainage and Natural Groundwater Recharge
- Sanitary Sewer

POTABLE WATER SUBELEMENT

Introduction

The Potable Water Sub element provides a summary of existing potable water supplies and treatment facilities in St. Lucie County. These facilities include municipal regional systems and area or development - specific systems, in addition to systems for individual residences. Portions of the unincorporated county area, including the North County, Central County, North Hutchinson Island and the County Airport are currently serviced through County owned treatment plants and distribution infrastructure. A bulk water agreement is in place with the Fort Pierce Utilities Authority (FPUA) to provide water to St. Lucie County Utilities (SLCU) which is served in portions of the County's service area. FPUA also serves customers within its retail service area. The Port St. Lucie Utility Systems Department provides service in the southeast portion of the County within their designated service area. The majority of the residential supply within the unincorporated county is provided by private wells, and treatment systems. The needs for the County's future are discussed, with goals, objectives and policies focusing on specific activities which will remedy those needs.

Existing Planning Documents

St. Lucie County ~~completed the Water and Wastewater Capital Improvement Plan in June 2016 and is anticipating completion of the 10~~ adopted a 20-Year Water Supply Facilities Work Plan in ~~September 2018~~ January 2022, which ~~will serve~~ serves as the overall planning documents for potable water facilities. The two (2) major municipalities within the County, Fort Pierce and Port St. Lucie, have regionalized potable water treatment and distribution systems.

St. Lucie County Utilities (SLCU) is currently developing a regional water treatment and distribution system to serve unincorporated areas of the County service area. North County Regional Water Treatment Plant (2MGD Taylor Dairy Site) is currently at 100% planned with a Construction Manager at Risk (CMAR) contract for 100% construction. Construction is scheduled to be complete in Q4 2026 with the plant being fully operational in Q1 2027. This plant will serve the Indrio Road Corridor, the TCR Airport and surrounding areas.

Holiday Pines Wastewater Treatment Plant (Holiday Pines site) was recently expanded to accept an additional 300,000 gallons per day (GPD). It currently has a capacity of 600,000 GPD. This plant is in the procurement stage for further design to increase capacity to 1.2MGD. This will be a traditional design-bid-build contract. This expansion will serve the Indrio Road Corridor, the TCR Airport and surrounding areas.

Central County Regional Water Treatment Plant (2 MGD Peacock Site) is currently at 60% of plans as part of a Progressive Design Build (PDB) contract. Long lead-time items have been purchased with one well drilled. Construction is scheduled to be completed in Q4 2026 with the plant being fully operational in Q1 2027. This plant will serve areas west of Rangeline Road, including the Oak Ridge Ranches (ORR) communities.

Central County Regional Wastewater Treatment Plant/Water Reclamation Facility (WRF) (2MGD Tropicana Site) is being expanded as part of a PDB contract. There is an existing industrial plant on the site, and it is being modified to accept 0.5MGD of domestic waste. Further, an adjacent 2MGD plant for domestic use only is being designed with plans currently at 60%. This plant will serve areas west of Range line Road, including the Oak Ridge Ranches (ORR) communities. ~~The City of Fort Pierce completed a master plan update for water and wastewater in September 2006. The Fort Pierce Utility Authority completed its Water Supply Facility Work Plan in December 2007 and the City of Port St. Lucie completed theirs in November 2007.~~

Geographic Service Area
Figure 2-1 in the Water Supply Facilities Work Plan outlines general areas of potable water service for the major regional facilities now operating in the County. The major regional facilities supplying unincorporated St. Lucie County are:

- St. Lucie County Utilities (SLCU)
- Fort Pierce Utilities Authority (FPUA)

Regional Facilities

St. Lucie County Water and Sewer District In July 1999, SLCU acquired the Holiday Pines Service Corporation. The service area for the St. Lucie County Water and Sewer District includes the Holiday Pines subdivision and some commercial and residential areas fronting Kings Highway and Indrio Road, as well as North Hutchinson Island. In August 2005, the North Hutchinson Island Utility District, Airport Utility District, North County (Holiday Pines) Utility District, Mid County District, Indian River Estates Municipal Services Benefit Unit (MSBU) District and H.E.W. Utility District were consolidated into the St. Lucie County Water and Sewer District. In 2017 the South Hutchinson Island Wastewater service area became a part of the St. Lucie County Water and Sewer District.

SLCU owns and operates a water treatment plant with a permitted ~~capacity~~ allocation of ~~0.288~~ 6.82 MGD (Holiday Pines WTP). ~~Average daily flow at this facility in 2017 was 0.105 MGD. Plans are currently underway to increase the Holiday Pines WTP capacity to 0.8 MGD.~~ There are three water supply projects that will increase potable water capacity in the County.

- North County WTP, 2.00 MGD RO (2026-2027) and expansion by 2.00 – 4.00 MGD (2028-2040). This WTP may eventually replace Holiday Pines WTP.
- Central County WTP, 2.00 MDG RO (2026-2027) and expansion by 2.00 – 4.00 MDG (2028-2040) to 4.00-6.00 MGD.

- ~~Central County WRF, 2.00 MGD WRF (2026-2027) and expansion by 2.00 – 4.00 MGD (2028-2037) to a total of 4.0 – 6.00 MGD.~~

North Hutchinson Island: In 1991, SLCU acquired the Bryn Mawr and North Hutchinson Island Water and Wastewater Utilities and expanded them to form a regional water and wastewater utility serving all of North Hutchinson Island. The North Hutchinson Utility District purchases potable water from FPUA and resells the water to its customers on North Hutchinson Island.

SLCU offers potable water to North Hutchinson Island from North A1A / Little Jim Bridge north to the County line.

South Hutchinson Island: SLCU owns and operates a 1.6 MGD water reclamation facility on SHI to serve the properties within the SLCU service area. Potable water service for this area is provided by FPUA.

***Fort Pierce Utilities Authority*:** The Fort Pierce Utilities Authority, (FPUA) maintains a ~~twenty (20)~~ 23.32 million gallon per day (MGD) potable water treatment plant referred to as the Henry A. Gahn Water Treatment Plant (WTP) located on 25th Street in Fort Pierce. This facility consists of two separate WTPs, one lime-softening and one reverse osmosis (RO), with a combined permitted ~~capacity~~ allocation of ~~18.99~~ 21.13 MGD. Raw water is obtained from several municipal wellfields consisting of both surficial aquifer and Floridan aquifer wells and is processed for potable water use at the WTP.

~~In 1999, the FPUA announced plans to complete a 4.0 MGD RO expansion to the existing facility, bringing the total plant capacity to 25.2 MGD. An additional 2.0 MGD filter system in the future will increase the permitted treatment capacity to 27.2 MGD.~~ The production capacity of this facility is presently permitted ~~17.9~~ 23.32 MGD by the South Florida Water Management District water use permit. ~~The first phase of expansion occurred in late 2000, with future expansion plans being adopted.~~

This facility currently provides water service to the City of Fort Pierce and adjacent unincorporated areas, including most of South Hutchinson Island to the Martin County line, and to areas north, west, and south of the City limits. The water service boundary is approximately bounded by Midway Road to the south (and, on South Hutchinson Island by the Martin County line); by the Turnpike to the west; by St. Lucie Boulevard to the north; and by the Atlantic Ocean to the east. FPUA has entered into a bulk agreement through an inter-local agreement with the County to provide up to 1.01 mdg of potable water to St. Lucie County Utilities. This agreement expires in 2028. ~~serve some of these adjoining properties.~~ Properties located adjacent to and nearby Fort Pierce are responsible for locating and maintaining their own water supplies. These on-site water supplies normally obtain their water from shallow aquifer wells.

Private Utilities with Capacities Greater than 0.1 MGD in Unincorporated St. Lucie County

***Spanish Lakes ~~Mobile Home Park~~ Country Club Village*:** The Spanish Lakes ~~Mobile Home Park~~ Country Club Village is owned by the Wynne Building Corporation. Potable water service is provided via an on-site RO WTP. ~~As of February 2008, t~~The RO system's ~~construction is not fully complete, but is operating with FDEP permission. R~~raw water is provided via four (4) surficial aquifer wells. The permitted capacity of the WTP is 0.~~33~~48 MGD. The existing population within the mobile home park is two thousand, eight hundred and seventy-three (2,873)~~four hundred and seventy (2,470) (1,300 lots), which is anticipated to increase to three thousand, forty (3,040) in 2010~~.

Spanish Lakes Fairways: Spanish Lakes Fairways is a private adult community located in the northwest portion of the County's mainland St. Lucie County Water and Sewer District service area. The sixteen hundred (1,600) unit development reached a build-out population of thirty-two hundred (3,200) people in 2004 and has no plans for further expansion. The development owns and operates a water treatment plant that provides potable water service via an on-site RO WTP with a permitted capacity of 0.57~~0~~ MGD. Raw water is supplied to the water treatment plant by four (4), eight (8)-inch wells constructed into the surficial aquifer. The maximum daily demands are 0.22 mgd, well within the plant's permitted capacity.

~~Panther Woods~~Meadowood Golf and Country Club: ~~Panther Woods, formerly~~ Meadowood Golf and Country Club, owns and operates a lime softening WTP that is permitted to produce up to 0.432 MGD of potable water. The historical peak day production is approximately 0.2 MGD. The WTP, fed by four 8-inch surficial aquifer wells, was ~~recently~~ refurbished and start-up took place in January 2008.

Harbour Ridge Yacht and County Club: Harbour Ridge Yacht and Country Club, located in south St. Lucie County, owns and operates its own on-site water treatment plant, providing potable water to the 885-acre private community.

The Reserve Community Development District (CDD): The Reserve CDD was formed in 1992, located west of I-95 in St. Lucie West, and provides potable water to 2,277 utility customers within the PGA Village Master Planned community. The Reserve CDD is transitioning its water and wastewater utility services to St. Lucie West Services District (SLWSD), which is expected to be completed by the end of 2027, prior to the expiration of the current Interconnect Agreement in November 2028. Under the old agreement, which was executed in 2003, the Reserve CDD was treated as a bulk customer, receiving 80% of their water from SLWSD.

St. Lucie West Services District (SLWSD): The SLWSD was established in 1990 under Florida Statute Chapter 190 and is a Master Planned Community Development District (CDD). SLWSD serves approximately 7,000 water consumers across 4,600-acres. Their service territory extends from the Florida Turnpike to I-95, and from the C-108 Canal near Torino to Crosstown Parkway. SLWSD operates a 3.6 mgd reverse osmosis water treatment plant.

Water Supply Wells

Raw water sources utilized in the county include the surficial aquifer and the upper Floridan aquifer. The Floridan aquifer wells are generally located in the coastal areas. The majority of the water supply wells in St. Lucie County presently draw water from the surficial aquifer. The wells located in the surficial aquifer range in size from one-inch, for the low demand systems, such as a home or small business, to twenty-four (24) inches for the larger demand regional systems. Also in service in the County are deeper wells which are fed from the Floridan aquifer.

The larger surficial wells are primarily used to supply water to package plants and regional facilities. A large number of the smaller surficial wells are concentrated in residential developments that are not served by any regional water or wastewater facility. Many of these wells exist on one quarter (1/4) - acre lots which generally also have on-site septic systems for their wastewater disposal.

The Floridan aquifer wells are generally located in the coastal areas. On South Hutchinson Island, Ocean Towers and Miramar condominiums use Floridan aquifer wells for their private WTPs. FPUA has recently received a water use permit from the SFWMD to construct Floridan aquifer

wells that will allow FPUA to blend treated water from the Floridan aquifer with water from the surficial aquifer. FPUA currently operates ~~thirty-five (35)~~twenty-nine (29) surficial aquifer wells and ~~nine (9)~~eleven (11) Floridan aquifer wells and is currently in the process of constructing two (2) additional Floridan aquifer wells. The City of Port St. Lucie has a combined system consisting of thirty-four (34) surficial aquifer wells, ~~eleven (11)~~nineteen (19) existing Floridan aquifer wells and ~~six (6)~~seventeen (17) proposed Floridan aquifer wells. St. Lucie County operates two (2) surficial aquifer wells that serve the Holiday Pines water treatment plant, and one (1) surficial aquifer well that serves the Lakewood Park (HEW) water treatment plan. The water use permit from the SFWMD will allow for up to twenty-five (25) future Floridan aquifer wells to supply three (3) to four (4) regional water treatment plants at build out of the unincorporated area. The first 2.0 MGD design of the North County Regional Water Treatment Plant is planned with four (4) new Upper Floridian Aquifer Wells. One (1) test well currently exists with two (2) others under design (2026-2027). The first 2.0 MGD design of the Central County Water Treatment plant is planned with four (4) new Upper Floridian Aquifer Wells. One (1) test well currently exists with two (2) others under design (2026-2027).

The County has a Wellfield Protection Ordinance in place for the protection of public water supply wells. The ordinance provides for required setbacks from supply wells and regulates land uses to prevent contamination of the water supply. See Map FLU-12 for the Wellfield Protection Zones.

Water Quality

Water quality ranges from fair in the southeast mainland part of the County to brackish in the northwestern part of the County. The poorer water quality has been associated with the use of the brackish artesian Floridan aquifer for irrigation of citrus. Drilling records indicate that there is also an area of naturally existing saltwater extending from the vicinity of St. Lucie Village to the northern and eastern shores of Lake Okeechobee. The concentration of minerals in the connate water increases with depth to the base of the shallow aquifer and at that point it exceeds the mineral content of the artesian aquifer.

The artesian aquifer system is part of an extensive carbonate rock aquifer system that underlies most of Florida. In St. Lucie County, the artesian Floridan aquifer has three distinct producing zones of different hydrologic properties and water quality separated by semi-permeable zones. The upper producing zone of Zone 1 has the best water quality, but it is too brackish for domestic or public water supply without proper treatment (i.e. RO membranes). The water from Zone 1 is suitable for stock watering and some crops, most notably citrus. Most of the artesian wells in the County are developed in Zone 1 of the Floridan aquifer. The water quality in the upper portion of this aquifer in St. Lucie County is fair to poor as potable water, without treatment via a membrane system (such as RO). With proper treatment, the Floridan aquifer water is ideal for potable use.

The surficial aquifer is recharged through local area rainfall. In periods of prolonged drought, water supplies can become a concern. There is no natural groundwater recharge to the Floridan aquifer in St. Lucie County. The Floridan aquifer in St. Lucie County is believed to be recharged in the regions of West Central Florida (Polk, Lake and Orange Counties). The quality of water in the surficial aquifer is generally good.

Needs Assessment

The County presently has potable water service provided by three major utilities, several medium sized utilities, small package plants, and domestic wells. This section examines the needs of those areas in the County which are not included in a major or medium-sized utility service area and which have been determined to be potential high growth areas or areas with identified problems.

The future land use plan for St. Lucie County identifies several higher density residential and commercial areas. Of the land uses identified, classifications which would be dense enough to require some form of regional or sub-regional public water supply are medium and high density residential, commercial, industrial and mixed use.

Much of the area east of I-95 is served by SLCU (the consolidated St. Lucie County Water and Sewer District), FPUA, Martin County (South Hutchinson Island) and Port St. Lucie Utility Systems Department (St. Lucie West). The far western area of the County is planned as agricultural. Much of the area just west of Interstate 95 has been acquired by developers. Proposed developments in this area are in various stages of approvals and several may require land use designation changes through the Department of Economic Opportunity. In anticipation of these areas being developed, SLCU is planning a series of three (3) to four (4) regional WTPs to provide service in the North, Central, and South County Service Areas. As mentioned previously, the SFWMD has these facilities listed in the 2021 UEC Plan.

Level of Service Analysis
The Level of Service and capacity analysis based upon future demand is contained in ~~Section 4 of~~ the 20 ~~10~~-Year Water Supply Facilities Work Plan. The analysis shows sufficient capacity for the short term and long-term planning periods.

~~St. Lucie County is currently working on the update to its 10-Year Water Supply Facilities Work Plan based on the SFWMD 2016 Upper East Coast Water Supply Plan Update.~~

Capital Improvement Projects
The CIE provides details of the planned capital improvement projects, the absence of which will impact the ability of the County to provide the required LOS.

SOLID WASTE SUBELEMENT

Introduction
St. Lucie County has been operating its present landfill since 1978. In 1990, the County retained the firm of CDM Smith, formerly Camp Dresser & McKee (CDM) to prepare a Solid Waste Management Master Plan and Build-Out Plan of the current Baling and Recycling Facility site. ~~An u~~Updated Class I Landfill Build-Out Plan was prepared by CDM Smith in ~~August 2005~~ June 2024. This plan along with the ~~2018~~2025 Baling and Recycling Facility Estimate of Remaining Life/Capacity Projections ~~Useful Life Projections~~ (CDM Smith, ~~2018~~2025) ~~was~~were used extensively for the preparation of this sub-element. ~~For planning purposes, a more conservative population growth rate of 5 percent until 2035 was assumed.~~

For the purpose of this element, the term solid waste excludes hazardous waste and has been used to include the following classifications which indicate general characteristics of the materials and their sources of generation. Residential wastes are mixed household wastes, including yard trash generated by the general population. Commercial wastes are generated by the commercial and institutional sectors. Physical characteristics of these wastes are similar to those of residential wastes, in that they consist largely of combustible materials in the form of paper and food waste from offices, restaurants, retail establishments, schools, hospitals, motels, and churches. Industrial wastes include wastes generated by industrial processes and manufacturing operations, excluding hazardous wastes. These wastes also include general industrial housekeeping and support activity wastes. Class I waste includes all residential/commercial solid waste. Construction and Demolition (C & D) debris is waste from construction sites.

The term landfill refers to the final disposal ~~site~~facility of solid wastes and, as it implies, involves the burial of the wastes in an area of land. Landfills/disposal facilites are classified for regulatory purposes in Florida according to the characteristics of the wastes they are permitted to receive.

Existing Solid Waste Disposal Facilities
Currently, solid wastes received by the County are disposed of at the St. Lucie County Baling and Recycling Facility, which is the only solid waste disposal facility currently permitted in the County. The County expects to continue to operate a landfill for the entire County indefinitely since the 1988 Solid Waste Management Act discourages municipalities from operating such facilities. The City of Port St. Lucie has an Interlocal Agreement which allows them to use the County facility. The County is desirous of establishing with the City of Fort Pierce a similar Interlocal Agreement. The current site, which was purchased with Federal Revenue Sharing Funds in 1977, is located between the Florida Turnpike and Interstate 95 in Sections 35 and 36, Range 39 East, Township 35 South.

In the past, private haulers operated a number of other landfills throughout the County which have since either closed or become non-operational.

Baling and Recycling Facility Site
The present location of all solid waste disposal in the County is a three hundred and thirty-three (333) - acre parcel of land located southwest of the City of Fort Pierce. The primary use of this landfill is as a municipal solid waste disposal (residential and commercial) and recycling facility. To determine the proportional capacity of the Baling and Recycling Facility that has been allocated to serve the City of Port St. Lucie, ~~City of Fort Pierce,~~ St. Lucie Village, and the unincorporated areas, ~~the~~ population estimates from the ~~2017~~2024 University of Florida Bureau of Economic and Business Research, Population Projections, along with the level of service (LOS) standard determined by a 5 year average generation rate as ~~3.88~~4.00 pounds/capita/day for Class I waste to estimate the amount of waste produced. The level of service provided for C&D (Construction & Demolition) debris was ~~0.81~~1.27 pounds/capita/day, which was calculated in a similar manner.

The Class I landfill area is currently planned in six primary phases in addition to other ancillary areas. The Baling and Recycling Facility Class I Landfill (existing and future) consists of ~~(~~Phase I~~)~~ (28-acres), ~~(~~Phase II~~)~~ (28-acres), ~~(~~Phases IIIA & IIIB~~)~~ (25-acres), ~~(~~Phases IVA & IVB~~)~~ (21-acres), ~~(~~Phases VA & VB~~)~~ (21-acres), ~~(~~and Phases VIA & VIB~~)~~ (9.9 – acres). The facility is ~~of fill area for Class I garbage that is~~ currently permitted by the Florida Department of Environmental Protection under Permit No. 0126814-~~018~~024-SO dated ~~December 12, 2014~~January 6, 2020. A summary of the acreage dedicated to each of the major land uses is shown in Table 4B-1.

Closure has been completed for all or some portions of Phases I, II, ~~and~~ IIIA, and IIIB ~~including~~which includes capping the ~~fill~~ waste with a polyethylene ~~liner~~geomembrane. Phase IIIB and Phase IVA are ~~is~~ currently active and accepting Class I waste. Phase ~~IVA~~VA is currently being constructed and it is anticipated to be ~~will be~~ ready to receive Class I waste in ~~January 2019~~2026.

Class I Development: The Phase I fill area was closed in 1987. The FDEP permitted finished height was ninety five (95) feet above existing grade in addition to a three (3)-foot access road dike on top of the fill area. Phases II and IIIA were closed in 2010. ~~and~~ Phase IIIB and Phase IVA are ~~is~~ active and currently receiving waste along with a reopened portion of Phase II. The useful

life of the Class I landfill at Baling and Recycling Facility is estimated to be exhausted in year ~~2050~~2065, assuming current operations continue and all phases are constructed. The remaining capacity of the Class I landfill is shown in Table 4B-2.

Commented [AD1]: Is this information still valid?

~~Table 4B-2~~

C&D Debris Development: The C&D debris ~~landfill~~ disposal facility is currently active and receiving waste. The useful life of the C&D debris ~~landfill~~ disposal facility at the Baling and Recycling Facility site is estimated to be exhausted in year ~~2042~~2035, assuming current operations continue. As of January ~~2018~~2025, an estimated ~~1,838,603~~2,300,624 cubic yards of capacity was filled. The C&D debris ~~landfill~~ disposal facility is estimated to have a total capacity of 2,928,704 cubic yards. Co-disposal of C&D debris with Class I waste and/or reallocation of future landfill phases are options currently under investigation for future C&D debris disposal. The remaining capacity of the C&D debris ~~landfill~~ disposal facility is shown in Table~~s~~ 4B-3.

Needs Assessment

St. Lucie County currently has solid waste disposal facilities to satisfy the needs of the County for the short-term planning period~~.; however, The County will need to assess alternative disposal site between 2018 – 2022~~. The projected waste tonnages for the Class I landfill and C&D debris ~~landfill~~ disposal facility are ~~is~~ shown in Tables 4B-4 and 4B-5, respectively. ~~In~~Since 2012, waste from the City of Ft. Pierce started going to a different site. If this waste were to come back to the Baling and Recycling Facility, the capacity of the landfills would be reduced ~~by at least 5 years~~.

Commented [AD2]: Do we need to update this data with the recent population projections? Need the updated LOS in order to do so.

~~**Table 4B-4**~~
~~**PROJECTED WASTE TONNAGE FOR CLASS I WASTE, 2020-2040**~~

~~Fiscal Year~~	~~Population (A)~~	~~Incoming Class I Tonnage (B)~~	~~Class I Tonnage Adjusted for Recycling (C)~~	~~Annual Volume (CY) (D)~~
~~2020~~	~~344,549~~	~~212,843~~	~~208,586~~	~~205,270~~

2025	439,741	279,482	273,892	269,538
2030	561,233	364,731	357,436	351,754
2035	716,292	473,735	464,260	456,880
2040	779,973	517,993	507,633	499,563

(A) Population: University of Florida, Bureau of Economic and Business Research, High Projection with assumed 5 percent growth rate until 2035 for planning purposes.
(B) Class I tonnage: Based on the population projections in conjunction with per capita generation rates (LOS) of 3.88 /person/day.
(C) Equals tonnage reduced by 2 percent to account for recycling of metal and cardboard.
(D) Based on an in-place compacted density, including cover material, of 2,032 lbs/yd^3 (5-year average).

Future Waste Stream Reduction

The County ~~is exploring~~ has evaluated alternative waste conversion technologies to reduce the amount of ~~the~~ waste stream that is currently being landfilled and to extend the useful life of the Bailing and Recycling Facility but has not found a cost-effective and viable alternative. Currently, the County is evaluating ways to expand the ultimate buildout capacity of the current Class I landfill and plan for future relocation of facilities to their newly purchased property to the south of the Bailing and Recycling Facility. Alternative waste conversion technologies may be reevaluated in the future.

DRAINAGE AND NATURAL GROUNDWATER AQUIFER RECHARGE SUBELEMENT

Surface water

Prior to man's alteration, the areas that presently comprise St. Lucie County had drainage patterns that were controlled by the County's primary topographic feature, the Atlantic Coastal Ridge and the more subtle features such as the Green Ridge (south/central County), the Osceola Plain (southwest County), and Ten-Mile Ridge (north/central County). Overall, the County gently slopes from west to east. Elevations range from about 60 feet, in the western portion, to sea level along the Atlantic coastal beaches, with scattered peaks associated with the above-described ridges. The alignment of these surface ridges parallels the existing coastline and serves to impede east/west sheetflow.

The St. Johns Marsh, Allapattah Flats, and the Savanna areas are wetlands formed by these natural impediments. The Allapattah Flats area is located in the southwestern portion of the County. This area drains predominantly, to the south/southeast, discharging into the area now occupied by the C-23 Canal. Portions of the St. Johns Marsh drain to the south into what is now the C-25 Canal basin. Water entering the Savannas normally percolated through the Atlantic Coastal Ridge to the Indian River, but during extremely high water stages there could be overflow to the North Fork of the St. Lucie River (NFSLR), through Platts Creek and several small sloughs. These wetland marshes store water and are believed to provide recharge to the shallow aquifer. The remaining central portions of the County serve as the watershed for the upper reaches of the North Fork of the St. Lucie River.

There are other minor drainage ways where the Atlantic Coastal Ridge has been breached, such

as Moore's Creek in Fort Pierce, but the areas drained are not very large and of no major significance on the overall drainage system for the County. The areas east of the Atlantic Coastal Ridge and along the barrier island are not included within any of the major drainage basins of the County. Stormwater discharge in these areas is essentially direct to the primary receiving body, the Indian River Lagoon or Atlantic Ocean.

The stormwater detention time for most of St. Lucie County, prior to man's alteration, was extremely long. The natural features and drainage ways are still apparent on satellite imagery. However, today, the North Fork of the St. Lucie River still serves as the major, and least altered, natural drainage feature in the County.

Manmade drainage systems
Major surface drainage modifications to St. Lucie County commenced with the formation of the North St. Lucie River Water Control District (1917) and the Fort Pierce Farms Water Control District (1919). These Districts were created for the purpose of agricultural drainage and irrigation, with a secondary purpose being flood control activities.

During the 1940s, the U.S. Army Corps of Engineers (COE) channelized portions of the North Fork of the St. Lucie River in an effort to improve its water-carrying capacity and to accelerate its speed or discharge into the Atlantic Ocean. During the 1960s, the COE constructed Canals C-23, C-24, and C-25, along with their control structures. With the construction of this Primary Canal system for the South Florida Water Management District, the County was then divided into a series of Sub-Basins.

The C-25 Basin is located in the northwestern St. Lucie County and extends into parts of Okeechobee and Indian River County~~y~~ies. This area is dominated by agricultural uses consisting of ~~either citrus~~crop production or ranching activities. The canal system in this area was designed to support agricultural activities. Although not the case in St. Lucie County, the western portions of this overall basin do not have any significant flood control protection, which could in times of extreme rainfall have detrimental effects in the downstream areas. With the absence of any significant urban development, local flooding is not presently a major problem in that on-site design requirements meet the current need. However, as elaborated further in this element, there are multiple stormwater treatment areas/reservoirs (STA's) planned or under construction within the C-23/24 and the C-25 basins that are components of the Comprehensive Everglades Restoration Plan's (CERP) Indian River Lagoon-South (IRL-S) Restoration Project, designed to reverse the damaging effects of pollution and the unnaturally large freshwater discharges into the areas canal system. ~~there is a need for a countywide review of this community's future drainage management requirements and this review will have to include the portions of this that lie outside of the County~~.

The C-24 Basin is located in the Central and West-Central portions of the County. This basin may further be divided into three subgroups: emerging urban (east one-third), citrus (central one-third) and ranching (west one-third). One of the primary purposes of this basin is to regulate the level of ground water, through the controlling effects of the S-49 control structure and to prevent the intrusion of saltwater into the local groundwater supplies. When initially constructed, this basin was designed to accommodate the agricultural needs of the area. The emergence of significant urban development may possibly cause a negative downstream impact, affecting the ability to efficiently move the water from the upper reaches of the Basin.

The C-23 Basin is located in the south and southwestern portion of the County. This basin serves the agricultural needs of the southwest area. However, a significant portion of the basin is located

in Martin County. This area ~~is, at present,~~was historically used for agricultural purposes, although~~, it's~~the eastern ~~edges face the~~ area has seen significant urban development within the incorporated area of Port St. Lucie, creating potential impacts ~~of~~as additional future urban development pressures the natural systems. These emerging areas will have to be accommodated for through the development of interlocal agreements between all affected parties addressing the issue of urban discharge.

The North Fork of the St. Lucie River Drainage Basin is located in the most populous part of St. Lucie County. This drainage basin includes within it the North St. Lucie River Water Control District, along with portions of the City of Port St. Lucie. As mentioned previously, in the 1940's the main river course was channelized by the Army Corps of Engineers. This channelization was effective in increasing the rate of water removal from the basin, but it also allowed for the increased collection and transmission of silt and other debris, affecting not only the long-term carrying capacity of the North Fork itself, but also contributing to the accelerated siltation of the lower reaches of the St. Lucie River.

The North Fork basin can be characterized as dominated by urban uses. What agricultural activities remain are in the western reaches of the district. However, it should be noted that although the basin serves an urban environment, the drainage design of this basin is based upon agricultural needs. This area has been the focus of several studies, evaluations and demonstration projects in recent years, attempting to improve upon its overall efficiency. As discussed later in this element, these efforts need to be continued and expanded.

The Taylor Creek-Nubbins Slough (C-59 Basin) basin area is located in extreme southwestern St. Lucie County. This basin affects only 9.5 square miles of the County. Activities in this area are ranching with the remaining property being undeveloped/ vacant. There is effectively no impact upon the balance of the County by this basin since its flows are to the west and the Lake Okeechobee area. However, as addressed in the goals, objectives and policies portion of this element, attention to this area is needed on water-quality issues.

Except for those efforts in Fort Pierce and Port St. Lucie, almost all of the surface drainage modifications that have taken place have been designed for agricultural land uses, or approximately a ten-year-24-hour storm event. As these agricultural lands have become more urbanized, the volumes of stormwater have increased and runoff times have decreased, resulting in more frequent periodic local flooding.

~~Because~~As the more urbanized areas of the community ~~are located in the~~ expand beyond the historically developed downstream areas of much of the drainage system, the potential for urban area flooding ~~has~~will increase~~d~~.

Groundwater

There are two distinct sources of groundwater in St. Lucie County: the shallow unconfined or semiconfined aquifer, and the deep artesian Floridan Aquifer. These aquifer systems are separated by a layer of relatively impermeable green clay known as the Hawthorne Formation, which is about 400 feet thick and starts at approximately 150 to 180 feet below the average land surface.

The shallow aquifer system is comprised of one to five feet of fine-grained sands and silts of the Pimlico Sand that overlie the Anastasia Formation. The Anastasia Formation consists of interbedded layers and lenses of sand, shell beds, sandy limestone, and sandstone. Beds and lenses tend to be elongated in a direction that parallels the coast. Most of the permeable zones,

which are primarily shell beds, are thin and, as a result, well yields are low to moderate. (USGS, 1972).

Water quality is variable in the shallow aquifer due to natural and artificial causes. Water quality ranges from fair in the southeast mainland part of the County to brackish in the northwestern part of the County. The poorer water quality has been associated with the use of the brackish artesian aquifer for irrigation of citrus. However, drilling records and well water analysis indicate that there is also an area of connate saltwater that extends from the vicinity of St. Lucie Village to the northern and eastern shores of Lake Okeechobee. The concentration of minerals in the connate water increases with depth to the base of the shallow aquifer and at that point it exceeds the mineral content of the artesian aquifer.

The artesian aquifer system is part of an extensive carbonate rock aquifer system that underlies most of Florida. In St. Lucie County, the artesian Floridian Aquifer has three distinct producing zones of different hydrologic properties and water quality separated by semipermeable zones. The upper producing zone, or Zone I, has the best water quality, but it is too brackish for domestic or public water supply. The water from Zone I is suitable for stock watering and some crops, most notably citrus. Most of the estimated 1,300 artesian wells in the County are developed in Zone I of the Floridan Aquifer. There is no natural groundwater recharge to the Floridan Aquifer in St. Lucie County. Producing zones, water quality, and other technical data are more extensively described in the SFWMD Technical Map Series 70-1. (SFWMD, 1979)

Agricultural drainage projects between the urbanized coastal areas and Canals C-23 and C-24 have impacted the major sources of groundwater recharge to the shallow aquifer and lowered the water table. Areas such as the St. Johns Marsh and the Allapattah Flats, which previously stored a large amount of water above the land surface to provide the hydraulic gradient needed to recharge the slightly permeable surficial aquifer have been drained for agricultural purposes. The Allapattah Flats west of the SFWMD canals and the remaining portions of the St. Johns Marsh still provide some degree of recharge, but the major sources for St. Lucie County are the St. Johns Marsh in Indian River County and the Orlando Ridge extension of the Osceola Plain (a marine terrace) in southwestern St. Lucie County and eastern Okeechobee County. The impacts of the construction of the canal drainage system on the groundwater contour levels in the County are illustrated.

From inspection of these diagrams it can be seen that the groundwater flow from the western half of the County is effectively being intercepted by these major canals. This interception is then depriving the wellfields in the central and eastern regions of the County from a source of replenishment. As a result, recharge areas will need to be located and protected near the centers of the drainage basins to optimize their effects.

The distance between water-level contours, when matched with the hydraulic gradient of topographic relief, indicates the relatively permeability of the surficial aquifer: the greater the distance between contours, the higher the permeability. This is exemplified in the area bounded by SFWMD C-23 and C-24 canals, where the land surface has little relief and the water level contours are miles apart.

Many secondary drainage systems have been constructed for agricultural drainage. However, most of these secondary systems are shallow and are designed to prevent ponding. This impacts the groundwater recharge. Because of the lack of recharge and the low permeability of the soils, the shallow aquifer provides insufficient water for irrigation during the extended dry season. SFWMD Canals C-23, C-24 and C-25 serve as linear storage reservoirs and provide irrigation

supply for many areas although, in extreme periods of drought, they too may only be used in a minimal capacity due to the lack of surface water.

To compensate for this, many agricultural operations will use the Floridan Aquifer for much of their irrigation demand. The problem associated with the use of this aquifer area is irrigation return (excess) flows from the Floridan Aquifer water are mineralized. These flows in turn mineralize the receiving canals.

Natural Groundwater Recharge

In the 2021 UEC Plan, water storage is recognized as an "essential component of any supply system that experiences fluctuation in supply and demand." In St. Lucie County SFWMD is utilizing ASR (Aquifer Storage and Recovery) which stores surface water, stormwater, fresh groundwater, drinking water, and reclaimed water in an aquifer that has appropriate characteristics; modest transmissivity, intergranular porosity, overlain by a competent confining unit, and low ambient water salinity. The aquifer acts as an underground aquifer. The injected water is stored underground and then pumped back out when needed.

~~Currently, there are no defined aquifer recharge areas in the County. The South Florida Water Management District through the Upper East Coast Water Supply Plan, is attempting to identify the aquifer recharge areas in the County, in addition to identifying the areas where existing problems are occurring and area that may have future problems. The County will continue to monitor the Water Management District as they work to define these areas.~~

Additionally, the Floridan Aquifer is not recharged within St. Lucie County, but rather primary recharge of that aquifer occurs in the more central portions of the State.

Local Drainage Issues

On the average, St. Lucie County receives about 53 inches of rain per year primarily during the period from June to October. It is recognized that from time to time, portions of the County will experience flooding problems as a result of heavy rainfall. Much of the local flooding that occurs can be attributed to development carried out before the advent of contemporary stormwater management practices. Most of the drainage problem areas are located in the North Fork Drainage Basin. However, there are documented problems in other parts of the County as well.

St. Lucie County has continued to work on drainage improvement projects that are designed to provide relief to small areas of the community. These improvements are not intended to be a comprehensive cure for the problem because they are limited in the areas they impact. The improvements are not system-wide and as such will have little wide-ranging impact. However, if successful, they should provide a degree of intermediate relief of limited scope and duration to the afflicted area.

Drainage Improvements

Ten Mile Creek Regional Attenuation Facility

The Ten Mile Creek Water Preserve Area attenuates summer stormwater flows into the North Fork of the St. Lucie River Estuary which originate in the Ten Mile Creek basin by capturing and storing the passing stormwater. The sedimentation of suspended solids that occurs in the storage reservoir reduces sediment loads delivered to the estuary. In addition, the captured stormwater is passed through a polishing cell for additional water quality treatment before being released into the North Fork. Stored water can be released in the drier winter months to augment current insufficient flows. Stabilizing the salinity concentration will greatly enhance the Estuary's ability to

support sea grasses, oysters, and nursery grounds for marine fish.

Ten Mile Creek is the largest sub-basin delivering water to the North Fork of the St. Lucie River Estuary, which has been established as an Outstanding Florida Water (OFW). The St. Lucie Estuary discharges into the Indian River Lagoon, which is also an OFW. The Indian River Lagoon is the most biologically diverse estuary in North America. The entire Lagoon is endangered from increased runoff from watershed drainage enhancements. Excess stormwater due to drainage improvements is causing radical fluctuations of the salinity concentration in the St. Lucie Estuary. Storage of excess water will allow its measured release, and hence a more natural salinity regime.

This project is a critical restoration project, which was authorized by Congress under the Water Resources Development Act of 1996. The project was implemented by the U.S. Army Corps of Engineers, with the South Florida Water Management District acting as the local project sponsor. St. Lucie County ~~is contributing~~ pledged local matching funds and assisted~~ing~~ with coordination of local issues and permitting.

The reservoir is located immediately west of the Gordy Road spillway on the south side of the Ten Mile Creek. The site is just west of the Florida Turnpike, about one-half mile south of Okeechobee Road (State Road 70).

The footprint of the reservoir is approximately 526 acres in size, with the remaining acreage of approximately 190 acres being utilized as a polishing cell. Based upon existing topography, ultimate stored water depths average ten feet. Total storage capacity is approximately 5,000 acre-feet at full build-out.

The project was built by the U.S Army Corps of Engineers in 2006 but did not operate as intended. In 2016, the SFWMD initiated a project to repair and improve the security of the reservoir's embankments. Once complete, the 526-acre reservoir will be able to store 2,500 acre-feet of local stormwater.

Indian River Lagoon – South

As a component of the Comprehensive Everglades Restoration Plan (CERP), the Indian River Lagoon-South (IRL-S) Restoration Project is now under way to reverse the damaging effects of pollution and unnaturally large freshwater discharges into the ecologically vital water bodies located within St. Lucie County. The delicate balance of fresh and salt water in the lagoon and estuary will be restored, polluted water will be treated, and degraded habitats will be revitalized.

The Indian River Lagoon-South Project employs a regional approach restore the St. Lucie Estuary and the southern portion of the Indian River Lagoon. Based on the Project Implementation Report approved by Congress in 2007, the IRL-S project is expected to include the following components that will work together to protect and restore the lagoon and estuary:

Construction and operation of new aboveground reservoirs and their connecting canals, control structures, levees, and pumps to capture water from the C-23, C-24 and C-25 canals for storage of water runoff.

The C23/24 north reservoir is 2,005 acres in size and intended to store over 32,000 acre-feet of water with a maximum impoundment depth of 16.5 feet. The C23/24 south reservoir has a footprint of 3,540 acres in size and is intended to store over 57,000 acre-feet of water with a maximum impoundment depth of 16.5 feet.

The C25 reservoir includes a 741-acre aboveground impoundment with a maximum depth of 8 feet, and a 163-acre STA. The reservoir will capture the first 0.4 inches of runoff from both the C-25 Basin and the Ft. Pierce Farms Basin (approximately 147,225 acres). The STA will treat 80 percent of the phosphorus load entering the STA from the reservoir. The reservoir and STA are north of and adjacent to C-25 at the S-99 structure. Their combined storage capacity is approximately 5,392 acre-feet.

Construction and operation of new stormwater treatment areas (STA) to reduce sediment, phosphorus, and nitrogen going to the St. Lucie River Estuary and the southern portion of the Indian River Lagoon. STAs are planned for each of the C-23/24, and C-25 basins.

Upper East Coast Water Supply Plan

The Upper East Coast (UEC) Water Supply Plan (WSP) was completed by the South Florida Water Management District and accepted by the Board of County Commissioners in February 1998. The Upper East Coast Plan includes Martin, St. Lucie, and a small portion of Okeechobee County. The District updated the UEC WSP in 2004. In 2006 the District issued the 2006 UEC Plan Amendment, then updated the Plan again in 2016 and 2022. The purpose of the Plan is to provide a framework for future water use decisions to provide adequate water supply for urban areas, agriculture, and the environment through year ~~2040~~ 2045.

The plan estimates the future water supply needs of urban areas and agriculture, weighs those demands against historically used water sources, and identifies areas where demands cannot be met without harming the resource and environment, including wetlands. The plan evaluates the potential of several alternative water source options to meet any unmet demand and makes recommendations for their development.

The Plan developed the following regional objectives to ensure that the Water Supply Plan would address the specific needs of the Upper East Coast:

1. **Water Supply:** Quantify sufficient volumes of water and water supply projects to meet reasonable-beneficial consumptive uses ~~Identify sufficient sources of water to meet~~ projected through ~~2040~~ 2045 under ~~water demands during a~~ 1-in-10-year drought event conditions.~~, without causing harm to natural resources.~~
2. **Natural Systems:** Protect and enhance natural systems and water resources including the St. Lucie River and Estuary, the Indian River Lagoon, the Northwest Fork of the Loxahatchee River, and other federal, state, and locally identified natural areas.
3. **Conservation and Alternative Source Development:** Encourage water ~~Increase levels of~~ conservation measures to improve ~~to increase the~~ efficiency of water use. Continue to encourage development of the FAS as ab alternative water supply (AWS) and monitor the aquifers to enhance understanding of the relationships among water use, water levels, and water quality. Develop water storage options, including aquifer storage and recovery (ASR) systems and reservoirs, and promote projects that increase use of reclaimed water. ~~; and, increase the use of alternatives sources to reduce dependency on drought susceptible water sources.~~
4. **Linkage with Local Governments:** Provide information to support local government Comprehensive Plans. Promote compatibility of the plan update with local government land use decisions.
5. **Compatibility and Linkage with Other Efforts:** Achieve compatibility and integration with the following planning related activities:
    - Other state and federal water resource initiatives in the planning area;
    - Existing and proposed environmental projects;

- Modifications to operating schedules for regional systems, including Lake Okeechobee; and
- Water use permitting process, minimum flow and minimum water level (MFL) criteria, water reservations, and restricted allocation areas (RAAs).

6. ~~**Floridan Aquifer:** Encourage development of the Floridan Aquifer as an option to sources that depend on local rainfall for recharge. Establish a monitoring program to collect data to better understand the relationship between water use, water levels and water quality.~~
7. ~~**Estuarine and Riverine Systems:** Protect and enhance the Loxahatchee River, the St. Lucie River and Estuary and the Indian River Lagoon through effective water deliveries and management of the water resources.~~
8. ~~**Water Resource Protection:** Protect wetland systems and the water resources from harm due to water use, including drawdowns and harmful movement of saline water.~~
9. ~~**Compatibility with Local Governments:** Coordinate the UEC Water Supply Plan with the water supply related elements of local government.~~
10. ~~**Other Regional Planning Efforts:** Achieve compatibility with other related regional water resource planning efforts. These include the Indian River Lagoon (IRL) Surface Water Improvement and Management (SWIM) Plan, Comprehensive Everglades Restoration Plan (CERP), CERP IRL – South Project, CERP North Palm Beach County Project Part 1, Lake Okeechobee SWIM Plan, Lower East Coast and Kissimmee Basin Water Supply Plans, IRL National Estuary Program Comprehensive Conservation and Management Plan, St. Johns River Water Management District (SJRWMD) District wide Water Supply Assessment and Northern Palm Beach County Comprehensive Water Management Plan (source 2004 UEC WSP).~~

~~The 2004 Update identified eight water source options to address the needs of the Upper East Coast region, including:~~

1. ~~Surface Water.~~
2. ~~Aquifer Storage and Recovery.~~
3. ~~Floridan Aquifer System.~~
4. ~~Surficial Aquifer System.~~
5. ~~Conservation.~~
6. ~~Reclaimed Water.~~
7. ~~Reservoirs.~~
8. ~~Seawater.~~

~~Specific goals or strategies were identified for each of the eight options to be implemented as part of the implementation of the UEC Water Supply Plan. Responsible agencies to carry out the goals were identified, along with probable sources of funding.~~

Natural Lands Storage

The South Florida Water Management District has been working with a coalition of agencies, environmental organizations, ranchers and researchers to enhance opportunities for storing excess surface water on private and public lands.

St. Lucie County is researching the ability to store water on conservation lands currently owned by the County and purchased using the Environmentally Sensitive Lands (ESL) program. Storing this water can assist to restore habitat damaged by excessive draining due to development. If water levels are higher than normal during the annual rainy season, this storage can be utilized. Holding water on these lands is one tool to help reduce the amount of water discharged to the St. Lucie estuary during high water conditions.

The SFWMD Dispersed Water Management Program encourages private property owners to retain water on their land rather than drain it, accept and detain regional runoff for storage or do both. Landowners typically become involved in the program through cost-share cooperative projects, easements or payment for environmental services.

Managing water on these lands is one tool to reduce the amount of water delivered into Lake Okeechobee during the wet season and discharged to coastal estuaries for flood protection. Dispersed water management offers many other environmental and economic benefits to the region.

Water Farming

The SFMWD has approved ~~contracts for three water farming pilot~~ permits for water farming projects in the St. Lucie River watershed to ~~test the concept of~~ store~~ing~~ excess surface water on privately owned fallow citrus lands.

The Ideal 1000 Water Farm (ERP No. 56-00025-S), owned by Evans Properties, Inc., is located south of the C-24 Canal, east of Carlton Rd. in western St. Lucie County. This project is aimed at addressing water quality impoundment issues caused by excess, nutrient-rich surface water discharges from the C-24. This project diverts water, retains rainwater, and keeps them from being released into the C-24 Canal.

The Caulkins Water Farm Project (ERP No. 43-101966-P), part of the SFWMD's Dispersed Water Management Program, is constructed and operational in Martin County. The project helps meet the intent of the Northern Everglades and Estuaries Protection Program (F.S. 373.4595), by retaining stormwater on private property, reducing flows and nutrient loads to the St. Lucie Estuary.

The Bluefield Dispersed Water Management Project (ERP No. 56-00116-S), also owned by Evans Properties, Inc. is a 6,104-acre project that is part of the SFWMD's Dispersed Water Management Program. This site is located south of Okeechobee Road (SR70) and west of the C-23 canal in St. Lucie County. The project is designed within internal and discharge riser/culverts and gated culverts and perimeter pumps for inflow from and discharge to the C-23 Canal. The project represents a net improvement in water quality resulting from the change in land use and additional attenuation of stormwater.

~~The first two pilot projects are operational on lands owned by Caulkins Citrus Company and Spur Land & Cattle/Bull Hammock Ranch. Under the program, water is pumped onto these properties in Martin County, capturing a combined average of 7,650 acre-feet of water a year that would otherwise flow from Lake Okeechobee and surrounding basins into the St. Lucie River and Estuary.~~

~~The third pilot project owned by Evans Properties will provide up to 1,750 acre-feet of additional water storage in the St. Lucie watershed.~~

Indian River Lagoon Comprehensive Plan

In July 1996, the Board of County Commissioners adopted the Indian River Lagoon Comprehensive Conservation & Management Plan (CCMP). The Plan was published in May of 1996 by the members of the Indian River Lagoon National Estuary Program (NEP) Management Conference, in cooperation with SJRWMD, SFWMD, and the U.S. EPA. This document was updated in 20~~08~~19.

In February of 2015, the Indian River Lagoon Council was established as a special district of Florida. The IRL Council sponsors the Indian River Lagoon National Estuary Program.

With the publication of the Plan (IRLCCP) more than 100 agencies and local governments with management responsibilities for the Lagoon agreed on a unified strategy to preserve and restore the Lagoon. The Plan was formally adopted by the governor and the Environmental Protection Agency (EPA).

The 1996 Plan containeds more than 69 recommended actions addressing critical problems such as the preservation of wetlands, sea grass restoration, endangered species protection, water and sediment quality improvement, land acquisition needs, and the means of funding preservation and restoration activities. All of these actions have the express purpose of protecting the integrity, diversity and productivity of the Indian River Lagoon. The 2098819 update revised the actions to either remove, amend or replace each action as necessary.

According to the Indian River Lagoon (CCMP) Plan, "Freshwater and stormwater discharges represent the largest nonpoint source of pollution to the Indian River Lagoon." The IRL experienced a dramatic shift from a system where benthic aquatic vegetation was expanding to one dominated by planktonic microalgae following an unprecedented algal bloom in 2011 (now referred to as the “2011 superbloom”). The post-2011 IRL is characterized by intense, recurring, and long-lasting algal blooms; widespread loss of seagrasses; and episodic wildlife mortality events.

Concurrently with these stress-response issues, the southern IRL is impacted seasonally by freshwater releases from Lake Okeechobee during times of high water. During the summers of 2013, 2016, and 2018, billions of gallons of freshwater were released through the St. Lucie Estuary to the southern IRL. As a result, the St. Lucie Estuary and southern IRL experienced dramatic salinity shifts including sustained freshwater conditions. The combination of freshwater, high nutrients, sediments, and an inoculant of the cyanobacteria Microcystis from Lake Okeechobee, in addition to nutrients from the IRL watershed, fueled harmful algal blooms (HABs) in portions of the southern IRL. In 2013, 2016, and again in 2018, these releases initiated an intense Microcystis HAB, with reported concentrations of the toxin microcystin exceeding World Health Organization standards. These freshwater releases and HAB events highlight the importance of connections between the watersheds of the IRL and the Everglades.

Over the years, these discharges have resulted in muck (or "ooze") deposits and sedimentation in the Lagoon and its tributaries. This deposition and sedimentation has caused the loss of seagrass beds with resulting impacts to fisheries and shellfish populations. On occasions, increased loadings of nutrients from freshwater discharges have caused algae blooms and resulted in fish kills.

The formation of a Stormwater Management Program by St. Lucie County is an important first step in implementing the goals of the IRLCCMP PlanCounty is currently updating the stormwater master plan, originally authored in 1992. This local government program forms the basis for fundingidentifying, categorizing, and ranking and implementing improvements to ourthe County’s stormwater management system for the purposes of enhancing drainage level of service and for increasing protections of water resources within the County.

Basin Management Action Plans

A Basin Management Action Plan (BMAP) is the “blueprint” for restoring impaired waters by

reducing pollutant loadings to meet the allowable loadings established in a Total Maximum Daily Load (TMDL). A BMAP represents a comprehensive set of strategies designed to implement the pollutant reductions established by the TMDL. These broad-based plans are developed with local stakeholders, they rely on local input and local commitment, and they are adopted by Secretarial Order to be enforceable.

The St. Lucie River and Estuary Basin is located in southeast Florida in Martin, St. Lucie, and Okeechobee Counties. The St. Lucie Estuary is a major tributary to the Southern Indian River Lagoon (IRL-S). The basin is an economically important area where water quality is affected by freshwater runoff from agricultural and urban sources in the watershed and Lake Okeechobee. To address the nutrient impacts in this important basin, the Florida Department of Environmental Protection adopted Total Maximum Daily Loads to reduce the watershed nutrient inputs to the river and estuary.

In June of 2013, the Florida Department of Environmental Protection (DEP) adopted a BMAP for the St. Lucie River and Estuary. The DEP identified the St. Lucie River and Estuary as impaired due to excessive amounts of total phosphorus (TP), total nitrogen (TN), and biochemical oxygen demand (BOD). In March 2009, DEP adopted the nutrient and dissolved oxygen (DO) TMDL for the St. Lucie Basin. For the St. Lucie River and Estuary Basin, the total required reductions ~~are~~were originally spread over a 15-year timeframe. Reductions will be implemented in three five-year BMAP iterations, and the DEP will evaluate basin health every five years. Executive Order 19-12 required an update to this BMAP in 2020. In 2023, House Bill 1379 added the additional requirement that BMAPs be assessed and updated every five years. The most recent 5-Year Review was completed in 2023. The BMAP includes management strategies or projects to be implemented by the responsible stakeholders that aim to reduce elevated levels of nitrogen and phosphorus in the estuary

The Central Indian River Lagoon (CIRL) Basin Management Action Plan was adopted in February 2013 to implement the total nitrogen (TN) and total phosphorus (TP) TMDLs in the watershed. The BMAP includes management strategies or projects to be implemented by the responsible stakeholders during the first phase of implementation. The restoration activities aim to reduce elevated levels of nitrogen and phosphorus inputs that can cause algal blooms and negatively impact the growth of seagrass in the lagoon basin. The Central Indian River Lagoon (CIRL) BMAP was updated in October 2021 to incorporate allocations to all parts of the CIRL.

Capital Improvement Projects
The CIE provides details of the planned drainage projects, the absence of which will impact the ability of the drainage systems to provide the required LOS.

Stormwater Management Master Plan
In 1992, a Stormwater Management Master Plan was completed and adopted for the unincorporated areas of the County. The Master Plan addressed the needs of the major canals of the primary and secondary stormwater management system. The canals, which were analyzed, are owned and operated by either North St. Lucie River Water Control District (NSLRWCD), Fort Pierce Farms Water Control District (FPFWCD), or South Florida Water Management District (SFWMD).

The Master Plan concluded that generally the secondary stormwater management system serves the County well for the ten-year, 24-hour storm event. The Master Plan recommended that the County continue to use the ten-year, 24-hour storm event (approximately 6.5 inches of rainfall in a 24-hour period) as the Level of Service standard for flood protection for roadways. This Level

of Service standard is incorporated in the County's Land Development Code.

The Master Plan recommended several capital improvement projects for the secondary stormwater management system, including: mechanically operated gates, electrically operated gates, upsizing and lowering selected culvert pipes, and installing fixed-crest weirs at selected locations to improve water quality of stormwater discharge from the secondary drainage canals into the St. Lucie River. All of the improvements recommended by the plan fall within the secondary canals owned by the North St. Lucie River Water Control District or the Fort Pierce Farms Water Control District. Many of these recommendations have already been implemented.

The Master Plan confirmed, "Flooding is far more prevalent in the secondary and local network systems that drain into the primary drainage canal system. A few examples include, but are not limited to: the Carlton Road area, portions of White City, Sunland Gardens, Paradise Park, and large agricultural ownerships in the western portion of the County. Although the primary drainage system could accommodate stormwater from these areas, the secondary or local network systems have not been improved (or do not exist) to transport the runoff from these troubled areas to the primary canal system." The Plan recognizes that "throughout unincorporated St. Lucie County, many isolated areas have little or no real drainage improvements and no access to a primary or secondary drainage system." Much of this was created when land was subdivided without proper planning of drainage and drainage outfalls. Other problem areas lie within the floodplain of natural creeks or streams.

~~Many of the existing secondary and local network drainage systems in the County were constructed many years ago, prior to permitting requirements for water quality treatment of stormwater discharges. Consequently, there were no provisions made for treatment of stormwater for water quality improvement prior to discharge to the primary canal system.~~

~~The 1992 Master Plan document and the County staff have compiled a listing of problem areas that are known to be flood prone historically. More details are available in the Master Plan document.~~ To address these chronic flooding and stormwater management issues, the County is preparing an update to the Stormwater Master Plan. The County's current stormwater master plan was developed in 1992 and, since then, there has been increased development, changes in water management practices, and increasing frequency of intense rainfall events and tidal flooding. The Stormwater Master Plan update consists of multiple phases including data collection, modeling, capital improvement projects identification, implementation plan development, ordinances and resiliency evaluation, and public engagement.

~~**Comprehensive Everglades Restoration Program (CERP)**~~
~~The Conservation Element provides details on CERP programs including the IRL South Plan. The CERP IRL projects will provide benefits to the primary drainage system and water quality. The County's Capital Improvements projects will provide benefits to the secondary and local drainage systems.~~

Levels of Service
The Level of Service standard ~~as defined by the 1992 Stormwater Master Plan~~ is outlined in Policy 4C.1.1.2, in the Capital Improvement Element, in the Land Development Code and tied to the rules of the SFWMD.

SANITARY SEWER SUB ELEMENT

Introduction

The Sanitary Sewer Sub-element provides a complete summary of the wastewater treatment facilities in St. Lucie County. Sanitary sewer services are provided in only a small portion of the unincorporated County. Central utility services are provided by the Fort Pierce Utilities Authority (FPUA), the Port St. Lucie Utility Systems Department, St. Lucie County Utilities, or St. Lucie West Utility District. Generally, St. Lucie County Utilities provides sanitary sewer service to those properties located on North and South Hutchinson Island and within the Holiday Pines neighborhood on the mainland. The County also owns and operates ~~a~~ small wastewater treatment facility, the Sampson subdivision located within Lakewood Park and the Fairwinds Golf Course. Those multi-family residential developments and Planned Unit Developments in the unincorporated County that are not serviced by St. Lucie County Utilities are serviced by their own on-site wastewater treatment plants (WWTP). Most of the single-family home sites in the unincorporated County are served with individual septic tanks. The importance of the municipal regional systems and on-site treatment facilities is noted.

Existing Planning Documents

St. Lucie County completed the Capital Improvement Plan in June 2016 and ~~is anticipating completion of~~ adopted the ~~10~~20-Year Water Supply Facilities Work Plan in ~~September 2018~~ January 2022 which will serves as the overall planning documents for potable water facilities. The two (2) major urban areas of the County, Fort Pierce and Port St. Lucie, have regionalized potable water treatment and distribution systems.

St. Lucie County Utilities (SLCU) is currently developing a regional wastewater treatment and collection system to serve unincorporated areas of the County within their service area. The North County Regional Water Treatment Plant 2 MGD is currently 100% planned with a Construction Manager at Risk (CMAR) contract for 100% construction. Construction is scheduled to be complete in Q4 2026 with the plant being fully operational in Q1 2027. This plant will serve the Indrio Road Corridor, the TCR Airport and surrounding areas.

Holiday Pine Wastewater Treatment Plant was recently expanded to accept an additional 300,000 gallons per day (GPD). It currently has a capacity of 600,000 GPD. This plant is in the procurement stage for further design to increase capacity to 1.2 MGD. This plant will serve the Indrio Road Corridor, the TCR Airport and surrounding areas.

Central County Regional Wastewater Plant (2 MGD Peacock Site) is currently at 60% of plans as part of a Progressive Design Build (PDB) contract. Long lead-time items have been purchased with one well drilled. Construction is scheduled to be completed in Q4 2026 with the plant being fully operational in Q1 2027. This plant will serve areas west of Rangeline Road, including the Oak Ridge Ranches (ORR) communities.

Central County Regional Wastewater Treatment Plant/Water Reclamation Facility (WRF) (2MGD Tropicana Site) is being expanded as part of a PDB contract. There is an existing industrial plant on the site, and it is being modified to accept 0.5MGD of domestic waste. Further, an adjacent 2MGD plant for domestic use only is being designed with plans currently at 60%. This plant will serve areas west of Rangeline Road, including the Oak Ridge Ranches (ORR) communities.

~~The City of Fort Pierce completed a master plan update for water and wastewater in September 2006.~~

Geographic Service Area

Figure 2-1 in the Water Supply Facilities Work Plan outlines general areas of sanitary sewer service for the major regional facilities now operating in the County. The regional facilities servicing unincorporated St. Lucie County are:

- St. Lucie County Utilities (SLCU)
- Fort Pierce Utilities Authority (FPUA)

These facilities are described below.

Other sub-regional franchises also operate in the County, but their area is usually limited to a single development or a relatively small area.

Regional Facilities

St. Lucie County Water and Sewer District*:* The service area of the St. Lucie County Water and Sewer District water and wastewater utilities lies within the St. Lucie County Utilities (SLCU) service area. The St. Lucie County Water and Sewer District service area includes the Holiday Pines subdivision and some additional commercial and residential areas fronting Kings Highway and Indrio Road, North Hutchinson Island, South Hutchinson Island, Central County and South County.

In August 2005, the North Hutchinson Island Utility District, the Airport Utility District, the North County (Holiday Pines) Utility District, the Mid County District, the Indian River Estates MSBU District and the H.E.W. Utility District were consolidated into a single utility district now known as the St. Lucie County Water and Sewer District. As such, the below mentioned North Hutchinson Island Utility District service area is now included in this District. In 2017 the South Hutchinson Island Wastewater District was incorporated in to, and is part of, the Utility District.

The St. Lucie County Water and Sewer District (Holiday Pines) WWTP is a field-erected, precast package plant with a design capacity of ~~0.3 MGD~~ 0.6 MGD. The WWTP is located on a 9.8-acre utility site near the Indian Pines Golf Course. The plant produces reclaimed water which is pumped to the Indian Pines Golf Course and utilized for irrigation purposes. Concentrate from the St. Lucie County Water and Sewer District water treatment plant is also discharged into ~~these~~ ponds at this plant. Sludge from the facility is lime stabilized and hauled to land application sites.

This plant will be expanded by ~~0.3~~ 0.6 mgd, to ~~0.6~~ 1.2 mgd, in 2026-2027. Additional expansions may be considered to provide capacity for anticipated growth. ~~Upon completion of the North County Regional Water Reclamation Facility (WRF), the Holiday Pines WWTP will be decommissioned and replaced with a master lift station to redirect flow to the new facility~~.

North Hutchinson Island: The North Hutchinson Island Utility District was consolidated into the St. Lucie County Water and Sewer District in August 2005. St. Lucie County Utilities owns and operates the North Hutchinson Island wastewater collection system and a 0.85 MGD WWTP. This plant produces reclaimed water that is made available to nearly all of the larger developed parcels on the island.

The upgraded WWTP was placed into service in January 1996. This facility was permitted through the FDEP for 0.50 MGD of treatment capacity. This upgraded WWTP replaced two (2) smaller sub-regional package treatment plants, one at the Bryn Mawr utility site and one at the Sands utility site, in addition to a number of individual WWTPs that served individual residential developments.

South Hutchinson Island: In 1996/1997, the South Hutchinson Island wastewater collection and treatment system was constructed by St. Lucie County to provide central sewer service for the portion of South Hutchinson Island located outside of the City of Fort Pierce. Just as with the North Hutchinson Island service area, this system was intended to eliminate all of the numerous individual wastewater package treatment plants that had been constructed in the absence of a centralized treatment network. Many of these existing WWTPs and all existing lift stations were upgraded or replaced to meet St. Lucie County Utility standards and a force main system was constructed to connect these lift stations to the new WWTP. The WWTP was designed to accommodate build out flows for South Hutchinson Island (based on a build out population of 15,150 residents. The primary method of effluent disposal is reclaimed water irrigation, with backup disposal provided by discharge to the FPL Nuclear Power Plant cooling canal.

This WWTP was permitted for 1.6 MGD and utilizes a conventional plug flow, extended aeration, activated sludge process followed by filtration and high-level disinfection to produce reclaimed water for irrigation. The plant is located on a 19.2 acre, county-owned site approximately two (2) miles south of the FPL Nuclear Power Plant on the west side of A-1-A.

Fort Pierce Utilities Authority (FPUA): According to the September 2006 FPUA Water and Wastewater Master Plan, FPUA operates the Island Water Reclamation Facility with a permitted capacity of twelve (12) MGD (max month average daily flow) on the barrier island. This facility provides service to approximately 49,029 residents throughout their service area and treats an average of 5.62 MGD, less than half of the permitted capacity. FPUA produces reclaimed water which is almost exclusively provided to the Florida Municipal Power Agency for use in cooling towers at the Treasure Coast Energy Center. The Island Water Reclamation Facility also utilizes approximately 300,000 gpd of reclaimed water for wash down and irrigation purposes.

FPUA is in the ~~planning~~ construction process for ~~the construction of~~ a mainland water reclamation facility located in the proximity of the County's landfill. Reclaimed water from the proposed facility may be allocated to the proposed Plasma Arc Gasification Facility planned at the landfill.

The FPUA, via a bulk user agreement with the County, has extended its wastewater service beyond the boundaries of the City of Fort Pierce, and presently serves areas in unincorporated St. Lucie County including the Central Service Area through bulk service.

Privately Owned Utilities with Capacities Greater Than 0.1 MGD Located Within the Unincorporated Area

~~Panther Woods~~Meadowood: ~~Panther Woods~~Meadowood Golf & Country Club owns and operates an on-site WWTP with a permitted capacity of 0.18 MGD but is limited to 0.105 MGD due to the size of the existing chlorine contact basins. The facility serves a current population of approximately 1,040 residents. Treated effluent is supplemented with well water and used to irrigate the 120-acre Panther Woods Golf Course.

Spanish Lakes Country Club: Spanish Lakes Country Club is an adult mobile home community with approximately 1,300 mobile home lots. The community is built out and is home to 3,040 residents. The WWTP serving the Spanish Lakes Country Club is a field-erected, precast concrete package plant with a permitted capacity of 0.160 MGD. Average daily flow is 0.121 MGD. This plant utilizes the extended aeration process to produce a secondary effluent. Effluent disposal facilities include a one-cell percolation pond and a three-cell drainfield. Sludge from this facility is lime stabilized on-site and hauled to land application sites.

The WWTP is adequately sized for the development it serves but is has no excess capacity. There is minimal area available for expansion on the WWTP site.

Spanish Lakes Fairways: Spanish Lakes Fairways is a 1,600-unit (3,200 residents) adult community located in the northwest portion of the St. Lucie County Water and Sewer District service area. The Spanish Lakes Fairways WWTP is a field-erected, precast concrete package plant with a permitted capacity of 0.250 MGD. Average daily plant flow is 0.116 MGD. The plant utilizes the extended aeration process to produce reclaimed water that meets FDEP standards for public access irrigation. The plant consists of two (2) separate treatment trains which include: two (2) 0.127 mg aeration basins with mechanical surface aerators, two (2) rectangular clarifiers, two (2) sand filters, two (2) 0.025 mg digesters and a baffled chlorine contact tank. The primary means of effluent disposal is irrigation on the development's private golf course. A lined pond is provided adjacent to the WWTP for reclaimed water storage. Backup effluent disposal capacity is provided by three (3) percolation ponds at the WWTP site. Sludge from the facility is lime stabilized on-site and hauled to land application sites.

The WWTP is designed to accommodate the community to build out. The maximum flow is 0.142 MGD, or approximately fifty-six (56) percent of the plant's permitted capacity. The excess capacity will be utilized to serve additional phases of the development. There is limited area available for expansion of the wastewater treatment plan.

Package Treatment Plants

There are numerous package treatment plants within the County that make up a significant portion of the wastewater treatment capacity in the County. Many of these package plants are concentrated in the White City and Indrio Road areas. Some of these plants have experienced difficulties in effluent disposal, where disposal systems have failed. The majority of the package plants within the County are under consent order and the Florida Department of Environmental Protection (FDEP) has urged each facility (through their permit renewal process) to seek connection to a central sewer system where available and feasible. As such, these facilities are slowly being connected to the public sewer systems available within the County.

Septic Tanks

Septic tank systems are used principally for the treatment of wastewater from individual residences. In rural areas they are also used for establishments such as schools, motels, rural hotels, trailer parks, housing projects, camps and others. It is impossible to determine the current number of septic tanks in the County since, prior to 1984, the rules and regulations were different and some septic tanks were installed without permits. With the expansion and availability of public utility in the Port St Lucie area, the concentration of septic system use is being decreased by attrition as systems reach the end of their useful life and connection to sewer is mandated by Statute and city policy.

Effluent from septic tanks is normally discharged to a drainfield where it is allowed to percolate into the ground. Soil permeability and depth to the wet season water table are limiting factors on septic tank drainfield performance and may require construction of elevated drainage field grounds to ensure adequate performance. Figures FLU 3a and FLU 3b indicate the general soil types present in St. Lucie County as identified in the Soil Survey of St. Lucie County (U.S. Department of Agriculture, 1980). As this figure indicates, virtually all soils within the County (98.4 percent), excluding a small area located on the Atlantic Coastal Ridge west of the Intracoastal Waterway, have moderate or severe limitations for septic tank drainage fields. Due to the unsuitability of the soil, the St. Lucie County Health Department, which permits all septic tank

system installations in the County, requires 95 percent excavation of the drainfield area and backfilling with acceptable material.

Needs Assessment
The unincorporated County presently has wastewater service provided by three (3) major municipal utilities (FPUA, Port St. Lucie Utilities and SLCU), several medium sized utilities (St. Lucie West and private utilities), small package plants, and septic tanks. This section examines the needs of those areas in the County which are not included in the major or medium sized utilities or in the service areas now identified by those wastewater utilities.

The area of growth in the unincorporated County directly corresponds to the urban service areas for water and sewer service. The area west of this growth area of the County is planned as agricultural.

The most intense development in these areas is expected to occur along the I-95 corridor with concentrations at the Gatlin Boulevard I-95 Intersection, mid-County, and the north County area. Other areas of the unincorporated County exhibiting needs include the Savannah Club area extending north past Tilton Road to Easy Street.

With a few exceptions, all of the package plants were designed to serve a small community, condominium, or commercial area. These plants are designed with a specific capacity in mind, determined by the proposed size of the development and the standards set by the FDEP for flow per unit. Therefore, these developments neither have appreciable excess capacity, nor do they exhibit appreciable needs beyond their initial design capacity. FDEP has urged each of the remaining facilities to seek connection to a central sewer system where available and feasible.

Because these smaller plants require daily attention, tend to wear out with time, and occupy increasingly valuable land, many are candidates for connection to a regional system within the next 20 years. With areas of proliferation of the small plants a County supported regional system would be a viable improvement in the future.

Level of Service Analysis
The St. Lucie County utilities service area is separated into several sub-service area: North Hutchinson Island Service Area from the Fort Pierce Inlet north to the Indian River County Line on the barrier island; South Hutchinson Island Service Area from the Martin County Line north to the Fort Pierce City Limits on the barrier island; the St. Lucie County Water and Sewer District from the Indian River Lagoon to the east, the Indian River County Line to the north, Interstate 95 to the west and St. Lucie Boulevard to the south; and the unincorporated County service areas (north, central and south) as illustrated on Figure 2-1 of the Water Supply Facilities Work Plan. The service areas for FPUA and the City of Port St. Lucie are also depicted on the same Figure.

A level of service for wastewater facilities has been defined by the FDEP at 100 gallons per day per capita (gpcd) of capacity. This makes some allowance for infiltration. Treatment facilities should be planning for expansion when they reach 80 percent of their flow capacity, and under construction at 90 percent of their flow capacity.

The level of service standard for sanitary sewer systems other than those owned and operated by FPUA shall be 100 gpcd.

The LOS standard for those areas of the unincorporated County served by FPUA shall be 110 gpcd (FPUA Master Plan, September 2006).

The population projections for each of the service areas indicates that as St. Lucie County grows there will be a need for additional service capacity within the existing wastewater service facilities. Table 4D-1 provides the projected population within the Service Areas for the years 2020, 2025 2030, and 2040. As this table indicates a significant portion of the County's overall population resides in an area located outside the service area of the St. Lucie County Utilities. Those areas lying outside of the County's service area will be provided wastewater service via the following methods: one (1) of the other two (2) public utility providers - FPUA or City of Port St. Lucie Utilities; an on-site package wastewater treatment plant or via an on-site septic system.

Table 4D-1
St. Lucie County Utilities Service Area - Connected Population Projections, 2020 to 2040

[1]Connected population refers to Equivalent Residential Connections (ERC) connected to North Hutchinson Island wastewater system and assumes 2.2 people per ERC.

Service Area	2020	2025	2030	2040
North County Service Area	1.547	1.944	2.321	2.75
Central County Service Area	1.051	1.277	1.482	1.75
South County Service Area	0.434	0.983	1.165	1.5
North Hutchinson Island	0.788	0.883	0.966	0.85[2]

[1]Wastewater Demand based on Population projections and an assumed per capita flow of 100 gpd/person.

[2]The North Hutchinson Island Wastewater Treatment Plant has adequate capacity for anticipated buildout of the Island and septic to sewer conversions.

~~Table 4D-2 shows the connected wastewater flows, which were Wastewater flow will increase as the population increases within the service delivery area.~~

Capacity Assessment
Many of the WWTPs in St. Lucie County are small package plants intended to serve individual communities, businesses, and condominiums. This type of facility has no significance in a capacity assessment, since it is not large enough to provide service to an expanded service area. The following particular observances are made:

- The FPUA is capable of receiving flow from their expanded service area.
- The South Hutchinson Island WWTP is capable of handling flows at the projected build out conditions (district south of the FPL nuclear power plant).
- ~~Panther Woods~~Meadowood Country Club is underutilized, but is designed to serve a specific development at build out. Although continued development has not been significant, future use of this plant as additional development does take place is likely.
- Reserve Utility Corporation is adequate for present needs, and is planning to expand as development takes place inside The Reserve.
- St. Lucie West is capable of handling growth in its service area and planned to grow with the development.
- Spanish Lakes Country Club Village is built out.
- Spanish Lakes MHP is built out.
- Port St. Lucie Utility Systems Department has adequate capacity for incoming flows and for growth.

The above analysis indicates in general a capacity for growth in the municipal service areas, newer planned developments in the unincorporated County (e.g., The Reserve), and some of the Hutchinson Island communities. Growth in all of the other unincorporated areas of the County will require additional wastewater transport and treatment facilities.

Northern Service Area: The current Holiday Pines facility is an extended aeration concrete package plant with a permitted capacity of ~~0.3~~ 0.6 MGD. Reclaimed water is produced and pumped to the Indian Pines Golf Course for use as irrigation. Onsite ponds are ~~also~~ permitted to dispose up to 0.120 MGD of Reverse Osmosis brine from the Holiday Pines Water Treatment Plant.

Current wastewater flows at the Holiday Pines Wastewater Treatment Facility are nearing capacity. In order to accommodate the population growth needs and wastewater demands into the year 2030 and anticipated growth in the North County area, the following wastewater facility needs and improvements were identified:

- Expansion of the Holiday Pines WWTP to ~~0.6~~ 1.2 MGD ~~with decommissioning upon completion of the new regional facility~~.
- Construct and operate, at a future time to be determined, expansions to the Holiday Pines WWTP in 0.3 – 0.6 MGD phases. ~~a new North County Regional Water Reclamation Facility to be located south of Indrio Road and east of Taylor Dairy Road.~~ This facility shall at construction contain:
  ~~a) Initial capacity of 2 MGD to be determined.~~
  b) Increase capacity to 4 MGD when growth dictates, with provisions to expand to 6 MGD as needed.
  c) Provide equipment capable of treating the wastewater product to unrestricted public access irrigation.
  d) ~~Potentially construct~~ a deep injection well for wet weather disposal of reclaimed water, or implementation of identified alternative beneficial reuse project for disposal of reclaimed water.
  e) Construct a bio-solids dewatering facility at the ~~North~~ Central County Regional Water Reclamation Facility (WRF).
- Provide service to the existing and future developments within the St. Lucie County Water and Sewer District Service Area.

Central Service Area: The County has begun constructing a wastewater treatment plant on County-owned property adjacent to the County Landfill. ~~The 0.035 mgd is ready for operation upon connection of future growth.~~ This Central County Regional Wastewater Treatment Plant/Water Reclamation Facility (WRF) (2MGD Tropicana Site) is being expanded (2026-2027). There is an existing industrial plant on the site and it is being modified to accept 0.5MGD of domestic waste. Further, an adjacent 2MGD plant for domestic use only is being designed with plans currently at 60%. As a backup to this plant an interconnect to FPUA will be constructed to provide service to this area. FPUA has sufficient capacity for the connection during the planning period. The future capacity needs will either be addressed by a future FPUA mainland WWTP or a SLCU WWTP.

South Service Area: The St. Lucie County Parks and Recreation Department owns and operates a wastewater collection and treatment system serving the St. Lucie County Fairgrounds and the County's Emergency Operations Center. The facility has a capacity of 0.0314 MGD. The County is planning to expand and utilize the ~~WWTP at the County Landfill~~ Central County

Regional Wastewater Treatment Plant/Water Reclamation Facility (WRF) (2MGD Tropicana Site) for wastewater in this area.

North Hutchinson Island: SLCU owns and operates a wastewater collection and treatment system that serves the majority of North Hutchinson Island with the exception of approximately 383 single-family homes and the Fort Pierce Inlet State Park. This WWTP has been expanded to accommodate buildout of the Island including those properties currently served through onsite treatment.

South Hutchinson Island: South Hutchinson Island is serviced by St. Lucie County Utilities. The South Hutchinson Island District Wastewater Utility was created under Resolution 07-208. In 1995, St. Lucie County constructed a 1.6 MGD wastewater and reclaimed water facility. This facility is designed to accommodate build out of South Hutchinson Island. The County maintains a bank of capacity that can be transferred to properties within the service area to accommodate development. The County has adopted a policy to transfer capacity through the County Utility Office.

Currently over ninety (90) percent of the total wastewater flow from the South Hutchinson Island District Wastewater Utility service area is collected and treated. The only area not currently connected to the system includes five condominiums in the Island Dunes Complex. This condominium complex is serviced by a private WWTP that produces reclaimed water for irrigation of the golf course. As the overall system on South Hutchinson Island was designed to accommodate the maximum build out within the County's service area on the island, no additional expansions are required or planned within the twenty (20) - year planning cycle. FPUA serves all wastewater customers on South Hutchinson Island within their service area. SLCU serves the Island from FPUA's service boundary south to the Martin County line.

Sanitary Sewer Facility Replacement, Expansion and New Facility Siting: Because of the importance that the provision of sanitary sewer service will play in the development of the County and also significant pressures for the County to enter into the provision of such services, St. Lucie County Utilities adopted a Water and Wastewater Capital Improvement Plan for the unincorporated County in 1992. The Plan was updated in August, 2000, February 2004, and October, 2008. The 2008 Water and Wastewater Capital Improvement Plan Update is used in conjunction with the Comprehensive Plan as a planning tool. These plans address the need for renewal, replacement, facility expansions and siting of new and proposed facilities.

Capital Improvement Projects
The CIE provides details of the planned capital improvement projects, the absence of which will impact the ability of the County to provide the required LOS.

CHAPTER 5

COASTAL MANAGEMENT ELEMENT

Calvin, Giordano & Associates, Inc.
EXCEPTIONAL SOLUTIONS™

DATA INVENTORY AND ANALYSIS

Purpose

The purpose of the Coastal Management Element is to protect human life and to limit public expenditures in areas that are subject to destruction by natural disaster. It is also to plan for, and where appropriate, restrict development activities where such activities would damage or destroy coastal resources.

COASTAL PLANNING AREA

The Coastal Planning Area for St. Lucie County includes unincorporated areas abutting the ocean and estuarine shorelines and the shoreline of the North Fork of the St. Lucie River and its tributaries. Map CST-1 Coastal Planning Area delineates the coastal planning area of the County.

For the oceanic and estuarine systems the eastern boundary is the Atlantic Ocean and the northern and southern boundaries are the respective county lines. The western boundary is delineated at U.S. 1 north of the A1A south causeway and by the Florida East Coast Railroad south of the causeway. Lands within these boundaries that fall within the corporate limits of St. Lucie Village and the Cities of Fort Pierce and Port St. Lucie are not components of the County Coastal Planning Area.

The boundary for the riverine system is the area along the North Fork of the St. Lucie River and its tributaries that falls within the "Coastal High Hazard Area." Pursuant to Chapter 163.3178(2)(h) of the Florida Statutes, the "Coastal High Hazard Areas" (also referred to as "high-hazard coastal areas") is the area below the elevation of the category 1 storm surge line as established by a Sea, Lakes, and Overland Surges from Hurricanes (SLOSH) computerized storm surge model. And again, lands within this boundary that fall within the corporate limits of the Cities of Fort Pierce and Port St. Lucie are not components of the County Coastal Planning Area.

Land Use in the Coastal Area

The existing land uses within the coastal planning area are also shown on Map CST-1. Table 5-1 Coastal Planning Area Existing Land Uses identifies the number of parcels within or containing a portion of the coastal planning area and identifies the existing use on the parcel and the parcel acreage. Overall, the uses can be broadly categorized as commercial (including agriculture), residential, institutional, governmental, Conservation and miscellaneous. Of the total acreage of the parcels, commercial comprises ~~9~~ 7% of the total area, residential is ~~40~~ 31%, institutional is 3%, governmental is ~~40~~ 33%, and there is ~~9~~ 3.9% miscellaneous. ~~At this time nearly 32% of the total area still remains vacant land, the bulk of which is allocated for residential development.~~ 21% of the coastal planning area is conservation.

The future land uses within the coastal planning area identified on Map FLU-1. Future Land Use.

Source: St. Lucie County Planning and Development, ~~2018~~ 2025

St. Lucie County has twenty-one miles of Atlantic Ocean shoreline, much of which is currently undeveloped. Through the efforts of the residents of St. Lucie County and the State of Florida, approximately seven miles of this unincorporated oceanfront are under public ownership. Another two miles of oceanfront property are owned by the Florida Power & Light Company and are to be maintained in their present natural state in conjunction with the operation of the St. Lucie Power Plant facilities. The balance of the remaining oceanfront properties is held in private ownership and available for development activities, which have historically been residential in character. Presently, approximately ~~56%~~ 64.8% of this privately held frontage is developed.

The County has not officially designated any areas as having conditions of slum and blight, but is continuing to monitor aging areas and implementing needed programs and improvements. The County has no Community Redevelopment Agency.

Natural Resources in the Coastal Area

Immediately interior to the coastal barrier island, located between the barrier island and the Atlantic Coastal Ridge, is the Indian River Lagoon (IRL). The IRL is a linear estuarine system that extends along more than a third of Florida's east coast, over 155 miles, from Ponce de Leon Inlet in Volusia County south to Jupiter Inlet in Palm Beach County. Numerous freshwater wetlands and sloughs undergo a transition into riverine systems that connect directly to the IRL. The lagoon interacts with the saline waters of the Atlantic Ocean through the inlets, providing tidal exchange with fresh water discharged into the lagoon from the inland rivers. Along the IRL the associated mangrove and salt marsh communities provide valuable filtration, stabilization and habitat and the seagrass beds provide foraging for manatees. The Conservation Element provides additional details on IRL characteristics and restoration programs.

The St. Lucie River (SLR) is divided into four sections: North Fork, South Fork, Middle Estuary and Lower Estuary. The North Fork of the St. Lucie River falls almost exclusively within the St. Lucie County. The creation of St. Lucie Inlet in 1892 connected the Indian River Lagoon to the Atlantic Ocean at the mouth of the SLR. This project ultimately converted this freshwater tributary to a riverine estuary (freshwater in the upper reaches and saltwater in the middle and lower sections). This unique salinity

gradient changed the natural resources found in the SLR. Because of its geographic location and tidal connection through the St. Lucie Inlet, the North Fork supports high species diversity and serves as an important nursery ground for a variety of fish and wildlife. The Conservation Element provides additional details on SLR characteristics and restoration programs.

Along the ocean shoreline the barrier island contains beach, dune, and coastal strand. The U.S. Fish and Wildlife Service (FWS) *Southeast Florida Multi-Species Recovery Plan* describes the characteristics of these habitats as follows:

> **Beach Dune, Coastal Strand –** The Beach dune and coastal strand communities are the closest communities to the high-energy shoreline. The coastal dune and coastal scrub habitat occupies the immediate Atlantic coast on Hutchison Island. Within this high-energy zone, there are a number of daily, naturally occurring events such as wave action, sand burial, and salt spray. Closest to the coast, the upper beach is regularly disturbed by waves of high tides or storms and regularly re-colonized by driftline annuals and trailing perennials such as railroad vine (*Ipomoea pes-caprae*). Above the reach of annual wave action is the foredune, built by coarse, rhizomatous grasses; primarily sea oats (*Uniola paniculata*), that thrive under constant burial from sand blown off the beach. Beyond the zone of constant sand burial are the dwarfed trees and shrubs of the coastal strand. The species growing in this zone are kept at a low stature by salt spray, which kills the upward-growing leader shoots. Species composition within the coastal strand communities that are located on the Gulf and Atlantic coasts differ. Maritime hammocks are low forests of evergreen broadleaved trees found inland from coastal strand communities on the Atlantic coast. The canopy may be composed of trees with either temperate affinities (*Quercus virginiana, Sabal palmetto, Persea borbonia*) or (usually on more calcareous substrates) of trees with tropical affinities (*Bursera simarouba, Ficus aurea, Coccoloba uvifera*).

Hutchinson Island is recognized as one of the major nesting beaches in South Florida for the federally listed marine turtles. Marine turtles typically nest at night from March through November, with incubation lasting approximately 55 days. Threats to marine turtle nests are both man-made and naturally occurring. Detrimental activities include: physical disturbance of dune systems by development; the placement of physical obstructions on the beach entrapping adults and hatchlings; high raccoon predator populations; the encroachment of the invasive Australian pine trees, whose root mats interfere with nest excavation; or the disorientation of hatchlings from direct lighting of the beaches at night. Natural occurring coastal erosion causing cliffing and, although not frequent, hurricanes causing serious beach erosion or accretion are also detrimental.

The federally listed southeastern beach mouse, which is restricted to sea oats dunes, was formerly abundant from Ponce de Leon (Mosquito) Inlet, Volusia County to Hollywood Beach, Broward County. In South Florida, this species is now restricted to scattered localities in Indian River and St. Lucie counties. Many shorebirds use beaches in South Florida for nesting or wintering or both. Florida is the main wintering ground of the federally threatened piping plover which breeds in northern North America. Formerly seen wintering in all South Florida counties except Martin, this species is now absent from Indian River, Palm Beach, and Broward counties and has become rare in Miami-Dade and Sarasota counties.

The St. Lucie County Mosquito Control District contains 301 square miles. The District manages ~~4000~~ 4,400 acres of coastal mangrove swamps and salt marshes to abate saltmarsh mosquitoes and sandflies. The District staff manages the saltmarsh impoundment areas, conducts research, provides public education and has an acquisition/mitigation/donation program. The District land acquisition and preservation efforts have been successful at helping to acquire Bear Point Sanctuary, Vitolo Family Park, Middle Cove, Blind Creek Park, Oceans Bay, Kings Island, Queens Island, Pepper Park Addition, Harbor Branch Preserve, Wildcat Cove, and the Indian River Lagoon Blueway.

The Bear Point ~~Impoundment~~ Mitigation Bank is an approved 317-acre mitigation bank that is located on County-owned wetlands adjacent to the Indian River Lagoon. ~~It is located within Mosquito Control District Impoundment 1.~~The Bear Point Mitigation Bank offers secure and beneficial environmental credits that help to improve the health of the Indian River Lagoon. It is a St. Lucie County mangrove saltwater marsh that has operated successfully along the Lagoon near Fort Pierce since 2003.

Water Access Facilities

The Recreation and Open Space Element provides specific details on the all public park and recreational facilities. The following table provides a list of those facilities that provide water access.

Table 5.2 Public Facilities Providing Water Access

Facility Name	Location

Estuarine Pollution Conditions

Overall, the natural hydrologic regime of the IRL has been heavily influenced over the years by human activities. Residential and commercial construction in the late 1800s and early 1900s increased the need for inlets to increase commerce. Local interests in 1921 originally constructed the Fort Pierce Inlet. In 1935, the Federal Government took over operation and maintenance responsibility. Since 1978, maintenance dredging of the entrance channel has been conducted on a periodic basis with disposal of the beach compatible dredged material on the adjacent downdrift beach south of the inlet. Construction of a spur jetty attached to the south jetty was completed in 1997. Maintenance dredging of the channel occurred in 1998, ~~then more recently in~~ 2014, and most recently in Spring 2025. During the 1880's a shallower inlet known as the Indian River Inlet previously existed approximately 2.7 miles north of the present Fort Pierce Inlet.

In the 1930s and 1950s much of the lagoon salt marsh was impounded for mosquito control purposes and the Atlantic Intracoastal Waterway was expanded and deepened to allow for more navigable waterways, both of which further altered the hydrology of the IRL. Over 40,000 acres of the salt marsh acreage in the Indian River have been impounded for mosquito control. Many of the 192 impoundments are still isolated from the lagoon. Over 40 percent of the impoundments are privately-owned, another 40 percent are federally-owned and the rest are county-owned. The St. Lucie County Mosquito Control District operates 24 impoundments that cover 4,400 acres of mangrove salt marsh. Most of the impoundments in ~~Indian River and~~ St. Lucie County ~~can~~have been reconnected to the Indian River Lagoon through an intricate series of culverts throughout the perimeter dikes ~~restored through reconnection with the lagoon~~. The ~~County continues to evaluate the~~ St. Lucie County Mosquito Control District continuously monitors the topography, water quality, and the functionality of the managed and unmanaged impoundments.

In the early 1900s, extensive drainage canals were constructed for agricultural purposes, and flood control projects were initiated in the 1930s following several destructive hurricanes. The County has three major primary drainage and flood control canals, the C-23, C-24 and C-25 which are part of the Central and South Florida Flood Control project and are managed by the South Florida Water Management District (SFWMD). In addition, the Fort Pierce Farms Water Control District and the St. Lucie River Water Control District manage numerous secondary canal systems. These canals are solely dependent on rainfall as a source of inflow and are important sources of agricultural irrigation water. Canals C-23, C-24 and the North Fork of the St. Lucie River Water Control District canals drain into the

North Fork of the St. Lucie River and its major tributaries. The C-25 Canal and Fort Pierce Farms Water Control District (Basin 1) canals empty directly into the Indian River lagoon nearly opposite the Fort Pierce Inlet. At this time, all but a small area in southwestern and northeastern St. Lucie County is drained by these primary and secondary canal systems.

Another flood control and navigation project was conducted from the 1920s to the 40s to straighten portions of the North Fork of the St. Lucie River. In the process of straightening the river, the dredged spoil was piled into berms (mounds) along the banks of the new channel. These spoil piles, which can measure up to 50 feet wide and 25 feet tall, block former river bends and oxbows as well as isolate a large portion of the North Fork floodplain. Historically, the slow and meandering path of the North Fork allowed suspended solids to settle out of the water and nutrients to be filtered by vegetation, but the direct river-course does not, which now affects the water quality and sediment loads reaching the estuary.

The North Fork is located in the Eastern Valley region which is composed of long, low narrow ridges ranging from 15 to 30 feet in elevation. The natural topography of the watershed is generally flat with few natural rises. The hydrology of the North Fork and its headwaters was altered in the early to mid 1900s to support the growing demands of development and navigation. This began with a network of agricultural and residential canals and drainages. The canals were primarily designed to address flood control and drainage for land reclamation. Prior to these drainage efforts, the North Fork St. Lucie River (SLR) watershed encompassed 187 square miles. Construction of these drainage canals expanded the watershed to 821 square miles by diverting flows from other areas to the North Fork.

Alteration and expansion of the historic watershed coupled with ecologically-degrading land use practices have set the stage for the current impaired condition of the North Fork and most other SLR watershed basins. Prior to these manmade alterations, wet season rains pooled broadly across the SLR watershed and moved toward the naturally lower elevations surrounding the river. Historic wetland ecosystems facilitated dynamic watershed storage and sheet flow. Reduced movement through natural features kept wetlands flooded and provided for movement of groundwater to the river during the dry season. This made historic wetlands and estuaries less vulnerable to Florida's variable rainfall. Today, much of the watershed runoff from the North Fork drainage basins flows quickly from smaller, residential canals into large canals that cross the coastal ridge instead of being detained, evaporated, cleansed, and held by natural systems. Since most of the development in the County pre-dates the required Best Management Practices for stormwater run-off, un-pretreated run-off is still a non-point source water quality issue for the lagoon

Through the cooperative efforts by a variety of federal, state, county and local governments, as well as non-governmental organizations, efforts have begun to address the long term health and viability of the estuarine lagoon and associated wildlife. A variety of organizations have monitoring and research underway in the IRL and its watershed. The Indian River Lagoon Surface Water Improvements and Management (SWIM) Program has been designed to develop and execute a combination of research and practical implementation projects to protect or restore the environmental resources of the Indian River Lagoon. This joint program, administered cooperatively through the St. John's River Water Management District (SJWMD) and the South Florida Water Management District (SFWMD), has three goals:

- Attain and maintain water and sediment of sufficient quality to support a healthy, seagrass-based estuarine ecosystem;
- Attain and maintain a functioning seagrass ecosystem which supports endangered and threatened species, fisheries and wildlife; and
- Achieve heightened public awareness and coordinated interagency management.

Ten Mile Creek Water Preserve Area. A feature of the *IRL – SWIM Plan* is construction of the Ten Mile Creek Water Preserve Area (WPA). This is one of the largest stormwater and restoration improvement projects to impact the St. Lucie Estuary and River in advance of the federal Comprehensive Everglades Restoration Program (CERP) *IRL - South Plan* proposed projects. The purpose of the Ten Mile Creek WPA is the seasonal or temporary storage of stormwater from the Ten-Mile Creek Basin. The Ten-Mile Creek Basin is the largest sub-basin and contributes the second largest volume of stormwater to the St. Lucie River Estuary. Stormwater is captured in the reservoir and then passed through a polishing cell for additional water quality treatment before being released into the North Fork. Stored water can be released in the drier winter months to augment current insufficient flows. Additional project details are contained in the Conservation Element.

Indian River Lagoon-South Plan. The component of the federal Comprehensive Everglades Restoration Program (CERP), referred to as the *IRL - South Plan* proposes various projects designed for stormwater attenuation to the estuary to control salinity and reduce nutrient and sediment loads, and to provide an additional source of agricultural water supply. Additional project details are contained in the Conservation Element on the following IRL-South projects proposed within St. Lucie County:

- C-23/24 North Reservoir
- C-23/24 South Reservoir
- C-23/24 Stormwater Treatment Area (STA)
- Cypress Creek Complex - Natural Storage and Treatment Area
- C-25 Reservoir and Stormwater Treatment Area
- North Fork Floodplain Restoration
- Muck Remediation
- C-44 Reservoir and Stormwater Treatment Area
- Palmar Natural Storage and Water Quality Area

Spoil Islands

The Atlantic Intracoastal Waterway (ICW), which runs off the mainland coast of the County, runs within the IRL. The ICW is managed and maintained by the Florida Inland Navigation District (FIND), a Special State Taxing District. Maintenance dredging has created spoil islands that run along the eastern edge of the ICW and there are a series of spoil islands in the IRL at the northern end of the County. The Spoil Island Working Group (SIWG), which consists of 12 Federal, State, and County government agencies and 6 non-governmental organizations, was created to implement the Indian River Lagoon Spoil Island Management Plan put forth by the Florida Inland Navigation District (FIND). The Spoil Island Project is a coordinated effort for managing the spoil islands for recreational and environmental interests. Within St. Lucie County, the Indian River Aquatic Preserve office and the St. Lucie County Mosquito Control District have partnered with the SIWG to initiate a full-island enhancement on St. Lucie County spoil island SL3. SL3 is immediately adjacent to the Florida Atlantic University facility at the Harbor Branch Oceanographic Institution.

St. Lucie County has partnered with the Indian River Lagoon Aquatic Preserve, the Florida Oceanographic Society, and Florida SeaGrant to restore an approximately 0.75-acre oyster reef on spoil island SL 18B. This island is south of the Fort Pierce Inlet. The County Erosion District was also a component of a non-federal project that addressed severely deteriorated conditions of the South County shoreline for a renourishment project.

Historic Resources

The Bureau of Archaeological Research within the Florida Office of Cultural and Historic Preservation maintains the Florida Master Site File (MSF); a database that contains information on archaeological and historic resources in Florida. The state MSF also contains those sites listed on the National Register that are located in the County's coastal planning area.

Infrastructure in the Coastal Area
Significant infrastructure in the coastal planning area includes A1A and A1A the north and south causeways, U.S. 1, Indian River Drive and Old Dixie Highway north of the Port of Fort Pierce. The County provides potable water to North Hutchinson Island, but the Martin County and the Fort Pierce Utility Authority (FPUA) provides potable water to South Hutchinson Island. The County operates a regional wastewater treatment plant on North Hutchinson Island and one on South Hutchinson Island; they provide wastewater treatment service for approximately 75% of North Hutchinson Island and for all of South Hutchinson Island except the Island Dunes residential development that maintains their own private plant. The Infrastructure Element of this plan provides greater detail on these facilities.

Although not publicly owned, it must be noted that the Florida Power and Light (FPL) nuclear power plant is located in the coastal planning area on South Hutchinson Island. This facility provides a significant amount of the power to the region.

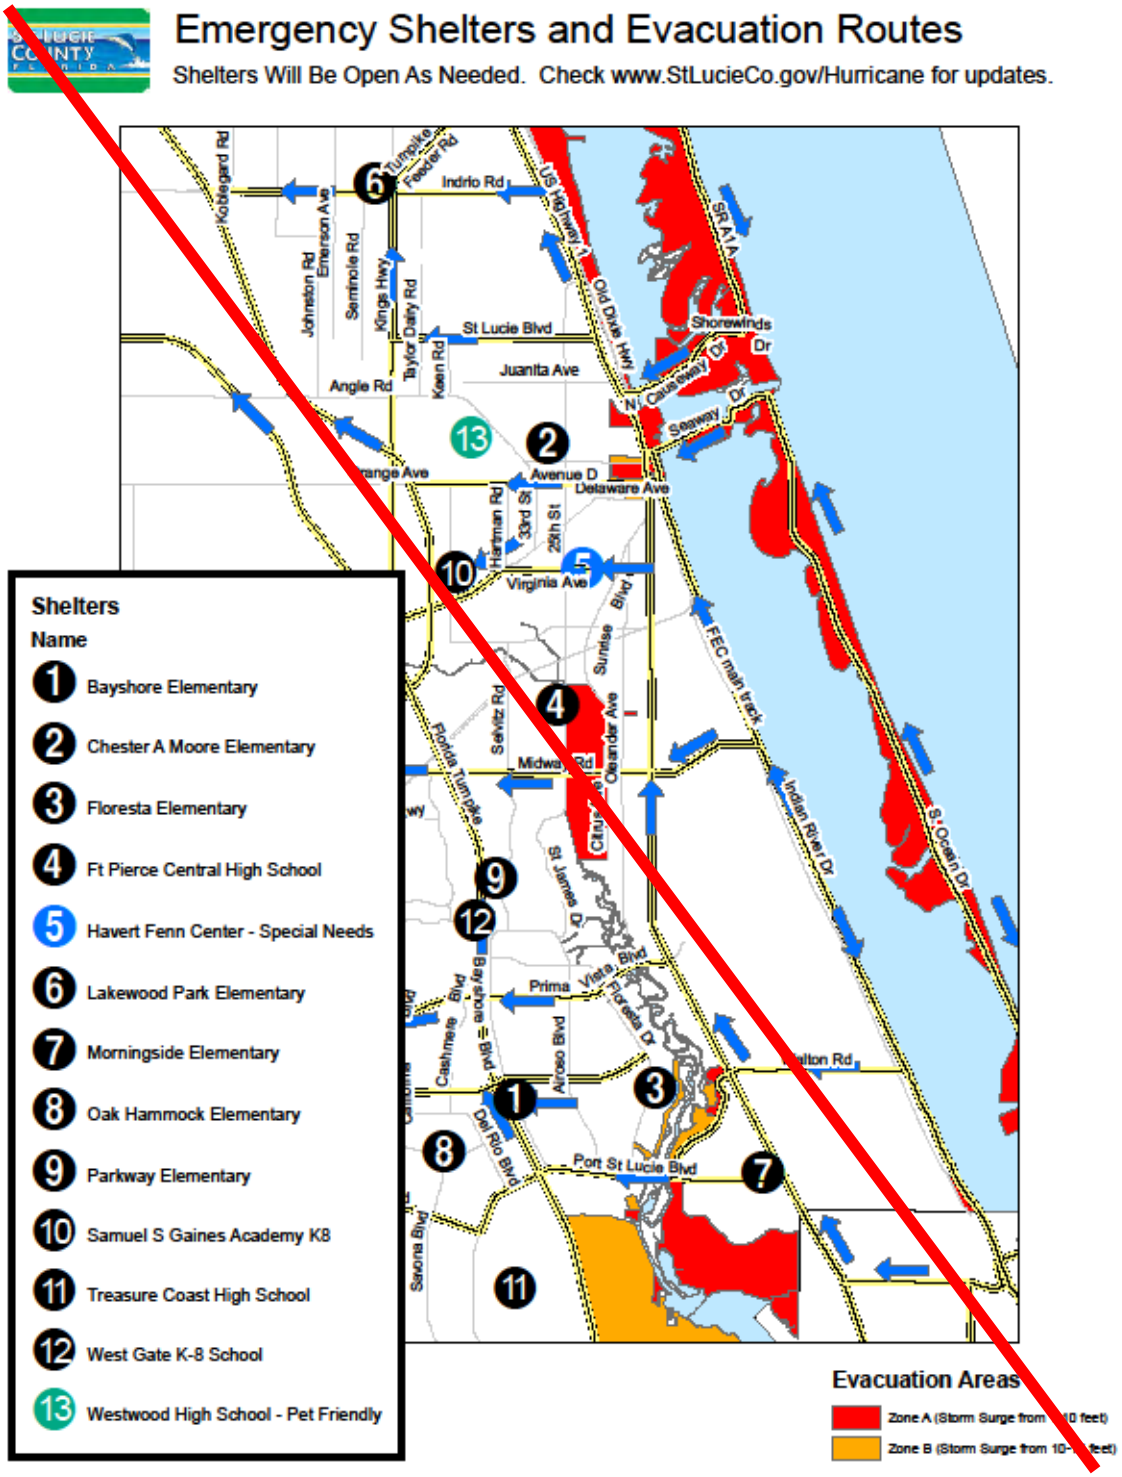
CBRA Zone
The Coastal Barrier Resources Act (CBRA) of 1982 and later amendments, removed the Federal government from financial involvement associated with building and development in undeveloped portions of designated coastal barriers. The County has conveyed concerns to the U.S. Department of Interior as it pertains to their digital mapping pilot project of the CBRA zones within St. Lucie County. The pilot project maps were prepared in 2009 using digital technology and were revised in 2016 to incorporate changes from public input and CBRA criteria. The revised maps will take effect only if they are adopted by Congress through legislation.

COASTAL HIGH HAZARD AREA
Pursuant to Section 163.3178(2)(h), F.S. the “Coastal High Hazard Areas” (also referred to as “high-hazard coastal areas”) means the area below the elevation of the category 1 storm surge line as established by a Sea, Lakes, and Overland Surges from Hurricanes (SLOSH) computerized storm surge model. Map CST-2, Coastal High Hazard Area identifies the Coastal High Hazard Area (CHHA) within the County.

Infrastructure in the Coastal High Hazard Area
The significant infrastructure in the CHHA is the same as in the coastal planning area and includes A1A and A1A north and south causeways, U.S. 1, Indian River Drive and Old Dixie Highway north of the Port of Fort Pierce, as well as the potable water and waste water infrastructure servicing the existing development. The County operates a regional wastewater treatment plant on North Hutchinson Island and one on South Hutchinson Island. The Infrastructure Element of this plan provides greater detail on these facilities.

NATURAL DISASTER PLANNING
As identified in the County’s Local Mitigation Strategy (LMS), the following natural hazards pose a risk to the County: floods, hurricanes/tropical storms, tornadoes, severe thunderstorms/lightning, drought, temperature extremes, muck fires, wildfire/urban interface fires geologic hazards, tsunami, sea level rise, agricultural pest and disease, and erosion. Hurricanes/tropical storms and floods are given the highest priority.

Hurricanes. Hurricanes have the potential to occur from June through November; heavy rainfall, high winds, storm surge and widespread flooding may accompany these storms, as well as a potential for associated tornadoes. During a hurricane evacuation, a significant number of vehicles will have to be moved across the local and regional road network. The quantity of evacuating vehicles will vary depending upon the magnitude of the hurricane, publicity and warnings provided about the storm, and particular behavioral response characteristics of the vulnerable population. The County must be prepared to evacuate highly vulnerable populations on critical routes, often concurrently with evacuees from outside the County. Map CST-3 Evacuation Routes identifies the designated evacuation routes and Figure ~~5~~ 1 Emergency Shelters, identifies the locations of the shelters within the County.



Source: St. Lucie Planning and Development Services, 2018

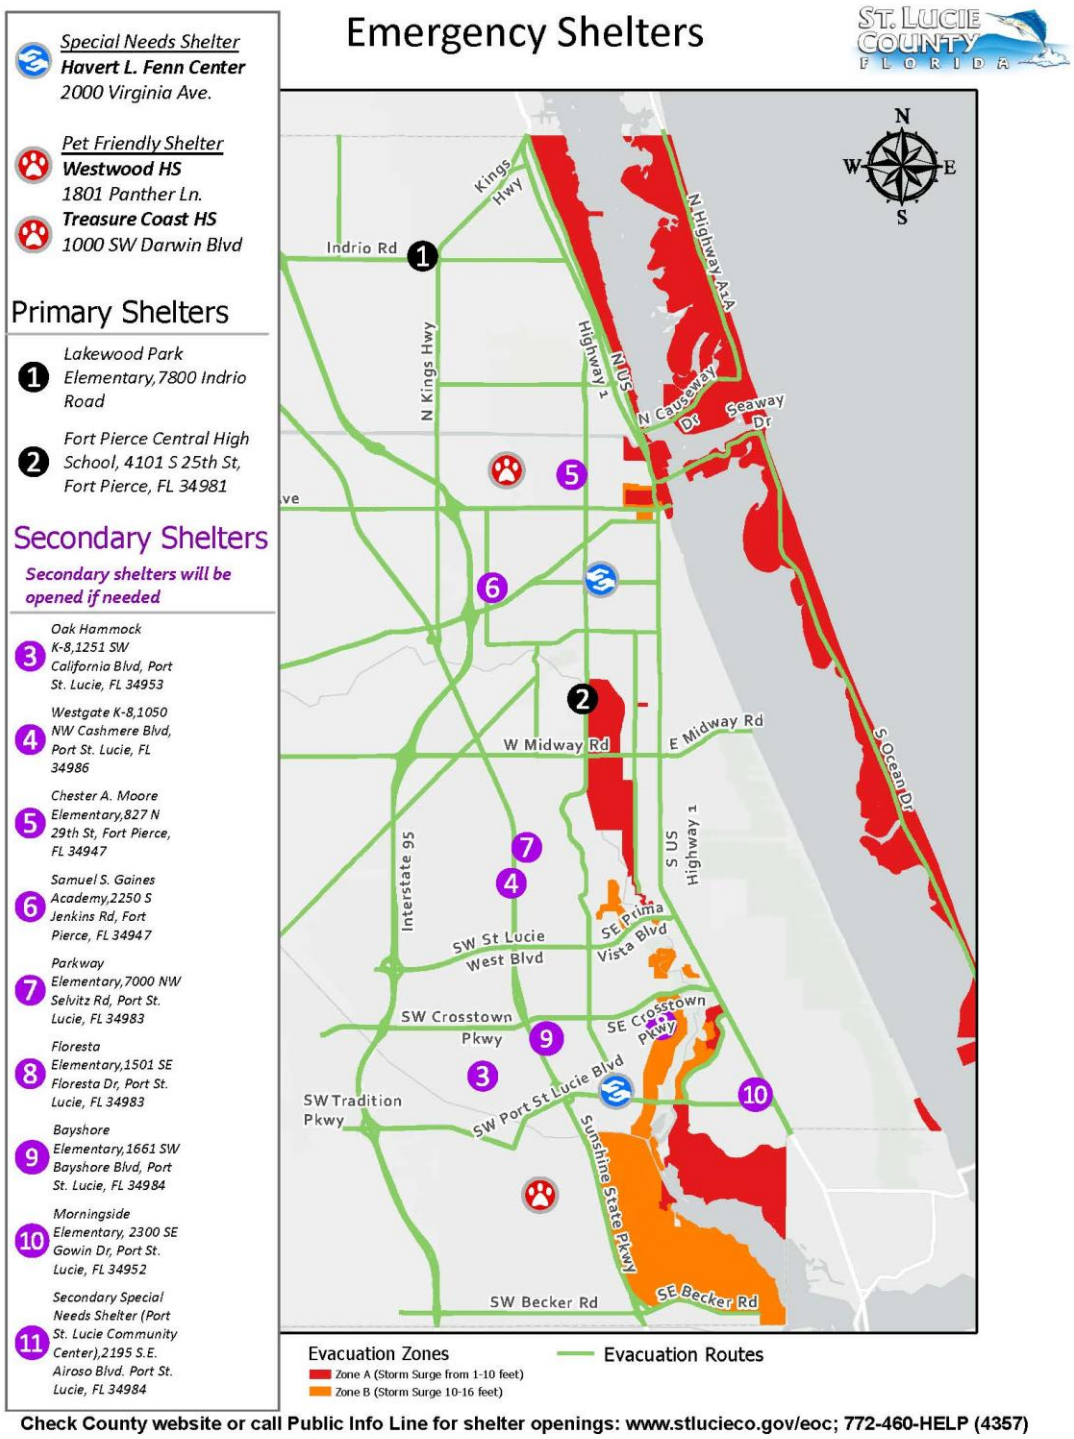


Figure 1 Map of St. Lucie County Emergency Shelters. St. Lucie Public Safety Division, 2025

The St. Lucie County Division of Emergency Management, under the auspices of the Public Safety Department, provides a coordinating point for the effective and efficient management of emergencies that range from minor to catastrophic disasters within St. Lucie County. The Division of Emergency Management coordinates disaster preparedness response, recovery and mitigation programs for County agencies, as well as local, state and federal partners of the Emergency Operations Center (EOC). The Public Safety Department coordinates recovery planning and financial assistance from the State of Florida and FEMA for County agencies. The Public Safety Department and its Divisions conduct outreach efforts to educate EOC stakeholders and residents regarding flood prone areas, evacuation and sheltering through the dissemination of disaster preparedness materials, community presentations, and posting information on the County website and social media platforms.

The County also coordinates sheltering and evacuation operations in partnerships with the School Board, Department of Health-St. Lucie, Community Services, American Red Cross, as well as other agencies. The County maintains 13 shelters which include special needs. The County also strives to maintain or improve hurricane evacuation processes in compliance with State and Federal guidelines.

The County has developed and has in place a Comprehensive Emergency Management Plan (CEMP). The CEMP outlines the framework for St. Lucie County's agencies and whole community partners to prepare for, prevent, respond to, recover from, and mitigate against all hazards that may severely affect the vital community. It is the intent of the CEMP to provide a structure for standardizing plans countywide and to facilitate interoperability among local, state, and federal governments within spans of administration. The County also has in place mutual aid agreements with local, regional, and State agencies. The County participates in the Unified Local Mitigation Strategy and the National Flood Insurance Program. The CEMP addresses recovery processes through a Recovery Plan and a Post-Disaster Redevelopment Plan (PDRP).

The Florida Division of Emergency Management, Florida State Emergency Response Team, Department of Economic Opportunity Bureau of Community Planning, and Department of Transportation in coordination with the Treasure Coast Regional Planning Council have developed the Statewide Regional Evacuation Study for the Treasure Coast Region. This report updates the region's evacuation population estimates, evacuation clearance times and public shelter demand. The study covers Indian River, Martin, Palm Beach and St. Lucie Counties and their municipalities.

The study is revised periodically with the latest updates in 2016. The Technical Data Report (TDR) is the primary document of the Statewide Regional Evacuation Study Program and contains the summary analysis of all other supporting research, survey data and modeling, including St. Lucie County Evacuation Clearance Times for various evacuation levels and scenarios.

Overall the County population grew by 41% between 2000 and 2009 and by ~~10.3% between 2010 and 2016~~ 38.8% between 2010 and 2024 according to BEBR. The County's population includes the City of Port St. Lucie which was the fastest growing City in the nation in 2003. In 2005, the County was the second fastest growing County in Florida. During the same period, the unincorporated population grew by 10% even with numerous annexations of unincorporated areas by the City of Fort Pierce. The County and unincorporated County population will continue grow and reflect development for approved DRIs, the Towns, Villages and Countryside designated area, and infill development. To address the current conditions, the Regional Planning Councils across the State are periodically re-evaluating the assessment methodologies of the evacuation reports

Flooding: The County experiences flooding on a regular basis from severe thunderstorms and tropical storms. The 1992 Stormwater Master Plan document and the County staff have compiled a listing of problem areas that are known to be flood-prone historically. Details are available in the Master Plan document. Overall, the Master Plan confirmed that flooding is far more prevalent in the secondary and local network systems that drain into the primary drainage canal system. The Plan also recognizes that

"throughout unincorporated St. Lucie County, many isolated areas have little or no real drainage improvements and no access to a primary or secondary drainage system." Much of this was created when land was subdivided without proper planning of drainage and drainage outfalls. The County began the process to update the Stormwater Master Plan in 2022, the contract with the County's consultant is ending in December of 2026. However, the County anticipates completion before this date.

Other problem areas lie within the floodplain of natural creeks or streams. Solutions to these types of problems will require extensive engineering analysis and expensive capital improvements, thus establishing a need for a dedicated funding source for Stormwater Management in the unincorporated areas of the County which is established through an MSTU.

Fire and Sinkhole: Fire hazards can be addressed through public education, by requiring fire-wise design concepts, and ensuring water sources are readily available for development in vulnerable areas. In karst-sensitive areas the County can require geotechnical evaluations prior to development approvals.

St. Lucie Nuclear Power Plant

The Florida Power and Light (FPL) St. Lucie Nuclear Power Plant is located in the County on south Hutchinson Island. The population closest, within the 10 mile emergency planning zone (EPZ), to the nuclear power plant is considered at greatest risk of exposure to radiation and radioactive materials in the unlikely event of an emergency. State and local officials, together with FPL, have prepared a detailed emergency plan for people within the 10 mile EPZ of the plant.

Nuclear energy production is monitored closely by the Nuclear Regulatory Commission (NRC), a federal agency. Daily inspections are conducted at the St. Lucie Plant to guarantee compliance. Several identical safety systems are in place so that if one fails, others automatically go to work. The purpose of radiological emergency preparedness is to protect people from the effects of radiation exposure after an accident at a nuclear power plant. Evacuation is the most effective protective measure because it protects the whole body (including the thyroid gland and other organs) from all radionuclides and all exposure pathways. However, in situations when evacuation is not feasible, in-place sheltering is substituted as an effective protective action. In addition, administering potassium iodide is a reasonable, prudent, and inexpensive supplement to both evacuation and sheltering. When the population is evacuated out of the area, and potentially contaminated foodstuffs are interdicted, the risk from further radioactive iodine exposure to the thyroid gland is essentially eliminated.

In the unlikely event of radiation contamination, the environmental impacts could range from modest to catastrophic on a wide ranging, long term scale. Long term commitments at the federal level will be required in the event of a significant emergency. At the local level, the County should continue to endorse the beach nourishment efforts to repair and stabilize the segment of critically eroded beach that is recognized as a threat to the power plant and should consider all current technological advances to address radiation exposure when periodically updating their CEMP.

Port of Fort Pierce

The Port of Fort Pierce Master Plan establishes the St. Lucie County Board of County Commissioners as the overall Port Authority, ensuring compliance with applicable state laws that guarantee the financial feasibility of any publicly funded infrastructure within the port. The Port Sub-Element provides objectives, goals and policies for the Master Plan.

Updates of the Port of Fort Pierce Master Plan continue to be reviewed by the St. Lucie County Board of County Commissioners as the vision for the future development of the Port adapts to changing market conditions and the potential for sustainable economic development in St. Lucie County. Updates to the Port of Fort Pierce Master Plan were most recently approved by the Board of County Commissioners in 2020. The plan update provides a roadmap for future port development that could adapt to changing market conditions while promoting sustainable economic development. The Master Plan provides

general goals, objectives and policies to encourage commercial and industrial uses. The plan was also written to strengthen local control over the port uses, and provide flexibility to ensure governmental coordination. The Port Master Plan reflects a vision of how the Port could capitalize on its unique potential for diversified maritime and other waterfront uses.

ADAPTATION PLANNING

Florida is one of the most vulnerable areas to the consequences of climate change, particularly rising seas, storm surge ~~and increased hurricane activity~~ and storm severity. Anthropogenic emissions of greenhouse gases through activities such as burning of fossil fuels, land use and land use changes have increased the amount of greenhouse gasses (GHG) into the atmosphere and GHGs are increasing the rate of global temperatures and leading to warming oceans and global glacial melting which is causing sea level rise. ~~Regardless of the underlying causes of climate change, global glacial melting and expansion of warming oceans are causing sea level rise ; although, its extent or rate cannot yet be predicted with certainty.~~ There are many agencies and international organizations that have taken the lead to study, project and report on Sea Level Rise (SLR) and the impacts on coastal communities. The National Oceanic and Atmospheric Administration (NOAA), The United Nations Intergovernmental Panel on Climate Change (IPCC), and NASA are working to inform policy makers at all levels on the potential risks of SLR. The most recent report from NOAA was issued in 2022, *Global and Regional Sea Level Rise Scenarios for the United States,* uses scenario planning to project SLR up to the year 2150 by decade. One of the key findings from this report is the East Coast and Gulf Coast will have the highest SLR compared to the West Coast and Hawaii. Land subsidence is combining "with other coastal factors, such as storms surge, wave effects, rising coastal water tables, river flows, and increased rainfall. The net result will be a dramatic increase in the exposure and vulnerability of the growing population, as well as the critical infrastructure related to transportation, water, energy, trade, military readiness, and coastal ecosystems and the supporting services they provide."

The Southeast Florida Climate Compact, which consists of Monroe, Miami-Dade, Broward, and Palm Beach counties created a Unified Sea Level Projection in 2019 for Southeast Florida.

- Short term: by 2040, sea level is projected to rise 10 to 17 inches above 2000 mean sea level.
- Medium term: by 2070, sea level is projected to rise 21 to 54 inches above 2000 mean sea level.
- Long term: by 2120, sea level is projected to rise 40 to 136 inches above 2000 mean sea level.

Figure 2 shows a graph of the Unified Sea Level Rise Projection with the planning scenarios of Median, Intermediate High, NOAA high, and NOAA extreme.

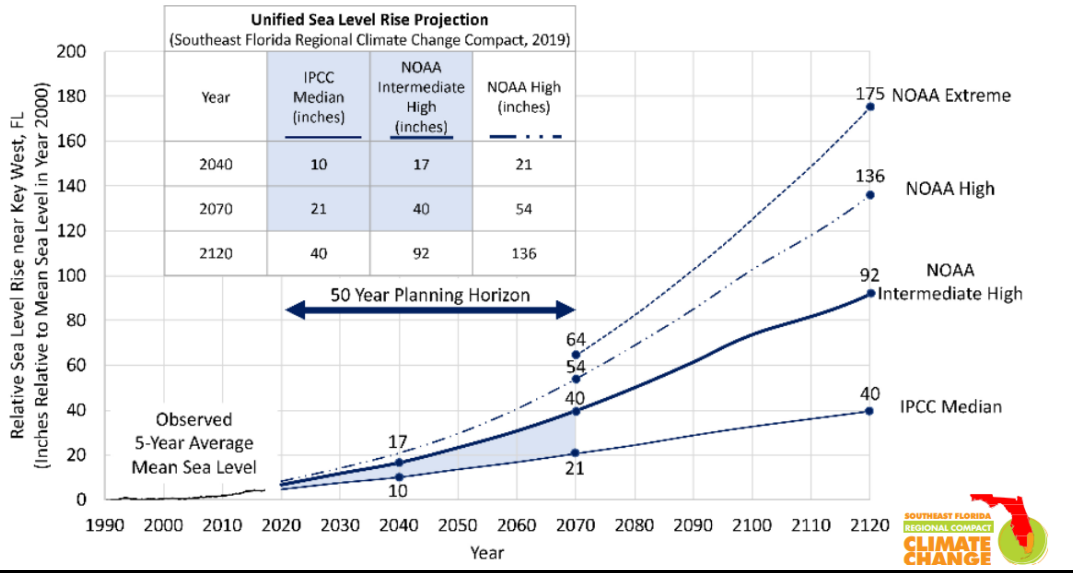

Figure 2 Southeast Florida Climate Compact Unified Sea Level Rise Projections, 2019 Update.

South Florida is prone to ~~both Atlantic and Caribbean~~ hurricanes. ~~The three primary climatic effects of hurricanes are high wind, storm surge, and heavy rain.~~ A changing climate is likely to ~~worsen~~ increase the intensity of hurricanes, leading to stronger winds and heavier rainfall. ~~but precise effects are uncertain. Higher water temperatures in the Gulf of Mexico and Atlantic Ocean may cause more intense hurricanes, which may cause more damage.~~ Damage will multiply as the effects from more intense hurricanes are added to more severe storm surges resulting from higher sea levels.

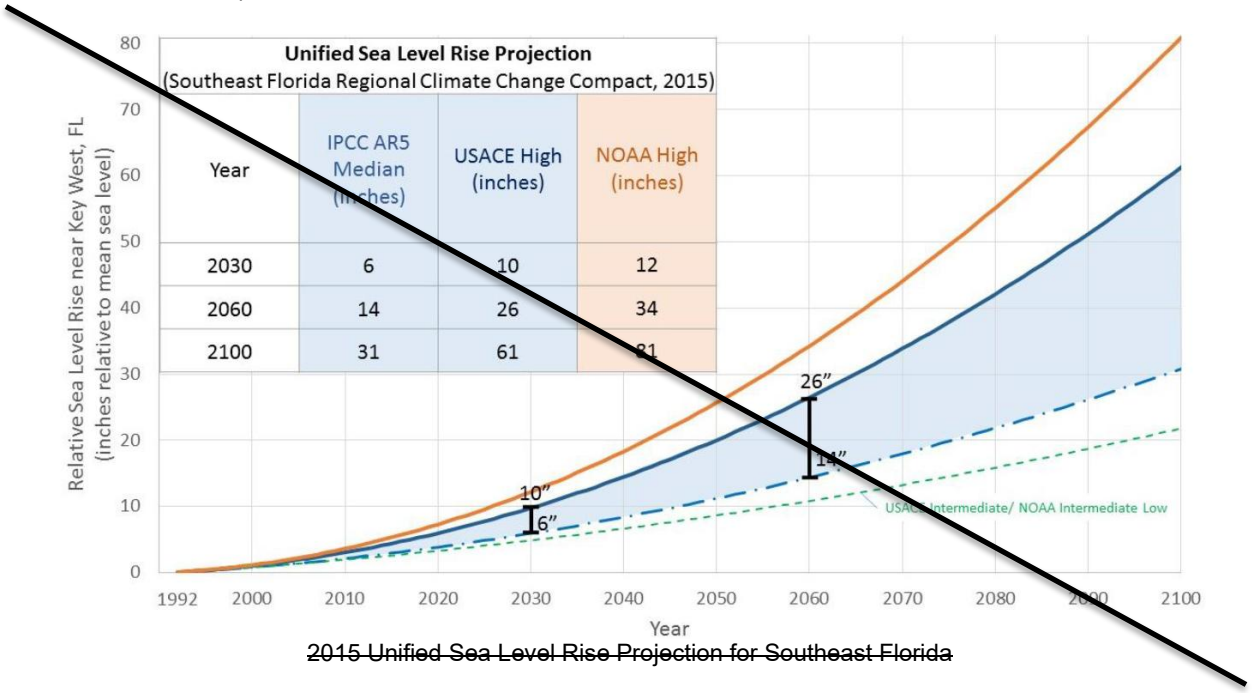
To plan for and address some of these potential vulnerabilities~~, on May 21, 2015, Governor Rick Scott signed SB 1094 into law, which is known as~~ the "Peril of Flood" was signed into State law in 2015 ~~Statute~~. This law requires the consideration of future flood risk from storm surge and sea level rise in the coastal management element of local government comprehensive plans. As a result of SB 1094, Section 163.3178(2)(f)1, Florida Statute, now requires the following:

> *(f) A redevelopment component that outlines the principles that must be used to eliminate inappropriate and unsafe development in the coastal areas when opportunities arise. The component must:*
>
> *1. Include development and redevelopment principles, strategies, and engineering solutions that reduce the flood risk in coastal areas which results from high-tide events, storm surge, flash floods, stormwater runoff, and the related impacts of sea-level rise.*
>
> *2. Encourage the use of best practices development and redevelopment principles, strategies, and engineering solutions that will result in the removal of coastal real property from flood zone designations established by the Federal Emergency Management Agency.*
>
> *3. Identify site development techniques and best practices that may reduce losses due to flooding and claims made under flood insurance policies issued in this state.*
>
> *4. Be consistent with, or more stringent than, the flood-resistant construction requirements in the Florida Building Code and applicable flood plain management regulations set forth in 44 C.F.R. part 60.*
>
> *5. Require that any construction activities seaward of the coastal construction control lines established pursuant to s. 161.053 be consistent with chapter 161.*
>
> *6. Encourage local governments to participate in the National Flood Insurance Program Community Rating System administered by the Federal Emergency Management Agency to achieve flood insurance premium discounts for their residents.*

As noted, the statute includes sea level rise as one of the causes of flood risk that must be addressed in the "redevelopment principles, strategies, and engineering solutions" to reduce flood risk.

~~Adaptation planning is the process of analyzing, selecting and prioritizing measures in response to changing conditions, such as sea level rise. While there is uncertainty in the rate of projected sea level rise, it is anticipated to affect St. Lucie County in the future long-term planning horizon. The National Aeronautics and Space Administration (NASA) Jet Propulsion Laboratory (2015) has reported the average global sea level has risen almost 3 inches between 1992 and 2015 based on satellite measurements.~~

~~The National Oceanic and Atmospheric Administration (NOAA) estimates that sea level rise will increase at a rate of about one-eighth of an inch each year. The Southeast Florida Regional Climate Compact Unified Sea Level Rise Projection for Southeast Florida, suggests that by 2030 the sea level rise could increase by 6 to 10 inches, and by 2060 increases could reach 14 to 26 inches (above the 1992 mean sea level).~~



~~2015 Unified Sea Level Rise Projection for Southeast Florida~~

~~The Treasure Coast Regional Planning Council's 2005 Sea Level Rise in the Treasure Coast Region report estimates that by 2050 the sea level rise could increase by 5 inches (90 % probability).~~

Sea Level Projection by Year*												
Probability (%)	2025		2050		2075		2100		2150		2200	
	cm	inches	cm	inches	cm	inches	cm	inches	cm	inches	cm	inches
90	7	2.8	13	5.0	20	7.7	26	10.4	40	15.7	53	21.0
80	9	3.6	17	6.6	26	10.1	35	13.9	53	20.8	71	28.1
70	11	4.4	20	7.8	30	11.6	41	16.3	63	24.7	85	33.6
60	12	4.7	22	8.6	34	13.2	45	17.8	72	28.3	99	39.1

30	16	6.3	29	11.3	44	17.1	61	24.1	102	40.1	146	57.6
20	17	6.7	32	12.5	49	19.1	69	27.3	117	46.0	173	68.2
10	20	7.9	37	14.5	57	22.3	80	31.6	143	56.2	222	87.5
5	22	8.7	41	16.1	63	24.6	91	35.9	171	67.2	279	110.0
2.5	25	9.9	45	17.6	70	27.4	103	40.7	204	80.2	344	135.6
1	27	10.6	49	19.2	77	30.1	117	46.2	247	97.2	450	177.3
Mean	13	5.1	25	9.8	38	14.8	52	20.6	88	34.6	129	50.9

*The results of this table is based on using Tables 9-1 and 9-2 of the EPA Report "The Probability of Sea Level Rise" (Titus and Narayanan 1995). Basically, the formula is multiplying the historic sea level rise (2.3 mm/yr) in Southeast Florida (closest point used is Miami Beach, FL, Table 9-2) by the future number of years from 1990 plus the Normalized Sea Level Projections in Table 9-1. In summary, the EPA Report has relied on various scientific opinions regarding sea level changes affected by factors such as radiative forcing caused by both greenhouse gases and sulfate aerosols, global warming and thermal expansion, polar temperatures and precipitation, and the contributions to sea level from Greenland, Antarctica, and small glaciers.

~~Estimated Sea Level Rise for the Treasure Coast Region~~

~~The consequences associated with sea level rise include direct physical impacts such as coastal inundation of inland areas, increased extent of storm surge, increased frequency of flooding in vulnerable coastal areas, increased flooding in interior areas due to impairment of stormwater infrastructure, saltwater intrusion into the aquifer and local water supply wells, and contamination of the land and ocean with pollutants and debris and hazardous materials released by flooding.~~

~~The County's adaptation planning involves reviewing the existing research and data on sea level rise projections and considering its application to scenarios specific to St. Lucie County. The goal is to be better prepared for future changes, to recover quickly from disasters and to adapt to future conditions such as sea level rise.~~

~~The County will need to seek the support of agencies [such as the National Oceanic and Atmospheric Administration (NOAA), U.S. Geological Survey (USGS), Environmental Protection Agency (EPA), Federal Emergency Management Agency (FEMA), the U.S. Department of Interior, the U.S. Army Corps of Engineers (ACOE), Florida Department of Environmental Protection (DEP)] as well as universities and not-for-profit organizations to coordinate the updating and the analyzing of data regarding potential changes in climate change vulnerability.~~

~~Another important effort will include, promoting public awareness of addressing climate impacts, so the community will become more resilient, and the economic benefits derived from these actions. Actions taken to reduce risk may lead to a reduction in storm-related business interruption across a variety of important coastal industries such as vessel maintenance and repair, tourism, recreation, seaports and ocean transportation, and fishing industries. Additionally, the actions taken to reduce risk may also lead to a reduction in potential future residential property damage and public infrastructure damage.~~

~~Sea level rise projections are being reviewed for planning purposes and can aid in understanding potential vulnerabilities and to provide a basis for developing risk informed adaptation strategies for the county.~~

~~Using data from sources such as the NOAA, the Treasure Coast Regional Planning Council, the EPA, Sea Grant Florida, and other Federal and State resources, St. Lucie County is assessing the possible scenarios and concerns involving sea level rise. Specifically, the County reviewed the Florida Sea Level Scenario Sketch Planning Tool viewer which was created by the University of Florida GeoPlan Center.~~

In 2021, the State of Florida established the Resilient Florida program through Florida Statute (F.S.) Section 380.093 acknowledging "the State is particularly vulnerable to adverse flooding resulting from increases in frequency and duration of rainfall events, storm surge from more frequent and severe weather systems, and sea level rise, and that such adverse impacts pose economic, social, environmental and public health and safety challenges to the State" (St. Lucie County Regional Resilience Vulnerability Assessment, 2025). This program set statewide requirements for sea-level rise and Flooding Vulnerability Assessment. The state statute also requires the Florida Department of Environmental Protection (FDEP) and the regional Water Management Districts to develop annual sea-level rise and Flood Resilience plans.

St. Lucie County was awarded a Resilient Florida grant to develop a short- and long-term Resilience Plan. The plan starts with a Resilience Vulnerability Assessment (RVA) that is still underway and takes "a local, data-driven approach to evaluate the vulnerability of community-wide assets to the risks posed by flood impacts from sea-level rise, and extreme rainfall and storm surge events" (SLC RVA, 2025). The RVA will form the foundation for the Regional Resilience Plan which will outline how the region can become more resilient in the face of weather-related stressors and identify funding sources to harden critical infrastructure, community resources and cultural and historic resources.

The flood hazards that the RVA focuses on per F.S. Section 380.093

- Extreme rainfall – focusing on flash flooding caused by increased intensity and duration of precipitation events in low lying areas.
- Sea-level rise – Due to warming of the climate and the oceans melting the ice caps.
- High tide flooding – a consequence of rising sea levels, involves the recurrent inundation of low-lying areas by tidal water during high tides.
- Storm surge – an abnormal water level rise generated by a storm over and above the predicted astronomical tide.
- Compounding flooding – occurs when multiple causes of flooding coincide simultaneously or subsequently within a short period of time, such as tidal, storm surge, and rainfall induced flooding, intensified by sea level rise.

~~The current Comprehensive Plan update has two planning periods: a 5~~ 10-year period, ~~ending FY 2023 (short term), and a 20-year period, ending FY 2040 (long term). Through the University of Florida GeoPlan Center GIS mapping tool, the County reviewed ACOE and NOAA high sea level rise projections for the year 2040 for consistency with the comprehensive plan long term planning horizon.~~

~~The Florida Sea Level Scenario Sketch Planning Tool viewer was used to provide the following depictions of potential sea level rise scenarios. The depictions compiled for this document are provided for informational and discussion purposes only. This information is not intended, nor can it be relied upon, to create any rights enforceable by any party in litigation with the United States.~~

~~In reviewing the resulting map outputs, it appears the County has to date, effectively implemented development and redevelopment principles to guide development from potential inundation areas along the river. Additionally, the County and State have acquired significant lands along the barrier islands~~

~~which provide protection from the impacts of sea level rise and limit the private exposure to the future potential vulnerabilities. The barrier islands are some of the most vulnerable lands subject to impacts of sea level rise. These narrow areas have significant value and development resulting from both public and private investment, and are of local, regional and state importance in terms of tourism, recreation, and marine industries. These areas may be the focus for future vulnerability analysis and adaptation and protection strategies.~~

~~It should be noted that~~ there ~~may be~~ ~~portions of SR A1A on the barrier islands that may be~~ are ~~impacted by rising seas. The County will need to continue to coordinate with Florida Department of Transportation to identify vulnerable/at risk transportation infrastructure in the County. The County will need to exchange data regarding locally specific vulnerable areas and land use strategies/policies with the Florida Department of Transportation, the~~
~~U.S. Department of Transportation and the Federal Highway Administration to plan for future transportation system improvements. This may include enhanced stormwater management requirements and resurfacing requirements for certain transportation segments.~~

~~Future efforts may include applying to Florida Department of Environmental Protection for funding and technical assistance to assess the vulnerabilities to projected increases in coastal flooding and erosion and to develop strategies to make affected areas more resilient.~~

According to St. Lucie County's RVA, the methodologies used conform with Section 380.093, F.S., the RVA modeled multiple future scenarios utilizing GIS-based methods and St. Lucie County's multiple assets. The modeling contains present day conditions and planning scenarios for 2040, 2070, and 2100 and incorporates assessments of 25- and 100-year storm events. When assessing exposure to high tides, "a coastal hydrology SLR modeling approach (NOAA 2017b) also known as the Bathtub Model was used to evaluate vulnerability to SLR inundation with an added two feet to account for SLR in combination with the latest version of ArcGIS Pro which mapped the extent of tidal flooding. These maps also identify low lying areas with similar elevation that are not tidally connected according to elevation surface but may still be vulnerable to flooding, especially if they connect to other tidal systems via stormwater conveyance or some other type of groundwater/surface water connection not captured within elevation data." (SLC RVA, 2025).

The results from the scenario modeling presented in Figures 3-10 below show that the County is projected to see between 1-4 feet of inundation by 2040 during a 25-year storm with 24hr of rainfall. Compound this flooding with a Category 3 storm surge and the County could potentially see 8 feet of inundation on the coast and around the St. Lucie River.

This information from the RVA, can now be used to inform a regional Resiliency Plan and grant applications to help fund infrastructure projects in improve the County's resiliency to flooding and storm surge.

CHAPTER 6

CONSERVATION ELEMENT

DATA, INVENTORY AND ANALYSIS

Calvin, Giordano & Associates, Inc.
EXCEPTIONAL SOLUTIONS™

CONSERVATION ELEMENT

DATA INVENTORY AND ANALYSIS

PURPOSE

The purpose of the Conservation Element is to promote the conservation, appropriate use, and protection of natural resources in the County. A conservation Element is required by Florida Statute (section 163.3177, F.S.). This analysis will cover the general characteristics of the climate and the land, air quality and the atmosphere, local ecosystems, water resources, natural flood plains, important resources for commercial and recreational uses and climate resilience planning.

NATURAL ENVIRONMENT

Climate

~~For St. Lucie County, the Southeast Regional Climate Center has data collected from the City of Fort Pierce that identifies from 1901 to 2012, the~~ The average annual maximum temperature is 82.1 F° and the average annual minimum temperature is 64.7 F°. The average annual total precipitation is 52.36 inches. Precipitation is not distributed evenly throughout the year. Precipitation ranges from an average monthly low of 2.17 inches in December, to 7.79 inches in September. Precipitation is heaviest from June through September; with nearly half of the annual rainfall occurring during these four months. No snowfall has been reported during this recording period.

Thunderstorms are common during the summer months and many of these thunderstorms are accompanied by intense lightening. Hurricanes~~, much less frequent occurrences,~~ have the potential to occur from June through November; heavy rainfall, high winds, ~~and~~ widespread flooding, and tornadic activity can accompany hurricane events. ~~may accompany these storms. Records identify that major events occurred in 1928 and 1949. This was followed by a relatively inactive period during the 1950s when Hurricane King, a minor event, occurred~~. These average conditions are not expected to remain constant. South Florida, St Lucie County included is now experiencing impacts of extreme weather events caused by an upward trend of global surface temperature which has been dramatically accelerated by carbon emissions from manmade sources. These impacts include sea-level rise, storm intensification, increased frequency and longer lengths of days with extreme heat, rain bombs, and inland inundation. Since 2022, South Florida has been breaking high temperature records and 2023 was one of the hottest on record across the globe. ~~In 2004 Hurricane Francis with 105 MPH winds made land fall on September 5th which was followed by Jeanne with 120 MPH winds on September 26th; both storms caused significant damage to the area. Hurricane Wilma, with 105 MPH winds, passed to the south on October 25, 2005, causing moderate damage. Tropical Storm Fay passed to the northwest on August 20, 2008 with heavy rainfall causing flooding to many locations. In October of 2016 Hurricane Matthew passed offshore impacting shorelines and on September10th of 2017 Hurricane Irma passed 80 miles to the west while moving north with 85 MPH hour winds and heavy rainfall.~~

Soils

Map FLU-3a and 3b Soils, provides the general distribution of soils in the County as presented in the U.S. Department of Agriculture, Natural Resources Conservation Service, Soil Survey Geographic (SSURGO) Database for Florida - November 2017.

Table 6-1 Soils, provides a list of the soils mapped by the NRCS. Please note, the table and map do not include water bodies, frequently flooded areas, and urban lands or other areas where natural soil coverage is not evident or present.

Physiography
St. Lucie is an Atlantic Ocean coastal County located slightly south of the middle of the Florida peninsula. The County is composed of a mainland component, an estuarine lagoon, and a barrier island that is intersected by the Fort Pierce inlet. The U.S. Fish and Wildlife Service (FWS) identifies the County as a part of an Upper East Coast sub-region, which includes Indian River, Martin and the northern portion of Palm Beach County. This sub-region covers approximately 2,174 square miles and has an average elevation of 20 feet. The rise and fall of changing sea levels formed this area which is characterized by three east to west physiographic zones: (1) the Atlantic Coastal Ridge, (2) the Eastern Valley, and (3) the Osceola Plain. The Atlantic Coastal Ridge, bordered on the east by the Atlantic Ocean and on the west by the Eastern Valley, consists of relic dune ridges formed by wind and wave action along the coastline. Paralleling the east coast, the Ridge varies in width from a few hundred yards to a mile or two, and ranges in elevation from sea level to approximately 100 feet in Jonathan Dickinson State Park, the highest coastal elevation within this sub-region. In general, U.S. Highway 1 and the F.E.C. Railway run along the Atlantic coastal ridge.

Map FLU-4 Topography, identifies the topography of the County. The County is relatively flat with elevations ranging from 0 to 30 feet. The vast majority of the County is at 20 feet. The lowest elevation is found along the coastlines and the St. Lucie River. The highest elevation is along the Atlantic Coastal Ridge and the westernmost lands.

Soil Erosion
Due to the relatively flat topography of the County, and the protection the Barrier Island provides, soil erosion from typical geophysical conditions is generally not a problem in the mainland component of the County. However, soil erosion and sedimentation can be a problem with large scale mining and agricultural operations if recommended Best Management Practices are not followed.

In the 1920's the headwaters of the North Fork the St. Lucie River were dredged for flood control and navigation. Spoil deposited along the newly-created channel isolated both floodplain habitat and oxbows from the original river course. This left canals with steep banks and narrow remains of floodplain habitats degraded by dense stands of non-native vegetation. These altered shorelines with diminished and degraded floodplain are susceptible to erosion and have created sedimentation problems along the North Fork of the St. Lucie River. Restoration projects along the North Fork are proposed within a component of the federal Comprehensive Everglades Restoration Program (CERP) identified as the *Indian River Lagoon - South Plan*.

Beach Erosion. A barrier island is by nature a migrating system and is subject to erosion, especially during storm events. ~~Significant beach erosion occurred in 2004 with the land fall of two major hurricanes in St. Lucie County and erosion occurred along the Atlantic Coast in 2016 from Hurricane Matthew even though it remained offshore.~~ The *Critically Eroded Beaches in Florida Report, ~~2017~~ 2024 Update*, produced by the Florida Department of Environmental Protection (FDEP) Bureau of Beaches and Coastal Systems, identifies 7.6 miles of critically eroded and 7.9 miles of non-critically eroded ocean shoreline in St. Lucie County. The St. Lucie County Summary from the DEP report states:

> There are three critically eroded areas (7.6 miles) and two non-critically eroded areas (7.9 miles) in St. Lucie County. The 2.3 miles of Ft. Pierce Beach (R34-R46) extending south from Ft. Pierce Inlet is critically eroded threatening recreation and development interests. Most of this area is a beach restoration project.
>
> Along central Hutchinson Island is a 6.4-mile segment of non-critically eroded shoreline (R46-R80), which lacks any current threat. Immediately to the south is a 1.9-mile eroded segment (R80-R90.3) that threatens the St. Lucie Nuclear Power Plant facilities, limited development, and recreation interests at the Walton Rocks Park. Continuing to the south

from this location is another 1.5-mile eroded segment (R90.3-R98) with no current threat. The southern 3.4 miles of the county shoreline (R98-R115+1000) is critically eroded with development interests threatened.

The Bureau defines critically eroded as a segment of the shoreline where natural processes or human activity have caused or contributed to erosion and recession of the beach or dune system to such a degree that upland development, recreational interests, wildlife habitat, or important cultural resources are threatened or lost. Critically eroded shoreline may also include peripheral segments or gaps between identified critically eroded areas which, although they may be stable or slightly erosional now, their inclusion is necessary for continuity of management of the coastal system or for the design integrity of adjacent beach management projects.

The construction of the Fort Pierce Inlet, a federally maintained deep-water inlet, and subsequent construction of the jetty interrupted the natural migration patterns of the barrier island and exacerbated soil erosion and accretion problems particularly within the City of Fort Pierce along Fort Pierce Beach. This portion of the shoreline is part of the ongoing beach nourishment program authorized by the US Army Corp of Engineers (USACE).

The federal inlet creates a long-term sand deficit south of the inlet; which (if not abated) negatively impacts all of the County's southern beaches.

Currently, the County performs active beach management within the 4.7 miles of FDEP's critically eroded shoreline. The federal Fort Pierce Shore Projection Project includes actively nourishing the initial 1.3 miles of beach immediately south of the Fort Pierce Inlet, and the federal St. Lucie County, Florida, Coastal Strom Risk Management Project (CSRM) includes nourishing the southern 3.4 miles of St. Lucie County's Atlantic shoreline.

Commercially Valuable Minerals

Many areas of central and southern Florida have been utilized to mine sand and lime rock materials for road building and development activities. Other than sand or lime rock substrate, there are no commercially valuable minerals in the County.

Floodplains

The National Flood Insurance Program administered by the Federal Emergency Management Agency (FEMA) has identified the following flood zones within the County. Table 6-2 Federal Emergency Management Agency Flood Zones, identifies and describes the flood zones.

Table 6-2 Federal Emergency Management Agency Flood Zones

Zone	Description
A	An area inundated by 1% annual chance flooding, for which no base flood elevations (BFE's) have been determined.
AE	An area inundated by 1% annual chance flooding, for which BFEs have been determined.
AH	Areas with a 1% annual chance of shallow flooding, usually in the form of a pond, with an average depth ranging from 1 to 3 feet. Base flood elevations derived from detailed analyses are shown at selected intervals within these zones.
AO	River or stream flood hazard areas, and areas with a 1% or greater chance of shallow flooding each year, usually in the form of sheet flow, with an average depth ranging from 1 to 3 feet. Average flood depths derived from detailed analyses are shown within these zones.

Table 6-2 Federal Emergency Management Agency Flood Zones	
VE	Coastal areas with a 1% or greater chance of flooding and an additional hazard associated with storm waves. Base flood elevations derived from detailed analyses are shown at selected intervals within these zones.
X	Areas determined to be outside the 500-year floodplain, determined to be outside the 1% and 0.2% annual chance floodplains. Areas of minimal flood hazard from the principal source of flood in the area.
X Shaded	Areas of 500-year flood; areas of 100-year flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 100-year flood. An area inundated by 0.2% annual chance flooding.

Map FLU-5 FEMA Flood Zones, locates the boundaries of the flood zones within the County. Nearly all the mainland components of the County is an X zone, and the majority of the barrier island is an AE and VE zone. Existing land uses found within the floodplain and flood zones are illustrated in the Future Land Use Element.

Map FLU 5a locates the Base Flood Elevations (BFE) throughout the County in conjunction with the FEMA Flood Zones. The lowest elevations are located in the Coastal Region and along The St Lucie River.

Land use as it relates to the discharge of stormwater and the use of natural drainage are regulated through the South Florida River Water Management District. The Florida Building Code regulates construction as it relates to flood zones along with the County Flood Damage Prevention regulations.

Air

Based upon ambient air quality monitoring, conducted by the Florida Department of Environmental Protection (FDEP) and documented in the *2012 Florida Air Monitoring Report*, St. Lucie County, is an attainment area for the six major air contaminants: carbon monoxide (CO), lead (Pb), ozone (O_3), nitrogen dioxide (NO_2), particulate matter (PM), and sulfur dioxide (SO_2). The attainment area designation indicates that the concentrations of major pollutants are within the acceptable limits set by the Florida Department of Environmental Protection and the U.S. Environmental Protection Agency. Air quality is a matter that must be addressed at a regional level requiring the local, County and regional entities to coordinate air quality maintenance and improvement efforts. St. Lucie County does not have an air monitoring program, the County relies on the State monitoring program mentioned above.

Water Resources

Map FLU-6 Water Bodies, locates the significant natural water bodies within the County. The County has significant marine, estuarine and freshwater resources. Along the east coastline is the Atlantic Ocean.

Indian River Lagoon. Immediately interior to the coastal barrier island, located between the barrier island and the Atlantic Coastal Ridge, is the Indian River Lagoon (IRL). The IRL is a linear estuarine system that extends along more than a third of Florida's east coast, over 155 miles, from Ponce de Leon Inlet in Volusia County south to Jupiter Inlet in Palm Beach County. Numerous freshwater wetlands and sloughs undergo a transition into riverine systems that connect directly to the IRL. The lagoon interacts with the saline waters of the Atlantic Ocean through the inlets, providing tidal exchange with fresh water discharged into the lagoon from the inland rivers.

The IRL provides a higher species diversity than any other estuary in North America. Due to the distinct characteristics of this system, portions of the IRL have been designated as Aquatic Preserves. The *Vero Beach to Fort Pierce Aquatic Preserve* extends from the southern Vero Beach corporate limit

(Indian River County) to the north A1A bridge at Fort Pierce (St. Lucie County), and the *Jensen Beach to Jupiter Inlet Aquatic Preserve* extends from the southern corporate limits of Fort Pierce (St. Lucie County) south (through Martin County) to Jupiter Inlet (West Palm Beach County). The *Vero Beach to Fort Pierce Aquatic Preserve* is 12 miles long and encompasses 11,000 acres. The *Jensen Beach to Jupiter Inlet Aquatic Preserve* is 37 miles long and encompasses 22,000 acres. Both Aquatic Preserves were adopted under Florida Statutes, Sections 258.35 – 258.46 by the State of Florida on October 21, 1969 and are managed by the Florida Department of Environmental Protection, Office of Coastal and Aquatic Managed Areas. The Preserves are listed in the Aquatic Preserve Rule, Chapter 18-20 Florida Administrative Code, and have also been designated as Outstanding Florida Water pursuant to Chapter 62.302.7 F.A.C. Additionally, a portion of the *Vero Beach to Fort Pierce Aquatic Preserve* designated as Class II waters afforded protection for shellfish propagation or harvesting. The IRL is one of only twenty-eight estuaries in the country in the Environmental Protection Agency's National Estuary Program.

A variety of organizations have monitoring and research underway in the IRL and its watershed. The Indian River Lagoon Surface Water Improvements and Management (SWIM) Program has been designed to develop and execute a combination of research and practical implementation projects to protect or restore the environmental resources of the Indian River Lagoon. This joint program, administered cooperatively through the St. John's River Water Management District (SJWMD) and the South Florida Water Management District (SFWMD), has three goals:

- Attain and maintain water and sediment of sufficient quality to support a healthy, seagrass-based estuarine ecosystem;
- Attain and maintain a functioning seagrass ecosystem which supports endangered and threatened species, fisheries and wildlife; and
- Achieve heightened public awareness and coordinated interagency management.

St. Lucie River. The St. Lucie River (SLR) is divided into four sections: North Fork, South Fork, Middle Estuary and Lower Estuary. The North Fork of the St. Lucie River falls almost exclusively within the St. Lucie County. The creation of St. Lucie Inlet in 1892 connected the Indian River Lagoon to the Atlantic Ocean at the mouth of the SLR. This project ultimately converted this freshwater tributary to a riverine estuary (freshwater in the upper reaches and saltwater in the middle and lower sections). This unique salinity gradient changed the natural resources found in the SLR. Because of its geographic location and tidal connection through the St. Lucie Inlet, the North Fork supports high species diversity and serves as an important nursery ground for a variety of fish and wildlife. The river now serves as an important brooding and nursery ground for migratory fish, such as snook (*Centropomus spp.*), snapper (*Lutjanus spp.*), and opossum pipefish (*Microphis brachyurus lineatus*) that require estuarine and freshwater to complete their lifecycle. The river is also an especially important habitat for the juvenile phases of commercially important species such as blue crabs, snook, snapper, drum and shrimp. Rare tropical peripheral fish species, such as gobies, sleepers, and pipefishes, are also found in the upper reaches of the North Fork and the two headwaters - Five Mile Creek and Ten Mile Creek.

The North Fork St. Lucie River is part of Florida's Save Our Rivers Program. Additionally, a portion of the North Fork was designated as an aquatic preserve in 1972 and is also designated as Outstanding Florida Water pursuant to Chapter 62-302 F.A.C. The North Fork Aquatic preserve is bounded on the north by Midway Road and extends from Coconut Point in Stuart to Jenkins Point in Palm City just west of the Roosevelt Bridge in Martin County. The eastern and western boundaries of the preserve encompass the state-owned sovereign submerged lands occurring below the mean high-water line to which the state holds title. The preserve is approximately 16 miles long through the natural riverbends and contains approximately 5,000 acres.

The North Fork is located in the Eastern Valley region, which is composed of long, low narrow ridges ranging from 15 to 30 feet in elevation. The natural topography of the watershed is generally flat with few natural rises. The hydrology of the North Fork and its headwaters were altered in the early to mid-1900s to support the growing demands of development and navigation. This began with a network of agricultural and residential canals and drainages. The canals were primarily designed to address flood control and drainage for land reclamation. Prior to these drainage efforts, the North Fork St. Lucie River (SLR) watershed encompassed 187 square miles. Construction of these drainage canals expanded the watershed to 821 square miles by diverting flows from other areas to the North Fork.

Another flood control and navigation project was conducted from the 1920s to the 40s to straighten portions of the North Fork. In the process of straightening the river, the dredged spoil was piled into berms (mounds) along the banks of the new channel. These spoil piles, which can measure up to 50 feet wide and 25 feet tall, block former river bends and oxbows as well as isolate a large portion of the North Fork floodplain. Historically, the slow and meandering path of the North Fork allowed suspended solids to settle out of the water and nutrients to be filtered by vegetation, but the direct river-course does not, which now affects the water quality and sediment loads reaching the estuary.

Drainage Canals. The County has three major primary drainage and flood control canals, the C-23, C-24 and C-25 which are part of the Central and South Florida Flood Control project and are managed by the South Florida Water Management District (SFWMD). In addition, the Fort Pierce Farms Water Control District and the St. Lucie River Water Control District manage numerous secondary canal systems. These canals are solely dependent on rainfall as a source of inflow and are important sources of agricultural irrigation water. Canals C-23, C-24 and the North Fork of the St. Lucie River Water Control District canals drain into the North Fork of the St. Lucie River and its major tributaries. The C-25 Canal and Fort Pierce Farms Water Control District (Basin 1) canals empty directly into the Indian River lagoon nearly opposite the Fort Pierce Inlet. At this time, all but a small area in southwestern and northeastern St. Lucie County is drained by these primary and secondary canal systems.

Alteration and expansion of the historic watershed coupled with ecologically-degrading land use practices have set the stage for the current impaired condition of the North Fork and most other SLR watershed basins. Prior to these manmade alterations, wet season rains pooled broadly across the SLR watershed and moved toward the naturally lower elevations surrounding the river. Historic wetland ecosystems facilitated dynamic watershed storage and sheet flow. Reduced movement through natural features kept wetlands flooded and provided for movement of groundwater to the river during the dry season. This made historic wetlands and estuaries less vulnerable to Florida's variable rainfall. Today, much of the watershed runoff from the North Fork drainage basins flows quickly from smaller, residential canals into large canals that cross the coastal ridge instead of being detained, evaporated, cleansed, and held by natural systems.

The Savannas. A unique freshwater ecosystem is located in a shallow catchment area between the steeper western slope of the Atlantic Ridge and the gentler slope to the eastern uplands. A large portion of this habitat is under public ownership and is referred to as The Savannas. The Savannas Recreation Area, located within the City of Fort Pierce, is utilized as an outdoor recreation area providing camping, hiking, wildlife observation, paddling, boating, fishing, picnic facilities, a greenway trail, and a dog park. The recreation area, managed by the St. Lucie County Parks and Recreation Department, covers 550 acres and contains five distinct biological communities: including pine flatwoods, wet prairie, marsh, freshwater lake and scrub. The 6,877 acre Savannas Preserve State Park is adjacent to the recreation area. The northern extent of this system is bordered by the Indian Hills Recreation Area, which is cooperatively owned and managed by St. Lucie County and the City of Fort Pierce. The 24-acre stormwater pond within the area provides treatment for a 1,242-acre watershed of urban and commercially developed land west of the site, including much of Virginia Avenue. This project implements numerous Best Management Practices (BMPs) to improve the water quality of stormwater

runoff that discharges into the Indian River Lagoon. All three areas provide essential connectivity for St. Lucie County including wetlands and water resources, wildlife and ecotoursim. ~~Future plans for this corridor include the construction of~~ A total of seven (7) segments of the East Coast Greenway, a 3,000-mile greenway trail that runs the Eastern Seaboard from Maine to Key West~~.~~, have been funded by FDOT SUNTrail and are at various stages of development. The St. Lucie Beach Trail (6.3 miles) has been completed along N A1A. The Savannas Recreation Trail Phase 1 (2.61 miles) has been completed The Green River Parkway Trail (5.7 miles) has been completed and the Savannas State Park Trail Gap connecting Midway Road to Walton Road is under construction. Outside of the Savannas, inland freshwater wetlands and swamps also occur throughout the County. Map FLU-7. Wetlands, locates the wetland habitat in the County.

Ten Mile Creek Water Preserve Area. One feature of the *IRL – SWIM Plan* is the Ten Mile Creek Water Preserve Area (WPA). This is one of the largest stormwater and restoration improvement projects to impact the St. Lucie Estuary and River in advance of the federal Comprehensive Everglades Restoration Program (CERP) *IRL - South Plan* proposed projects. This project is situated at the headwaters of the North Fork of the St. Lucie River Aquatic Preserve and the total site is 910 acres. Ten-Mile Creek runs west to east across the northern portion of the site. ~~This project involves the construction of an above ground reservoir with a pump station for filling the reservoir from Ten-Mile Creek and a gated water level control structure for the release of water back to the creek. The total project will consist of a 500-acre reservoir, a polishing cell of roughly 110 acres and an adjoining natural preserve area consisting of scrub habitat and a borrow pit. Based upon existing topography, stored water depths in the reservoir will average ten feet. Total storage capacity will be approximately 5,000 acre-feet. The height of the reservoir levee will range from about 12 to 15 feet above surrounding natural ground.~~

The project was built by the U.S. Army Corps of Engineers in 2006 but did not operate as intended. The project was ultimately deauthorized by the US Army Corps of Engineers and ~~I~~in 2016, the SFWMD initiated a project to repair and improve the security of the reservoir's embankments. ~~Once complete, the 526-acre reservoir will be able to store 2,500 acre-feet of local stormwater.~~ The 526-acre reservoir is able to hold up to 4-feet of water and on average treats 17,444-acre feet of water.

The purpose of the Ten Mile Creek WPA is the seasonal or temporary storage of stormwater from the Ten-Mile Creek Basin. The Ten-Mile Creek Basin is the largest sub-basin and contributes the second largest volume of stormwater to the St. Lucie River Estuary. Stormwater is captured in the reservoir and then passed through a polishing cell for additional water quality treatment before being released into the North Fork. Stored water can be released in the drier winter months to augment current insufficient flows.

Indian River Lagoon-South Plan. The component of the federal Comprehensive Everglades Restoration Program (CERP), referred to as the *IRL - South Plan* proposes the following projects within St. Lucie County. The IRL-South Final Project Implementation Report describes these projects as follows:

> **C-23/24 North Reservoir.** This feature is located on the west side of C-24 between control structures G-81 and G-79 and includes a 4,399-acre aboveground reservoir with a maximum depth of 12-feet. The total storage capacity of the reservoir is approximately 48,500 acre-feet. The purpose of this component is to capture local runoff from the C-23 and C-24 Basins. The pump station will be designed to provide up to 900-cubic feet per second (cfs) removal rate from C-24 canal. This water can then be routed to the C-23/24 STA or returned to C-23 or C-24 when there is a need to reclaim storage capacity or meet a water supply demand. The component is designed for stormwater attenuation to the estuary to control salinity and to provide an additional source of agricultural water supply. This component is also expected to provide incidental water quality benefits by

reducing loads of nutrients, pesticides, and other pollutants. This project is in the design phase and has been fully funded through construction under the Infrastructure Investment and Jobs Act.

C-23/24 South Reservoir. This feature is located north and west of C-23 between control structures G-78 and G-79 and includes a 4,155-acre aboveground reservoir with a maximum depth of 12-feet. The total storage capacity of the reservoir is approximately 43,400 acre-feet. This component functions very much like the C-23/24 North reservoir. The pump station will be designed to remove up to 900 cfs from the C-23 canal. Approximately 10,560 feet of Canal C-23 will be re-routed around the reservoir levee as part of the seepage canal system. The abandoned section of the canal will be left in place as an approach to the drawdown structure S-413 and as a fish refuge area. Once constructed, the project will also provide important connectivity for ecotourism, wildlife and the County's western greenways and trails program. The project provides linkage between Steven J. Fousek Preserve (Paleo, Teague, and Hackberry Hammocks), Pinelands Preserve, Bluefield Ranch Preserve, and Cypress Creek Preserve. This project is ongoing through the South Florida Water Management District.

C-23/24 Stormwater Treatment Area (STA). The STA is located east of C-24 between control structures G-81 and G-79. It is designed to remove 80% of the phosphorus from stormwater entering the C-23/24 reservoirs. This facility will be a multi-cell STA covering approximately four-square miles. The primary discharge from the STA will be into the header canal of the North SLR Water Control District. A 250-cfs pump station will transfer water from the C-23/24 North Reservoir into the STA. It is expected that the STA will be operated to discharge primarily into the header canal and then directed toward Ten Mile Creek. Other discharge options include C-25 and C-24. Approximately one mile of Sneed Road (State Road 613) will be abandoned**.** This component of the recommended plan includes water quality features considered essential to Everglades restoration. This STA is currently under construction and set to be completed in 2026.

Cypress Creek Complex - Natural Storage and Treatment Area. The Cypress Creek Complex - Natural Storage and Treatment Area, is located in St. Lucie and Okeechobee Counties and includes 32,639 acres of primarily pastureland, along with some of the last remaining large tracts of forested wetland habitat in St. Lucie County. This land has been identified for use as alternative storage, rehydration, habitat restoration, and water quality improvements. The parcels consist primarily of the VBar-2 Ranch, lands around Cypress Creek and remnants of Bluefield Ranch. By rehydrating these drained pastures, large volumes of water will be attenuated on-site during the rainy season, providing a low-cost alternative to reservoir storage. St. Lucie County currently owns and manages approximately 4,800 acres of this Complex, including Bluefield Ranch Preserve, Cypress Creek Preserve, and Pinelands Preserve. In 2023, St. Lucie County was awarded legislative appropriation funding in the amount of $1.6 million to design, permit, and construct a restoration, rehydration, and natural storage project under the State of Florida's water quality initiatives. The now completed project promotes natural area storage, groundwater recharge, rehydration of the historic creek, wetland restoration, habitat enhancement and improve water quality. The project complements projects within the Indian River Lagoon South (IRL-S) and the Comprehensive Everglades Restoration Plan (CERP).

C-25 Reservoir and Stormwater Treatment Area. This feature includes a 741-acre aboveground reservoir with a maximum depth of 8-feet and a 163-acre STA. The Reservoir will capture the first 0.4 inches of runoff from both the C-25 Basin and the Fort Pierce Farms Basin (approximately 147,225 acres). The STA was sized to treat 80% of the phosphorus load entering the STA from the reservoir. The total storage capacity of the reservoir and STA is approximately 5,392 acre-feet and is located north of and adjacent to C-25 at the S-99 structure. The purpose of this component is to capture and treat local runoff from the C-25 Basin and from the Fort Pierce Farms Water Control District (FPFWCD). Stormwater will be pumped into the reservoir from the C-25 Basin and from a new canal connection to the FPFWCD. The pump station will be designed to remove up to 250 cfs from the C-23 canal. Water will be released from the reservoir through the STA where sediment, nutrient and other pollutant loads will be reduced. Water from the STA will be released into C-25, and from C-25 into the IRL. Water captured in the reservoir will also be available to augment water supply following the end of the summer rainy season. This project is in design phase with an anticipated completion year of 2028.

North Fork Floodplain Restoration The North Fork of the St. Lucie River was dredged during the 1920's as a part of early drainage improvements in the region. The dredging operation cut off many oxbows and created berms that disconnected the river channel from the adjacent floodplain. This feature includes acquisition and preservation of approximately 3,100 acres of floodplain and adjacent lands, which will receive an additional 64,500 acre-feet of flow via the northern diversion efforts. The majority of public land within this feature is held by St. Lucie County, SFWMD and the Florida Department of Environmental Protection. Preserving lands within the North Fork corridor provides significant environmental improvement in the health of this portion of the river by preventing such degradation as increased stormwater runoff, increased turbidity, and increased influence of exotic plants and animals from the surrounding areas that are under significant development pressure. The North Fork lands are extremely important in linking the estuary to the watershed. Preservation will provide such water quality and environmental benefits as removing nutrients, maintaining valuable wading bird habitat, and serving as a nursery for many of the recreationally and commercially important fish species that spend certain life stages in this area. In 2024, the ACOE began a feasibility study and preparation of a National Environmental Policy Act (NEPA) assessment for the North Fork St. Lucie River Continuing Authorities Program (CAP) Section 1135 project. The project will focus on oxbow and floodplain restoration on the North Fork of the St. Lucie River.

Muck Remediation. Muck remediation involves the removal of accumulated muck within the St. Lucie Estuary from areas that are effectively "dead zones." Muck accumulation has covered substrate that once supported healthy submerged aquatic vegetation and oyster communities. Removal of this sediment would greatly improve estuarine conditions by exposing this substrate making it suitable for colonization by target species. Removing the muck would also improve water quality conditions for target species by improving the clarity of the water and reducing sunlight attenuation, especially critical for re-colonization and growth of submerged aquatic vegetation. Two of the four areas targeted for remediation are located in the North Fork. On April 6, 2021, the St. Lucie County Board of County Commissioners accepted grant funds in the amount of $2,488,180.00 from the Florida Inland Navigation District (FIND) administered through the South Florida Water Management District Governmental Agreement to construct the Taylor Creek Muck Removal Project. The completed project addressed the muck

sediments that accumulated in the navigation channel of Tayor Creek, since it was last dredged in July 2004. This project removed muck sediments from migrating on to the seagrass beds in the Indian River Lagoon and provide navigational benefits to surrounding Marinas and the Port of Ft. Pierce.

LAND COVER The Future Land Use Element discusses in detail and identifies the existing land uses and vacant lands in the County, it also contains the wetlands and waterbodies maps. Nearly 70% of the County is identified as agriculture, much still in a natural state.

Natural Habitats
Listed and other animal species depend on native vegetative communities for refuge, foraging, nesting, and denning. The size, quality and connectivity of native communities all influence wildlife utilization. ~~Appendix 6-A~~ The Florida's Endangered and Threatened Species, identifies those federal and state listed wildlife species that may be found within the County. The Florida Fish and Wildlife Conservation Commission maintains and updates the species lists as required by new legislation, the most current list can be found at http://myfwc.com/imperiledspecies/ and is utilized by the County.

Appendix 6-~~B~~A Native Plant Species, provides a list of native plant species having the potential to occur in the County, and identifies those that are listed as either threatened or endangered by federal and State agencies.

~~Appendix 6-C~~ The Florida Invasive Species Council maintains the invasive species list, ~~Invasive/Exotic Pest Plant Species,~~ which provides a list of the invasive ~~exotic~~ pest plant species that may occur in the County. Invasive exotic plant species have the capacity to disrupt, disturb and displace native plant communities and associated dependent wildlife. The Florida Invasive Species Council (formerly the Florida Exotic Pest Plant Council) maintains and updates the list of pest plant species, the most current list can be found at ~~http://fleppc.org/~~ https://www.floridainvasives.org/plant-list/2023-invasive -plant-species/ and is utilized by the County.

Conservation Opportunities
Conservation opportunities are enhanced through the public ownership of land. In 1991, the St. Lucie Board of County Commissioners formed the Land Acquisition Selection Committee (LASC), which was charged with the task of preparing a proposal for public acquisition or protection of significant natural areas in the County. The LASC still serves as an advisory body to the Board of County Commissioners. In November 1994, St. Lucie County voters approved a bond referendum authorizing issuance of ad valorem tax bonds, not to exceed $20 million, to participate in state and federal land acquisition programs targeting the protection of natural areas. The St. Lucie County Environmental Lands project began in 1994 with the passage of this local bond program. On December 7, 1995, Spruce Bluff, a 97-acre site along the North Fork of the St. Lucie River, was the first site acquired through the Environmentally Significant Lands (ESL) program. Since that time, the County leveraged the $20 million bond with State funding programs, such as Florida Communities Trust and Florida Forever, to acquire nearly 10,000 acres and over $75 million worth of Public Conservation Lands. The County Environmental Resources Department oversees the ESL program, as well as the management of the preserve system. The program continues to pursue lands selected by the LASC with limited funding resources and partners. As such, much of the focus has shifted to meeting grant obligations and providing public passive recreation elements, land management, restoration and nature-based programming within the system.

The *IRL-South SWIM Plan* identifies that restoration of 2,984 acres along the North Fork St. Lucie River is proposed and that nearly 2,300 acres were purchased and are managed by local, state, and regional agencies. Since 1994, the Conservation and Recreation Lands Program, the SFWMD Save Our River's Program, Florida Communities Trust, and the County's ESL program combined have spent about $25

million on land acquisition along the North Fork. The Recreation and Open Space Element provides greater detail and lists the recreation and preservation lands within the County.

The FFWCC Upland Invasive Plant Management Program provides competitive funding assistance to local agencies for invasive plant management. ~~Over the past ten years (since 2008), the program has provided nearly $4 million in funding assistance to the County and the Savannas Preserve State Park for invasive plant management. Approximately 40% of this funding has been spent on managing invasive plants on public lands surrounding the North Fork.~~ From 2015-~~2018~~2024, St. Lucie County received ~~nearly $2.5~~over $3.9 million (approximately $~~625~~660,000/year on average) from this program to manage invasive plants within the preserve system County-wide. In general, these funds treated less than 50% of the acreage annually, of the land held in public ownership within St. Lucie County.

WATER RESOURCES

Potable Water

On a regional level, St. Lucie County is located within the South Florida Water Management District (SFWMD). More specifically it is located in the Upper East Coast (UEC) Planning Area consisting of St. Lucie and Martin counties and eastern Okeechobee County with boundaries encompass over 1,230 square miles and generally reflecting the watersheds of the C-23, C-24, C-25 and C-44 canals. The ~~*2016*~~ *2021 Upper East Coast Water Supply Plan Update* provides details on the current and projected water supply for this planning area. The Executive Summary of the ~~2016~~ 2021 UEC Plan Update states:

> The UEC Planning Area relies on groundwater (fresh and brackish), and reclaimed water to meet urban and agricultural demands. Public supply (PS) relies on fresh groundwater from the SAS and brackish groundwater from the FAS. Groundwater sources can meet 2045 PS demands. There are 15 PS utilities within the UEC Planning Area. One PS utility will need to construct new projects to meet its projected 2045 demands. Six (6) other utilities have proposed 23 new projects through 2045. These projects will increase water supply capacity and distribution through expanded use of the FAS, extension of reclaimed water lines and construction of reservoirs. ~~from the surficial aquifer system (SAS) and Floridan aquifer system (FAS) for urban uses. In 2013, the SAS accounted for approximately 40 percent of public water supply (PWS) use in the UEC Planning Area, and the FAS accounted for the remaining 60 percent. SAS use for PWS is projected to increase very little if at all as the use of alternative water sources such as brackish water from the FAS increases.~~
>
> ~~Recreation and landscape irrigation, including golf courses is accomplished through a combination of water from surface water, the SAS, and reclaimed water. Additionally, the FAS is used as a supplemental source for some landscape and golf course irrigation. Development of the SAS has been maximized in many portions of the UEC Planning Area.~~
>
> Agriculture is a substantial part of the economy. However, agricultural irrigated acres are projected to decrease 26% from 107,383 acres in 2019 to 79,004 acres in 2045, due to citrus crop loss from greening disease and a transition of agriculture lands to residential developments. ~~and the single largest water use category in the UEC Planning Area. Surface water from the C-23, C-24, C-25, and C-44 canals serve as the primary water source for agricultural uses. Additional use of water from these canals is restricted above existing allocations.~~
>
> Total water demand is projected to increase by 38 percent, from 257.5 million gallons per day (MGD) in 2013 to 354.7 MGD by ~~2040~~ 2045. AGR is projected to use ~~52.6~~ 46

percent of the planning area's total water demand with PWS using ~~20.6~~ 29% percent in ~~2040~~ 2045. The remaining four categories: domestic (residential) self-supply, recreation and landscaping, industrial, and power generation, account for the remaining ~~26.8~~ 25% percent.

The Potable Water Sub-Element focuses on the public and domestic self-supply demand for the County and provides specific data on the public water sources, treatment and distribution systems. Detailed information can also be found in the St. Lucie County 10-Year Water Supply Facilities Work Plan. St. Lucie County also has an adopted Wellfield Protection Ordinance.

Ground Water

The South Florida Water Management District identifies that agriculture is the major land use in the Upper East Coast (UEC) Planning Area, with citrus being the dominant crop. Water for urban and agricultural uses in the UEC Planning Area comes from three main sources: the Floridan Aquifer System (FAS), the Surficial Aquifer System (SAS) and surface water. Surface water from the C-23, C-24, C-25 and C-44 canals is used primarily for agricultural irrigation, with the FAS used as a backup source during periods of low rainfall. The SAS has been the principal source for public water supply and urban irrigation. Withdrawals from the SAS have been maximized along the coast and alternative water supplies are being developed to meet the growing water needs. These include the FAS as a source of drinking water and reclaimed water for irrigation water. The SAS and surface water are dependent upon rainfall for recharge.

There are four primary drainage canals in the UEC Planning Area that are part of the Central and Southern Florida Flood Control Project. These canals (C-23, C-24, C-25 and C-44) have also become important sources of irrigation water within their respective drainage basins. The C-44 Canal was constructed as a navigable flood control outlet for Lake Okeechobee. The C-44 is the only one of the four canals that receives inflow from outside its drainage basin. The C-23, C-24 and C-25 canals, by contrast, are solely dependent on rainfall as a source of inflow. As a result of the large demand for this limited surface water supply, there are prohibitions for any new or expanded water supply uses of these three canals.

The Floridan Aquifer is used by growers as a supplemental source when surface water availability is limited, and as a primary irrigation source when surface water is not available. In most cases, water from the Floridan Aquifer has a high salinity (relative to surface water) and has to be blended with surface water or water from the Surficial Aquifer before it is used for irrigation.

Currently, most of the public water supply for the region comes from the shallower Surficial Aquifer as it has better quality water. The Floridan Aquifer in the UEC Planning Areas is a relatively unused water source for public water supply, as it located approximately 900 feet below land surface. However, the use of the Floridan Aquifer by utilities is increasing and most coastal utilities in the region plan to use the Floridan Aquifer to meet their future needs. Utilities either blend the Floridan water with fresh water or treat it using reverse osmosis.

Because of its diffuse and intermittent nature, stormwater is not generally considered a viable option for direct public-supply applications where reliability is a major consideration. Stormwater management practices that provide for increased soil infiltration and groundwater recharge opportunities should be considered as a means to protect and possibly enhance existing groundwater resources.

Following is a summary of water supply issues in the UEC Planning Area.

- Increased withdrawals from the Surficial Aquifer System are limited due to potential impacts on wetlands, as well as the increased potential for saltwater intrusion.

- Surface water availability in the C-23, C-24 and C-25 canals is not sufficient to meet existing and projected agricultural demands.
- Freshwater discharges (minimums and maximums) are affecting the health of the St. Lucie River and Estuary, southern Indian River Lagoon and the Northwest Fork of the Loxahatchee River.

Surface Water
Compared to most groundwater sources, surface water sources generally are of lower quality. Surface waters tend to contain silts and suspended sediments, algae, dissolved organic matter from topsoil, and chemical and microbiological contaminants from municipal wastewater discharges, stormwater runoff, and industrial and agricultural activities. The quality of surface water may vary seasonally with variation in flow rates or water levels. Traditionally, surface water has not been used for public supply in the SFWMD.

Pollutants
Waste generators, solid waste facilities, above and underground storage tanks, and dry cleaning facilities are licensed and regulated by the Florida Department of Environmental Protection (FDEP). Current information on these facilities is available through the Florida Department of Environmental Protection Division of Waste Management. Information on contaminated sites is also available through the U.S. Environmental Protection Agency (EPA) Resource Conservation Recovery Act (RCRA), Superfund, National Priorities List and Brownfield databases.

~~A May 2018~~ An August 2024 database search identifies that at this time there are no sites in the County listed on the U.S. Environmental Protection Agency's (EPA) Federal Superfund list or the National Priorities List (NPL). There are f~~our~~ six brownfield areas in the County that all fall within the City of Fort Pierce. There are no Brownfield sites (BSE). Currently there are ~~seven~~ five sites within the County registered in the State Dry Cleaning Solvent Clean-up Program. FDEP maintains the database and map of all DEP licensed facilities and facilities undergoing cleanup, the map of current information is at https://ca.dep.state.fl.us/mapdirect/?focus=waterdatacentral

The County can discourage residential source contamination through close coordination with the Florida Department of Environmental Protection and by providing public information regarding the safe disposal of chemicals. Specifically, information can be made available on free disposal of household hazardous wastes, information on disposal contractors available to small businesses and the special waste programs available for landfill disposal of non-typical materials, such as spill clean-ups and contaminated soils.

Nuclear Power Plant. The Florida Power and Light (FPL) St. Lucie Nuclear Power Plant is located on South Hutchinson Island in the southern portion of the County. Nuclear energy production is monitored closely by the Nuclear Regulatory Commission, (NRC) a federal agency. Daily inspections are conducted at the St. Lucie Plant to guarantee compliance. Several identical safety systems are in place so that if one fails, others automatically go to work. In the unlikely event of an emergency, that could potentially result in the release of nuclear contamination, the environmental impacts could range from modest to catastrophic on a wide-ranging, long-term scale. Long term commitments at the federal level will be required in the event of the release of nuclear contaminants.

The Coastal Management Element provides details on evacuation and protection plans.

Resiliency Planning
St. Lucie County has a long, established history of leadership and strong public support for creating a sustainable community.

In 1994, the Board of County Commissioners established the Land Acquisition and Selection Committee, who advises and recommends to the Board on the acquisition and selection of Environmentally Sensitive and Open Space and Greenways. Since the committee's creation, they have been instrumental in the County's efforts of acquiring and preserving thousands of acres of sensitive habitats, environmentally significant lands, and floodplains within the County.

The County has implemented a variety of sustainable land use programs and policies. The 2002 update of the County's Comprehensive Plan incorporated smart growth policies and an economic element to promote a sustainable tax base while protecting against loss of open space and natural systems. ~~More recently, the~~ The Board implemented a specific model of sustainable development in the North County area, called Towns, Villages and Countryside (TVC). The process included numerous public meetings and resulted in criteria consistent with smart growth and sustainable development, including transect-based neighborhood planning with grid transportation networks, interconnected greenways and blueways, and low impact development standards. The TVC regulations were approved by the Board of County Commissioners in May 2006.

In 2006, the Board of County Commissioners created an Environmental Resources Department and passed the Sustainability Resolution (06-272), establishing sustainability as a primary goal of the County. The Board also created the Sustainability Ad Hoc Committee, made up of citizens, and government and business representatives, to make policy recommendations on sustainable practices. The Sustainability Advisory Committee reviewed and approved the St. Lucie County Greenprint document.

~~The Board created the Smart Growth Committee and Environmental Advisory Committee to recommend changes to the County's Comprehensive Plan and Land Development Codes consistent with smart growth principles and environmental protection. These committees continue to review and make recommendations that foster sustainable practices on a variety of revisions to St. Lucie County's policies and regulations.~~

The Board created the Blueway Advisory Committee to provide input in the development of individual management plans for the state-leased conservation and recreation lands managed by the County, all of which are connected to the Indian River Lagoon. On October 4, 2022, pursuant to section 253.034(5) and 259.032(8)(a), Florida Statutes, the Board of County Commissioners updated the Blueway Advisory Committee to meet current applicable statutes.

St. Lucie County became the catalyst for sustainability by hosting the Treasure Coast Green Conference in 2007 and 2008. The conference brought together representatives from a six-county area including the development community, state and local government entities, business leaders, and key stakeholders.

St. Lucie County adopted a Bicycle, Pedestrian, Greenways & Trails Master Plan in 2008 to develop alternative transportation systems and walkable, people-friendly communities. The County also completed the Evaluation and Appraisal Report, an 18-month evaluation of the Comprehensive Plan, which included numerous recommendations to strengthen the County's regulations in support of sustainable development and resource protection. In addition, the Land Development Code was updated to provide more stringent protection of native trees and other vegetation. The County commissioned a comprehensive study of wetlands to further protect and improve wetland functions by the University of South Florida in 2011.

In 2009 – 2010 the County conducted a comprehensive Western Lands Study with the agricultural industry, landowners, and the public to identify strategies to preserve prime agricultural lands. The study concluded with policy amendments to the Future Land Use Element that help to protect

agricultural lands from large-scale residential development and to ensure that when development in the agricultural areas occurs that it is consistent with utility needs as identified in the Infrastructure Element.

Another outstanding example of the Board's vision for sustainability is the Treasure Coast Research Park. Situated on 1,650 acres, it is one of the largest research parks in the nation. The park is dedicated to aiding in the economic development of the Treasure Coast by supporting industries invested in innovation and commercialization of scientific research, with a special emphasis on "clean" alternative energies and agricultural biosciences. A neighborhood charrette process ~~is also being initiated to~~ identif~~y~~ied land uses and transportation networks needed to support the Research Park.

St. Lucie County Government has incorporated sustainability by using industry approved green building standards in new construction. In 2008, the Havert L. Fenn Center was built to U.S. Green Building Council (USGBC) standards. This 62,575 square foot facility serves as a community center throughout the year but is specifically built and equipped to provide shelter from hurricanes for citizens with special needs. In addition, the new 57,000 square foot Clerk of Courts building was constructed to USGBC standards and includes a single-ply membrane roof, movable walls, low flow plumbing fixtures, and raised flooring for higher air conditioning efficiency.

St. Lucie County Greenprint. In 2008, the St. Lucie County Board of County Commissioners unanimously approved the recommendation by the Sustainability Committee to pursue Green Local Government Certification through the Florida Green Building Coalition, Inc. (FGBC). The Florida Green Local Government Certification process provides a systematic way for local governments to assess its level of sustainability and to incorporate multiple environmental, ecological and sustainability features throughout its operations to reduce consumption and increase efficiency; saving taxpayer dollars and the environment.

The application for the "Green Local Government" adopted certification by the Board of County Commissioners in July 2009 has become St. Lucie County's 'Greenprint', defining and outlining the County's vision for a sustainable future. The St. Lucie County 'Greenprint' contains the following goals for achieving a sustainable community:

Goal I: Conserve, Protect and Restore Natural Resources;
Goal II: Implement Sustainable Development and Building Standards;
Goal III: Improve Community Transportation and Mobility;
Goal IV: Support Energy Conservation and Clean Energy Alternatives;
Goal V: Develop a Sustainable Green Economy
Goal VI: Promote Sustainable Communities and Social Equity;
Goal VII: Strengthen Green Government Policies and Practices

Specific actions as part of FGBC's Green Local Government certification, including:

- Establishing the U.S. Green Building Council (USGBC) Leadership in Energy Efficient Design (LEED), and the Florida Green Building Coalition (FGBC) standards as officially recognized 'green' standards within the County;
- Establishing policy to construct and renovate county buildings to USGBC or FGBC standards to the extent feasible;
- Utilizing Florida Friendly Landscaping™ standards, Integrated Pest Management principles, and Best Management Practices or similar/greater standard for all county owned and maintained properties;
- Requiring all county facilities have recycling programs in place;
- Utilizing street design standards such as "Street Design Guidelines for Healthy Neighborhoods" as described by Walkable Communities Inc.;

- Adopting Environmentally Preferred Purchasing policies to the extent feasible; and
- Adopting green cleaning and green maintenance techniques such as those described by the Florida Department of Environmental Protection to the extent feasible.

These practices and additional policies that enhance energy efficiency and reduced greenhouse gas emissions have been incorporated into the Future Land Use, Transportation, Conservation, and Housing Elements, and continue to be updates to reflect local priorities. In 2010, St. Lucie County was certified as a Florida Green Local Government (Gold Level). In 2017 St. Lucie County successfully renewed its "Green County" designation from the Florida Green Building Coalition (FBGC), earning the silver level. This certification is expires in 2027.

Solar and Energy Loan Fund. In 2010, the County received a $2.9 million energy block grant from the U.S. Department of Energy to develop a $20 million solar and energy loan fund. The program is intended to reduce the upfront cost of installing energy efficiency and conservation measures as well as renewable energy technology in homes and businesses. The Solar and Energy Loan Fund (SELF) continues to be a successful self-sustaining independent agency that provides financing mechanisms for many types of energy-efficiency improvements for homes and businesses. SELF's mission is to rebuild and empower underserved communities by providing access to affordable and innovative financing for sustainable property improvements, with the focus on energy efficiency, renewable energy, and climate resilience in low and moderate income (LMI) neighborhoods. In FY 2023, 94% of loans went to LMI customers, providing for 3,933 metric tons of CO2 avoided, with an average annual savings of 23% in energy bills through the reduction of energy consumption.

The County (2025) is presently completing a Regional Resilience Vulnerability Assessment, which received funding from the Florida Department of Environmental Protection (FDEP) through a Resilient Florida Planning Grant. The county-wide assessment includes the County, the City of Port St. Lucie, City of Fort Pierce and St. Lucie Village. The assessment seeks to evaluate present day and future flood risk based on State criteria and includes the following Objectives:

- Develop a comprehensive strategy to identify flood risks
- Evaluate types and levels of flood hazards
- Evaluate assets at risk to hazards now and in the future
- Begin developing guiding strategies for adaptation and infrastructure design

The Resilient Florida Program was created by State Statute 380.093, F.S. The program includes the requirement for the Florida Flood Hub (USF) to develop a statewide assessment every five years, and FDEP, Florida Department of Environmental Protection, to develop an annual Sea Level Rise and Flooding Resilience Plan. St. Lucie County's Regional Resilience Vulnerability Assessment can be found online.

CHAPTER 7

RECREATION AND OPEN SPACE ELEMENT

DATA, INVENTORY & ANALYSIS

Calvin, Giordano & Associates, Inc.
EXCEPTIONAL SOLUTIONS™

RECREATION AND OPEN SPACE ELEMENT

DATA INVENTORY AND ANALYSIS

INTRODUCTION

The Recreation and Open Space Element presents a review of the current recreation facilities and opportunities in St. Lucie County, and includes Level of Service Standards and Goals, Objectives and Policies designed to assist the County in meeting the future recreation needs of its residents and visitors.

Recreation facilities are important components of a community's physical development pattern. They contribute to the attractiveness of the area, as well as the health and well-being of its citizens. St. Lucie County's location along the Atlantic Ocean provides abundant water-oriented recreational opportunities. The County would like to continue providing for diverse recreational interests with an emphasis on community and regional park creation in the future.

OVERVIEW OF CURRENT CONDITIONS

The St. Lucie County Parks and Recreation Services Services Department, Environmental Resources Department, and Mosquito Control ~~and Coastal Management Services~~ Departments operate facilities and conducts programs throughout the County. These activities are conducted at County-owned or leased recreational facilities which are under the management or use of several departments. Several park facilities within the City of Fort Pierce are under the maintenance responsibility of the City; however, program administration has, through an interlocal agreement, been delegated to the County. The City of Port St. Lucie operates and maintains their own park facilities and programs. In addition to the local facilities, the State of Florida owns/ operates/ administers over 7,750 acres of recreational and open space lands within the County.

Community Parks System Master Plan and Classification System

The St. Lucie County Community Parks System Master Plan adopted in ~~2002~~2022, clarified the County's Parks & Recreation Mission to enhance the quality of life in St. Lucie County by providing memorable, positive experiences for citizens and visitors at our parks, recreational facilities, athletic fields, and event venues. ~~indicates that the provision of larger parks such as community and urban district (generally called "regional") parks should be the main emphasis of the County's parks and recreation system.~~ The Parks and Recreation ~~Services~~ Department ~~revised its~~ utilizes a parks classification system ~~in 2010 based upon an extensive review of other Florida Comprehensive Plan Recreation and Open Space Elements. The current framework~~ that includes the following categories:

Neighborhood Parks

This classification of parks includes those that typically serve neighborhoods and mixed use centers in suburban or urban areas of the county. These parks are within walking or biking distance of the neighborhood or center they serve and amenities such as restrooms and parking may or may not be provided. These parks are typically used by the residents in the immediate area. The amenities in these parks may include playgrounds, picnic areas, small community centers, open space play and walking trails.

No level of service standard has been set for Neighborhood Parks and these parks are encouraged to be provided and maintained by the cities or homeowner associations.

Community Parks

This classification includes parks that serve larger geographic areas of the County and provide a variety of passive and/or active recreation activities conveniently located for short-term visits. The park size will vary greatly but is distinguished primarily by the patrons using the park who are local residents from different neighborhoods. The service area for community parks generally extends up to 20 miles; they may be located in residential areas or be adjacent to schools or other community facilities to maximize use and share costs. Parking is provided on the site or at a shared location. Facilities may include restrooms, picnic tables and pavilions, athletic fields and courts (tennis, basketball, softball, baseball) and a recreation center. Community parks on the water may have trails, piers, observation towers and canoe launches but do not have boat ramps.

Regional Parks

This classification includes parks that primarily serve the needs of an entire county or region. These parks vary in size but are characterized by frequent use by visitors from outside the county. The use by residents and visitors from outside the county is generally due to the type(s) of facilities available and/or the activities which occur in these parks. These parks may be athletic complexes which host a variety of scheduled, organized sports such as baseball, softball, football and soccer. The fields are typically lighted and include restrooms and adequate parking for large crowds. The regional parks may also contain a variety of recreational facilities such as picnic pavilions, trails, athletic fields, swimming pool and tennis or basketball courts but are differentiated from community parks because of the size, number and requirement for scheduling use. Regional parks on the water provide access to major water bodies (St. Lucie River, Indian River and Atlantic Ocean) for swimmers, boaters and fishermen from within and from outside the county. These parks include the beaches as well as boat ramps with restrooms and parking for autos and trailers.

Resource-based Parks (ESL and Preserves)

This classification includes parks that primarily preserve and protect environmentally sensitive lands, and interpret natural and/or cultural resources. The location for Resource-based Parks is determined by the location of the specific resources. Size and access can take many forms depending on the setting and type of resources. Management plans should give consideration to the resource and allow public use only as it is compatible with resource protection.

Resource-based Parks are selected for inclusion in the park system because of their exemplary natural and/or cultural features and are acquired, identified and preserved for stewardship and protection. Protection and stewardship of unique natural and cultural resources provide a variety of public benefits. These parks provide educational and interpretative opportunities relative to environmental and cultural resources. These lands may offer opportunities to restore degraded areas and to protect, increase, and restore biodiversity of species that may inhabit these areas. In addition, passive recreation opportunities and facilities are also appropriate at these parks. Development which does not adversely affect resources and which enhances awareness of the resource values is appropriate. Development of public sites should include opportunities for public education and enjoyment. Interpretive (educational) facilities and structures may include visitor centers, nature centers, orientation kiosks, nature watching stations, demonstration areas, preserved buildings and gardens, hiking, biking, and equestrian trails as designated. To the extent

that they do not adversely impact the resources themselves, support amenities may also be developed such as camping, picnicking areas, restrooms, signs, benches and parking. Trails and trail connections are a significant feature at these parks.

Inventory of Existing Facilities

The following tables 7-1a through 7-1c summarizes existing recreation and open space facilities owned, operated, and/or maintained by St. Lucie County. The location of the facilities is indicated on Map REC-1. Many of the existing parks continue historic Comprehensive Plan categorizations.

Source: St. Lucie Planning and Development Services Department, St. Lucie Parks and Recreation Services, 2012

As Table 7-1a-7-1c indicates, St. Lucie County contains approximately 3,190 ~~2,602~~ acres of neighborhood, community, and regional parks, and other County facilities. Resource- based parks, including Environmentally Significant Lands and preserves, comprise over 9,900 ~~9,212~~ acres. Ownership of and responsibility for the management of the recreational lands in St. Lucie County falls to a mixture of state and local agencies.

Additionally, the State of Florida operates four major parks in St. Lucie County. These are:

- Jack Island State Preserve (414.32 acres)
- Ft. Pierce Inlet State Recreation Area (355.38 acres)
- Avalon State Park (673.62 acres)
- Savannas Preserve State Park (6,311.33 acres)

Private Recreation Facilities

In addition to public facilities, St. Lucie County has a number of large developments that have private recreational facilities such as golf courses, tennis courts, pools, and trails. Most residential development projects that use the Planned Unit Development zoning furnish some type of recreational facilities for their residents. These facilities satisfy some proportion of the total recreation demand for the residents of these communities.

NEEDS ANALYSIS

Level of Service: Community Parks

The current inventory identifies 1,134.95 ~~1,023~~ acres of Community Parks. The LOS standard for publicly-owned Community Parks in St. Lucie County is 5 acres per one thousand (1,000) residents in the County's unincorporated area. As a comparison, Martin County and Palm Beach County have Community Park levels of service of 2 acres and 2.5 acres per 1,000 residents respectively. St. Lucie County's LOS for this recreation category is projected through 2040~~2030~~. As the following ~~t~~Table 7-2 shows, the County will have sufficient Community Park acreage in the short and long term planning periods.

Community Parks LOS Projections

	~~2009~~	~~2010~~	~~2011~~	~~2015~~	~~2020~~	~~2025~~	~~2030~~

Source: St. Lucie Planning and Development Services Department, St. Lucie Parks and Recreation Services, 2025.

Level of Service: Resource-based Parks

The current inventory identifies 9,905 ~~9,212.69~~ acres of Resource-based Parks. The LOS standard for Resource-based Parks in St. Lucie County is 21.2 acres per one thousand (1,000) residents Countywide. As the following ~~t~~Table 7-4 shows, the County will have sufficient Resource-based Park acreage in the short- and long-term planning periods. It should be noted most counties do not provide a resource-based park level of service. However, because these parks are such an important part of St. Lucie County's overall recreational amenities, they have been included.

INTERGOVERNMENTAL COORDINATION ELEMENT

DATA, INVENTORY & ANALYSIS

Calvin, Giordano & Associates, Inc.
EXCEPTIONAL SOLUTIONS™

INTERGOVERNMENTAL COORDINATION ELEMENT

DATA INVENTORY AND ANALYSIS

PURPOSE

The purpose of the Intergovernmental Coordination Element is to identify and resolve incompatibilities between St. Lucie County's comprehensive planning processes and those of other governmental entities with interests in or related to the County's area of concern. The areas of concern for St. Lucie County include municipalities within the County, adjacent counties, the St. Lucie County School Board, the South Florida Water Management District, Fort Pierce Farms Water Control District, North St. Lucie River Water Control District, Treasure Coast Regional Planning Council, state government, federal government, and utility companies.

Specific coordination needs within each of the elements of the St. Lucie County comprehensive plan that would benefit from improved or additional intergovernmental coordination and mechanisms for satisfying these needs are also identified, as appropriate.

EXISTING DATA AND CONDITIONS

St Lucie County currently has either formal or informal coordination agreements, or interacts through standard operating procedures under statutory authority, with the following agencies or jurisdictions:

Municipal Government

City of Fort Pierce
City of Port St. Lucie
Village of St. Lucie

Adjacent County Government

Indian River County
Martin County
Okeechobee County

County Government

St. Lucie County Fire District
St. Lucie County Health Department
St. Lucie County Property Appraiser
St. Lucie County Sheriff
St. Lucie County Supervisor of Elections
St. Lucie County Tax Collector

Education

Bureau of Economic and Business Research (University of Florida)
Harbor Branch Oceanographic Institution (Florida Atlantic University)
Indian River State College
Institute of Food and Agricultural Sciences (UF/IFAS) (University of Florida)
St. Lucie County District School Board

Other

19th Judicial Circuit of Florida
Economic Development Council of St. Lucie County
~~Enterprise Florida~~
Fort Pierce Farms Water Control District
North St. Lucie River Water Control District
North St. Lucie Hospital District
Office of the Medical Examiner--19th Judicial District of Florida
Rupert J. Smith Law Library of St. Lucie County Florida
Smithsonian Institution
St. Lucie Chamber of Commerce
St. Lucie Transportation Planning Organization (TPO)
Treasure Coast Education, Research and Development Authority
Treasure Coast Regional Planning Council

Florida Departments and Agencies

Department of Business and Professional Regulation
Department of Children and Family Services
Department of ~~Economic Opportunity~~ Commerce
Department of Emergency Management
Department of Environmental Protection (DEP)
Department of Highway Safety and Motor Vehicles
Department of Revenue
Department of Transportation
Department of Veterans' Affairs
Division of Emergency Management
Division of Historic Resources
Florida Housing Finance Corporation
Fish and Wildlife Conservation Commission
South Florida Water Management District
State Attorney's Office

United States Departments and Agencies

Army Corps of Engineers
Commerce, Census Bureau
Environmental Protection Agency
Federal Emergency Management Agency
Federal Aviation Administration
Housing and Urban Development
U.S. Fish and Wildlife Service
U.S. Postal Service
U.S. Department of Veterans Affairs
Transportation

Regulated Utilities

AT&T
Florida Cablevision
Florida Power & Light
Fort Pierce Utility Authority

EVALUATION OF EXISTING COORDINATION MECHANISMS

For each agency previously listed, Table 8-1 briefly describes the existing coordination mechanisms indicating the subject, nature of the relationship and the office with primary responsibility for coordination.

JOINT PLANNING AREAS

Comparison with Regional Policy Plan

The Strategic Regional Policy Plan for the Treasure Coast Region (1995) has been reviewed and considered during the process of revising this Comprehensive Plan. The Comprehensive Plan conforms to the Regional Policy Plan.

Specific Coordination Issues in Each Element

Following is a summary the interagency coordination needs associated with each element of this Comprehensive Plan.

Future Land Use

Significant issues that warrant coordination include review of the western rural lands, annexations, and reduction of sprawl and greenhouse gases. The County will continue to coordinate with the municipalities on population growth and annexations, utility service areas and maintenance of roads and drainage facilities. The County ~~will~~ coordinated with the Department of ~~Economic Opportunity~~ Commerce, the Treasure Coast Regional Planning Agency and local stakeholders on the Western Land Study. The County will continue to coordinate with the City of Fort Pierce on annexation through an interlocal agreement and pursue a similar agreement with the City of Port St. Lucie.

Starting in 2021, the Board of County Commissioners reviewed the original Urban Service Boundary (USB) for expansion in response to significant growth in the county and anticipating more growth in the next twenty years. The County saw 38.8% of population growth between 2010-2024. 13% of population growth in unincorporated St Lucie County and the majority of the population growth from the City of Port St. Lucie. In August of 2022, the Board of County Commissioners adopted Ordinance 2022-15 to expand the USB in the southwest area in the County.

The County, with Calvin Giordano & Associates, completed an assessment of the Urban Service Boundary (USB) with the updated data associated with the 2024 Evaluation and Appraisal Review and determined there is sufficient land within the USB to accommodate growth through 2035 (10-year planning period).

Coastal Management

In order to implement the goals of this element, the County works with various agencies including the Florida Department of Environmental Protection (FDEP), Fish and Wildlife Service, National Marine Fisheries Commission, Federal Emergency Management Administration (FEMA) and the U.S. Army Corps of Engineers. With the assistance of the FDEP the County continues to protect reefs and sea grass beds, West Indian Manatees, Sea Turtles, and other listed species, and marine turtles and turtle nesting habitats. The County works with a variety of state and regional agencies to create a system of natural area greenways and wildlife corridors that will protect ecological communities in the coastal area. Coordination with FEMA includes monitoring FEMA's regulations and updating the County's adopted flood protection regulations accordingly.

Port of Fort Pierce Sub-Element

~~Efficient transportation to the Port is essential for movement of cargo. The County continues to coordinate with FDOT and the Florida East Coast Railroad on transportation issues related to the Port.~~

The vision for the Port of Fort Pierce encourages economic redevelopment of the port under well-defined land use and planning guidelines and streamlined port governance, with sufficient flexibility to merge market demand with marine industrial, marine commercial, marine research, and maritime academic/vocational uses. The County Port Authority works in coordination with the City of Fort Pierce to implement the Goals, Objectives and Policies of the Port Sub-element and 2020 Port Master Plan. An interlocal agreement between the County and the City of Fort Pierce further defines the responsibilities of each entity.

Transportation

The County works with City of Port St. Lucie, City of Fort Pierce, the St. Lucie Transportation Planning Organization, Martin County and the Florida Department of Transportation to coordinate and implement regular updates to the regional transportation plan, including improvements to all mobility infrastructure. Most recently, the ~~Go2040~~ SmartMoves 2045 Long Range Transportation Plan was adopted February 3, ~~2016~~ 2021. Interagency coordination with FDOT is required for the development of FDOT's annual Work Program; intergovernmental coordination on the airport involves Florida FDOT, the Federal Aviation Administration, and the Florida Aviation System; and planning for and funding improvements to the Port of Fort Pierce includes the City of Fort Pierce, St. Lucie County serving as the Port Authority, the Florida Seaport Transportation and Economic Development (FSTED) Council, and the Florida Ports Council.

Housing

The County continues coordination with U.S. Housing and Urban Development, the Florida Housing Finance Corporation for affordable and workforce housing programs. Additionally, the County shall dialogue with the Florida Housing Finance Corporation to ensure an accurate inventory for any subsidized rental housing, group homes, or mobile home parks that may exist within the County. An inventory of historically significant housing is required for the Comprehensive Plan, and therefore periodic coordination and communication with the State's Division of Historic Resources, Florida Master Site File is necessary.

Infrastructure

The Infrastructure Element provides for potable water, sewer, drainage, and solid waste facilities to meet the needs of existing and future development. The County shall continue to coordinate with the South Florida Water Management District and potable water providers on implementation of the 10-Year Water Supply Facilities Work Plan and development of alternate water supplies. The County will coordinate with the Florida Department of Environmental Protection to encourage these areas served by package plants to connect to a central sewer system. In coordination with the South Florida Water Management District, the County will continue to support projects related to the Comprehensive Everglades Restoration Program (CERP)/IRL-South Plan in order to improve water quality in the Indian River Lagoon and St. Lucie River Estuary.

Recreation and Open Space

The intergovernmental coordination needs within this element include the ongoing work with the Florida Department of Environmental Protection and its oversight of four state parks located within the County. Further, through an interlocal agreement, program administration for many City of Fort Pierce parks has been delegated to the County. Finally, the County and the St. Lucie County School Board have informal arrangements that allow for shared recreational facilities.

Conservation

The County shall continue to coordinate with the Florida Department of Environmental Protection, South Florida Water Management District (SFWMD), and the U.S. Army Corps of Engineers to protect wetlands, native habitats, and create greenways.

Capital Improvements
The County shall continue to coordinate with non-County entities that provide and monitor public facilities affecting concurrency such as the Florida Department of Transportation, the St. Lucie Transportation Planning Organization, the Florida Department of Environmental Protection, and the South Florida Water Management District. As part of the County's overall economic development strategy, continued coordination with the Federal Aviation Administration and Florida FDOT on investment in the Treasure Coast International Airport and with Florida Seaport Transportation and Economic Development (FSTED) Council on infrastructure improvements at the Port of Fort Pierce, which shall continue to be a priority for the County.

Economic Development
Economic development is a high priority ~~in the County~~ and the County works continuously with the Economic Development Council and ~~Enterprise Florida~~ the Florida Department of Commerce on attracting new businesses and encouraging the expansion of ~~new~~ existing businesses in St. Lucie County. In order to encourage economic development, the County continues to focus on working with local higher education providers. ~~In particular, the County will coordinate with the University of Florida through the Treasure Coast Education, Research and Development Authority to develop an agriculturally-and-biotechnologically-focused research park (TCERDA).~~

Towns, Villages, and Countryside (TVC)
The County is coordinating with the St. Lucie Transportation Planning Organization and the Florida Department of Transportation-on-transportation improvements to accommodate the TVC area.

Public School Facilities Element
The County continues to coordinate with the ~~St. Lucie School Board~~ St. Lucie Public Schools on school concurrency through implementation of the interlocal agreement.

Areas of Critical State Concern
There are no areas of critical state concern in St. Lucie County.

The following abbreviations are used in Table 8-1.

AE - Advise and Encourage
AP - Approval, Permit
CA - County Agency
FA – Formal Agreement
FN - Formal Notice
IN - Informal Notice
OA - Outside Agencies
PM - Periodic Meetings to Coordinate Programs
TA - Technical Assistance

CHAPTER 9

CAPITAL IMPROVEMENTS ELEMENT

Calvin, Giordano & Associates, Inc.
EXCEPTIONAL SOLUTIONS™

CAPITAL IMPROVEMENTS ELEMENT

DATA INVENTORY AND ANALYSIS

Purpose
The purpose of the capital improvements element is to evaluate the need for public facilities as identified in the other comprehensive plan elements and as defined in the applicable definitions for each type of public facility, to estimate the cost of improvements for which the local government has fiscal responsibility, to analyze the fiscal capability of the local government to finance and construct improvements, to adopt financial policies to guide the funding of improvements and to schedule the funding and construction of improvements in a manner necessary to ensure that capital improvements are provided when required based on needs identified in the other comprehensive plan elements. The element shall also include the requirements to ensure that an adequate concurrency management system will be implemented by local governments pursuant to Section 163.3180, F.S.~~, of this chapter~~.

Relationship to the other Elements of the Comprehensive Plan

The Capital Improvements Element summarizes the needed capital facilities as identified in the other elements of the County's Comprehensive Plan. These needs include those necessary to correct existing deficiencies in meeting Level of Service Standards while providing for future needs. Deficiencies ~~were~~ are determined by comparing the current facilities to the currently adopted/proposed Level of Service Standard.

Public Facility Needs
Per Section 163. 3180, F.S., sanitary sewer, solid waste, drainage, and potable water are the only public facilities and services subject to the concurrency requirement on a statewide basis. If concurrency is applied to other public facilities, the comprehensive plan must provide the principles, guidelines, standards, and strategies, including adopted levels of service, to guide its application. The comprehensive plan must demonstrate, for required or optional concurrency requirements, that the levels of service adopted can be reasonably met. Infrastructure needed to ensure that adopted level-of-service standards are achieved and maintained for the 5-year period of the capital improvement schedule. Additionally, if concurrency is applied to transportation facilities, the comprehensive plan must provide the principles, guidelines, standards, and strategies, including adopted levels of service to guide its application.

The determination of facility needs within each Element considers the level of service, required repairs or renovations that reflect new system capacity, and new growth demands for projects. A relative priority of need among facility types has been indicated through the extent of improvements scheduled within this CIE update.

The projects summarized in the Schedule of Capital Improvements have been previously identified in the following Elements within the adopted St. Lucie County Comprehensive Plan: drainage, potable water, sanitary sewer, solid waste, parks & recreation, transportation/roads and schools. Each project has been prioritized in consideration of available 5-year funding. The analysis of needs for each public facility is analyzed here.

The County classified public facilities according to their relationship with the Concurrency Management System. Used in conjunction with the adopted Level of Service Standards for the various parts of the

Comprehensive Plan, these classifications are to be a guide in determining the need for, and then the development of, any capital improvement projects needed to meet the growth demands of the community. The classification of facilities is as follows:

A. Category A Public Facilities are transportation/roads, ~~mass transit,~~ stormwater management, potable water, sanitary sewer, solid waste, parks/recreational facilities and schools used for concurrency all of which are addressed in other elements of this Comprehensive Plan.

B. Category B Public Facilities are libraries, corrections, courthouse, administration, mosquito control, and Treasure Coast International Airport as owned, operated or developed by St. Lucie County. Category B Public Facilities are not used for concurrency purposes as provided for in the Concurrency Management System.

Category A Public Facilities

Transportation/Roads: In addition to the maintenance or achievement for traffic on county roadways being based upon a peak hour/direction level of service, consideration of growth demand includes addressing multimodal needs such as pedestrian and bicycle facilities and transit service. The County also works to address both vehicular and nonvehicular modes of transportation in development proposals and community design to provide adequate levels of mobility.

~~Due to recent reductions in motor fuel tax receipts from the increasing fuel efficiency of motor vehicles, the programming of transportation projects will be affected. As such, transportation projects have been prioritized in consideration of available funding.~~

The St. Lucie County Transportation Element provides additional details on roadway level of service and multimodal needs. The County's primary funding source for capacity adding projects, such as new road construction and lane addition improvements, is transportation impact fees/multimodal fees. To develop transportation fees, the County uses a systemwide approach, including demand/travel, costs and credits associated with County and State roads within the county. This approach is appropriate since the County and State roads jointly provide regional access as well as connecting neighborhoods to other areas. State and County roads that are parallel to each other alleviate traffic by providing travel options. County roads tend to play a greater role in connecting neighborhoods to State roads, which then provide a higher level of regional access.

The County also works to secure federal and state funding to ensure that the adopted level-of-service standards are achieved and maintained. As required by Section 163.3180, F.S., the County also provides for binding agreements for proportionate share contributions of required improvements from proposed development. The proportionate-share contribution is calculated based upon the number of trips from the proposed development expected to reach roadways during the peak hour from the stage or phase being approved, divided by the change in the peak hour maximum service volume of roadways resulting from construction of an improvement necessary to maintain or achieve the adopted level of service, multiplied by the construction cost, at the time of development payment, of the improvement necessary to maintain or achieve the adopted level of service. The County has accepted proportionate-share contributions for various roads to mitigate transportation impacts by applicants and to maintain level of service standards.

The Schedule of Capital Improvements in Tables 9-1a and 9-1b include ~~indicates if a~~ projects scheduled that ~~will~~ affect level of service standards and/or address multimodal needs.

Table 9-1a Capital Improvement Revenue for Roads

Revenue	FY 2025	FY 2026	FY 2027	FY 2028	FY 2029

Available Major Project Reserves	$12,888,982	$13,919,238	$16,243,458	$18,763,125	$17,001,677
Residential Impact Fees	$8,368,249	$8,016,956	$7,831,272	$7,831,272	$7,831,272
Commercial Impact Fees	$629,868	$581,368	$555,749	$555,749	$555,749
Reimbursement	$5,000,000	$5,000,000	$5,000,000		
Interest	$175,196	$208,789	$265,259	$285,139	$295,372
Less 5 Percent	$(658,672)	$(688,507)	$(682,614)	$(433,608)	$(434,120)
Total Budgeted Revenues	**$26,403,623**	**$27,037,843**	**$29,213,125**	**$27,001,677**	**$25,249,951**

Table 9-1b Capital Improvement Expenditures for Roads

Expenditures	**Funding Source**	**FY 2025**	**FY 2026**	**FY 2027**	**FY 2028**	**FY 2029**	**Future Anticipated**
Arterial A (Midway Road to Orange Avenue)	Impact fees				$1,000,000		$2,000,000
Glades Cut Off Rd Widening & Improvements	Impact fees		$3,500,000	$6,000,000	$6,000,000	$7,600,000	$85,500,000
Jenkins Road Phase 2 (from Glades Cut Off Rd to Orange Ave)	Impact fees						$69,000,000
Jenkins Road Phase 3 (from Orange Ave to St Lucie Blvd)	Impact fees						$49,000,000

Source: St Lucie County Office of Management & Budget 2025.

Stormwater/Drainage: Fort Pierce Farms Water Control District and North St. Lucie Water Control Districts provide stormwater services for a portion of unincorporated St. Lucie County.

The drainage improvement needs as identified and prioritized within the CIE schedule are determined through an analysis of the required storm-water management resources necessary to maintain a 10-year/24-hour storm event within adjacent primary basin and outfall areas. This analysis is consistent with the County's involvement in maintaining National Pollutant Discharge and Elimination System (NPDES) standards administered by the United States Environmental Protection Agency (EPA) and the State Department of Environmental Protection (FDEP), which is directly linked to the impacts of land development activity upon the adjacent surface water system. ~~As shown on the project schedule for drainage, the County is emphasizing project funding for capacity improvements on Orange Avenue, Indian River Estates and White City.~~

~~The~~ Tables 9-2a and 9-2b are the capital projects reflected within the schedule that will allow the 10-year/24-hour storm event level of service to be maintained in areas where current surface water management practices are in place and achieved in areas where storm water/drainage projects are programmed over the next 5 years. The cost to provide services by the water control districts to the unincorporated parts of the County are not included in this Capital Improvement Element.

Source: St Lucie County Office of Management & Budget 2025.

***Potable Water*:** Unincorporated areas of the County are served by St. Lucie County Utilities or the Fort Pierce Utility Authority. The improvement needs for potable water is consistent with the ~~10~~20-Year Water Supply Facilities Work Plan for St. Lucie County adopted in January 2022, in concurrence with the South Florida Water Management District, which serves as the overall planning document for potable water facilities. The analysis for potable water demand is based upon the need to provide ~~110~~ 100 gallons per capita/per day of capacity in consideration of population growth. Fort Pierce Utility Authority (FPUA) provides finished bulk water to SCLU and their existing and adopted projected potable water level of service standard is 151 gpcd. As shown on the project schedule for potable water, the County is emphasizing project funding for capacity improvements related to the North and Central County service areas.

Currently, the County is maintaining Level of Service (LOS) for Potable Water facilities. The Water Supply Facilities Work Plan 2022 indicates there is sufficient capacity to serve unincorporated St. Lucie County residents in the short-term and long-term planning timeframes. See the St. Lucie Comprehensive Plan, Infrastructure Element.

As described further in the Infrastructure Element, St. Lucie County presently provides limited water and wastewater services to three areas of the County. The City of Port St. Lucie and the City of Fort Pierce provide some limited utility services outside of their municipal limits, but for the most part the~~se~~ City of Port St. Lucie utility limits its ~~utilities limit their~~ service areas to properties within their corporate boundaries. Because the County Commission does not provide any direct or indirect funding support to these municipal utility providers, the cost to provide their services to the unincorporated parts of the County are not included in this Capital Improvement Element. Funding for any such expansion is to be borne by the particular utility or individuals seeking to obtain those services.

Sanitary Sewer: Unincorporated areas of the County are served by St. Lucie County Utilities or the Fort Pierce Utility Authority. The improvement needs for sanitary sewer considers the ~~10~~-20-Year Water Supply Facilities Work Plan for St. Lucie County. The demand for each project directly correlates to the need to provide 100 gallons per capital/per day of capacity for each Equivalent Residential Connection (ERC)) and 110 MGD in the unincorporated areas by (FPUA). As shown on the project schedule for sanitary sewer, the County is emphasizing project funding for capacity improvements related to the North and Central County service areas ~~North Hutchinson Island waste water treatment plant~~.

Currently, the County is maintaining Level of Service (LOS) for Sanitary Sewer facilities. The Water Supply Facilities Work Plan 2022 indicates wastewater utility providers have sufficient capacity to serve unincorporated St. Lucie County residents in the short-term and long-term planning timeframes. See the St. Lucie Comprehensive Plan, Infrastructure Element.

The County currently provides sewage collection, treatment and disposal, and potable water services to three ~~limited~~ areas of the County. The City of Port St. Lucie and the City of Fort Pierce provide some limited services outside of their municipal limits, but for the most part these utilities limit their service areas to properties within their corporate boundaries. Should unincorporated areas seek to obtain services from Fort Pierce, they are required to enter into an annexation agreement to annex into the municipality once their property is contiguous. If unincorporated areas seek service from Port St. Lucie they may pay a surcharge. Those areas served by the County with water and sewer services have been so serviced through the establishment of local special taxing districts for that purpose. No general tax funds have been used to develop, operate or maintain these systems. Future expansion of these systems will be done in a similar manner and through bonding. Tables 9-3a and 9-3b list the capital improvement revenue and expenditure for the water and sewer facilities.

Table 9-3a Water and Sewer Facility Capital Improvement Revenue

Revenue	**FY 2025**	**FY 2026**	**FY 2027**	**FY 2028**	**FY 2029**

Solid Waste: The existing Class I landfill/Solid Waste Baling and Recycling Facility has sufficient capacity to meet the ~~4.69~~5.27 pounds per capita per day (~~3.88~~ 4.00 pounds per capita per day for Class 1 waste and ~~0.81~~1.27 pounds per capita per day for C+D debris) demand over the next five years. The County has completed several construction and operation phases at the landfill to expand the landfill capacity.

St. Lucie County currently has solid waste disposal facilities to satisfy the needs of the development potential for the subject site and the County is actively assessing alternative disposal strategies and capacity renewal programs. Based upon University of Florida, medium BEBR population projections and a 5-year average per capita generation rate of 4.04 pounds per person per day, the capacity is estimated to last through 2066 (42 years). Presently, the St. Lucie County Bailing & Recycling facility has nearly three quarters of one-million cubic yard capacity remaining in the current cells/phases, with ultimate facility capacity of over twelve million cubic yards remaining, correlating to a multiple decade service period, without accounting for waste reduction or capacity renewal programs that may be

implemented.

The Florida Department of Environmental Protection (FDEP) Tons Municipal Solid Waste (MSW) Collected in Florida Counties report indicates the County facility collected 578,465 tons in 2024 and presented in Table 9-4a, with the following management and annual per capita disposal rates in Table 9-4b below.

Table 9-4a Solid Waste Management and Annual Per Capita Disposal Rates

County	Total MSW Managed 2019	Total MSW Managed 2020	Total MSW Managed 2021	Total MSW Managed 2022	Total MSW Managed 2023	Total MSW Managed 2024

The County has constructed a Single Stream Recyclables Processing Facility. The Single Stream Recyclables Processing Facility is projected to increase the County recycling rate in order to reach Florida's recycling goal of 75 percent by 2020, as specified in Section 403.706(2), F.S. There is no provision in the statute for the goal to sunset after 2020. As reported by FDEP, as of 2024 the County has attained an overall 36% recycling rate and indicates the following in Table 9-5.

Table 9-5 St. Lucie Recycling Rates

County	Population	Total Yard Trash Collected Tons	Total Yard Trash Recycled[1] Tons	Total Yard Trash Recycled[1] %	Yard Trash used as Landfill Cover Tons	Yard Trash used as Landfill Cover %	Yard Trash Beneficially Disposed in a Landfill using Gas to Generate Electricity[2] Tons	Yard Trash Beneficially Disposed in a Landfill using Gas to Generate Electricity[2] %	Yard Trash Beneficially Disposed in a Landfill using Gas for something other than Electricity Tons	Yard Trash Beneficially Disposed in a Landfill using Gas for something other than Electricity %	Total Yard Trash Recycling Credits Tons	Total Yard Trash Recycling Credits %

Source: Florida Department of Environmental Protection

Further, the County has and will continue to consider opportunities for a waste-to-energy facility. Increasing the County recycling rate and exploring other innovative solutions will effectively extend the life of the landfill. Currently, the County is maintaining Level of Service (LOS) for Solid Waste facilities. See the St. Lucie Comprehensive Plan, Infrastructure Element. Tables 9-6a and 9-6b are the 5-Year Capital Improvement revenue and expenditures of solid waste in the County.

Table 9-6a Solid Waste 5-Year Capital Improvement Revenue

Revenue	FY 2025	FY 2026	FY 2027	FY 2028	FY 2029

Parks and Recreation: Currently the County is required to provide a minimum level of service standard of 2.5 acres of regional park land area for every 1,000 residents. The analysis needs to take into consideration the parkland area (in acres) available for both active and passive recreational activities. As such, many of the projects within the County's capital improvements program shown on the project schedule include the expansion of recreation opportunities at existing parks and recreational facilities. Park impact fees are intended primarily to provide adequate capital facilities and equipment for existing regional parks.

~~Many of the projects within the County's capital improvements program include the expansion of recreation opportunities at existing parks and recreational facilities.~~ ~~No projects~~ Projects affecting level of service have been scheduled in Tables 9-7a and 9-7b, including land acquisition and expansion projects.

Schools. The St. Lucie Public Schools ~~District~~ provides for public school facilities in the County. *S*chool facility needs-as reflected within the schedule for the 5-year time frame-are consistent with the requirement to provide sufficient classroom and school site facility to maintain and achieve the 100% capacity level of service standard required for all schools, as determined by the Florida Department of Education. The capital projects shown in ~~the schedule~~ Table 9-8 below will provide the school facility capacity to meet current student enrollment projections for the 5-year window and is consistent with the St. Lucie Public Schools ~~County School District's~~ 5-Year Work Program.

The analysis of needs for school facilities were determined using a 100% capacity for all schools level of service standard required by the Florida Department of Education. The St. Lucie Public Schools provides a 10-Year Utilization Projections (10-Year FISH utilization projection) as shown in the Table 9-9 below. This includes an analysis of current student enrollments at each school and a review of total facility classroom space district-wide divided by the number of students that attend schools within the district. Projects are no longer being identified within the schedule; instead the County is adopting the St. Lucie Public Schools ~~County School District's~~ 5-Year Work Program by reference per Policy 9.1.1.19.

~~**Health Care Facilities**~~

~~The St. Lucie County Health Department provides individualized health care services to St. Lucie County residents at affordable rates. These services are provided by highly qualified and experienced family practice doctors, pediatricians, nurse practitioners, nurses, nutritionists, and case managers. They offer a wide range of health care services to the community including clinical services, health issue~~

~~monitoring, and environmental health issues. The County has no financial oversight of the St. Lucie County Health Department.~~

Category B Facilities

Category B Public Facilities are libraries, administration, mosquito control, and Treasure Coast International Airport as owned, operated or developed by St. Lucie County. Category B Public Facilities are not used for concurrency purposes as provided for in the Concurrency Management System.

County Library: Two level of service standards are applied to evaluate the Level of Service provided by the library system. The first method is measuring the amount of library space at a Level of Service of 0.525 square feet per capita. The second method is measuring the book volume at a Level of Service of 1.45 books per capita.

~~The County operates six libraries. Additionally, St. Lucie County, in conjunction with Indian River State College, financially supports a joint-use facility, the Pruitt Campus Library. All St Lucie County residents have full access to this facility. Total square footage of library space including the Pruitt campus Library is 111,900. The joint-use facility currently constitutes 25,000 square feet (21%) of the overall library space available to county residents~~.

~~The following table shows that the County will be deficient in the Level of Service for the five-year and ten-year planning periods.~~

~~SLC Public Works Complex~~	~~10,579~~

~~The County does not have a numerical level of service standard for County Administrative and Maintenance Space; however, County intends to maintain the provision of Administrative and Maintenance space as the county grows.~~

Mosquito Control: The St. Lucie County Mosquito Control District is a dependent taxing district, overseen by its own board and by the Mosquito Control Section of the Florida Bureau of Entomology and Pest Control (Department of Agriculture and Consumer Services). The District is fully authorized to do and perform all things necessary to carry out the intent and purposes of Chapter 388, F.S., and Chapter 5E-13, Florida Administrative Code. District services also include: reduction of mosquito breeding habitat, control of mosquito larvae where possible, monitoring of mosquitoes and viruses they sometimes carry, measurement and analysis of environmental information, environmental education, and public use of impounded wetland parks.

~~State regulations require the confirmed presence of 25 or more adult mosquitoes in a trap overnight as a justification of adulticide chemical spraying. The Level of Service for Mosquito Control is maintaining state standards for controlling adult mosquitoes when they exceed 25 per night.~~

Airport: The Treasure Coast International Airport (FPR) is located north of Fort Pierce, at 3000 Curtis King Blvd. It is currently operating as a general aviation airport that serves dozens of tenants including aeronautic businesses such as aircraft maintenance, storage, and manufacturing as well as a flight training school, air taxi and charter services, medical transport, and a missionary flights operation. Users experience a well-equipped airport offering a full-service fixed-based operator with fuel services, oxygen and a restaurant. The airport also houses a U.S. Customs and Border Protection office and Aircraft Rescue & Fire Fighting Services (ARFF). The airport is also designated within Foreign Trade Zone 218.

On October 4, 2024, Treasure Coast International Airport received its Part 139 Commercial Service Certification from the FAA. It is anticipated by the end of 2025 that the airport will be offering commercial passenger service, after completion of a terminal renovation and a parking lot expansion. This certification also positions the airport as a competitive player in the aviation industry, ready to meet the demands of growing air travel. With more commercial flights, residents and businesses in the Treasure Coast region will enjoy greater access to destinations, facilitating travel and commerce.

~~It is a general aviation airport that serves several flight schools, an airplane manufacturer, and several businesses ancillary to airport and flight operations. It serves charter flights to and from the Bahamas, as well as, flights throughout the continental United States. Federal Express and United Parcel Services have flight operations from here.~~ The Airport Industrial Park, just to the east of the airport, also benefits from the proximity to the airport and its services. The vast 3,844~~,660~~ acre airport property is owned by the St. Lucie County Board of County Commissioners (BOCC), and is managed by the County's Airport Department. ~~Because of~~ With the availability of developable airport property, a strong potential for both aviation and non-aviation related growth exists at the airport.

Local Policies and Practices

Timing and Location of Capital Improvements.

Timing and location of public facilities is determined by needs projected by the various departments of the County, and in the case of multi-jurisdictional facilities such as State roads or potable water, by coordination with the affected agencies. Capital facilities will be planned and constructed in accordance with the established Schedule of Capital Improvements. This program is a five year schedule of improvements which is supported by a projection of revenues to ensure its feasibility. Improvements included in the 5-year program include those items called for by the various departments of the County.

The following criteria are applied for determining the need for capital improvements:

- Regard for the Urban Service Area and provision facilities in the most efficient and compact manner so as to discourage the proliferation of urban sprawl.
- Anticipated demand through growth.
- Coordination of County plans with those of State agencies and water management districts, school district, and other outside agencies.
- Demand for improvements created by facility breakdown or by life expectancy of the facility.
- Maintenance of level of service standards.

REVENUE AND EXPENSE PROJECTIONS

Florida law states that a county must have a balanced budget. Therefore, the budgeted expenditures and reserves of each fund (including reserves for contingencies, cash flow and all other purposes) will equal the sum of projected fund balance at the beginning of the fiscal year and all revenues and receipts which reasonably can be expected to be received during the fiscal year.

A summary of the total project expenditures for all of the capital projects identified within this CIE update is represented below in Tables 9-10a and 9-9b. The expenditures are funded through various local, state and federal revenue sources.

Source: FDOT Adopted Five Year Work Program July 1, 2024 through June 30, 2029.

Revenue Sources
St. Lucie County shall use the following revenue sources in order to meet the demands for projects identified within each facility Element:

- ad valorem taxes
- impact fees
- utility connection fees and user rates
- state revenue sharing
- one-half cent sales tax
- franchise fees
- gas taxes (constitutional gas tax, local option gas tax, county gas tax, motor fuel rebate)
- state and federal revenues
- bond proceeds
- MSBU and MSTU

State and federal revenue sources for transportation improvements and mass transit include the state transportation trust fund, state TRIP funds, the Federal Highway Administration (FHWA) highway trust fund, and Federal Transit Administration (FTA) trust funds.

Debt Capacity and Obligations
One of the ways in which capital needs are provided is through debt. The primary rationale for becoming obligated for such facilities through indebtedness is that it spreads the cost of the facility over its useful life and thus is indeed paid for by those who are there to use it. St. Lucie County has ~~historically~~ used debt for providing capital facilities and it is quite likely to do so in the future. A key factor in determining how debt can be factored into the provision of necessary infrastructure is to examine the County's capacity to handle debt.

The County strives to maintain a minimum underlying bond rating equivalent to 'Upper Medium Grade' (Moody Rating Service A or Standard & Poor's A).

Moody's

- In April 2025, Moody's Ratings assigned a Aa2 to St. Lucie County's Non-Ad Valorem Revenue Bonds, Series2025A and Non-Ad Valorem Revenue Bonds, Series 2025B. Concurrently, they affirmed the county's outstanding Aa2 issuer and non-ad valorem ratings. In addition, they assigned a stable outlook.
- In December 2017, Moody's Investors Service assigned a rating of Aa3 to St. Lucie County FL's $25.2 million Taxable Non-Ad Valorem Revenue Bonds, Series 2017A. Moody's maintained the Aa3 rating on approximately $46.9 million of rated parity non-ad valorem debt, as well as the county's Aa2 Issuer Rating.

Standard and Poor's (S&P)

- In April 2025, S&P Global Ratings affirmed their previous 'AA' long-term issuer credit rating. They also assigned their 'AA' long-term rating to St. Lucie County, Fla.'s series 2025A and 2025B non-ad valorem revenue bonds. In addition, they assigned a stable outlook.
- In December 2017, S&P Global Ratings assigned its 'AA-' long-term rating to St. Lucie County, FL's Series 2017A taxable non-ad valorem revenue bonds. At the same time, they affirmed their 'AA-' long-term rating on the county's non-ad valorem debt outstanding. They also affirmed their 'AA' long-term issuer credit rating on the county's general obligation (GO) debt outstanding. In February 2018, they subsequently increased St. Lucie County's credit rating on the series 2017A taxable non-ad valorem revenue bonds from AA- to AA.

~~Moody's and S&P evaluated St. Lucie County's issuer credit rating in December of 2017. Moody's rated the County at Aa2. S&P affirmed their 'AA-' long-term rating on the county's non-ad valorem debt outstanding. They also affirmed their 'AA' long-term issuer credit rating on the county's general obligation (GO) debt outstanding. These ratings indicate that the County is exceeding its goal of 'Upper Medium Grade' of investment quality.~~

Neither the Florida Constitution, Florida Statutes, nor the St. Lucie Board of County Commissioners places limits on the amount of debt the voters may approve by referendum. As of September 30, 2025, the County anticipates $91,068,700 government funds bonds. Based on June 1 assessed valuation of $42.8 billion for the fiscal year commencing October 1, 2025, the County's general obligation and voted debt ratio currently equals 0.23 percent (0.23%).

As of September 30, 2024, the County anticipated $100,043,700 governmental funds bonds. Based on the July 1st assessed valuation of $40.0 billion for the fiscal year commencing October 1, 2024, the County's general obligation and voted debt ratio currently equaled 0.25 percent (0.25%).

~~As of September 30, 2017 the County anticipates $125,555,000 government funds bonds. Based on the assessed valuation of $18.7 billion for the fiscal year ending September 30, 2017 the County's general obligation and voted debt ratio currently equals 0.67 percent (0.67%).~~

St. Lucie County has established a fund balance policy at 5 percent of operating expenses as recommended by Bond rating agencies. The County Debt Policy also outlines several key indicators designed to keep direct debt at the lowest possible level:

Outstanding Indebtedness
~~The County's total outstanding debt as of September 30, 2017 is estimated to be $189,319,938. None of the total County debt is repaid with property tax revenues. The debt is repaid with pledged revenues, including sales tax, tourist tax and special taxing units.~~ The County's total outstanding debt as of September 30, 2025, is approximately $295,168,335. None of the County's debt is pledged from property tax revenues. The debt is repaid with pledged revenues, including sales tax, tourist tax and special taxing units.

The County maintains an AA Bond Rating and although the County faces some future debt needs related to major project improvements, its debt capacity remains healthy.

~~Debt Service~~

~~The following table provides debt service projections.~~

~~Table 9-5 Debt Service Projections~~

~~Year Ending September 30~~	~~Total Combined Debt~~		
	~~Principal~~	~~Interest~~	~~Total P&I~~
~~2018~~	~~$ 11,848,534~~	~~$ 7,814,429~~	~~$ 19,662,963~~
~~2019-2023~~	~~$ 63,235,244~~	~~$ 31,206,220~~	~~$ 94,441,464~~
~~2024-2029~~	~~$ 60,105,767~~	~~$ 22,887,647~~	~~$ 82,993,414~~
~~2030-2034~~	~~$ 32,315,393~~	~~$ 7,862,728~~	~~$ 40,178,121~~

Schedule of Capital Improvements

Capital Improvement projects that increase or maintain Category A level of service standards shall be included in the regular Schedule of Capital Improvements contained in this Capital Improvements Element.

~~Financial Feasibility~~

St. Lucie County has prepared this CIE annual update for its adopted five-year capital improvements plan. This update is being transmitted to State Department of ~~Economic Opportunity~~ Commerce in accordance with Section 163.3177 (3)(b), F.S. ~~Sufficient revenue has been committed in the first three (3) years to provide for the expenditure of project funding during FY 2017/18–2019/20. Funding for FY 2020/21-2021/22 includes both committed and planned revenues.~~

Each capital project identified within this CIE shall have a minimum cost of $25,000 as referenced within the adopted and revised Capital Improvements Element ~~(2002)~~. However, most of the capital project costs that add system capacity from new development demand will exceed $50,000 based upon current day costs.

A public facilities capital improvement may include design and land acquisition as part of the total project construction cost. The adopted County Capital Improvements Program (CIP) and State DOT Work Program representing FY ~~2017/18 – 2021/22~~ 2024/25 – 2028/29 may contain non-capacity enhancing projects necessary for the continuation of on-going infrastructure priorities. As such, there is not an equivalent total project cost comparison between the CIE, CIP and State DOT Work Program.

~~*Committed Years 1-3* - funding under the first three years of the CIE represents the funding that is committed and currently available from specific funding sources and is included as part of the first three years of the St. Lucie County Capital Improvement Program (CIP) or the State's Five Year Work Program.~~

~~*Committed and/or Planned Years 4-5* - funding during years four and five represents both committed (currently available and programmed) funding and/or planned funding (currently not available but will be committed once the specific revenue source has been secured during the 5 years of this CIE update).~~

MONITORING AND EVALUATION

The adoption of a Comprehensive Plan requires that procedures be established to evaluate and monitor the intended capital improvements addressed in the Plan. These procedures must be in place and clearly identified. In order to accomplish this, the County will annually review the Capital Improvement Element and other relevant portions of the Plan to assure that the capital needs are being met.

The review will also determine if adequate revenues are available to meet the needs. The data regarding the listed improvements will be updated and revised as needed in order to meet current and future capital improvement needs as they relate to the County's adopted Levels of Service.

CHAPTER 10

ECONOMIC DEVELOPMENT ELEMENT

Calvin, Giordano & Associates, Inc.
EXCEPTIONAL SOLUTIONS™

ECONOMIC DEVELOPMENT ELEMENT

DATA INVENTORY AND ANALYSIS

Purpose
The Economic Development Element is an optional element of the St. Lucie County Comprehensive Plan. The Element provides direction for the future to: assist government and developers in informed investment decision-making; diversify and promote a more sustainable tax base; protect the integrity of real estate investments; protect against overbuilding and urban sprawl; and stimulate job growth in the targeted industries.

The Economic Development Element recognizes that St. Lucie County needs to act in coordination with neighboring municipalities and private enterprise, because of the economic relationships that exists between geographic areas and the private sector. This Element is a starting point and the base of the economic development toolbox. The Economic Development Element describes the current conditions in the county, selects a direction for economic development and develops goals, objectives, and policies to advance the plan for economic development.

ECONOMIC DEVELOPMENT HISTORY AND BENCHMARKS
In 1993, the U.S. Economic Development Administration awarded St. Lucie County a grant to fund a countywide economic plan. The result of this effort was the St. Lucie County Economic Development Base Study, which was completed in 1995. This document quantified local economic conditions to more effectively set a course of action. Subsequently, the County went through a visioning process, which resulted in a document called Vision St. Lucie, from which benchmarks emerged to measure the progress of economic development in the country through 2010, such as an increase in high tech jobs and increases in average earnings per job and per capita income.

In April 2009, the Economic Development Council (EDC) and the St. Lucie Chamber of Commerce hosted the St. Lucie Economic Roundtable to discuss the County's transition to a knowledge-based economy and to create a vision for the future, which resulted in a series of actions to be taken in the next three to five years.

As a result of this action plan, in ~~2009~~ by 2023 St. Lucie County in partnership with the Economic Development Council of St. Lucie County was able to create ~~a 3,000~~ more than 10,000 new, high wage jobs; ~~a thousand~~ many of which are ~~also high wage,~~ high skill positions. ~~By 2010, St. Lucie County became the new home of prestigious biotechnology institutions such as the Torrey Pines Institute for Molecular Studies, and the Mann Research Center, LLC.~~ In addition to an increase in jobs in the County's core industries such as boating manufacturing, agribusiness and construction related occupations, new jobs were created in manufacturing, advanced manufacturing, life sciences, aviation, and logistics.

The Economic Strategy Center of the National Community Development Services presented to the St. Lucie Economic Development Council in ~~January 2018~~ September 2021 their report titled Economic Impact Analysis Return on Investment, 2017-June 2021 summarizing the more recent successes of the EDC's partnerships with local governments. During the period the EDC worked on ~~29~~ 46 projects that retained and created ~~2,867~~ 3,847 jobs, the largest of which are represented

by ~~Maverick Boat Group's current expansion~~ Pursuit Boats and Tradition ~~Medical Center phase I and phase II expansions.~~ Hospital and Lawnwood Regional Medical Center expansions, plus FedEx Ground's new regional distribution facility.

GEOGRAPHIC SETTING

Located on Florida's east coast, about 120 miles south of Orlando and 60 miles north of West Palm Beach, St. Lucie County lies at the heart of the Treasure Coast. The current St. Lucie County population is 385,746. Population of the Treasure Coast (St. Lucie, Indian River and Martin counties) stands at 706,696, with a regional workforce of 315,000+.

One of the greatest influences upon the mobility and economic development of St. Lucie County is the highway network. The proximity of Interstate 95 and the Florida Turnpike combined with US Highway 1, SR A-1-A, Treasure Coast International Airport, and the Port of Ft. Pierce provide access to markets throughout Florida, the United States, South America, and the world. As economies globalize, St. Lucie County's linkages with other geographic areas become more evident and more important. It is therefore necessary to view the County's economy not as an isolated unit, but within a broader context.

~~St. Lucie County also enjoys a reputation as vacation destination with the theme: "Stay Tranquil." Among the many attractions for residents and visitors alike are 21 miles of beach, the Indian River Lagoon, the 500-acre Harbor Branch Oceanographic Institution, Smithsonian Marine Institution, canoeing on the St. Lucie River, or visiting one of the many museums in the County.~~
This competitive location also provides a spectacular setting in which to work and play. St. Lucie County's natural resources are enviable, with more than 21 miles of pristine coastline and beaches, more than 20,000 acres of public parks and natural preserves, and miles of rivers and waterways.

Locations Suitable for Economic Development

Depending on their individual requirements, businesses may find that their immediate needs for property can be met in areas already developed for commercial or industrial activities. The Economic Development Council keeps a database of properties available and suitable for development.

In 2022, the County extended its Urban Service Boundary (USB) to include properties on the west side of Range Line Road along the southern County line, extending north, generally to NSLRWCD Canal No. 73, then east to SR 70 and south to Midway Road, and the north set the stage for utilities and other facilities to provide for growth. The USB was first depicted on the Comprehensive Plan Land Use Map in 1990 to distinguish the area where urban development may occur from areas where it should not occur. At the time of the initial establishment of the USB, the total population of St. Lucie County was 150,171 (1990 Census). The 2020 Census total population count for St. Lucie County was 329,226, a 119% increase in 30 years. The expanded USB encompasses the ongoing growth areas for unincorporated St. Lucie County, and western Port St. Lucie, where public facilities and services including, but not limited to, central water, sewer capacity and roads, are already in place or are in the planning stage. This growth area includes the lands targeted for development by investments in infrastructure (e.g., roads, water and sewers), incentives for targeted industries, promotion of redevelopment and infill development within urbanized areas and the land needed to accommodate population growth projected for the 2040-year planning timeframe.

Priority should be given to renovating existing and creating new locations for economic development and businesses. Land use planning, zoning, infrastructure planning, and fiscal policy should encourage patterns of development that will foster redevelopment and infill of existing commercial and industrial areas and encourage new areas to form in a way that will increase the number and availability of good locations for economic development. Criteria for good business locations include a good transportation network, available infrastructure, close proximity to neighborhoods (employees), high density of customers and support businesses, and proximity to cultural, recreational, and educational opportunities.

Treasure Coast International Airport

~~The Treasure Coast International Airport (FPR) is located north of Fort Pierce. It is a general aviation airport that serves several flight schools, an airplane manufacturer, and several businesses ancillary to airport and flight operations. It serves charter flights to and from the Bahamas, as well as flights throughout the continental United States. Federal Express and United Parcel Services have flight operations from here. The Airport Industrial Park, just to the east of the airport, also benefits from the proximity to the airport and its services. The vast 3,660-acre airport property is owned by the St. Lucie County Board of County Commissioners (BOCC) and is managed by the County's Airport Department. Because of the availability of developable airport property, a strong potential for both aviation and non-aviation related growth exists at the airport.~~

~~Within St. Lucie County, much of the airport property and surrounding area is designated as a Foreign Trade Zone (FTZ). The Florida Aviation System Plan (FASP) 2025 identifies two types of airports: commercial service and community airports – the FDOT selected the term "community airport" rather than "general aviation" to emphasize the importance of the airport to the community it serves. Since FPR only serves general aviation activity at this time, it is classified as a community airport. However, the FASP 2025 indicates that FPR may attract future commercial airline services associated with tourism, business, and international passengers. (Source: Draft St. Lucie County International Airport Master Plan Update, March 2009).~~

Treasure Coast International Airport (FPR) is a commercial airport located in St. Lucie County on Florida's Treasure Coast, approximately four miles northwest of downtown Fort Pierce. The airport recently obtained its Part 139 Commercial Service Certification on October 2, 2024. The airport is publicly owned and operated by the St. Lucie County Board of County Commissioners. The airport offers three paved runways, the longest of which (Runway 10R/28L) measures 6,492 feet long by 150 feet wide. FPR primarily supports business/ corporate aviation, emergency medical operations, and flight training. Aviator College and independent instructors regularly conduct flight training operations at the airport. FPR provides index B Aircraft Rescue and Fire Fighting (ARFF) service. The Treasure Coast International Airport is also a Foreign Trade Zone with an on-site U.S. Customs and Border Protection facility. This designation offers tax relief for manufacturers exporting goods through the facility—bringing high-wage jobs into the county and driving economic growth. Future plans include a terminal renovation, parking lot expansion, and runway extension.

Port of Ft. Piece

The Port of Fort Pierce is the region's only deep-water port. The County incorporated a Port Sub-element in the Comprehensive Plan in 2002 as required by Florida Statutes and most recently updated it in 2022.. Much of the Port Planning Area lies within the City of Fort Pierce and the Fort Pierce Community Redevelopment Area. A small portion of the Port Planning Area lies within unincorporated St. Lucie County and development of this portion is governed by the County's Future Land Use Element, the Port Sub-element, and the County's Land Development Code

Foreign Trade Zones

~~St. Lucie also has a number of sites classified as Foreign Trade Zones (FTZs). The FTZs are secure industrial parks and specialized warehouses considered to be outside of the US Customs territory, typically located close to a port of entry such as the Crossroads Park of Commerce. The following are FTZs in St. Lucie County.~~

- ~~Kings Highway Industrial Park~~
- ~~Airport North~~
- ~~St. Lucie West Commerce Park~~
- ~~Airport Industrial Park~~
- ~~Airport South~~

On February 22, 2022, the Foreign-Trade Zones Board approved the County's application for reorganization of Foreign Trade Zone (FTZ) No. 218 under the Alternative Site Framework. On June 7, 2022, the Board of County Commissioners adopted the new Zone Schedule as follows:

Foreign-Trade Zone No. 218 has:

- Site 1 located at the St. Lucie County International Airport that consists of 1,063 acres located at 300 Curtis King Boulevard in Fort Pierce, Florida;
- Site 2 located at the King's Highway Industrial Park that consists of 102 acres located at King's Highway and Commercial Circle in Fort Pierce, Florida;
- Site 3 located at the St. Lucie West Commerce Park that consists of 315 acres located at 590 N.W. Peacock Boulevard, Port St. Lucie, Florida; and
- Site 4 located at the Crossroads Commerce Park that consists of 15 acres located at State Rd. 70 and I-95 in Fort Pierce, Florida

~~Economic Clusters~~

~~Tradition~~

~~The Tradition Area in Port St. Lucie has become a technology cluster with three prestigious biotechnology institutions Torrey Pines Institute for Molecular Studies. Other technology companies such as an upcoming digital animation studio may complement the technology cluster in Tradition.~~

~~Treasure Coast Education, Research and Development Authority (TCERDA)~~

~~In 2005, the St. Lucie Board of County Commissioners and the University of Florida collectively created this agriculturally and biotechnologically focused Research Park in unincorporated St. Lucie County including renewable energy and alternative fuel companies. This Research Park is governed by the Treasure Coast Education, Research and Development Authority (TCERDA), pursuant to Chapter 159, Part V, Florida Statutes and the enabling Resolution and Ordinance of the Board of County Commissioners of St. Lucie County, Florida. It is envisioned as a home to multi-disciplinary scientists, researchers and educators.~~

~~The initial master plan calls for over 350 developed acres of buildings and wet labs to house research, development and educational institutions, businesses and incubators, with an additional 700 acres for agricultural fields and for future Research Park expansion. USDA's 170,000 square foot Horticultural Research Laboratory and the 90,000 square foot University of Florida's Institute of Food and Agricultural Sciences' Research and Education Center will anchor the TCERDA's~~

~~Research Park.~~

TOURISM

~~St. Lucie County's Tourism Division's mission is to improve the overall economic condition of St. Lucie County through activities, special events, marketing and expanding tourism within St. Lucie County as a year-round destination.~~

~~St. Lucie County's Tourist Development Council (TDC) is represented by local elected officials, hospitality professionals and tourism-related community members and the TDC serves as an advisory committee to the St. Lucie County's Board of County Commissioners. The TDC appointed seats are comprised of three elected officials, three representatives from accommodations collecting the tourist tax, and three representatives from tourism-related industries, as directed by Section 125.0104, F.S.~~

~~St. Lucie County has many natural assets and planned activities to offer visitors. In addition to the round balmy weather other attractions include:~~

- ~~Water activities, 21 miles of beaches, fishing and boating~~
- ~~Sporting events and activities: St. Lucie County is the spring training home to the New York Mets. In addition to baseball, St. Lucie also offers world class golfing opportunities~~
- ~~Ecotourism: The County is blessed with a variety of natural resources and habitats including the Indian River Lagoon, the St. Lucie River and other natural waterways. Water activities are unlimited through exploration by canoe, kayak, stand-up paddle board or on an eco-boat tour. It is also home of numerous natural resources as well as the Heathcote Botanical Gardens, Port St. Lucie Botanical Gardens, the Manatee Education & Observation Center, the St. Lucie County Aquarium featuring the Smithsonian Ecosystems Exhibit, Harbor Branch Oceanographic Institute at FAU and the Oxbow Eco-Center. Land conservation efforts are prominent with over 20,000 acres of nature preserves with great amenities and access available to the public, all of which are free.~~
- ~~Arts and Culture: St. Lucie County is home to the legendary Florida landscape painters A.E. "Bean" Backus and the Florida Highwaymen and renowned African-American author Zora Neale Hurston, inspiration for the Dust Tracks Heritage Trail that follows her life in Fort Pierce in St. Lucie County. The St. Lucie Regional History Center highlight's the County's history and St. Lucie is home to the one and only National Navy SEAL Museum located on the grounds where the men first trained during WWII.~~

~~*Visitor Origination*~~

~~St. Lucie, like many other south Florida communities, experiences a significant influx of seasonal residents during the winter months. Many of these seasonal visitors come from the Northeast and Midwest as well as southeast Canada, and Europe to escape the cold and enjoy St. Lucie's perfect weather and the many activities and opportunities described above. With relatively undeveloped beaches, a quaint small-town feel, a slower-paced Florida lifestyle, the County is also a haven for instate travelers looking to get away from more metro areas in south and central Florida. St. Lucie also attracts a number of international visitors, but succinct data is not available.~~

~~*Targeted Visitor Market and Approach*~~

~~Targeted markets include the Northeast (specifically New York and New Jersey) and Canada. Marketing to Florida residents is prominent, especially during the shoulder and low season months (May – November). Tourism has shifted from a print- heavy media schedule to more digital marketing such as native advertising, storytelling in relevant content environments, social media and email marketing. Due to a relatively small advertising budget, the County is very~~

~~active in establishing and maintaining partnerships with industry partners (VISIT FLORIDA, local hotels, etc.) and nearby destinations partners (Indian River & Martin Counties) to leverage its exposure and budget.~~

~~This data was updated during an economic recession during the late 2000's. Like most Florida destinations, travel had decreased as well as hotel tax revenues. Since the recession, tourist tax revenues have seen a healthy comeback primarily due to increasing demand and rates. St. Lucie attributes this to its ongoing effort to increase its awareness and exposure in key markets and the ability to attract amateur and youth sporting events to our area that take advantage of the numerous sports venues and facilities. Sports tourism is one of the tourism segments that is continuing to thrive.~~

St. Lucie County's Tourism Division's mission is to market St. Lucie County and its cities as a destination and to promote activities and assets that will generate new or repeat visitors, thereby creating a positive economic impact for St. Lucie County.

St. Lucie County's Tourist Development Council (TDC) is represented by local elected officials, hospitality professionals and tourism-related community members and the TDC serves as an advisory committee to the St. Lucie County's Board of County Commissioners. The TDC appointed seats are comprised of three elected officials, three representatives from accommodations collecting the tourist tax, and three representatives from tourism-related industries, as directed by Section 125.0104, F.S.

The County collects a 5% tourist tax (bed tax) on accommodations (hotels, motels, vacation rentals, RV sites, etc.) rented for six (6) months or less. In 2024, the Tourist Development Tax collections totaled $6.1 million, which is a 47% increase from the 2019 fiscal year.

About St. Lucie County as a Tourist Destination

St. Lucie is home to the historic city of Fort Pierce, the vibrant city of Port St. Lucie & the beautiful beaches of Hutchinson Island. It is located on the Atlantic Ocean along the east coast of Florida, 120 miles southeast of Orlando and 115 miles north of Miami with direct access from Florida's Turnpike and Interstate 95 – making it a perfect geographic location for Florida visitors that travel between these two international destinations. St. Lucie offers an array of visitor activities including 21 miles of uncrowded, natural beaches, championship golf, excellent outdoor, nature and water-based adventures, a thriving arts and cultural scene, world class fishing and dozens of unique attractions. It is also home to New York Mets spring training. A variety of affordable accommodations such as hotels, motels, bed & breakfasts, RV parks & campsites, private vacation rentals and an all-inclusive resort are available for visitors to stay overnight.

Downtown Fort Pierce is a destination within the destination. This charming, waterfront city is where history and nature unite. It's been regarded as a "hidden gem" waiting to be uncovered by travel enthusiasts seeking a unique Old Florida experience. It's known as the "Sunrise City" and has been the hub of St. Lucie County for over 100 years – as it is one of the oldest communities on the east coast of Florida. It is a diverse, yet neighborly, community that embraces both the richness of its heritage and the promise of the future. In Fort Pierce, visitors discover a historic, small-town lifestyle with miles and miles of unspoiled shores and gorgeous waterways ideal for boaters and water recreation. Fort Pierce also boasts fascinating marine research centers and museums, a rich history, and a wealth of cultural and recreational attractions. Fort Pierce, especially the historic downtown, is a charming experience that offers art, cultural and a growing culinary scene ranging from casual seafood shacks to fine dining. St. Lucie's southernmost city, Port St. Lucie is a thriving and fast-growing city receiving national accolades regularly. Visitors flock to explore its award-winning neighborhoods, active lifestyle, its family-friendly energy and

for its proximity to south Florida. Port St. Lucie is best known amongst visitors as the Spring Training home of the New York Mets. The NY Mets have called Port St. Lucie is spring training home since the mid-1980s. The city is also home to PGA Village, where three PGA courses are open to the public. Pickleball enthusiasts are also enthralled with Port St. Lucie's impressive facilities that play host to national pickleball tournaments. The outdoor activities in Port St. Lucie go beyond just golf, pickleball and baseball. The picturesque St. Lucie River winds through the heart of the city providing peaceful scenery featuring lush canopies of trees along the shores. Water recreation on the river includes kayaking, paddleboarding, fishing, watersports, airboating, and guided wildlife boat tours to observe native wildlife such as turtles, alligators, manatees and hundreds of species of birds. The burgeoning dining scene is also an attractor to Port St. Lucie. The culinary talent moving into the area is just one more reason why visitors choose Port St. Lucie. Even Guy Fieri, famous for hosting Food Network shows such as Diners, Drive Ins & Dives and Guy's Grocery Games chose Port St. Lucie as his pilot show location for a new series called "Best Bite in Town."

The beaches are the destination's most important asset in attracting visitors. The barrier island just off the mainland of Fort Pierce and Port St. Lucie is known as Hutchinson Island. It boasts 21 miles of coastline and offers more public access per square mile than any other coastal community in Florida. All County and City beaches are free – no parking or admission fees – a rare trait for a Florida coastal destination. Visitors to the beach on Hutchinson Island enjoy an uncrowded, well-preserved experience, as nearly half of the coastline is nature conservation and undeveloped. Hutchinson Island is also home to the only place in south Florida that allows horseback riding on the beach.

St. Lucie is a year-round destination, but visitation is quite seasonal with peak visitation occurring January through March annually (i.e. "snowbird season"). During other months, visitor origins and visitor attractors change. In 2023, Visit St. Lucie commissioned a year-long visitor tracking and economic impact study that provides visitors insights and data to help guide the data-driven decisions for developing an effective marketing strategy. Visit St. Lucie also collects and analyzes data from other sources to help guide marketing decisions.

As of 2024, the number of overnight commercial properties (hotels, motels, bed & breakfast, RV parks, etc.) was approximately 61 totaling nearly 5,000 units available for rent. Additionally, the destination's private vacation rental inventory (i.e. rentals listed on AirBnB, VRBO, etc.) continues to grow year over year fluctuating between 900 and 1,100 listings depending on availability and seasonality.

Visitor Origin

St. Lucie, like many other south Florida communities, experiences a significant influx of seasonal residents during the winter months. Many of these seasonal visitors come from the Northeast and Midwest as well as southeast Canada to escape the cold and enjoy St. Lucie's perfect weather and the many activities and opportunities described above. With relatively undeveloped beaches, a quaint, small-town feel, a slower-paced Florida lifestyle, the County is also a haven for instate travelers looking to get away from more metro areas in south and central Florida.

Top states of visitor origin are New York, New Jersey, Pennsylvania, Michigan, Ohio, Massachusetts, Georgia, Connecticut and Delaware. Toronto Canada is the top place of origin in Canada. Visitors from within the state of Florida remain the destination's top state of origin, therefore marketing to Florida residents is prominent, especially during the low season months (May – November). Tourism's marketing approach has shifted from a print-heavy media plan to primarily digital marketing such as native advertising, storytelling in relevant content

environments, social media and email marketing. Due to a relatively small advertising budget, the County is very active in establishing and maintaining partnerships with industry partners (VISIT FLORIDA, local hotels, etc.) and nearby destinations partners (Indian River & Martin Counties) to leverage its exposure and budget.

Tourism as an Economic Driver

Tourism is a key driver of the St. Lucie County economy, it provided over $1 billion dollars in economic impact in 2023, supporting nearly 8,520 jobs and $287,231,300 in wages and salaries. Tourism generates tax revenue to fund projects and services that benefit local residents such as the construction and maintenance of roads & bridges, public safety, and environmental programs. *(Source – 2023 Visitor Tracking & Economic Impact Study).*

Visit St. Lucie is committed to growing and sustaining the tourism industry through:

- Increasing overnight stays to St. Lucie
- Increasing visitor spending per trip

TARGETED INDUSTRIES

St. Lucie County maintains a Targeted Industry list to provide direction in its economic development programming. New development or expansion projects identified as Targeted Industries may qualify for certain economic incentive offerings from the County. The County intends to focus on industries that have potential for high skill, high paying, long-term employment that will contribute to the overall quality of life of County residents. As of ~~May 2018~~ January 2025, the targeted industry list, by NAICS Code ~~is as follows:~~ are listed in Table 10-1.

Manufacturing Facilities	**Clean Energy**
Chemical Manufacturing	Solar Energy
Pharmaceutical Manafacturing	Biomass Energy and Biofuels
Computer and Electronic Product Manufacturing	Fuel Cell and Hydrogen Technologies
Computer and Electronic Component Manufacturing	Ocean Energy
Electromedical Apparatus Manufacturing	Other Renewables

Jobs Housing Balance
In an ideal world, there would be one job per resident. More realistically, a standard of 1.5 jobs to each housing unit could be developed and a range of 1.3 to 1.7 or 1.4 to 1.6 could be adopted as a target. (Weitz, Jerry, "Jobs-Housing Balance" Planning Advisory Service, American Planning Association, 2003.) The jobs/housing balance for ~~2017~~ 2023 is ~~1.13~~ 0.42 based upon the number of households and labor force totals according to the U.S. Census Bureau QuikFacts.~~. [Consider why the large difference since 2017?]~~

EDUCATION
The public school system is countywide and is governed by the School Board consisting of five members each elected for a four-year term. The school system is comprised of ~~twenty~~ seventeen elementary schools (grades K-5), ~~eleven~~ nine schools that combine grades K-8, five middle schools (grades 6-8) and six high schools (grades 9-12). Of the total 42 schools in St. Lucie County, there are ~~five~~ six Magnet Schools: three elementary, one combined K-8, and ~~one~~ two high school.

Higher educational resources within the County include: Indian River State College (IRSC) (formally Indian River Community College), Keiser University, and extension campuses of Florida Atlantic University, University of Florida, Nova Southeastern University, and Barry University. Each of these institutions offer four-year degree programs.

The following table shows educational attainment rates in comparison to the state and the nation.

ECONOMIC DEVELOPMENT PROGRAMS

~~St. Lucie County has embraced two popular economic development tools, namely branding and cluster development. Along with Indian River and Martin County, St. Lucie County now promotes itself as part of Florida's "Research Coast". This branding highlights the region's desire to shift its image from an agricultural and tourist-based economy (Treasure Coast) to an area that is invested in recruiting businesses that offer high-skilled, high-paying, long-term employment opportunities.~~ St. Lucie County is poised for economic growth. The County's location, hospitality and a large "Suite of Services" partnership with local businesses, key public and private agencies all working together to help move St. Lucie County forward in the right direction.

~~Business Retention and Expansion~~

~~One of the EDC's key programs is the development of a Business Retention and Expansion program (BRE) for businesses located in St. Lucie County through a collaborative effort between St. Lucie County's Workforce Development Board of the Treasure Coast, St. Lucie County's Chamber of Commerce and the Economic Development Council of St. Lucie County.~~

~~The BRE Program tries to identify the following:~~

- ~~Companies at risk.~~
- ~~Companies ready for expansion.~~
- ~~Company business needs - Uncover business needs, local factors, or trends that might lead a company to shutdown, relocate or expand.~~
- ~~Communication - Establish an on-going communication between the public and private sector, and build a pro-business attitude for local businesses.~~
- ~~Knowledge - Build a knowledge base of how the local economy works.~~

Economic Development Incentives

St. Lucie County has a number of incentives for business to relocate in St. Lucie County. They include:

- Job Growth Investment Grant
- Ad Valorem Tax Exemption
- Expedited Review and Permitting
- Waivers, Deferrals and Alternatives
- Industrial Development Revenue Bonds
- Economic Development Impact Fee Mitigation
- Foreign Trade Zone
- Brownfield Site
- Franchise Fee Rebate

Local Utility Programs

- Florida Power and Light Economic Development Rate
- Florida Power and Light Commercial Industrial Service Rider
- Fort Pierce Utilities Authority Electric Economic Development Discount Program
- Fort Pierce Utilities Authority Sales Tax Exemption on Electric

Local Workforce Assistance Programs

- On-the-Job Training Grant
- Employed Worker Training Program

These County programs complement the following State of Florida economic development incentives:

- Sales and Use Tax Exemptions
- Qualified Targeted Industry Grant
- Capital Investment Tax Credit

State of Florida Workforce Assistance Programs

- Incumbent Worker Training Program
- Quick Response Training Program

CHAPTER 11

TOWNS, VILLAGES AND THE COUNTRYSIDE ELEMENT

DATA, INVENTORY AND ANALYSIS

Calvin, Giordano & Associates, Inc.
EXCEPTIONAL SOLUTIONS™

TOWNS, VILLAGES AND THE COUNTRYSIDE ELEMENT

DATA INVENTORY AND ANALYSIS

The landscape in St. Lucie County is changing rapidly. As land values escalate and the availability of undeveloped land decreases in counties to the south, St. Lucie County has become increasingly attractive both for people relocating from congested areas in South Florida and for retirees from the northern states and throughout Florida. At the same time, the viability of utilizing lands in unincorporated St. Lucie County for citrus production has declined due to the devastating effects of citrus greening disease and impacts from hurricanes. According to the UF/IFAS Citrus Research and Education Center, St. Lucie County has seen the largest net decrease in citrus acreage among Florida counties, with a loss of over 60,000 acres.~~to international competition, uncertain harvests, the threat of citrus canker and severe price fluctuations~~. In addition, the relatively high residential densities already designated for agricultural lands in portions of the County have encouraged some landowners to undergo a transition from agricultural to residential uses.

The wave of development that has impacted many areas of Florida over the past several decades has obscured or destroyed the defining characteristics of many communities. Agriculture, natural habitat, and rural communities have been replaced by homogenous, sprawling development characterized by limited access, congested roadways, inadequate or non-functional open spaces, and housing that is segregated from the civic, office, and retail uses that residents depend on in their everyday lives. Without a focused redirection, St. Lucie County will likely succumb to a similar growth pattern.

The principles set forth in the Towns, Villages and Countryside Element (TVC) constitute a pro-active plan for future growth in St. Lucie County. The planning approach outlined in this element contains a strategy for development in the existing rural agricultural areas that will ensure that future growth is sustainable, predictable, protects and enhances the natural environment, and improves the citizens' quality of life. The TVC preserves and enhances existing private property rights while providing incentive-based options to landowners intended to achieve these goals.

The TVC encourages a pattern of development that will preserve the rural character while still providing for future growth. Using the principles of Traditional Neighborhood Design (TND), the strategy for new settlement in the undeveloped areas requires a sustainable growth pattern characterized by a mix of uses, building types and income levels as well as a pedestrian-friendly block and street network. The TVC preserves a significant amount of public open space, promotes strategies for viable agriculture, and helps mitigate the environmental impact of new development in the area. The TVC Element applies only to the Special Area Plan for North St. Lucie County.

Definitions for use in the TVC:

Accessory Unit: an ancillary unit, limited in size, sharing ownership and utility connections with a principal residence, typically located in the rear of the lot.

Alley: a right-of-way that affords a secondary means of access, typically in the back of the property.

Affordable: Monthly rents or mortgage payments, including taxes, insurance, and utilities do not

exceed 30% of the monthly income of the family.

Affordable Housing: ~~Rental or for sale housing that is affordable to people earning 50%-80% of Area Median Income.~~ Rental or for sale housing where monthly rents or monthly mortgage payments including taxes, insurance, and utilities do not exceed 30 percent (30%) of that amount which represents the percentage of the median adjusted gross annual income for the households.

Agricultural Research & Education Facilities: The agricultural uses and the associated facilities including green houses, laboratories and field offices related to agricultural research activities such as, but not limited to USDA, the Institute of Food and Agriculture Services (IFAS), the St. Lucie Agricultural Research and Education Park and Harbor Branch.

Agriculture: The science, art, and business of cultivating soil, producing crops, and raising livestock; farming.

Civic Use: The use of land or buildings by not-for-profit organizations primarily for governmental, educational, artistic, cultural, social or religious purposes. Civic uses may take place in outdoor civic spaces or in civic buildings.

Convenience Center: A collection of small stores servicing a range of daily needs from dry cleaning to baked goods, ranging between 3,000 – 80,000 square feet in size, located along an important thoroughfare, between two neighborhoods, serving the daily needs of two to three neighborhoods.

Community Development District (CDD): A unit of the government classified as an independent special district run by a board composed of landowners within the district. A CDD has the power to assess ad valorem taxes upon the lands in the district, or other special assessments, in order to provide services required to develop the land, such as road building, water and sewer facilities, drainage, conservation and mitigation areas, parks and other recreational facilities.

Community Stewardship Organization (CSO): A not-for-profit organization dedicated to education and conservation efforts that benefit both development and the community.

Countryside: Land, including natural habitat, agriculture, recreation parks and similar uses, required to be set aside as open and unobstructed to the sky in perpetuity, but not including rights-of-way dedicated for streets, roads or alleys.

Development: The carrying out of any building activity, the making of any significant change in the use or appearance of land.

Eco, Heritage and Cultural Tourism: Direct-guided tours of natural, historic or cultural sites, along with education about the resources, without threatening the viability of the resources. Activities may include backpacking, bird watching, horseback riding, canoeing, camping and fishing.

Environmentally Significant Land: Land identified as Environmentally Significant and/or ranked as A, B or C on the County's Native Habitat Inventory Map.

Farm Store: An enterprise located in or near the Countryside providing goods and services needed by farms, such as seed, fertilizer, tools, tool repair. Such stores may also offer farmers markets for the sale of produce grown in the surrounding Countryside.

Farmer's Market: An area set aside within a farm store or a Neighborhood Center to enable farmers to sell produce, dairy products and other products of their farms directly to consumers**Fiscal Neutrality:** A result wherein the net effect of the tax revenue, impact fees and other financial contributions received from new development added to the public spending for infrastructure for the development is neutral so as not to negatively affect the fiscal budget.

Greenway: A narrow or wide corridor of open space managed for natural resource conservation and/or recreation.

Gross Developable Area: The land area including both the Net Developable Area and the Countryside land.

Higher Education: Education institutions operated by the state university system, state department of education or private accredited institutions providing postsecondary, vocational or other specialized forms of learning.

Highway Service Retail: Vehicular-oriented retail such as gas stations, motels and fast food restaurants.

Local Store: Typically a single proprietor establishment, the average size is 500 – 2,000 square feet. Local Stores are located in either the middle or edge of a neighborhood and typically serve one neighborhood. Either residential or office uses are appropriate above the ground level retail. The Local Store is not expected to expand in size over time.

Minimum Average Density: The average number of dwelling units per acre within the Net Developable Area. This number is an average to allow more dense development in the Neighborhood Center area with development becoming gradually less dense through the Neighborhood General to the Neighborhood Edge zone.

Mixed use: Combining two or more of the following uses: retail, commercial and residential within the same building or on the same site.

Mixed-Use Business District: An area that due to its location has the development potential to specialize in terms of accommodating significant business functions. A Mixed-Use Business District should include a variety of uses and is encouraged to provide a place for large offices that may be too intense for the Neighborhood as well as for regional commercial uses, targeted industry, higher education/research facilities, other office uses, and residential uses. Land located within the Mixed-Use Business District may also develop pursuant to the density and intensity established by the Transferable Development Value Map (Figure 11-3) and otherwise in accordance with the Goals, Objectives and Policies of the TVC.

Neighborhood: The basic building block of all new development within the TVC, generally ranging in size from 80 to 150 acres (not including land set aside for the Countryside component), scaled upon a radius of approximately ¼ mile and containing a mix of uses that include residential, retail, office, civic and recreation spaces to support the daily needs of its residents within walking/bicycling/wheelchair distance.

Neighborhood Center: Larger than a Convenience Center, the Neighborhood Center averages 100,000 square feet in size and is anchored with a grocery store. The Neighborhood Center is located at the intersection of two important roads and serves the daily needs of three to four neighborhoods.

Net Developable Area: The land area available for development once the Countryside/Open Space requirement has been achieved.

Open Space: Land that is dedicated to Countryside including natural habitat, agriculture, and recreational parks, or used to fulfill other County objectives (See Policy 11.1.5.4).

Settlement Principles: The guidelines for development established in Policy 11.1.4.2.

Targeted Industry: Businesses identified by the St. Lucie County Planning and Development Services Department in conjunction with the Economic Development Council as desirable to promote job growth in the County. Such businesses are set forth every two years as eligible for the Job Growth Investment Grant Program and include a wide range of commerce; approval by the Board of County Commissioners is required when proposed in the TVC area.

TDR Credits: Credits that are created when the unused Transferable Density of a property receives a multiplier. One credit may be eligible to secure one additional dwelling unit of density when applied to a qualified development.

Transferable Density: The amount achieved by multiplying the size of the property by the residential Transferable Development Value, less any existing dwellings on the property.

Transferable Development Value: The density and intensity designated on a property by the Transferable Development Value Map.

Town: Two or more neighborhoods in the Countryside.

Town Center: Town Centers are an open-air collection of core retailers, typically a minimum of 200,000 square feet, serving approximately 25,000 persons with a primary trade area of 6 to 10 miles. Tenants include multiple anchors, shops, movie theaters, a grocery store, department store, bookseller, restaurants, boutiques, residential units and possibly a hotel. A Town Center distinguishes itself from conventional open-air centers by including a variety of residential types, office and civic uses. The Town Center could ultimately evolve into areas served by mass transit with higher densities. Appropriate locations are along major thoroughfares close to an interstate interchange or within downtown areas.

Urban Services: Potable water supply and distribution; sanitary sewer collection, treatment and disposal.

Village: One neighborhood in the Countryside**.**

Village Center: A Village Center is 80,000 - 140,000 square feet and has tenants similar to those in a Neighborhood Center and may include lodging. The Village Center is located at an intersection of two important thoroughfares and serves four to five adjacent neighborhoods.

Warehouse Type: Usually associated with discount or home improvement retail, typically averages in size from 100,000 – 150,000 square feet. Appropriate locations are along heavily traveled roads or rail corridors. May be a form of land banking that may evolve into another appropriate mixed-use in the future.

Workforce Housing: Housing that is attainable to people earning between 80%-120% of the Area Median Income.

RE: Ear Based Amendment

Dear Mr. Balcer:

Thank you for submitting the proposed comprehensive plan amendment package for St. Lucie County. The reference number for this amendment is 25-02ER**.**

The submission package appears to be complete, and your proposed plan amendments will be reviewed pursuant to Chapter 163.3184(4)(d), Florida Statutes. Once the review is underway, you may be asked to provide additional supporting documentation by the review team to ensure a thorough review. The State Land Planning Agency's Objection, Recommendation and Comment (ORC) report will be mailed to you on or about November 9, 2025.

Pursuant to 163.3184(4)(e)1. If the local government fails to hold the second hearing and adopt the amendments with 180 days after receipt of the state land planning agency's report, the amendments shall be deemed withdrawn unless extended by agreement with notice to the state land planning agency and any affected person that provided comments on the amendment.

Pursuant to 163.3184(4)(e)2. All comprehensive plan amendments adopted by the governing body, along with the supporting data and analysis, shall be transmitted within 10 working days after the final adoption hearing to the state land planning agency and any other agency or local government that provided timely comments under subparagraph (c). If the local government fails to transmit the comprehensive plan amendments within 10 working days after the final adoption hearing, the amendments are deemed withdrawn.

An equal opportunity employer/program. Auxiliary aids and service are available upon request to individuals with disabilities. All voice telephone numbers on this document may be reached by persons using TTY/TTD equipment via the Florida Relay Service at 711.

If you have any questions, please contact Terri Stoutamire, Plan Processor at (850) 717-8513 or by email at terri.stoutamire@commerce.fl.gov. You may also contact James Stansbury, Bureau Chief, who will be overseeing the review of the amendments, at (850)717-8512.

Sincerely,

Donna Harris, Senior Plan Processor

RE: St. Lucie County – Proposed EAR Based Amendments

Dear Mr. Stansbury,

In accordance with Section 163.3191, F.S., St. Lucie County is submitting an amendment package consisting of the proposed EAR-based amendments to the St. Lucie County Comprehensive Plan which is subject to the state coordinated review process pursuant to Section 163.3184(4), F.S. The amendment package is complete with supporting data and analysis.

The Local Planning Agency (St. Lucie County Planning & Zoning Commission) held a public hearing on August 20, 2025, and voted unanimously to recommend approval of the amendments. The Board of County Commissioners held a transmittal hearing on September 2, 2025, and voted unanimously to transmit the proposed amendments to the Department of Commerce and corresponding reviewing agencies.

All proposed text is in a strike-through/underline format within the amendment package. St. Lucie County is updating its Comprehensive Plan in accordance with Florida Statute requirements and has included amendments to address issues of local concern. A copy of the amendment package has been sent to all required reviewing agencies.

The proposed amendment is available for public inspection online at https://stluciecofl.portal.civicclerk.com/event/3154/overview and during normal business hours in the St. Lucie Planning & Development Services Department, 2300 Virginia Ave, Fort Pierce, FL 34982.

The County anticipates holding an adoption hearing within 180 days after receipt of the Florida Commerce Objection, Recommendations, and Comments Report.

If you have any questions or require additional information, please contact me.

We appreciate your time and deliberation on the proposed EAR-based amendments to the St. Lucie County Comprehensive Plan. Thank you for your assistance.

Fort Pierce, Florida 34982

RE: St Lucie Couty Evaluation and Appraisal Notification Letter Due Date

Dear Mr. Belcher:

As you know each local government in the State of Florida is required to regularly review its comprehensive plan pursuant to Section 163.3191, Florida Statutes (F.S.).

The purpose of this letter is to remind you that your Evaluation and Appraisal Notification Letter is due on **October 1, 2024;** as well as remind you of the 2023 requirements for submitting your EAR Notification Letter. Section 163.3191, F.S., states that at least once every 7 years, each local government shall evaluate its comprehensive plan to determine if plan amendments are necessary to reflect a minimum planning period of at least 10 years as provided in s. 163.3177(5) or to reflect changes in state requirements, or changes in local conditions since the last update of the comprehensive plan and notify the state land planning agency as to its determination. If the local government determines that no updates are necessary **the notification must include a separate affidavit, signed by the chair of the governing body of the county or the mayor of the municipality, attesting that all elements of its comprehensive plan comply with this subsection. The affidavit must also include a certification that the adopted comprehensive plan contains the minimum planning period of 10 years, as provided in s. 163.3177(5), and must cite the source and date of the population projections used in establishing the 10-year planning period. Updates to the required elements and optional elements of the comprehensive plan must be processed in the same plan amendment cycle.**

Section 163.3191(4) F.S., provides that a local government will be prohibited from initiating or adopting any publicly initiated amendment to its comprehensive plan if it fails to timely submit its notification letter or transmit the necessary amendment to update its plan, within one year of notification. This prohibition on plan amendments does not apply to privately initiated plan amendments.

An equal opportunity employer/program. Auxiliary aids and service are available upon request to individuals with disabilities. All voice telephone numbers on this document may be reached by persons using TTY/TTD equipment via the Florida Relay Service at 711.

It is important to complete the Evaluation and Appraisal notification process and you are encouraged to comprehensively evaluate and, as necessary, update your comprehensive plan to reflect changes in local conditions. Department staff is available to assist and provide technical guidance to your questions concerning this new process.

If you have any questions concerning the processing of the Evaluation and Appraisal Notification Letter or the submittal of proposed Evaluation and Appraisal based amendments, please contact me at, (850) 717-8491 or by email at donna.harris@commerce.fl.gov. You can also contact Jana Williams, Regional Planning Administrator at (850)717-8483, or by email at jana.williams@commerce.fl.gov.

Sincerely,

Donna Harris, Senior Plan Processor
Bureau of Community Planning and Growth

Title XI	Chapter 163	View Entire Chapter
COUNTY ORGANIZATION AND INTERGOVERNMENTAL RELATIONS	INTERGOVERNMENTAL PROGRAMS	

163.3191 Evaluation and appraisal of comprehensive plan.—

(1) At least once every 7 years, each local government shall evaluate its comprehensive plan to determine if plan amendments are necessary to reflect a minimum planning period of at least 10 years as provided in s. 163.3177(5) or to reflect changes in state requirements in this part since the last update of the comprehensive plan, and notify the state land planning agency as to its determination. The notification must include a separate affidavit, signed by the chair of the governing body of the county or the mayor of the municipality, attesting that all elements of its comprehensive plan comply with this subsection. The affidavit must also include a certification that the adopted comprehensive plan contains the minimum planning period of 10 years, as provided in s. 163.3177(5), and must cite the source and date of the population projections used in establishing the 10-year planning period.

(2) If the local government determines amendments to its comprehensive plan are necessary to reflect changes in state requirements, the local government must prepare and transmit within 1 year such plan amendment or amendments for review pursuant to s. 163.3184.

(3) Local governments shall comprehensively evaluate and, as necessary, update comprehensive plans to reflect changes in local conditions. Plan amendments transmitted pursuant to this section must be reviewed pursuant to s. 163.3184(4). Updates to the required elements and optional elements of the comprehensive plan must be processed in the same plan amendment cycle.

(4) If a local government fails to submit the letter and affidavit prescribed by subsection (1) or to transmit the update to its plan pursuant to subsection (3) within 1 year after the date the letter was transmitted to the state land planning agency, it may not initiate or adopt any publicly initiated plan amendments to its comprehensive plan until such time as it complies with this section, unless otherwise required by general law. This prohibition on plan amendments does not apply to privately initiated plan amendments. The failure of the local government to timely update its plan may not be the basis for the denial of privately initiated comprehensive plan amendments.

(5) If it is determined that a local government has failed to update its comprehensive plan pursuant to this section, the state land planning agency must provide the required population projections that must be used by the local government to update the comprehensive plan. The local government shall initiate an update to its comprehensive plan within 3 months following the receipt of the population projections and must transmit the update within 12 months. If the state land planning agency finds the update is not in compliance, it must establish the timeline to address the deficiencies, not to exceed an additional 12-month period. If the update is challenged by a third party, the local government may seek approval from the state land planning agency to process publicly initiated plan amendments that are necessary to accommodate population growth during the pendency of the litigation. During the update process, the local government may provide alternative population projections based on professionally accepted methodologies, but only if those population projections exceed the population projections provided by the state land planning agency and only if the update is completed within the timeframe set forth in this subsection.

(6) The state land planning agency may not adopt rules to implement this section, other than procedural rules or a schedule indicating when local governments must comply with the requirements of this section.

163.3191 Evaluation and appraisal of comprehensive plan.—

(1) At least once every 7 years, each local government shall evaluate its comprehensive plan to determine if plan amendments are necessary to reflect a minimum planning period of at least 10 years as provided in s. 163.3177(5) or to reflect changes in state requirements in this part since the last update of the comprehensive plan, and notify the state land planning agency as to its determination. The notification must include a separate affidavit, signed by the chair of the governing body of the county or the mayor of the municipality, attesting that all elements of its comprehensive plan comply with this subsection. The affidavit must also include a certification that the adopted comprehensive plan contains the minimum planning period of 10 years, as provided in s. 163.3177(5), and must cite the source and date of the population projections used in establishing the 10-year planning period.

(2) If the local government determines amendments to its comprehensive plan are necessary to reflect changes in state requirements, the local government must prepare and transmit within 1 year such plan amendment or amendments for review pursuant to s. 163.3184.

(3) Local governments shall comprehensively evaluate and, as necessary, update comprehensive plans to reflect changes in local conditions. Plan amendments transmitted pursuant to this section must be reviewed pursuant to s. 163.3184(4). Updates to the required elements and optional elements of the comprehensive plan must be processed in the same plan amendment cycle.

(4) If a local government fails to submit the letter and affidavit prescribed by subsection (1) or to transmit the update to its plan pursuant to subsection (3) within 1 year after the date the letter was transmitted to the state land planning agency, it may not initiate or adopt any publicly initiated plan amendments to its comprehensive plan until such time as it complies with this section, unless otherwise required by general law. This prohibition on plan amendments does not apply to privately initiated plan amendments. The failure of the local government to timely update its plan may not be the basis for the denial of privately initiated comprehensive plan amendments.

(5) If it is determined that a local government has failed to update its comprehensive plan pursuant to this section, the state land planning agency must provide the required population projections that must be used by the local government to update the comprehensive plan. The local government shall initiate an update to its comprehensive plan within 3 months following the receipt of the population projections and must transmit the update within 12 months. If the state land planning agency finds the update is not in compliance, it must establish the timeline to address the deficiencies, not to exceed an additional 12-month period. If the update is challenged by a third party, the local government may seek approval from the state land planning agency to process publicly initiated plan amendments that are necessary to accommodate population growth during the pendency of the litigation. During the update process, the local government may provide alternative population projections based on professionally accepted methodologies, but only if those population projections exceed the population projections provided by the state land planning agency and only if the update is completed within the timeframe set forth in this subsection.

(6) The state land planning agency may not adopt rules to implement this section, other than procedural rules or a schedule indicating when local governments must comply with the requirements of this section.

I. SUMMARY

Policy 1.1.6.13 of the Future Land Use Element shall be updated with an assessment of the Urban Service Boundary to help the County determine if the boundary should be adjusted to support urban growth through the 2050 planning horizon. The following assessment includes:

- Population growth projections through 2050;
- Review of the existing land use patterns and land use designations;
- Inventory of vacant land within the current USB;
- Forecast of the land needed to accommodate the projected population growth;
- Employment forecasts;
- Growth trends, market conditions and growth pressures along the Treasure Coast region;
- Forecast of the land needed to accommodate the commercial and industrial projected growth;
- Inventory of public facilities and services;
- Review of existing infrastructure capacity and the projected needs through 2050; and
- Inventory of lands intended to be protected from encroachment of urban development to preserve natural resources, rural communities; agricultural uses, etc.

As part of the initial data and existing conditions analysis required to complete an Evaluation and Appraisal Report and Comprehensive Plan update, CGA analyzed land availability for potential residential unit development inside and outside the Urban Service Boundary (USB).

Methods:

- Determine population and housing unit projections countywide from BEBR.
- Determine total acreage of land required to meet medium growth projections.
- Determine available vacant lands inside and outside USB. Optimize lands zoned Vacant Residential and Undeveloped Land, or County-owned land near or adjacent to existing services, near transportation corridors, or adjacent to recent development projects/approvals.
- Determine the amount of vacant land available/developable for residential units within and outside the current USB for 10- and 20-year projections.

The analysis found vacant available lands inside the 2025 USB, if built-out, could accommodate **123% of the 10-year projected housing growth**. Using the same projection the USB may require expansion when the 20-year housing unit growth projection is fully built.

DRAFT

II. BACKGROUND

- BEBR provides a medium-range 10-year population growth projection estimate for St Lucie County (including incorporated jurisdictions) of **88,172** people and 20-year projection of **140,172** people.
- Using a BEBR estimate of 2.53 people per housing unit 10-year unit growth is projected at **34,851** units, and a 20-year projection of **55,404** units.

BEBR Projections	**2025**	**2035**	**2045**	**10 Year Growth**	**20 Year Growth**
Population	368,628**	456,800	508,800	88,172	140,172
Dwelling Units*	N/A	180,553	201,107	34,851	55,404

** Based on BEBR est. of 2.53 people per dwelling unit.*

*** Closest actual population figures used are from 2023 US Census ACS, population only.*

III. ANALYSIS

Unincorporated Areas Inside 2025 USB (No USB expansion)

INSIDE USB	**Developable Acres**	**Projected Units**	**Projected Population**	**% of 10Y Projected Units Accommodated by Developable Land**
Vacant Residential (1)	1,335	2,670	6,755	7.7%
Undeveloped Lands (Grazing/Ag/Crop Land) (1)	19,519	39,038	98,766	112%
County Lands (2)	1,216	1,216	3,078	3.5%
Total	**22,070**	**42,924**	**108,599**	**123%**

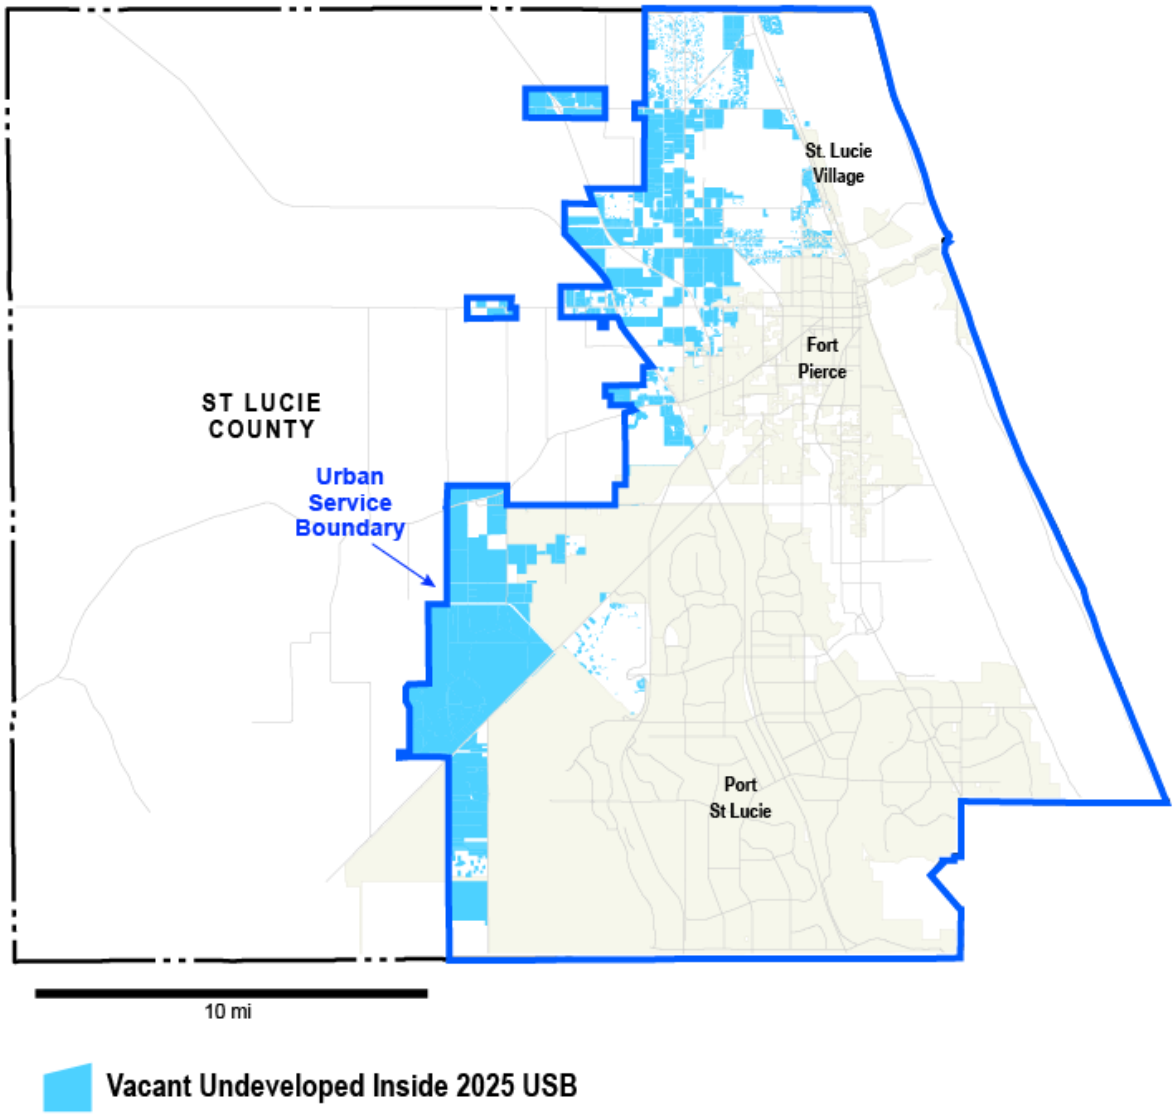
FIGURE 1 – UNDEVELOPED LAND FOR FUTURE DEVELOPMENT (BLUE PARCELS)



Blue parcels represented in Figure 1 are broken down into Vacant Residential and Undeveloped Agricultural and Grazing Lands, and County-owned Lands.

Vacant Residential

- Vacant Residential lands may accommodate roughly **2,670 units** at a projected density of 2.0 units/acre over **1,335 acres** within the USB.

- These lands may absorb an estimated **7.7% of 10-year unit growth**.
- Selection methods:
    - All vacant parcels with residential zoning that have not been built out.
- Estimated density of 2.0 units/acre due to current minimum lots sizes and existing infrastructure and access to the parcels. New units only require a building permit.
- Factors including landowners purchasing several adjacent properties as investments, or to preserve privacy/views, may contribute to these lands being slow to fully build out.

Undeveloped Agricultural and Grazing Lands

- Undeveloped Lands may accommodate roughly **39,038 units** at a density between 1.0 unit/acre over **19,519 acres** inside the USB.
- These lands may absorb an estimated **112% of 10-year unit growth**.
- Undeveloped Lands selection methods:
    - Proximity to major roads.
    - Proximity to existing or recently approved subdivisions/residential developments or rezonings.
    - Proximity to infrastructure/services or extensions.
    - Private ownership.

County-owned Lands

- County-owned Lands may accommodate roughly **1,216 units** at a density between 1.0 and 2.0 units/acre over **1,216 acres** inside the USB.
- County-owned Lands occupies a very small portion of lands inside the USB that meet the selection criteria and are not held in conservation status.
- These lands may absorb an estimated **3.5% of 10-year unit growth**.
- County-owned Lands selection methods:
    - Proximity to major roads.
    - Proximity to existing or recently approved subdivisions/residential developments or rezonings.
    - Proximity to infrastructure/services or extensions.
    - Public ownership.

DRAFT

IV. USB EXPANSION AREAS OF FOCUS

The prior comprehensive plan EAR highlighted two specific areas for future analysis:

- North County Expanded Service Area
- Agricultural Limited-Service Area

Unincorporated Areas Outside 2025 USB (Expansion required)

OUTSIDE USB: Target Expansion Areas	**Developable Acres**	**Projected Units**	**Projected Population**	**% of Remaining 20Y Projected Units Accommodated by Developable Land**
North Couty Expanded Service Area (1)	5,818	11,635	29,437	50%
Agriculture Limited-Service Area (2)	8,073	2,018	5,106	69%
Total	**13,890**	**13,653**	**34,142**	**119%**

Source: Urban Service Boundary Vacant Lands Analysis, Calvin, Giordano & Assoc. 2025, BEBR.

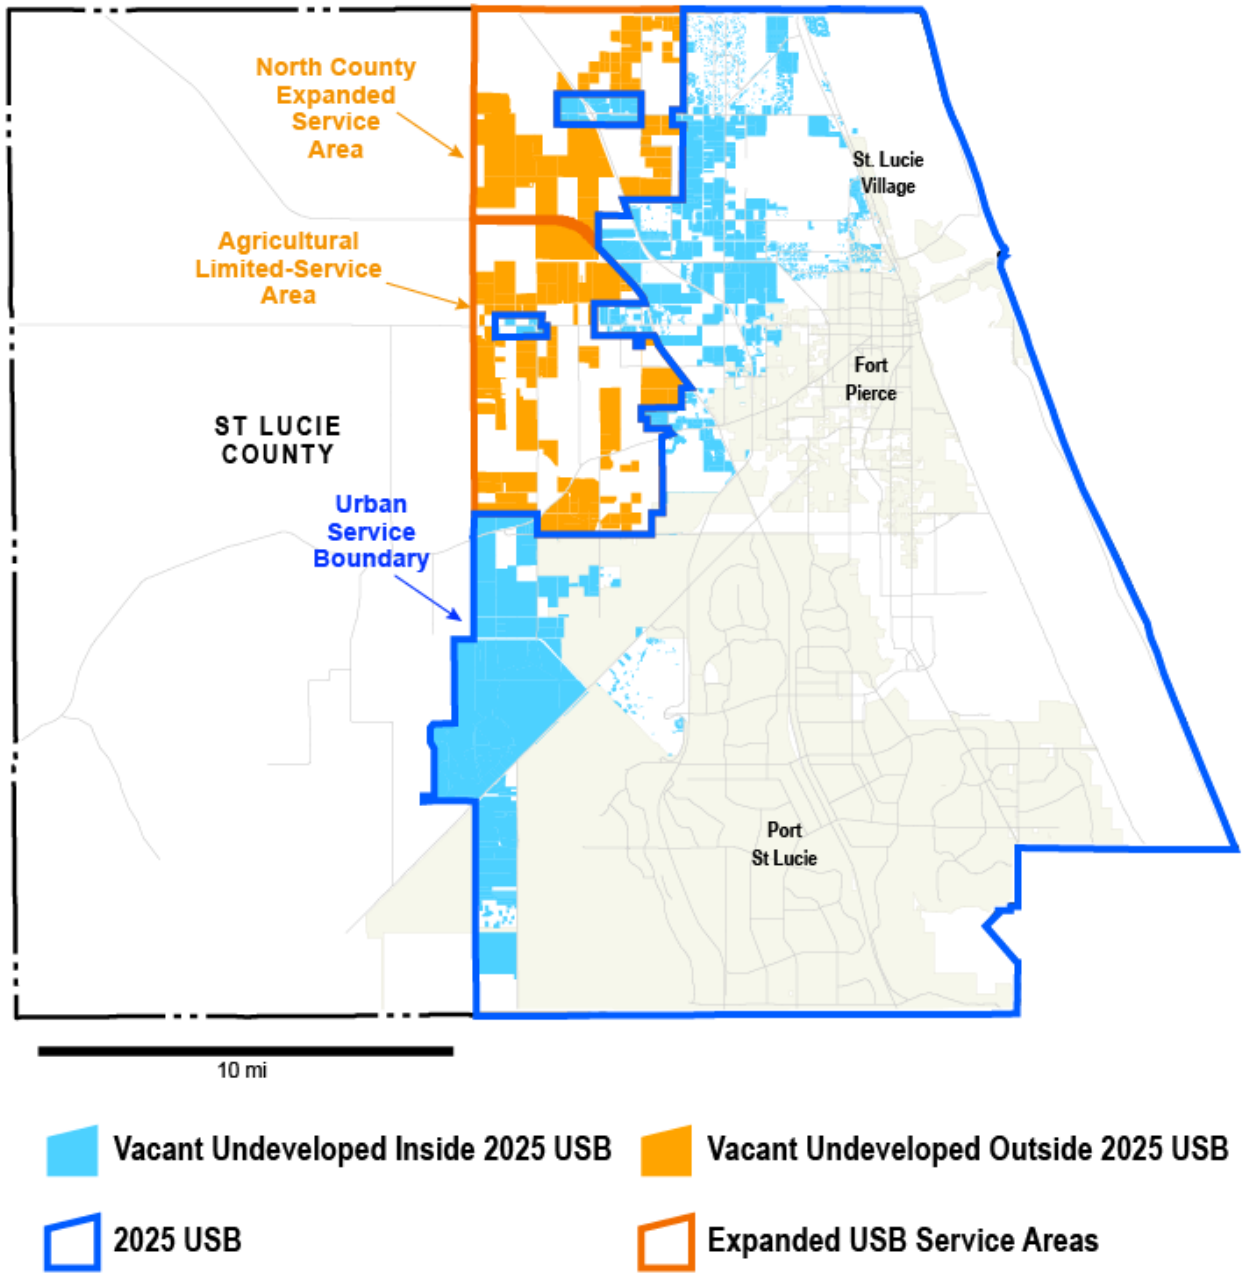
DRAFT

FIGURE 2 – UNDEVELOPED LANDS IN EXPANDED SERVICE AREAS



Undeveloped Lands Outside USB in Expanded USB Areas

- Vacant Undeveloped Lands outside the USB may accommodate roughly **13,653 units** at a density between 0.25 and 2.0 units/acre over **13,890 acres.**
- These lands have potential to accommodate **119% of the 20-year growth** in housing units that remains after 10-year growth projections are met. Orange areas in Figure 2 illustrate vacant undeveloped lands within the two targeted expansion areas identified in the comprehensive plan: North Couty Expanded Service Area, and Agriculture Limited-Service Area.
- Vacant Undeveloped Lands outside the USB selection methods:
    - Proximity to major roads.
    - Proximity to existing or recently approved subdivisions/residential developments or rezonings.
    - Proximity to most recent USB extensions or infrastructure/services extensions.
    - Continuous single-owner private ownership.
    - Non-ranch ownership.
    - Single-use agricultural or grazing lands with lack of permanent structures.
- Undeveloped Lands selected from the following Future Land Uses, in priority:
    - TVC
    - Ag 2.5
    - Ag 5
    - SD
    - RE
- Undeveloped Lands selected from the following Zoning districts, in priority:
    - AG-1
    - AG-2.5
    - AG-5

V. FINDINGS

1. Available land inside the USB and in Expanded Service Areas may accommodate an estimated **56,577 units** based on this scenario.
2. The same available lands under current Future Land Use designations and densities would accommodate **90,771 units**.

DRAFT

3. Vacant undeveloped lands inside the USB have capacity to accommodate 123% of the 10-year medium growth projection.
4. Residentially zoned lands are unlikely to accommodate substantial amount of projected units.
5. Ranching/grazing lands likely most likely to transition into housing development under previous 5 years if a "business-as-usual" scenario continues.
6. Optimal lands outside the USB but within the two identified USB expansion areas can accommodate 20-year growth and beyond.

VI. CONSIDERATIONS

1. Consider the North County Expanded Service Area and Agricultural Limited-Service Area for future USB expansion to accommodate 20-year projected growth.
2. Create interjurisdictional maps to illustrate future annexations between incorporated limits and the County's USB.
3. As part of any future strategic planning efforts, create and model scenario planning alternatives that consider growth along major transportation corridors, in direct proximity to existing infrastructure, or in designated areas as defined by the Comprehensive Plan (i.e. TVC future land uses).

DRAFT

BUSINESS IMPACT ESTIMATE

Before the enactment of a proposed ordinance, the County shall prepare or cause to be prepared a business impact estimate in accordance with Section 125.66(3), Florida Statutes. This Business Impact Estimate may be revised following its initial posting.

BOCC Meeting Dates: permission to advertise _N/A_ 1st hearing 9/2/2025_2nd hearing 5/5/2026

Proposed Ordinance Title/Reference:
AN ORDINANCE OF THE BOARD OF COUNTY COMMISSIONERS OF ST. LUCIE COUNTY, FLORIDA AMENDING THE TEXT OF THE COMPREHENSIVE PLAN AND UPDATES TO THE MAP SERIES IN ACCORDANCE WITH THE EVALUATION AND APPRAISAL REVIEW (EAR) BASED AMENDMENTS; PROVIDING FINDINGS; PROVIDING FOR CONFLICTING PROVISIONS; PROVIDING FOR SEVERABILITY; PROVIDING FOR APPLICABILITY; PROVIDING FOR FILING WITH THE FLORIDA DEPARTMENT OF STATE; PROVIDING FOR FILING WITH THE FLORIDA DEPARTMENT OF COMMERCE; PROVIDING FOR AN EFFECTIVE DATE; AND PROVIDING FOR ADOPTION.

The Proposed Ordinance ☒ does ☐ does not fall under one of the following enumerated exceptions:[1]

- ☒ The proposed ordinance is required for compliance with Federal or State law or regulation;
- ☐ The proposed ordinance relates to the issuance or refinancing of debt;
- ☐ The proposed ordinance relates to the adoption of budgets or budget amendments, including revenue sources necessary to fund the budget;
- ☐ The proposed ordinance is required to implement a contract or an agreement, including, but not limited to, any Federal, State, local, or private grant or other financial assistance accepted by the county government;
- ☐ The proposed ordinance is an emergency ordinance;
- ☐ The ordinance relates to procurement; or
- ☐ The proposed ordinance is enacted to implement the following:
  a. Development orders and development permits, as those terms are defined in s. 163.3164, and development agreements, as authorized by the Florida Local Government Development Agreement Act under ss. 163.3220-163.3243;
  b. Comprehensive plan amendments and land development regulation amendments initiated by an application by a private party other than the county;
  c. Sections 190.005 and 190.046, Florida Statutes, regarding community development districts;
  d. Section 553.73, Florida Statutes, relating to the Florida Building Code; or
  e. Section 633.202, Florida Statutes, relating to the Florida Fire Prevention Code.

A business impact estimate is not required for the above exceptions.

Summary of Proposed Ordinance and Statement of Public Purpose to be Served:
Section 163.3191(1), Florida Statutes directs local governments to conduct an Evaluation and Appraisal Review (the "EAR") every seven (7) years to determine whether the need exists to amend the comprehensive plan to reflect changes in state requirements since the last time the comprehensive plan was updated. The proposed ordinance adopts EAR-based amendments to the St. Lucie County Comprehensive Plan to comply with statutory requirements..

Estimate of Direct Economic Impact on Private/For Profit Businesses:
a. Estimate of Direct Business Compliance Costs: N/A
b. New Charges/Fees on Businesses Impacted: N/A
c. Estimate of Regulatory Costs: N/A

Good Faith Estimate of Number of Businesses Likely Impacted: None.

Any Additional Information: None

ST. LUCIE COUNTY BOARD OF COUNTY COMMISSIONERS PUBLIC HEARING AGENDA

May 5, 2026

NOTICE OF THE PROPOSED EVALUATION AND APPRAISAL REVIEW (EAR) BASED AMENDMENTS TO THE ST. LUCIE COUNTY COMPREHENSIVE PLAN

The St. Lucie County Board of County Commissioners proposes to consider the adoption of the following to the State Land Planning Agency:

ORDINANCE

AN ORDINANCE OF THE BOARD OF COUNTY COMMISSIONERS OF ST. LUCIE COUNTY, FLORIDA AMENDING THE TEXT OF THE COMPREHENSIVE PLAN AND UPDATES TO THE MAP SERIES IN ACCORDANCE WITH THE EVALUATION AND APPRAISAL REVIEW (EAR) BASED AMENDMENTS; PROVIDING FINDINGS; PROVIDING FOR CONFLICTING PROVISIONS; PROVIDING FOR SEVERABILITY; PROVIDING FOR APPLICABILITY; PROVIDING FOR FILING WITH THE FLORIDA DEPARTMENT OF STATE; PROVIDING FOR FILING WITH THE FLORIDA DEPARTMENT OF COMMERCE; PROVIDING FOR AN EFFECTIVE DATE; AND PROVIDING FOR ADOPTION.

DATE AND TIME: TUESDAY, MAY 5, 2026, AT 6:00 P.M.

PLACE: COUNTY COMMISSION CHAMBERS, ST. LUCIE COUNTY ADMINISTRATION BUILDING, ROGER POITRAS ANNEX, 2300 VIRGINIA AVENUE, FORT PIERCE, FLORIDA

APPLICANT: BOARD OF COUNTY COMMISSIONERS, ST. LUCIE COUNTY

PURPOSE: St. Lucie County is undertaking an update to its Comprehensive Plan in accordance with Florida Statute requirements and is seeking input on those changes from the Public and the Board of County Commissioners. The Board of County Commissioners will consider transmittal of these proposed changes to the Department of Commerce. The Comprehensive Plan update (called "EAR-based Comprehensive Plan Amendments") provides direction for land development, infrastructure, transportation, conservation, economic development, and is the basis for the implementing the Land Development Code. Updates are proposed to the data and analysis, updates are proposed to the mandatory and optional elements of the Comprehensive Plan (as needed) as well as the map series to reflect changes in state requirements and data since the last update of the Comprehensive Plan, updates are proposed to include the required minimum planning period of at least 10 years, and updates are proposed for out dated references and clarification.

The Board of County Commissioners will hold the second of two (2) **PUBLIC HEARINGS** on this item in the Commission Chambers, Roger Poitras Annex, 3rd Floor, 2300 Virginia Avenue, Fort Pierce, FL on **Tuesday, May 5, 2026, beginning at 6:00 pm** or as soon thereafter as possible.

All interested persons will be given an opportunity to be heard. Written comments received in advance of the public hearing will also be considered. Written comments to the Board should be received by the Planning and Development Services Department - Planning Division at least three (3) days prior to the scheduled hearing. Comments will be distributed to the Board members in advance of the meeting and included in the record provided the comments comply with the County's rules. The petition file is available for review at the Planning and Development Services Department – Planning offices located at 2300 Virginia Avenue, Fort Pierce, FL during regular business hours. Please call (772) 462-1562 or TDD (772) 462-1428 if you have any questions or require additional information about this petition.

The St. Lucie County Board of County Commissioners has the power to review and approve or disapprove any applications within their area of responsibility.

The proceedings of the Board of County Commissioners are electronically recorded. **PURSUANT TO Section 286.0105, Florida Statutes**, if a person decides to appeal any decision made by the Commission with respect to any matter considered at a meeting or hearing, he or she will need a record of the proceedings. For such purpose, he or she may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based. Upon the request of any party to the proceeding, individuals testifying during a hearing will be sworn in. Any party to the proceeding will be granted an opportunity to cross-examine any individual testifying during a hearing upon request. If it becomes necessary, a public hearing may be continued to a date certain.

Anyone with a disability requiring accommodation to attend this meeting should contact the St. Lucie County Community Risk Manager at least forty-eight (48) hours prior to the meeting at (772) 462-1546 or T.D.D. (772) 462-1428. Any questions about this agenda may be referred to St. Lucie County Planning Division at (772) 462-2822.

BOARD OF COUNTY COMMISSIONERS
ST. LUCIE COUNTY, FLORIDA

*RESOLUTION ITEM - CONDITIONAL USE
QUASI-JUDICIAL ITEM? YES

AGENDA REQUEST

TO: **Board of County Commissioners**

PRESENTED BY: Morgan Phelps, Associate Planner

SUBMITTED BY: Planning & Development Services

SUBJECT: Pitstop Mini Market, Inc. Conditional Use Permit for Packaged Alcohol Sales within the Commercial Neighborhood Zoning District - **THIS ITEM IS QUASI-JUDICIAL**

BACKGROUND:

The applicant, William Fagan, on behalf of the property owner Aghapy Properties, LLC, is seeking a Conditional Use Permit in accordance with the Land Development Code (LDC) Section 11.07.03, to allow the sale of packaged alcoholic beverages for off-site consumption at a convenience store within the CN (Commercial, Neighborhood) Zoning District, at 5061 Turnpike Feeder Road, in St. Lucie County.

PREVIOUS ACTION:

On April 16, 2026, the Planning and Zoning Commission voted unanimously to forward a recommendation of approval to the Board of County Commissioners.

FINANCIAL IMPACT:

N/A

RECOMMENDATION:

Staff recommends the Board approve the Conditional Use Permit and allow the Chair to sign the Resolution as approved by the County Attorney.

TO:	Board of County Commissioners
THROUGH:	Benjamin Balcer, AICP, Planning & Development Services Director Kori Benton, AICP, Planning & Zoning Manager
FROM:	Morgan Phelps, AICP Candidate, Associate Planner
DATE:	April 17, 2026
SUBJECT:	Pitstop Mini Market, Inc. - Conditional Use (CU-2603-000103)

The applicant, William Fagan, on behalf of the property owner, Aghapy Properties, LLC, is seeking a Conditional Use Permit in accordance with St. Lucie County Land Development Code (LDC) Sections 3.01.03.Q.7.d.(2) and 11.07.00, to allow the sale of packaged alcoholic beverages (non-distilled) for off-site consumption at a convenience store within the CN (Commercial, Neighborhood) Zoning District, at 5061 Turnpike Feeder Road, in St. Lucie County.

GENERAL INFORMATION:

Property Owner:	Aghapy Properties, LLC. 445 21st Court SW, Vero Beach, FL 32962-2192
Applicant:	William Fagan 7806 Lakeside Way, Fort Pierce, FL 34951
Location:	5061 Turnpike Feeder Road, Fort Pierce, FL 34951
Zoning District:	CN (Commercial, Neighborhood)
Future Land Use:	RU (Residential Urban)
Parcel ID Number:	1301-615-0226-000-5
Site Size:	+/-1.79-acres
Building Size:	4,481 sq. ft. (finished)
Existing Use:	Unoccupied Building Suite – Application underway for Pitstop Conv. Store
Urban Service Boundary (USB):	Located inside the Urban Service Boundary (USB)
Fire/EMS:	Station #7, located at 4900 Fort Pierce Boulevard, Fort Pierce, FL 34951, and is approximately 0.8 miles southwest of the subject property.

Exhibit 1 - Aerial Map

BACKGROUND:

The applicant is requesting a Conditional Use Permit to allow the sale of packaged, undistilled alcoholic beverages for off-site consumption at a convenience store.

The Pitstop Mini Market Convenience Store (SIC Code 5411) is permitted within the Commercial Neighborhood (CN) Zoning District for buildings under 6,000 sq. ft. However, the sale of alcoholic beverages requires Conditional Use approval.

The applicant proposes alcohol sales between the hours of 7:00 a.m. – 11:30 p.m., consistent with the St. Lucie County Code of Ordinances Chapter 4 - Alcoholic Beverages, which prohibits alcohol sales between 2:00 a.m. and 7:00 a.m.

The Pitstop Mini Market Convenience Store operated across the street, at 5101 Turnpike Feeder Road until recently. Their prior site held a license for packaged alcohol sales.

Previous Action

- On May 4, 2012, the Planning and Development Services Director approved a Use Determination allowing Hometown News, a local newspaper, to operate in the Commercial Neighborhood (CN) Zoning District.

**STANDARDS FOR CONDITIONAL USE REVIEW
AS SET FORTH IN SECTION 11.07.03 OF THE
ST. LUCIE COUNTY LAND DEVELOPMENT CODE**

The St. Lucie County Land Development Code (LDC) Section 11.07.03 establishes the Standards for Review for Conditional Use Permits. In reviewing an application for a Conditional Use Permit, the Board of County Commissioners shall consider the following:

A. Consistency with Local Ordinances and Comprehensive Plan

The Development Review Committee has reviewed the proposed Conditional Use, finding it to be consistent with the general purpose and standards of the St. Lucie County Land Development Code (LDC) and the Comprehensive Plan Goals, Objectives and Policies.

Land Development Code:

Pursuant to LDC Section 3.01.03.Q.2.g.(8), the Pitstop Mini Market is classified under the Standard Industrial Classification (SIC Code 5411) Grocery Stores, a Permitted Use within the Commercial Neighborhood (CN) Zoning District. The retail sale of (packaged) alcoholic beverages is allowed as a Conditional Use in the CN Zoning District, for beer and wine only, pursuant to LDC Section 3.01.03.Q.7.d(2) Undistilled alcoholic beverages accessory to retail of food. (5921 - Except for liquor).

The Institute of Transportation Engineers (ITE) Parking Generation 6th Edition advises that convenience stores have 3.17 parking spaces for every 1,000 sq. ft. of indoor space. The proposed location is 4,481 sq. ft., therefore it would need at least fourteen (14) parking spaces. The commercial center where Pitstop is locating provides thirty two (32) vehicular parking spaces, including three (3) handicapped accessible parking spaces, and a loading area. The store proposes alcoholic beverage sales between 7:00 a.m. – 11:30 p.m., complying with the St. Lucie County Code of Ordinances Chapter 4 – Alcoholic Beverages which precludes sales between 2:00 a.m. and 7:00 a.m. No alcohol is permitted to be consumed on site.

Exhibit 2 – Highlighted Loading Zone and Dumpster

Zoning:

The zoning of the subject property is **CN (Commercial, Neighborhood)**. *"The purpose of this district is to provide and protect an environment suitable for limited retail trade and service activities covering a relatively small area and that is intended to serve the population living in surrounding neighborhoods."*

Future Land Use:

The Future Land Use designation of the subject property is **RU (Residential Urban).** *"The Residential Urban (RU) classification is the predominant residential land use category in the County. This residential land use category provides for a maximum density of five (5) dwelling units per gross acre. The RU designation is generally found between the identified urban service areas and the transitional RS areas."*

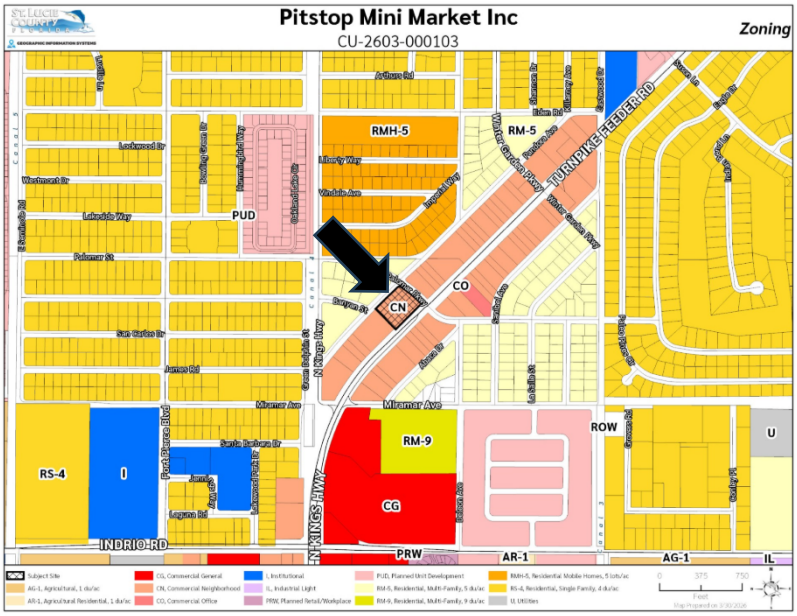
"Limited nonresidential uses may be appropriate, in accordance with applicable standards and restrictions as set forth in the Land Development Code."

> ***Objective 1.1.13:*** *Economic Sustainability. To enhance the quality of life of St. Lucie County and promote a sound and resilient local economy, St. Lucie County shall continue to work with the interested groups and agencies to increase and broaden the County's economic base while expanding existing business and industrial opportunities.*

The proposed use supports neighborhood-serving commercial activity consistent with the intent of the CN Zoning District and is compatible with the Residential Urban (RU) Future Land Use designation, which allows limited nonresidential uses subject to applicable standards. The request promotes access to goods and services for surrounding residents and is consistent with Comprehensive Plan Objective 1.1.13 related to economic sustainability.

The proposed Conditional Use complies with all requirements, and is consistent with the general purpose, goals, objectives, and standards of this St. Lucie County Land Development Code, Code of Ordinances, and the Comprehensive Plan.

Exhibit 3 - Future Land Use Map



B. Effect on Nearby Properties

The proposed Conditional Use is not anticipated to have adverse impacts upon adjacent or nearby properties.

> *1. The proposed conditional use will not have an undue adverse effect upon nearby property.*
> *2. The proposed conditional use is compatible with the existing or planned character of the neighborhood in which it would be located.*
> *3. All reasonable steps have been taken to minimize any adverse effect of the proposed conditional use on the immediate vicinity through building design, site design, landscaping, and screening.*
> *4. The proposed conditional use will be constructed, arranged, and operated so as not to interfere with the development and use of neighboring property, in accordance with applicable district regulations.*

For the last 13 years, Pitstop Mini Market was located across Palomar Parkway at 5101 Turnpike Feeder Road, which is also zoned CN, Commercial Neighborhood. Pitstop Mini Market retained a Conditional Use Permit during the time that they occupied that space, and they would like to move to a larger space across the street.

The subject site is established within the CN zoning district and features appropriate access, parking, and orientation to provide general compatibility with the character of the neighborhood. The site includes parking lot lighting and is within walking distance for local residents, despite limited sidewalks in nearby residential blocks. The proposed hours of operation are 5:30am to 11:30pm. Established landscape areas provide buffering between the site, bordering roadways and nearby residences, although it has been identified that screening needs to be provided for the on-site dumpster.

The St. Lucie County Land Development Code (LDC) contains Distance Restrictions for Persons Selling or Transferring Alcoholic Beverages.

> *LDC Section 7.10.11 states: "No sales or transfers of alcoholic beverages for on-premises consumption shall be permitted except as noted below, within one thousand six hundred (1,600) feet of an existing religious facility, school, public park, or public playground. This section shall not be applicable to sales or transfers by any license holder whose use of his premises for such sale existed before the establishment of the use of the religious facility, school, public park, or public playground, or when the religious facility is located in a CG (Commercial General) zoning district."*

This section of the code is not applicable to this project as proposed, as the market will only provide packaged alcohol sales for off-premise consumption. The proposed Conditional Use will not interfere with the development and use of neighboring property, in accordance with applicable district regulations.

Adjacent Zoning & Future Land Uses:

Location		Zoning District	Future Land Use	Existing Land Use
Subject Property		*CN (Commercial, Neighborhood)*	*RU (Residential Urban)*	Vacant
Adjacent Parcels	**North**	*RM-5 (Residential, Multi-Family - 5)*	*RU (Residential Urban)*	Vacant
	South	*CN (Commercial, Neighborhood)*	*RU (Residential Urban)*	Restaurant
	East	*CN (Commercial, Neighborhood)*	*RU (Residential Urban)*	Vacant
	West	*RM-5 (Residential, Multi-Family - 5)*	*RU (Residential Urban)*	Residential Neighborhood

C. Adequacy of Public Facilities

The proposed use is not expected to create additional demand on public facilities beyone existing capacity.

Water/Wastewater

The subject property is served by central water through St. Lucie County Utilites (SLCU) and an existing septic system. No additional services are needed to support the proposed use.

Transportation System

The proposed Conditional Use is not anticipated to adversely impact transportation capacity on Turnpike Feeder Road. Primary access to the site is provided via Palomar Parkway, with regional access from Turnpike Feeder Road, a Florida Department of Transportation (FDOT) facility equipped with turn lanes and sidewalks.

Law Enforcement

The Convenience Store is located within the unincorporated county and is served by the St. Lucie County Sheriff's Office.

D. Adequacy of Fire Protection

The site will be served by Fire Station #7 (4900 Fort Pierce Boulevard, Fort Pierce, FL 34951), located next to the Lakewood Park Elementary School, approximately 0.8 miles southwest of the subject property. No Fire Protection related impacts or concerns are anticipated with this proposal.

E. Environmental Impact

Background

The Environmental Resources Department (ERD) is in receipt of the March 13, 2026, date-stamped submittal, transmitted March 16, 2026, from Planning and Development Services with comments due April 9, 2026. The applicant is seeking approval of a Conditional Use Permit to allow for the issuance of an alcoholic beverage license for an existing business. The project is located at 5061 Turnpike Feeder Rd in Fort Pierce. The 1.79-acre parcel (Parcel ID: 1301-615-0226-000-5) is zoned Commercial Neighborhood (CN) with a Future Land Use of Residential Urban (RU).

Findings

The proposed Conditional Use Permit is not anticipated to result in any adverse environmental impacts. If site development activities are proposed in the future, ERD will conduct further review through the site plan or building permit review process.

Recommendation

ERD has no objection to the approval of the Conditional Use application with the conditions outlined below.

PUBLIC PARTICIPATION MEETING

Mailed notice of a neighborhood meeting was provided by the applicant on March 12, 2026 to property owners within 1,000 feet of the proposed Conditional Use. The meeting was held on Friday, March 27, 2026 at 6:00pm at the Lakewood Park Community Center, and approximately 20 residents attended to express their support.

PUBLIC NOTICE

A Display Ad was published in the St. Lucie News, a sign was posted on the property, and mailed notice was provided to owners of property within 500 feet of the proposed Conditional Use.

PLANNING & ZONING COMMISSION RECOMMENDATION

The Planning and Zoning Commission held a public hearing for the Conditional Use petition on April 16, 2026, and voted 6-0 to forward a recommendation of approval to the Board of County Commissioners, subject to the conditions outlined in the staff report.

STAFF RECOMMENDATION

Staff has determined the Conditional Use Permit to meet the standards for review outlined in LDC Section 11.07.03, and is consistent with the Goals, Objectives, and Policies of the Comprehensive Plan. Therefore, staff recommends approval of the Conditional Use Permit, subject to the following conditions:

1. A boundary and topographic survey shall be required for any exterior site alterations or expansion of alterations related to the Conditional Use, with the exception of landscaping and signage.

2. The hours of operations shall comply with the Code of Ordinances of St. Lucie County and State of Florida Statutes, Chapter 561 (Beverage Law: Administration).

3. All alcoholic beverages sold on-site shall be packaged for off-premise consumption only. No on-site consumption shall be permitted.

4. Pitstop Mini Market, Inc. shall implement procedures to ensure that no alcohol is sold to persons under 21, including employee training and ID verification policies.

5. Alcohol-related signage shall comply with County sign regulations and shall not be excessive or directed toward minors.

6. The applicant shall obtain and maintain a valid license from the Florida Division of Alcoholic Beverages and Tobacco (ATB) prior to commencing alcohol sales.

7. Within 60 days of approval, an enclosure and screening shall be provided for the dumpster on site.

RESOLUTION NO. 2026-076

File No.: CU-2603-000103

A RESOLUTION OF THE BOARD OF COUNTY COMMISSIONERS OF ST. LUCIE COUNTY, GRANTING A CONDITIONAL USE PERMIT TO ALLOW FOR THE SALE OF PACKAGED ALCOHOLIC BEVERAGES FOR OFF-SITE CONSUMPTION AT A CONVENIENCE STORE LOCATED AT 5061 TURNPIKE FEEDER ROAD, WITHIN THE CN (COMMERCIAL, NEIGHBORHOOD) ZONING DISTRICT FOR A PROPERTY LOCATED IN ST. LUCIE COUNTY, FLORIDA.

WHEREAS, the Board of County Commissioners of St. Lucie County, Florida, based on the testimony and evidence, including but not limited to the staff report, has made the following determinations:

1. Pitstop Mini Market, Inc. presented a petition for a Conditional Use Permit to allow the sale of packaged alcoholic beverages for off-site consumption within the CN (Commercial, Neighborhood) Zoning District for a project to be known as “Pitstop Mini Market” located at 5061 Turnpike Feeder Road, Fort Pierce, FL, 34951 as legally described in Paragraph “B” and depicted on the attached map as Exhibit “A”.

2. On April 16, 2026, the St. Lucie County Planning and Zoning Commission held a public hearing on the petition after publishing notice in the St. Lucie News Tribune at least ten (10) days prior to the hearing, installing a sign on the property and notifying by mail all owners of property within five hundred (500) feet of the subject property, and recommended that the Board of County Commissioners approve the request for a Conditional Use Permit with conditions.

3. On May 5, 2026, the Board of County Commissioners held a public hearing on the petition, after publishing notice in the St. Lucie News Tribune at least 10 days prior to the hearing, installing a sign on the property and notifying by mail all owners of property within 500 feet of the subject property, at which all interested persons were given an opportunity to be heard.

4. The proposed Conditional Use **will/will not** have an undue adverse effect on adjacent property, the character of the neighborhood, traffic conditions, parking, utility facilities, or other matters affecting the public health, safety, and general welfare.

5. The proposed Conditional Use **will/will not** be served by adequate public facilities and services.

NOW, THEREFORE, BE IT RESOLVED by the Board of County Commissioners of St. Lucie County, Florida:

A. Pursuant to Section 11.07.03 of the St. Lucie County Land Development Code, a Conditional Use Permit for Pitstop Mini Market, that allows the sale of packaged alcoholic beverages for off-site consumption within the CN (Commercial, Neighborhood) Zoning District is hereby **approved/denied** for the property described below, subject to the following condition as outlined below:

1. A boundary and topographic survey shall be required for any exterior site alterations or expansion related to the Conditional Use, excluding landscaping and signage.
2. The hours of operations shall comply with the Code of Ordinances of St. Lucie County and State of Florida Statutes, Chapter 561 (Beverage Law: Administration).
3. All alcoholic beverages sold on-site shall be packaged for off-premise consumption only. No on-site consumption shall be permitted.
4. Pitstop Mini Market, Inc., shall implement procedures to ensure that no alcohol is sold to persons under 21, including employee training and ID verification policies.
5. Alcohol-related signage shall comply with County sign regulations and shall not be excessive or directed toward minors.
6. The applicant shall obtain and maintain a valid license from the Florida Division of Alcoholic Beverages and Tobacco (ABT) prior to commencing alcohol sales.
7. Within 60 days of approval, the applicant shall install an enclosure and screening for the on-site dumpster.

B. The subject property is described as follows:

Legal Description:

LAKEWOOD PARK-UNIT 12A- BLK 179 LOTS 15, 16, 17, 18 AND 19 (MAP 13/13N)

Parcel ID: 1301-615-0226-000-5

ADDRESS: 5061 Turnpike Feeder Road, Fort Pierce, FL 34951

C. The approvals and authorizations granted by this Resolution are for the purpose of obtaining a Zoning Compliance from St. Lucie County and are not assigned to any other party or institution. Should the petitioners choose or decide to assign this business to another entity or individual, a minor adjustment to the Conditional Use Permit shall be required.

D. The conditions set forth in Paragraph “A” are an integral non-severable part of the approval

granted by this Resolution. If any condition set forth in Part "A" is determined to be invalid or unenforceable for any reason and the applicant or property owner declines to comply voluntarily with that condition, the Conditional Use approval granted by this Resolution shall become null and void.

E. Pursuant to Section 11.07.05(I) of the St. Lucie County Land Development Code, approvals and authorizations granted by this Resolution shall expire after twelve (12) months from the date of approval, unless a Certificate of Zoning Compliance is obtained for the uses described in Paragraph "A" above, or an extension has been granted in accordance with Section 11.07.05(F).

F. The St. Lucie County Planning and Development Services Director is hereby authorized and directed to cause the notation of this resolution to be made on the Official Zoning Map of St. Lucie County, Florida, and to make notation of reference to the date of adoption of this resolution.

G. A copy of this Resolution shall be mailed to the owner and agent of record as identified on the application.

H. This Resolution shall be recorded in the Public Records.

After motion and second, the vote on this resolution was as follows:

Jamie Fowler, Chair	XX
Larry Leet, Vice-Chair	XX
James Clasby, Commissioner	XX
Erin Lowry, Commissioner	XX
Cathy Townsend, Commissioner	XX

Type of Use Proposed	Commercial	Description of Specific Use if "Other":		Change in Zoning	No
Future Land Use	No	Site Plan Approval	Yes	Reason	Request approval of a conditional use permit for the sale of unstilled alcoholic beverage (beer and wine only) as an accessory use to a retail convenance store. Alcohol sales are incidental and subordinate to the primary retail use and are limited to packaged products for off premises only.
In Conflict LDC	no	Existing Uses	all convenance stores in the area sell alcohol beverages	Changed Condition	winn dixie is closing
Anticipated Impacts	none. same amount of traffic and use in the area not bringing more traffic to the area attracting existing people living in the area	Environmental Impacts	The proposed accessory sale of unstilled alcoholic beverages will not adversely impact surrounding properties. The use is compatible with nearby commercial uses and will not increase traffic, noise, or parking demand beyond that of a typical convenance store. All alcohol sales will comply with approved operating conditions and applicable laws.	Additional Information	The convenience store will be open from 530 am to 1130 pm normal deliveries daily with 8-10 employees. lighting will not need to be changed. This will allow customers to continue to shop here locally and not travel.

11.07.03. Standards for Review of Conditional Use Permits.

A conditional use permit shall be granted only if the applicant demonstrates the following:

A. *Consistency With Local Code and Comprehensive Plan.* The proposed conditional use is in compliance with all requirements, and is consistent with the general purpose, goals, objectives, and standards of this Code, the St. Lucie County Comprehensive Plan, and the Code of Ordinances of St. Lucie County; and is in compliance with all additional standards imposed on it by the particular provisions of this Code authorizing such use.

B. *Effect on Adjacent Properties.*

1. The proposed conditional use will not have an undue adverse effect upon nearby property.
2. The proposed conditional use is compatible with the existing or planned character of the neighborhood in which it would be located.
3. All reasonable steps have been taken to minimize any adverse effect of the proposed conditional use on the immediate vicinity through building design, site design, landscaping, and screening.
4. The proposed conditional use will be constructed, arranged, and operated so as not to interfere with the development and use of neighboring property, in accordance with applicable district regulations.

C. *Adequacy of Public Facilities.* The proposed conditional use will be served by adequate public facilities and services, including roads, police protection, fire protection, solid waste disposal, water, sewer, drainage structures, parks and mass transit.

D. *Adequacy of Fire Protection.* The applicant for the proposed conditional use has obtained from the St. Lucie County - Fort Pierce Fire Prevention Bureau written confirmation, or has otherwise demonstrated by substantial credible evidence, that water supply, evacuation facilities, and emergency access are satisfactory to provide adequate fire protection.

E. *Environmental Impact.* For developments required to provide an environmental impact report under Section 11.02.09(A)(5), the proposed conditional use will not contravene any applicable provision of the St. Lucie County Comprehensive Plan, or of Chapter VIII, "Natural Environment Analysis", of the St. Lucie County Barrier Island Study Analysis of Growth Management Policy Plan, Kimley-Horn and Associates, Inc. (August 1982).

Q. *CN COMMERCIAL, NEIGHBORHOOD.*

1. *Purpose.* The purpose of this district is to provide and protect an environment suitable for limited retail trade and service activities covering a relatively small area and that is intended to serve the population living in surrounding neighborhoods. The number in "( )" following each identified use corresponds to the SIC code reference described in Section 3.01.02(B). The number 999 applies to a use not defined under the SIC code but may be further defined in Section 2.00.00 of this code.

2. *Permitted Uses:*

   a. Beauty and barber services. (723/724)

   b. Membership organizations subject to the provisions of Section 7.10.31. (86)

   c. Depository institutions. (60)

   d. Laundering and dry cleaning (self service). (7215)

   e. Real estate. (65)

   f. Repair services:

      (1) Electrical repair. (762)

      (2) Shoe repairs. (725)

      (3) Watch, clock, jewelry, and musical instrument repair. (7631)

   g. Retail trade (each building shall be less than 6,000 square feet gross floor area, all uses inclusive):

      (1) Antiques. (5932)

      (2) Apparel an accessories. (56)

      (3) Books and stationery. (5942/5943)

      (4) Cameras and photographic supplies. (5946)

      (5) Drugs and proprietary. (5912)

      (6) Eating places. (5812)

      (7) Florists. (5992)

      (8) Food stores. (54)

      (9) Gifts, novelties, and souvenirs. (5947)

      (10) Hobby, toy and game shops. (5945)

      (11) Household appliances. (572)

      (12) Jewelry. (5944)

      (13) Newspapers and magazines. (5994)

      (14) Optical goods. (5995)

      (15) Nurseries, lawn and garden supplies. (526)

      (16) Radios, TV's, consumer electronics and music supplies. (573)

      (17) Sporting goods and bicycles. (5941)

      (18) Tobacco products. (5993)

   h. Video tape rental. (784)

3. *Lot Size Requirements.* Lot size requirements shall be in accordance with Section 7.04.00.

4. *Dimensional Regulations.* Dimensional requirements shall be in accordance with Section 7.04.00.

5. *Off-street Parking and Loading Requirements.* Off-street parking and loading requirements are subject to Section 7.06.00.

6. *Landscaping Requirements.* Landscaping requirements are subject to Section 7.09.00.

7. *Conditional Uses:*

   a. Car washes (self service only) -subject to the provisions of Section 7.10.22. (999)

   b. Day care - adult. (8322)
   - child. (8351)

   c. Postal services. (4311)

   d. Retail trade:

      (1) Gasoline services - accessory to retail food stores under SIC-5411. (999)

      (2) Undistilled alcoholic beverages accessory to retail sale of food. (5921-Except for liquor)

   e. Telecommunication towers - subject to the standards of Section 7.10.23. (999)

8. *Accessory Uses.* Accessory uses are subject to the requirements of Section 8.00.00 and include the following:

   a. Drinking places (undistilled alcoholic beverages) accessory to an eating place. (999)

   b. One dwelling unit contained within the commercial building, for on-site security purposes. (999)

ST. LUCIE COUNTY BOARD OF COUNTY COMMISSIONERS PUBLIC HEARING AGENDA

Tuesday, May 5, 2026

NOTICE OF PROPOSED CONDITIONAL USE PERMIT

The St. Lucie County Board of County Commissioners is scheduled to review and consider the adoption of the following by Resolution:

A RESOLUTION OF THE BOARD OF COUNTY COMMISSIONERS OF ST. LUCIE COUNTY, FLORIDA GRANTING A CONDITIONAL USE PERMIT FOR THE SALE OF PACKAGED ALCOHOLIC BEVERAGES FOR OFF-SITE CONSUMPTION AT A CONVIENIENCE STORE WITHIN THE CN (COMMERCIAL, NEIGHBORHOOD) ZONING DISTRICT FOR A PROPERTY LOCATED IN ST. LUCIE COUNTY, FLORIDA.

APPLICANT: Pitstop Mini Market, Inc.

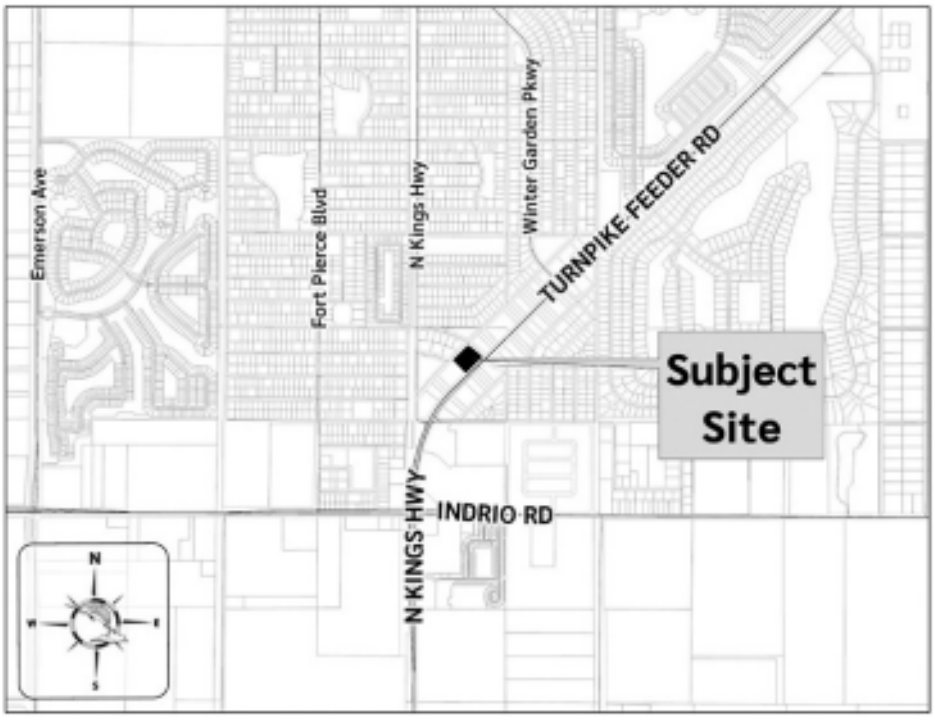
OWNER: Aghapy Properties, LLC.

PURPOSE: To allow the sale of packaged alcoholic beverages for off-site consumption at a convenience store within the CN (Commercial, Neighborhood) Zoning District in St. Lucie County.

ADDRESS: 5061 Turnpike Feeder Road, Fort Pierce, FL 34951 (see map below)

PARCEL ID: 1301-615-0226-000-5

FILE NUMBER: CU-2603-000103



The Board of County Commissioners' **PUBLIC HEARING** on this item will be held in the Commission Chambers, Roger Poitras Annex, 3rd Floor, 2300 Virginia Avenue, Fort Pierce, Florida on **Tuesday, May 5, 2026, beginning at 6:00 pm** or as soon thereafter as possible.

All interested persons will be given an opportunity to be heard. Written comments received in advance of the public hearing will also be considered. Comments must be submitted by noon the day prior to the meeting. Comments will be distributed to the Board in advance of the meeting and included in the record provided the comments comply with the County's rules.

The petition file is available for review at the Planning and Development Services Department – Planning offices located at 2300 Virginia Avenue, Fort Pierce, Florida during regular business hours. Please call (772) 462-2822 or TDD (772) 462-1428 if you have any questions or require additional information about this petition.

The St. Lucie County Board of County Commissioners has the power to approve or disapprove, any applications within their area of responsibility.

The proceedings of the Board of County Commissioners are electronically recorded. **PURSUANT TO Section 286.0105, Florida Statutes**, if a person decides to appeal any decision made by the Board of County Commissioners with respect to any matter considered at a meeting or hearing, he or she will need a record of the proceedings. For such purpose, he or she may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based. Upon the request of any party to the proceeding, individuals testifying during a hearing will be sworn in. Any party to the proceeding will be granted an opportunity to cross-examine any individual testifying during a hearing upon request. If it becomes necessary, a public hearing may be continued to a date certain.

Anyone with a disability requiring accommodation to attend this meeting should contact the St. Lucie County Community Risk Manager at least forty-eight (48) hours prior to the meeting at (772) 462-1546 or T.D.D. (772) 462-1428. Any questions about this agenda may be referred to St. Lucie County Planning Division at (772) 462-2822.

Subject: Proposed Conditional Use Permit for Pit Stop to establish Packaged Beer & Wine Sales at 5055 Turnpike Feeder Road

Billy
5055 Turnpike Feeder Rd.
Fort Pierce, FL 34951

Dear Property Owner,

The owners of Pit Stop invite you to a Community Participation meeting to discuss the proposed Conditional Use Permit necessary for our business, Pit Stop to establish Packaged Beer & Wine Sales at our new location, 5055 Turnpike Feeder Road, Fort Pierce, FL.

The purpose of this meeting is to provide information and discuss the project prior to upcoming public hearings. You have been identified as a property owner within 1,000 feet of the property.

The proposed date, time, and location for the Community Participation Meeting are listed below:

Date: Friday, March 27, 2026
Time: 6:00 PM – 7:00 PM
Location: Lakewood Park Community Center, 7508 Jennings Way, Fort Pierce, FL 34951

The subject property is located within Unincorporated St. Lucie County, Florida, is within the County's Commercial Neighborhood, CN, Zoning District.

We are requesting the Conditional Use Permit to continue packaged beer and wine sales upon relocating to our new location, which intends to continue to serve the general convenience and niche grocery needs for Lakewood Park and guests traveling by.

The planned hours of operation are 5:30 AM to 11:30 PM Monday through Saturday and 6:00 AM to 10:30 PM Sunday and holidays. If you have any questions or concerns, please contact us at 772-465-8270.

Thank you,
Pit Stop

ENVIRONMENTAL RESOURCES
FINAL REPORT

TO:	Morgan Phelps, Planning and Development Services
THROUGH:	Aimee L. Cooper, Environmental Regulations Manager Amy E. Griffin, Environmental Resources Director
FROM:	Bryan-James Redden, Environmental Planner
DATE:	April 1, 2026
SUBJECT:	Pitstop Mini Market Inc CU-2603-000103

Background

The Environmental Resources Department (ERD) is in receipt of the March 13, 2026, date-stamped submittal, transmitted March 16, 2026, from Planning and Development Services with comments due April 9, 2026. The applicant is seeking approval of a Conditional Use Permit to allow for the issuance of an alcoholic beverage license for an existing business. The project is located at 5061 Turnpike Feeder Rd in Fort Pierce. The 0.72-acre parcel (Parcel ID: 1301-615-0226-000-5) is zoned Commercial Neighborhood (CN) with a Future Land Use of Residential Urban (RU).

Findings

The proposed Conditional Use Permit is not anticipated to result in any adverse environmental impacts. If site development activities are proposed in the future, ERD will conduct further review through the site plan or building permit review process.

Recommendation

ERD has no objection to the approval of the Conditional Use application with the conditions outlined below.

Please contact Bryan-James Redden at 772-462-3862 if you have any questions.

ST. LUCIE COUNTY BOARD OF COUNTY COMMISSIONERS PUBLIC HEARING AGENDA

Tuesday, May 5, 2026

RES-2026-82
PUBLIC HEARINGS - PLANNING & DEVELOPMENT SERVICES
DATE: **5/5/2026**
*RESOLUTION ITEM - BOARD APPROVAL
QUASI-JUDICIAL ITEM? YES

TO: **Board of County Commissioners**

PRESENTED BY: Morgan Phelps, Associate Planner

SUBMITTED BY: Planning & Development Services

SUBJECT: Linda Vista Trails (and 21st Street) Road Paving Waiver - **THIS ITEM IS QUASI-JUDICIAL**

BACKGROUND:

Mr. Scott & Mrs. Jessica Mosher own a 1.25 acre parcel, containing five (5) lots and portions of two (2) additional lots, located between Linda Vista Ave and South 21st St. and approximately 900 feet south of Edwards Rd. The owner wishes to subdivide (via a Replat) the property into five (5) lots, to create four (4) new parcels, with two (2) featuring frontage on Linda Vista Ave. and two (2) featuring frontage on 21st St. A proposed site plan has been reviewed by the Development Review Committee (DRC) and deemed appropriate for continued processing towards site plan approval for subdivision into the 5 parcels, each with a minimum of 8,000 square-feet (0.18 ac) in size.

PREVIOUS ACTION:

This proposal has been evaluated and approved by the Development Review Committee.

FINANCIAL IMPACT:

If the waiver is partially denied, the County would accept the funds for the fair share of the roadway improvements. The prorated contribution for this site is $234,903.00.

RECOMMENDATION:

Staff recommends the Board approve the paving waiver, and waiver of the prorated proportionate share contribution for this site is $234,903.00. Consistent with previous St Lucie County Board of County Commissioners actions, staff recommends a condition that the current and future owners and their heirs/assigns agree to participate and shall be a “yes” vote in any lawfully established MSTU, MSBU or other special assessment district created for the purpose of providing paving and/or drainage improvements to Linda Vista Ave. and South 21st St.

MEMORANDUM

TO: Board of County Commissioners

THROUGH: Patrick Dayan, PE, Public Works Director
Kori Benton, AICP, Planning & Zoning Manager

FROM: Steven Frink, PE, Project Engineer

DATE: April 20, 2026

SUBJECT: Paving Waiver Request – Proposed Linda Vista Trails Subdivision

GENERAL INFORMATION:

Agent of Record:	Brickley Land Surveying, LLC Scott Mosher 801 NE Whistling Duck Way Port St Lucie, FL 34983
Property Owner:	Scott & Jessica Mosher 3301 Matthews Rd Ft Pierce, FL 34945
Requested Action:	Road Paving Waiver request in accordance with Section 7.05.07.B.2. Provisions for access to new development

Background:

Mr. Scott & Mrs. Jessica Mosher own a 1.25 acre (ac) parcel of land located west of Linda Vista Trail east South 21st St to the west and approximately 900 feet (ft) south of Edwards Rd. The owner wishes to subdivide the property into 5 parcels. A proposed site plan has been reviewed by the Development Review Committee (DRC) and has been deemed appropriate for continued processing towards a minor site plan approval and for subdividing into the 5 parcels, each with a minimum of 8,000 square-feet (sf) (0.18 ac) in size, as eligible in the RS-4 Zoning District, where central water connections are achieved. The DRC has advised the applicant than both central water and wastewater connections are required as conditions of site plan approval, and sidewalk installation or a fee in-lieu of installation may be required.

Linda Vista Ave and South 21st St are currently unimproved (substandard) St Lucie County owned and maintained roadways, with Exhibits B1 & B2, further below highlighting recent roadway conditions. The existing rights-of-way (ROW) widths along the sites frontage meet the minimum width requirements.

Per St Lucie County Land Development Code, projects on unimproved roadways seeking site plan approval are required to provide paved access to the project. The definition of paved access includes construction to County roadway standards, in other words, an improved roadway.

> *7.5.07.B.1. Access Roads.*
>
> *Provisions for the paving of unpaved access roads that access the development shall be required as specified below under general requirements.*

The site is a small traffic generator on an unimproved County roadway. Per St Lucie County code 7.05.07.B.4. – General Requirements, the applicant is required to pay a proportionate fair share amount for future paving, pave the access road, or seek a waiver from the Board of County Commissioners.

The applicant has provided a prorated fair share cost analysis and is requesting a waiver for the paving and fair share cost contribution based on criteria listed in section 7.05.07.B.2. of the St Lucie County's Land Development Code. If the Board does not waive the requirements and accepts a fair share contribution, the County must pave the road utilizing the funds within a 10-year period or the money is returned to the applicant at the end of the 10-year period.

> *7.05.07.B.2. Waiver.*
>
> *a. Paving requirements and provisions shall be waived by the Board of County Commissioners, following a public hearing, if the Board determines:*
>
> *(1) That the road paving is not essential to provide adequate access to the proposed development and through the surrounding area, or*
>
> *(2) That the road will be paved as part of the County's five-year road program or an approved municipal service taxing or benefit unit, or*
>
> *(3) That the access road does not have adequate right-of-way in which to construct the necessary paving improvements in accordance with County standards.*

This request falls under item number 1. Paving is not essential to provide adequate access. Linda Vista Ave. and South 21st St. are currently maintained in its existing condition for access to surrounding properties. The corresponding Site Plan for re-division of the parcel (replat) would provide for two (2) new homes and their respective driveways on each of the two (2) roadways as displayed in Exhibit A, further below.

At this time, the County does not have either roadway in its 5-year road program for paving, and the existing right-of-way width is sufficient in meeting the County standards.

Exhibit A: Proposed Site Plan

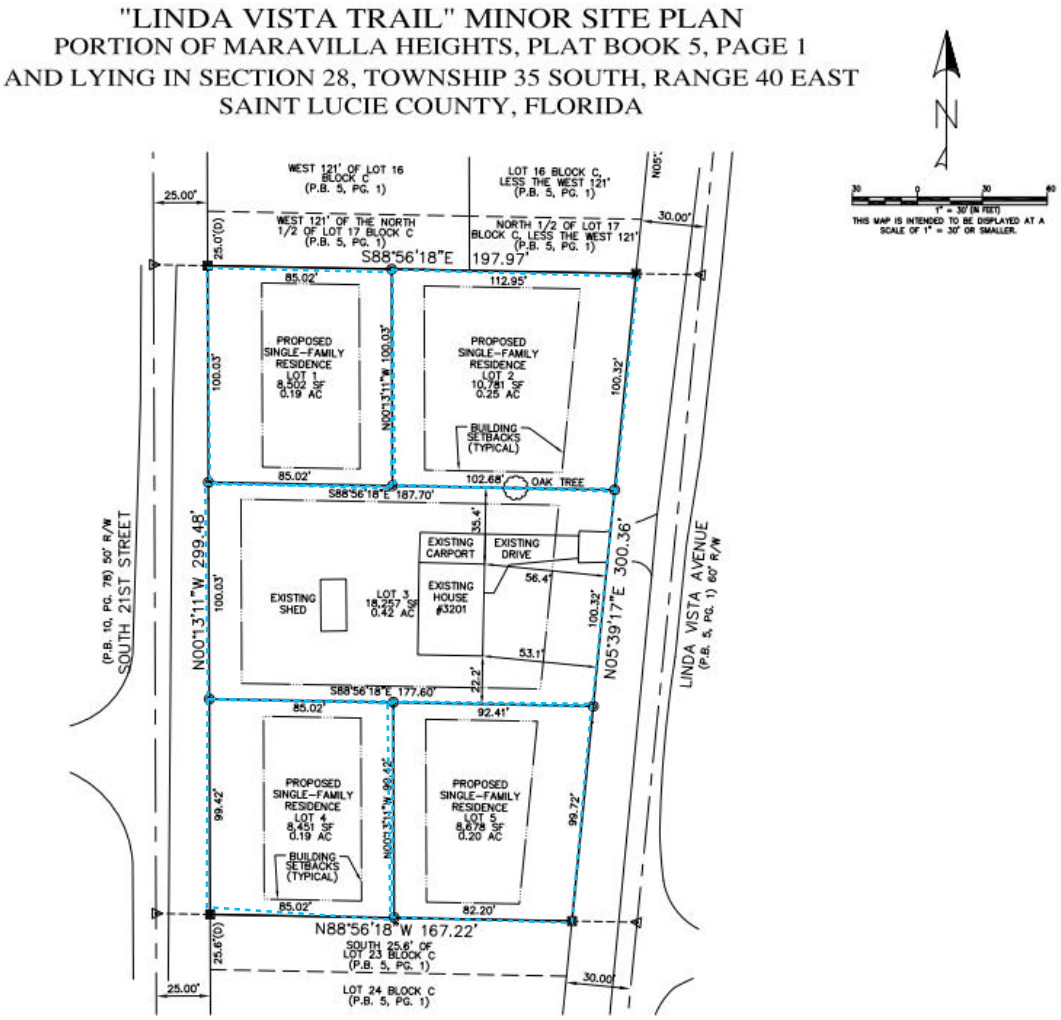

Exhibit B1: Linda Vista Ave. (Google Earth 2022)

Exhibit B2: 21st St. (Google Earth 2024)

Previous Action:

None.

Financial Impact:

If the waiver is denied, the County would accept the funds for the fair share of the improvements. The prorated fair share contribution for this site is $234,903.00.

Recommendation:

St Lucie County Staff has reviewed the request and recommends providing a conditional waiver for the paving requirements and provision of fair share contribution. Consistent with previous St Lucie County Board of County Commissioners actions, staff recommends a condition that the current and future owners and their heirs/assigns agree to participate and shall be a "yes" vote in any lawfully established MSTU, MSBU or other special assessment district created for the purpose of providing paving and/or drainage improvements to Linda Vista Ave. and South 21st St.

RESOLUTION NO. 2026-082

File No.: RPW-2601-000001

A RESOLUTION OF THE BOARD OF COUNTY COMMISSIONERS OF ST. LUCIE COUNTY FOR A WAIVER FROM THE REQUIREMENTS OF SECTION 7.05.07 OF THE LAND DEVELOPMENT CODE REQUIRING PAVED ACCESS TO NEW DEVELOPMENTS.

WHEREAS, the Board of County Commissioners of St. Lucie County, Florida, based on the testimony and evidence, including but not limited to the staff report, has made the following determinations:

1. Steve Brickley of Brickley Land Surveying, Inc., on behalf of Scott and Jessice Mosher, submitted a waiver request regarding the fair share contribution requirements for the proposed development located at 3201 Linda Vista Avenue, between Linda Vista Avenue and South 21st Street and approximately 900 ft. south of Edwards Road.

2. The applicant desires to subdivide (replat) a 1.25-acre parcel into five (5) lots, three (3) of which will have access from Linda Vista Ave. and two (2) via 21st St. which are unpaved. A proposed site plan has been reviewed by the Development Review Committee (DRC) and deemed appropriate for continued processing towards a site plan approval, generally as exhibited in Exhibit B, below, proposing to subdivide into five (5) lots, each with a minimum of 8,000 sq. ft. (0.18 acre) in size.

3. Staff has performed a detailed analysis of the project and determined it to not be consistent with the St. Lucie County Land Development Code and Comprehensive Plan. The analysis is found in the Public Works Memorandum titled "*Paving Waiver Request – Proposed Linda Vista Trails Subdivision*, dated April 20, 2026.

4. On May 5, 2026, the Board held a public hearing on the petition, after publishing notice at least 10 days prior to the hearing and notifying by mail all owners of property within 500 feet of the subject property.

NOW, THEREFORE, BE IT RESOLVED by the Board of County Commissioners of St. Lucie County, Florida:

A. Pursuant to Section 7.05.07 of the St. Lucie County Land Development Code, the Board of County Commissioners **approved/denied** the requested Paving Waiver and elected to **waive/require** the fair share contribution based on the minimum traffic impacts generated by the proposed development subject to the following condition:

> 1. The current and future owners and their heirs/assigns agree to participate and shall be a "yes" vote in any lawfully established MSTU, MSBU or other special assessment district created for the purpose of providing paving and/or drainage improvements to Linda Vista Ave. and 21st St. adjacent to the project's respective frontage.

B. The property for which this paving waiver is *approved/denied* is located as displayed in Exhibit A, below, and described as follows:

LEGAL DESCRIPTION

LOT 23, LESS THE SOUTH 25.6 FEET;
LOT 17, LESS THE NORTH 1/2 OF SAID LOT;
AND ALL OF LOTS 18, 19, 20, 21 AND 22, BLOCK C, MARAVILLA HEIGHTS, ACCORDING TO THE PLAT THEREOF, AS RECORDED IN PLAT BOOK 5, PAGE 1 OF THE PUBLIC RECORDS OF ST. LUCIE COUNTY, FLORIDA.
CONTAINING +/- 54,670 SQUARE FEET, 1.25 ACRES, MORE OR LESS.

ADDRESS: 3201 Linda Vista Avenue, Fort Pierce, FL 34982

PARCEL I.D. NO(s).: 2428-601-0146-000-0

C. A copy of this Order shall be placed on file with the St. Lucie County Planning and Development Services Department and mailed to the developer and agent of record as identified on the paving waiver application.

D. This Resolution shall be recorded in the Public Records.

After motion and second, the vote on this Resolution was as follows:

Jamie Fowler, Chair	XXX
Larry Leet, Vice-Chair	XXX
James Clasby, Commissioner	XXX
Erin Lowry, Commissioner	XXX
Cathy Townsend, Commissioner	XXX

PASSED AND DULY ADOPTED This 5th day of May 2026.

Plan Custom Fields

Project Name	Linda Vista Trails	Acres	1.20876	Zoning District	Saint Lucie County RS-4
Legal Description	MARAVILLA HTS BLK C S 1/2 LOT 17, ALL LOTS 18-22 INCL AND LOT 23-LESS S 25.6 FT- (1.27 AC)	Existing Use of Property	Single Family	Type of Use Proposed	Residential
Description of Specific Use if "Other":		Property Use	Residential/Agricultural	Change in Zoning	No
Future Land Use	No	Site Plan Approval	Yes	Reason	Looking to receive a paying waiver so we do not have to re-pave Linda Vista Ave and S 21st St. when two additional homes on built on the streets.
In Conflict LDC	No	Existing Uses	Linda Vista Ave and S 21st St are both residential neighborhoods. The building of two more additional homes on the streets will not change the feel or the dynamic of the area.	Changed Condition	We are looking two build two additional homes on the Linda Vista Ave and S 21st.
Anticipated Impacts	We will be connecting to city water and sewer. Only residential use impacts will be on the roadways.	Environmental Impacts	The property is already a mowed lawn that has been cleared for years. No impacts are anticipated.	Additional Information	These homes will be used as residential use only with no commercial use.

Linda Vista Trails - Road Asphalt Paving Cost Analysis

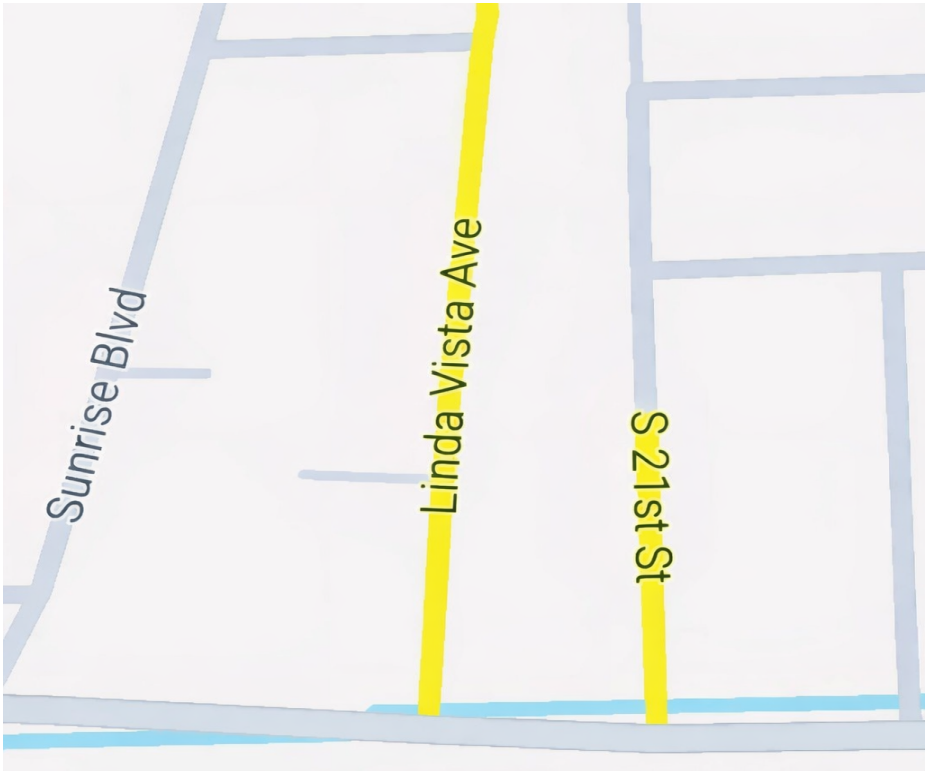
Prepared for: St. Lucie County Board of County Commissioners

Linda Vista Trails subdivision will be accessed by two unpaved roads:

- Linda Vista Ave: 1,350 LF, 22 ft width, 3,300 SY
- S 21st St: 730 LF, 22 ft width, 1,784 SY

Total Length: 2,080 LF, Total Area: 5,084 SY

Purpose: Request waiver from paving requirements since road paving is not essential to provide adequate access to the proposed development.



FDOT Zone 11 2025 Cost Analysis

Item	Quantity	Unit Cost	Total
Subgrade Stabilization	5,084 SY	$8.59	$43,673
Base Course	5,084 SY	$18.15	$92,329
Asphalt Pavement	49 T	$188	$10,572
Pavement Markings	2,080 LF	$0.85	$1,768
Subtotal (Paving Only)	-	-	$148,342
Mobilization (8%)	-	-	$11,867
Maintenance of Traffic (6%)	-	-	$8,900
Contingency (10%)	-	-	$14,834
Total Estimated Paving Cost	-	-	$184,943
Milling Removal (Existing Millings)	5,084 SY	$4.02	$20,460
Soil Testing Allowance	-	-	$4,500
Engineering Services Allowance	-	-	$18,500
Survey Work Allowance	2,080 LF	-	$6,500
Total Estimated Project Cost	**-**	**-**	**$234,903**

Per-Lot Summary (4 New Lots)

Total Estimated Project Cost: $234,903
Estimated Cost Per Lot: $58,726

Each of the four proposed lots contains approximately 100 linear feet of property frontage along the roadway. Based on an estimated per-lot project cost of $58,726, the approximate cost per linear foot of frontage is calculated as follows:

$58,726 ÷ 100 LF = $587.26 per linear foot

Each lot would therefore bear an estimated cost of approximately $587.26 per linear foot of frontage for milling removal, asphalt paving improvements, soil testing, engineering services, and survey work.

Conclusion

Given that this road paving project is not essential to provide adequate access to the proposed development of the four new lots, we respectfully request that the St. Lucie Board of County Commissioners approve waiving the asphalt paving requirements for the Linda Vista Trails subdivision.

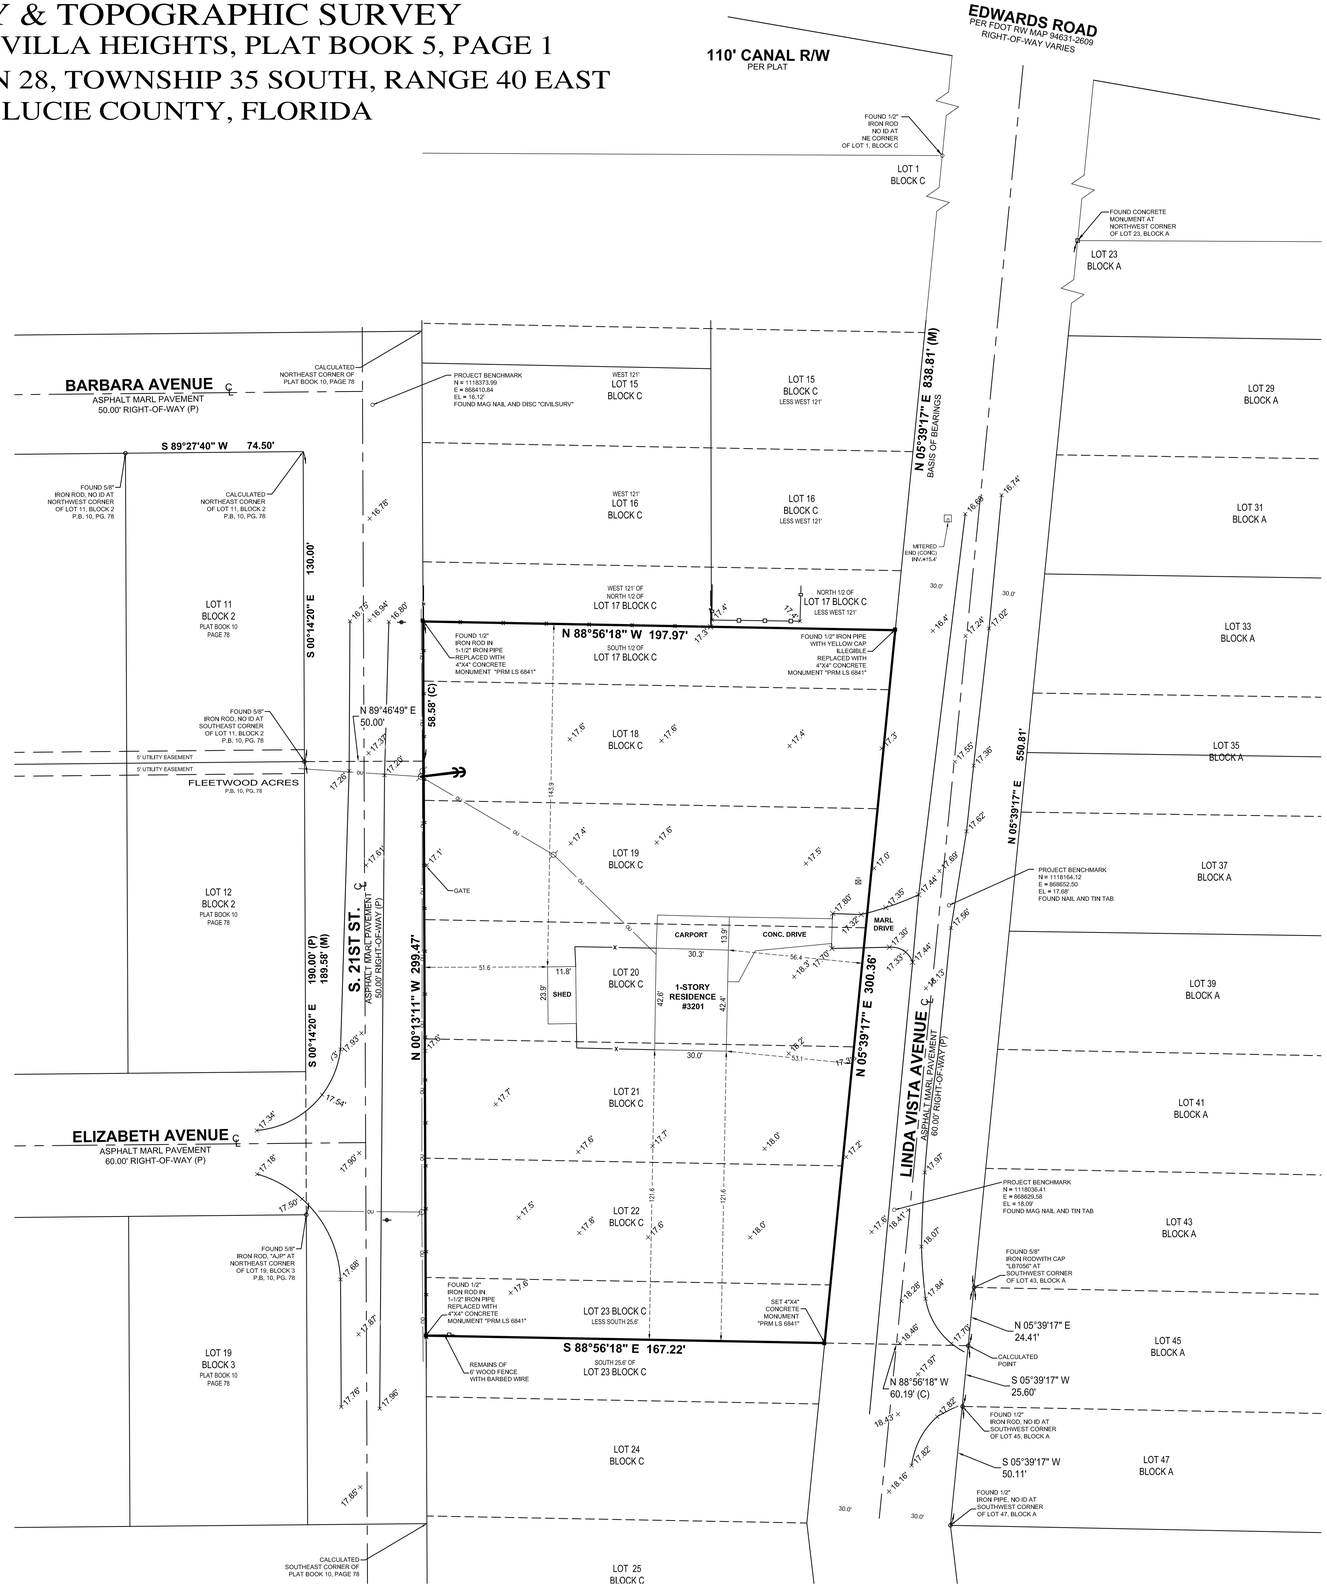
The cost of a mandatory asphalt paving, including the removal of the existing roadway millings, would place a financial strain on the four new proposed lots within this small subdivision.

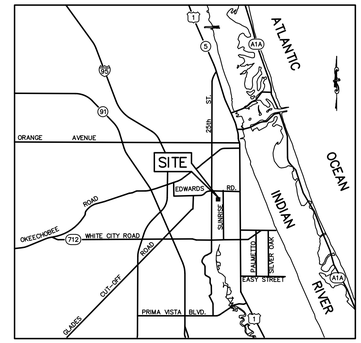
Sincerely,

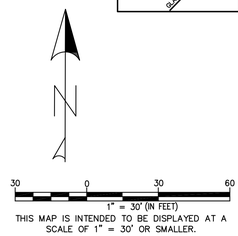
Scott Mosher

Date: 3/20/26

BOUNDARY & TOPOGRAPHIC SURVEY
PORTION OF MARAVILLA HEIGHTS, PLAT BOOK 5, PAGE 1
AND LYING IN SECTION 28, TOWNSHIP 35 SOUTH, RANGE 40 EAST
SAINT LUCIE COUNTY, FLORIDA







SURVEYOR'S NOTES:

1. THIS IS A BOUNDARY SURVEY PREPARED IN ACCORDANCE WITH THE "STANDARDS OF PRACTICE" FOR SURVEYING AND MAPPING IN THE STATE OF FLORIDA AS SET FORTH BY THE FLORIDA BOARD OF PROFESSIONAL SURVEYORS AND MAPPERS IN CHAPTER 5J-17.05, FLORIDA ADMINISTRATIVE CODE, PURSUANT TO SECTION 472.027, FLORIDA STATUTES.
2. THIS SURVEY WAS PREPARED WITHOUT THE BENEFIT OF A TITLE COMMITMENT OR POLICY. RECORD DOCUMENTS REFERENCED HEREON WERE PROVIDED BY THE OWNER OR DOWNLOADED FROM THE OFFICIAL RECORDS SEARCH ON THE CLERK OF COURTS WEBSITE.
3. THE BEARINGS SHOWN HEREON ARE RELATIVE TO A MEASURED BEARING FOR THE WEST RIGHT OF WAY LINE OF LINDA VISTA AVENUE BEING NORTH 05°39'23" EAST.
4. THE HORIZONTAL DATUM FOR THE PROJECT CAD FILE IS RELATIVE TO NORTH AMERICAN DATUM OF 1983-2011 (NAD83/2011) EPOCH 2010 ADJUSTMENT AND IS BASED UPON REDUNDANT OBSERVATIONS ON PROJECT CONTROL POINTS USING THE TRIMBLE VRS NOW NETWORK.
5. THIS SURVEY WAS PERFORMED UTILIZING G.P.S.-R.T.K. PROCEDURES AND TRADITIONAL SURVEY PROCEDURES WITH REDUNDANT MEASUREMENTS ON PROJECT CONTROL AND BOUNDARY MONUMENTS TO OBTAIN A HORIZONTAL POSITIONAL TOLERANCE OF 0.15 FEET.
6. SUBSURFACE OR UNDERGROUND UTILITIES HAVE NOT BEEN LOCATED AND ARE NOT A PART OF THIS SURVEY.
7. FENCES AND OVERHEAD POWER LINES MEANDER THE PROPERTY LINES OF SUBJECT PARCEL AND ARE SHOWN APPROXIMATELY HEREON.
8. ALL DISTANCES ARE IN U.S. SURVEY FEET AND DECIMALS THEREOF AND ARE CALCULATED DISTANCES, UNLESS OTHERWISE NOTED.
9. ADDITIONS OR DELETIONS TO THIS SURVEY MAP OR REPORT BY OTHER THAN THE SIGNING PARTY OR PARTIES IS PROHIBITED WITHOUT WRITTEN CONSENT OF THE SIGNING PARTY OR PARTIES.
10. THIS SURVEY IS NOT VALID WITHOUT THE ORIGINAL SIGNATURE AND SEAL, OR ELECTRONIC SIGNATURE OF A FLORIDA LICENSED SURVEYOR AND MAPPER.

ENVIRONMENTAL RESOURCES
FINAL REPORT

TO:	Morgan Phelps, Planning & Development Services
THROUGH:	Aimee L. Cooper, Environmental Regulations Manager Amy E. Griffin, Environmental Resources Director
FROM:	Bryan-James Redden, Environmental Planner
DATE:	February 3, 2026
SUBJECT:	Linda Vista Trails – Road Paving Waiver RPW-2601-000001

Background

The Environmental Resources Department (ERD) is in receipt of the January 21, 2026, date-stamped submittal transmitted January 23, 2026, from Planning and Development Services with comments due February 19, 2026. The applicant is seeking approval of a road paving waiver to waive road paving improvements for Linda Vista Avenue and South 21st St. in association with a proposed (5) parcel subdivision (MNSP-2512-000183). The project site measures approximately 1.21-acres, located at 3201 Linda Vista Ave. in Ft. Pierce, and is zoned Residential, Single-Family - 4 (RS-4).

Findings

The proposed road paving waiver is not anticipated to result in any adverse environmental impacts. Environmental impacts shall continue to be addressed through the Development Order process as defined in LDC 2.00.00, in this case, the Minor Site Plan (MNSP-2512-000183) application currently under review.

Recommendation

ERD has no objection to the proposed road paving waiver.

Please contact Bryan-James Redden at 772-462-3862 if you have any questions.

7.05.07. Provisions for Access to New Development Activities.

A. *Generally.* All new road and street construction, public or private, shall be paved according to standard county specifications.

B. *Paving Requirements for Roads that Access Developments Requiring Site Plan Approval that Utilize Unpaved Public and Private Roads for Access.* The following paving requirements shall apply to developments requiring site plan approval that utilize unpaved public or private roads and roadways for access:

1. *Access Roads.* Unless explicitly listed in exempt development, as listed in subsection a. below, provisions for the paving of unpaved access roads that access the development shall be required as specified below under general requirements. County road design and construction standard specifications shall apply to all paving improvements.

a. *Exempt development.* The following use(s) are exempt from the provisions of this Section:

(1) Telecommunications towers with frontage on unpaved roads outside the Urban Services Boundary (USB).

2. *Waiver.*

a. Paving requirements and provisions shall be waived by the Board of County Commissioners, following a public hearing, if the Board determines:

(1) That the road paving is not essential to provide adequate access to the proposed development and through the surrounding area, or

(2) That the road will be paved as part of the County's five-year road program or an approved municipal service taxing or benefit unit, or

(3) That the access road does not have adequate right-of-way in which to construct the necessary paving improvements in accordance with County standards.

b. If paving requirements are waived, the Board may attach conditions deemed necessary to minimize the impacts of the road on the surrounding area including, but not limited to, payment by the developer of the development's fair share of paving costs for the unpaved public or private road providing access to the development prior to issuance of final record plat approval pursuant to the procedures set out in Section 11.03.00.

3. *Scenic and Historic Roads.* Paving requirements and provisions for developments utilizing unpaved scenic or historic routes, as designated by the Board of County Commissioners, shall be addressed on a case-by-case basis. The requirements specified below under general requirements shall apply. Paving requirements and provisions shall be waived by the Board of County Commissioners if the Board determines:

a. That the scenic or historic value or significance of the road would be adversely impacted by road paving.

b. That road paving is not essential to provide adequate access to the particular development and through the surrounding area, and

c. That the preservation of scenic or historic values outweighs the impacts of permitting a particular use to develop without paved access.

If paving requirements are waived, the Board may attach any conditions deemed necessary to minimize impacts on the road and surrounding area.

4. *General Requirements.* Paving requirements are established to ensure that adequate road improvements are provided to adequately serve the development. County road design and construction standards shall apply to all paving improvements. Mixture of residential and non-residential traffic shall be avoided where possible. Persons applying for plat approval of developments utilizing access roads shall, as part of their application, include the appropriate provision for paving, as specified below.

   The County Engineer shall determine the estimated average daily traffic of the development in accordance with accepted standards and good traffic engineering practice.

   a. *Small Traffic Attractors/Generators.* Developments determined to be small traffic attractors/generators, defined as developments generating less than one hundred (100) average daily trips, shall provide for road paving as follows:

      (1) *Access road frontage:* For the paving of a road(s) accessing the development, the applicant shall submit funds in the amount of the development's fair share of paving costs as determined by the Board of County Commissioners prior to the issuance of final plat approval. The fair share contribution shall be determined and prorated according to front footage or by such other lawful and equitable method as the Board may prescribe. Said funds shall be held by the County for a period not to exceed ten (10) years to be used for the paving of the road(s) accessing the development. Any funds not expended or encumbered by the end of the calendar quarter immediately following ten (10) years from the date the funds were submitted to the County shall, upon application of the feepayer, be returned to him with interest to be determined based upon the average rate of return to the County for the time period the funds were held. The road segment to be funded and later paved shall include all of the development's frontage on the road.

      Any required submission of escrow funds shall include an escrow agreement acceptable to the County Attorney. Such agreement shall include provisions necessary to accomplish and facilitate future road paving.

      (2) *Paving option:* In lieu of submitting funds for paving under subsection 4(a)(1) above, the developer may propose to pave or arrange for paving the development's access road frontage notwithstanding requirements for roads designated on the Thoroughfare Network Right-of-Way Protection Plan, if such paving would connect to a paved public road. If such a paving option is utilized, no final plat approval shall be issued for all or any portion of the development until all paving has been completed, and improvements are inspected and approved by the County. At the option of the Board of County Commissioners, the developer may furnish the County security in the amount of one hundred fifteen percent (115%) of the estimated cost of providing the paving improvement at the time of final plat approval. The County Engineer shall approve the amount of security to be furnished.

      (3) *Multi-phase projects:* For purposes of determining if a multi-phase development is a small traffic attractor/ generator, the total number of project trips shall be compared to the small traffic project definition criteria.

      (4) *Cumulative effect:* No final plat approval shall be issued for any development utilizing access on an unpaved public or private road that exceeds two hundred (200) average daily trips as determined by the County Engineer until the road accessing the development is paved from the development's access point(s) to a paved public road. For the purpose of this Code and determination of this cumulative effect, all access roads in the unincorporated County are assumed to have a zero (0) average daily trip count as of the effective date of the ordinance. Provisions specified below under subsection 4.b(2) and (3)

shall apply. The County Engineer's decision may be appealed to the Board of County Commissioners.

In considering the cumulative effect of small traffic attracting/generating developments on a road(s) or on an area, the Board of County Commissioners may determine the need for a municipal service taxing or benefit unit or assessment for road paving purposes in developed or developing areas, and may impose such an assessment.

b. *Large Traffic Attractors/Generators.* Developments determined to be larger traffic attractors/ generators, defined as developments generating one hundred (100) or more average daily trips, shall provide for road paving as follows:

(1) *Access road frontage to access point(s):* The unpaved public or private road accessing the development shall be paved from the development's access point(s) to a paved public road. The design of the connection shall be in accordance with County design standards. Said paving shall be completed, and improvements inspected and approved by the County, prior to the issuance of final plat approval. At the option of the Board of County Commissioners, the developer may furnish the County security in the amount of one hundred fifteen (115) of the estimated cost of providing the paving improvement at the time of final plat approval. The County Engineer shall approve the amount of security to be furnished.

(2) *Developer Agreements/MSBU Options:* In considering the effect of large traffic attracting/generating developments on a road(s) or on an area, the Board of County Commissioners may enter into a development agreement with the developer pursuant to Section 11.08.00 to ensure the refund of monies expended by the developer on the paving of the unpaved access road pursuant to subsection 4.b(4), above the developer's fair share contribution as monies are made available by other development that uses the unpaved road as access to a paved public road. The Board may also create a municipal service taxing or benefit unit or assessment for road paving purposes in developed or developing areas, and may impose such an assessment.

(3) *Remaining access road frontage:* For the paving of portions of a development's access road frontage not covered in the above paving requirement subsection 4(b)(1), the developer shall submit funds in the amount of the development's fair share of paving costs prior to the issuance of final plat approval. Said funds shall be held by the County for a period not to exceed ten (10) years to be used for the paving of the road accessing the development. Any funds not expended or encumbered by the end of the calendar quarter immediately following ten (10) years from the date the funds were submitted to the County shall, upon application of the feepayer, be returned to him with interest to be determined based upon the average rate of return to the County for the time period the funds were held. The road segment to be funded and later paved shall include all of the development's frontage on the road. Any required submission of escrow funds shall include an escrow agreement acceptable to the County Attorney. Such agreement shall include provisions necessary to accomplish and facilitate future road paving.

(4) *Paving option:* In lieu of submitting funds for paving specified under subsection 4(b)(3) above, the developer may propose to pave or arrange for paving the development's remaining access road frontage, notwithstanding requirements for roads designated on the Thoroughfare Plan, if such paving connects to a paved public road. If such a paving option is utilized, no final plat approval shall be issued for all or any portion of the development until said paving is completed, and improvements are inspected and approved by the County. At the option of the Board of County Commissioners, the developer may furnish the County security in the amount of one hundred fifteen percent (115%) of the estimated cost of

providing the paving improvements at the time of final plat approval. The County Engineer shall approve the amount of security to be furnished.

(Ord. No. 2022-13, Pt. A, 6-7-2022)

J. RS-4 RESIDENTIAL, SINGLE-FAMILY - 4.

1. *Purpose.* The purpose of this district is to provide and protect an environment suitable for single-family dwellings at a maximum density of four (4) dwelling units per gross acre, together with such other uses as may be necessary for and compatible with low density residential surroundings. The number in "( )" following each identified use corresponds to the SIC Code reference described in Section 3.01.02(B). The number 999 applies to a use not defined under the SIC Code but may be further defined in Section 2.00.00 of this Code.
2. *Permitted Uses:*
    a. Family day care homes. (999)
    b. Family residential homes provided that such homes shall not be located within a radius of one thousand (1,000) feet of another existing such family residential home and provided that the sponsoring agency or Department of Health and Rehabilitative Services (HRS) notifies the Board of County Commissioners at the time of home occupancy that the home is licensed by HRS. (999)
    c. Single-family detached dwellings. (999)
3. *Lot Size Requirements.* Lot size requirements shall be in accordance with Section 7.04.00.
4. *Dimensional Regulations.* Dimensional requirements shall be in accordance with Section 7.04.00.
5. *Off-Street Parking Requirements.* Off-street parking requirements shall be in accordance with Section 7.06.00.
6. *Conditional Uses:*
    a. Family residential homes located within a radius of one thousand (1,000) feet of another such family residential home. (999)
    b. Telecommunication towers - subject to the standards of Section 7.10.23. (999)
7. *Accessory Uses.* Accessory uses are subject to the requirements of Section 8.00.00.
    a. Solar energy systems, subject to the requirements of Section 7.10.28.

NOTES:

(a) Expressed as dwellings/per acre.

(b) For three (3) or more dwelling units, motel, or hotel uses, use the building spacing formula identified in Section 7.04.03.

(c) For Industrial extraction uses, refer to Mining Regulations, Section 6.06.00.

(d) Maximum net density of 36 guest units/acre, except for North and South Hutchinson Island. For hotel/motel development density on North and South Hutchinson Island refer to Policy 1.1.10.2 of the St. Lucie County Comprehensive Plan.

(e) All structures in excess of 40 feet shall comply with the provision of Section 7.04.03.

(f) With central water.

(g) For enclosed storage structures, greenhouses, child's playhouse and gazebos, this dimension may be reduced to five (5) feet.

(h) 10,000 square foot lots permitted when use limitations consistent with the CN and CO zoning districts (see Section 3.01.03(Q) and (R).

(i) For any development activity on Hutchinson Island, refer to Section 4.01.00, Hutchinson Island - Building Height Overlay Zone.

(j) For aquaculture production activities, the maximum percentage of lot coverage by building is 50%. All buildings are subject to meeting the applicable stormwater management standards and requirements of this code.

For the purpose of this section, aquaculture means the cultivation of aquatic organism and aquacultural products as defined in Chapter 597.0015, Florida Statutes.

(k) There shall be no minimum lot size required for the Cpub zoning district, however the minimum yard setback for any structures erected on any site zoned Cpub shall be as identified.

(l) For accessible handicap ramps the required yard setback may be reduced to 50% of the minimum setback requirement.

The accessible handicap ramp permitted under this amendment shall not have a roof or be enclosed and shall not provide for a deck or landing larger than is necessary to be in compliance with the Florida Accessibility Code for Building Construction. A Physician's Certification Form and proper Building Permit Application documentation is required.

(m) Maximum hotel/motel density of 36 guest units/acre. For hotel/motel projects containing condominium hotel units (as defined in the Land Development Code) the total number of hotel/motel units of any kind (including condominium hotel units) may not exceed 36 units per acre.

(Ord. No. 08-025, Pt. A, 9-16-2008; Ord. No. 15-002, Pt. A, 4-7-2015 ; Ord. No. 2016-23 , Pt. A, 11-1-2016)

J. *RS-4 RESIDENTIAL, SINGLE-FAMILY - 4.*

1. *Purpose.* The purpose of this district is to provide and protect an environment suitable for single-family dwellings at a maximum density of four (4) dwelling units per gross acre, together with such other uses as may be necessary for and compatible with low density residential surroundings. The number in "( )" following each identified use corresponds to the SIC Code reference described in Section 3.01.02(B). The number 999 applies to a use not defined under the SIC Code but may be further defined in Section 2.00.00 of this Code.
2. *Permitted Uses:*
   a. Family day care homes. (999)
   b. Family residential homes provided that such homes shall not be located within a radius of one thousand (1,000) feet of another existing such family residential home and provided that the sponsoring agency or Department of Health and Rehabilitative Services (HRS) notifies the Board of County Commissioners at the time of home occupancy that the home is licensed by HRS. Public Hearing Notice

Tuesday, May 5, 2026

Road Paving and Fair Share Contribution Waiver Request

This notice is provided because you are an owner of property within 500 feet of the petition site.

Project Description
The applicant has submitted a petition to the County requesting a Road Paving and Fair Share Contribution Waiver for a ±1.25-acre parcel. The site is located between Linda Vista Avenue and South 21st Street, approximately 900 ft. south of Edwards Road.

Linda Vista Avenue and 21st Street are County owned and maintained, but unimproved roadways. Sufficient Right-of-Way has been dedicated for these two streets.

Pursuant to Section 7.05.07.(B.)(2.) of the Land Development Code allows the Board of County Commissioners to waive paving requirements of unpaved access roads to new developments requiring site plan approval.

In order for the Board to consider a waiver the applicant shall demonstrate one of the three following criteria.

1. Paving is not essential to provide adequate access, or
2. The road is part of the County's five-year program or an municipal service taxing or benefit unit, or
3. The road does not have adequate width for necessary improvements.

For more information on the proposed Waiver or Site Plan, please contact the project manager listed herein.

Board of County Commissioners
The St. Lucie County Board of County Commissioners has the power to approve or disapprove any applications within their area of responsibility.

The Board of County Commissioners strongly encourages your input and comment at the public hearing.

You may also mail or email written comments regarding this proceeding in advance of the public hearing for inclusion in the official record.

Public comment for upcoming meetings can be submitted several ways:

Email: Morgan.Phelps@stlucieco.gov
or
Mail: Planning Division
Attn. Morgan Phelps
2300 Virginia Avenue
Fort Pierce, Florida 34982

Date Mailed: April 22, 2026

ST. LUCIE COUNTY BOARD OF COUNTY COMMISSIONERS PUBLIC HEARING

Tuesday, May 5, 2026

NOTICE OF PROPOSED WAIVER FROM THE PAVING REQUIREMENT PURSUANT TO LAND DEVELOPMENT CODE SECTION 7.05.07

The St. Lucie County Board of County Commissioners is scheduled to consider adoption of the following, by Resolution:

A RESOLUTION OF THE BOARD OF COUNTY COMMISSIONERS OF ST. LUCIE COUNTY FOR A WAIVER FROM THE REQUIREMENTS OF SECTION 7.05.07 OF THE LAND DEVELOPMENT CODE REQUIRING PAVED ACCESS TO A NEW DEVELOPMENT PROPOSED ON LINDA VISTA AVENUE.

PROPERTY OWNER: Scott & Jessica Mosher

APPLICANT: Scott & Jessica Mosher

ADDRESS: 3201 Linda Vista Avenue, Fort Pierce, FL 34982

LOCATION: Linda Vista Avenue and S 21st Street south of Edwards Road

PARCEL ID: 2428-601-0146-000-0

FILE NAME & NO: Linda Vista Trails, Road Paving Waiver, RPW-2601-000001

REQUEST: A waiver from the requirement of St. Lucie County Land Development Code Section 7.05.07 to pave a segment of Linda Vista Avenue and S 21st Street south of Edwards Road and waiver of a proportionate fair share contribution to paving.

BACKGROUND: Mr. Scott & Mrs. Jessica Mosher own a 1.25 acre (ac) parcel of land located between Linda Vista Avenue and South 21st Street and approximately 900 feet (ft) south of Edwards Rd. The owner wishes to subdivide the property into 5 parcels, creating 4 new parcels. A proposed site plan has been reviewed and has been deemed appropriate for continued processing towards a site plan approval and for subdividing into the 5 parcels, each with a minimum of 8,000 square-feet (sf) (0.18 acre) in size.

Linda Vista Avenue and South 21st Street are currently unimproved St. Lucie County owned and maintained roadways. The existing rights-of-way (ROW) widths along the site's frontage meet the minimum width requirements.

Per St. Lucie County Land Development Code, projects on unimproved roadways seeking site plan approval are required to provide paved access to the project. The definition of paved access includes construction to County roadway standards, in other words, an improved roadway.

The site is a small traffic generator on an unimproved County roadway. Per St. Lucie County code 7.05.07(B.)(4.) – General Requirements, the applicant is required to pay a proportionate fair share amount for future paving, pave the access road, or seek a waiver from the Board of County Commissioners.

The applicant has provided a prorated fair share cost analysis and is requesting a waiver for the paving and fair share cost contribution based on criteria listed in section 7.05.07.(B.)(2.) of St. Lucie County's Land Development Code. If the Board does not waive the requirements and accepts a fair share contribution, the County must pave the road utilizing the funds within a 10-year period or the money is returned to the applicant at the end of the 10-year period.

7.05.07.(B.)(2.) Waiver.

a. Paving requirements and provisions shall be waived by the Board of County Commissioners, following a public hearing, if the Board determines:

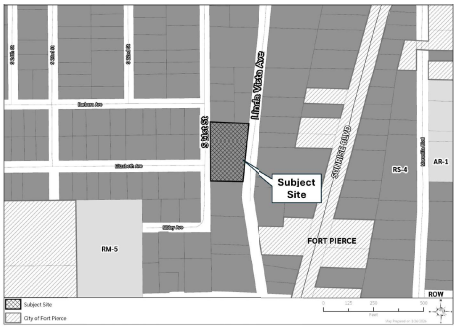
(1) That the road paving is not essential to provide adequate access to the proposed development and through the surrounding area, or

(2) That the road will be paved as part of the County's five-year road program or an approved municipal service taxing or benefit unit, or

(3) That the access road does not have adequate right-of-way in which to construct the necessary paving improvements in accordance with County standards.

This request falls under item number 1. Paving is not essential to provide adequate access. Linda Vista Avenue and South 21st Street are currently maintained in their existing conditions for access to surrounding properties.

At this time, the County does not have Linda Vista Avenue or South 21st Street in its 5-year road program for paving, and the existing right-of-way width is sufficient in meeting the County standards.



The Board of County Commissioners' **PUBLIC HEARING** on this item will be held in the Commission Chambers, Roger Poitras Annex, 3rd Floor, St. Lucie County Administration Building, 2300 Virginia Avenue, Fort Pierce, Florida on **Tuesday, May 5, 2026,** beginning at **6:00 pm** or as soon thereafter as possible.

All interested persons will be given an opportunity to be heard. Written comments received in advance of the public hearing will also be considered. Comments must be submitted by noon the day prior to the meeting. Comments will be distributed to the Board in advance of the meeting and included in the record provided the comments comply with the County's rules.

The petition files are available for review at the Planning and Development Services Department – Planning offices located at 2300 Virginia Avenue, Fort Pierce, Florida during regular business hours. Please call (772) 462-2822 or TDD (772) 462-1428 if you have any questions or require additional information about this petition.

The St. Lucie County Board of County Commissioners have the power to review and approve or disapprove, any applications within their area of responsibility.

The proceedings of the Board of County Commissioners are electronically recorded. **PURSUANT TO Section 286.0105, Florida Statutes**, if a person decides to appeal any decision made by the Board of County Commissioners with respect to any matter considered at a meeting or hearing, he or she will need a record of the proceedings. For such purpose, he or she may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based. Upon the request of any party to the proceeding, individuals testifying during a hearing will be sworn in. Any party to the proceeding will be granted an opportunity to cross-examine any individual testifying during a hearing upon request. If it becomes necessary, a public hearing may be continued to a date certain.

Anyone with a disability requiring accommodation to attend this meeting should contact the St. Lucie County Community Risk Manager at least forty-eight (48) hours prior to the meeting at (772) 462-1546 or T.D.D. (772) 462-1428. Any questions about this agenda may be referred to St. Lucie County Planning Division at (772) 462-2822.

SUBJECT: Ordinance No. 26-011 - Correcting a Scrivener's Error in Ordinance 26-004

BACKGROUND:

On March 17, 2026, the Board adopted Ordinance No. 26-004 which scheduled a referendum on November 3, 2026, to allow the electors to consider continuing levying the 0.5 percent infrastructure surtax. Unfortunately, due to a scrivener's error, the ordinance had unclear language in Section 42-253, which appeared to exclude pre-paid calling arrangements, which are covered under Section 212.054(2)(b), Florida Statutes. This error did not affect the ballot language that the Board approved. The draft ordinance attached corrects this error.

PREVIOUS ACTION:

On April 3, 2018, the Board approved Ordinance No. 18-004 levying a local government infrastructure 0.5% surtax which took effect January 1, 2019, after a county-wide referendum election.

On February 17, 2026, the Board approved permission to advertise Ordinance No. 26-004.

On March 17, 2026, the Board approved Ordinance No. 26-004.

On April 21, 2026, the Board approved permission to advertise Ordinance No. 26-011.

FINANCIAL IMPACT:

Proceeds from the proposed surtax, if approved, would be used to improve public roads, reduce traffic congestion, reduce neighborhood flooding, improve local water quality and other similar uses. The proceeds would be distributed to the County and municipalities pursuant to the formula set out in Section 218.62, Florida Statutes.

A Business Impact Estimate, pursuant to Section 125.66(3), F.S. has been prepared and posted on the St. Lucie County website (stlucieco.gov).

RECOMMENDATION:

Staff recommends the Board approve Ordinance No. 26-011 and authorize the Chair to sign the ordinance.

ORDINANCE NO. 26-011

AN ORDINANCE AMENDING AND RESTATING ORDINANCE NO. 26-004 TO CORRECT A SCRIVENER'S ERROR IN CHAPTER 42 "TAXATION", ARTICLE VIII "DISCRETIONARY SALES SURTAX", SECTION 42-253 "LEVY OF DISCRETIONARY SALES SURTAX"; LEVYING A LOCAL GOVERNMENT INFRASTRUCTURE 0.5 PERCENT SURTAX ON CERTAIN TRANSACTIONS OCCURRING WITHIN ST. LUCIE COUNTY FROM WHICH TAXES ARE PAYABLE TO THE STATE OF FLORIDA UNDER THE PROVISIONS OF CHAPTER 212, FLORIDA STATUTES; PROVIDING THAT THE IMPOSITION OF THE SURTAX SHALL NOT BE EFFECTIVE UNLESS APPROVED AT A REFERENDUM ELECTION; PROVIDING THAT THE IMPOSITION SHALL BE EFFECTIVE BEGINNING JANUARY 1, 2029 AND ENDING ON DECEMBER 31, 2038; PROVIDING FOR DISTRIBUTION AMONG THE GOVERNMENTS OF ST. LUCIE COUNTY AND ELIGIBLE MUNICIPALITIES PURSUANT TO LAW; DIRECTING THE SUPERVISOR OF ELECTIONS TO HOLD A REFERENDUM ELECTION ON NOVEMBER 3, 2026; PROVIDING BALLOT LANGUAGE AND A BRIEF DESCRIPTION OF CAPITAL PROJECTS; PROVIDING FOR A DEFINITION OF INFRASTRUCTURE; DIRECTING THE CLERK OF CIRCUIT COURT TO ADVERTISE THE REFERENDUM ELECTION IN ACCORDANCE WITH LAW; PROVIDING FOR SEVERABILITY; PROVIDING FOR FILING WITH THE DEPARTMENT OF STATE; PROVIDING AN EFFECTIVE DATE AND PROVIDING FOR CODIFICATION.

WHEREAS, Section 212.055(2), Florida Statutes authorizes St. Lucie County to impose a sales infrastructure surtax upon most taxable transactions occurring within St. Lucie County and taxable under Chapter 212 of the Florida Statutes; and,

WHEREAS, such surtax may be imposed at a rate of 0.5 percent for transactions which are subject to the state tax imposed under the provisions of Chapter 212, Florida Statutes; and,

WHEREAS, a 0.5 percent surtax would, under current State sale tax rates, result in a 0.5 percent surtax on each one dollar ($1.00) sale; and,

WHEREAS, funds generated by the local government infrastructure surtax authorized by Section 212.055(2), Florida Statutes, shall be utilized by the St. Lucie County and its municipalities to finance, construct, reconstruct, maintain, repair and improve public infrastructure including long term capital maintenance and useful life extension of public infrastructure projects such as new and improved sidewalks near schools, roadway improvements including expansion and major resurfacing, reducing traffic congestion, local flood control and improving water quality and such other similar uses authorized under Florida law for the use and benefit of the citizens of the County;

WHEREAS, a sales tax is levied on all sales to non-residents and residents alike within St. Lucie County and, a significant portion of the infrastructure surtax will be paid by non-permanent residents such as short term and seasonal visitors ("Non-Permanent Residents"). It is estimated that 15-20% of all surtax revenue in St. Lucie County is paid by Non-Permanent Residents;

WHEREAS, this is fair and equitable as Non-Permanent Residents contribute significantly to road congestion and wear and tear on roadways and other public infrastructure;

WHEREAS, since such infrastructure projects have a long useful life and funding would be costly to the current citizens of the County, it is fair and equitable that the current and future Non-Permanent Residents who will also benefit from such infrastructure improvements share in the cost of these projects;

WHEREAS, the infrastructure surtax will allow the St. Lucie County and its municipalities to use current fiscal and monetary resources for other existing and needed municipal services;

WHEREAS, the revenue generated by the infrastructure surtax will be allocated pursuant to State law guaranteeing the St. Lucie County and its municipalities with a specified share of the revenue generated by this tax;

WHEREAS, the revenue generated by the infrastructure surtax can be used for matching state and federal funds to generate significantly more funding for infrastructure projects in the County;

WHEREAS, adequate public infrastructure facilities of the types hereinabove described promote the safe, efficient, and uninterrupted provision of numerous general and essential public services provided by the St. Lucie County and its municipalities including but not limited to roadways, flood control, pedestrian safety and water quality;

WHEREAS, the St. Lucie County and its municipalities recommend that a citizens' oversight committee should be established by the Cities of the County to routinely review projects funded by the infrastructure surtax that will issue reports to the County to insure transparency and to provide the citizens of the County with the assurance that funds are being spent in the manner approved by the voters;

WHEREAS, a brief general description of the projects to be funded is set forth in the ballot language contained in this ordinance; and,

WHEREAS, St. Lucie County and its municipalities are presently without sufficient revenues to pay for improving local roads, reducing traffic congestion, improving public safety, improving local water quality, and other similar uses to adequately serve the needs of the County; and,

WHEREAS, adequate infrastructure promotes safe, efficient and uninterrupted provision of services in St. Lucie County; and,

WHEREAS, Section 212.055(2), Florida Statutes, requires voter approval in a referendum election prior to imposition of the discretionary sales surtax.

WHEREAS, on March 17, 2026, the Board adopted Ordinance No. 26-004 which due to a scrivener's error excluded prepaid calling arrangements; and

WHEREAS, this Ordinance is intended to amend and restate Ordinance No. 26-004 to correct the

scrivener's error.

NOW, THEREFORE, BE IT ORDAINED by the Board of County Commissioners of St. Lucie County, Florida:

PART A. ARTICLE VIII "DISCRETIONARY SALES SURTAX" IS HEREBY CREATED AND ADDED TO CHAPTER 42 "TAXATION" OF THE CODE OF ORDINANCES OF ST. LUCIE COUNTY, FLORIDA, AS FOLLOWS:

SECTION 42-250 AUTHORIZATION.

This ordinance is authorized by Sections 212.054 and 212.055(2), Florida Statutes as amended and other applicable law.

SECTION 42-251 PURPOSE.

The levy herein of the discretionary sales surtax is to serve the public purpose of providing and making available to St. Lucie County and the eligible municipalities therein funds to finance, plan and construct infrastructure for any or all of the following public needs: improving local roads, reducing traffic congestion, adding sidewalks, improving local water quality, including the Indian River Lagoon, reduce neighborhood flooding, and other similar uses authorized by Florida law.

The proceeds of the discretionary sales surtax may be pledged for the purpose of paying principal and interest on bonds issued to finance the foregoing infrastructure. The sales surtax proceeds shall not be used to supplant or replace user fees or to reduce ad valorem taxes existing prior to the levy of this surtax. Neither the proceeds of the sales surtax nor any interest accrued thereto shall be used for operational expenses of the County or the municipalities.

SECTION 42-252 DEFINITION.

Infrastructure shall have the meaning set out in Section 212.055(2)(d)1, Florida Statutes, as amended.

SECTION 42-253 LEVY OF DISCRETIONARY SALES SURTAX.

~~There is hereby levied and imposed throughout the incorporated and unincorporated areas of St. Lucie County, a 0.5 percent sales surtax upon any tax paid to the State of Florida pursuant to Chapter 212, Florida Statutes, which resulted from a taxable transaction occurring within St. Lucie County; provided, however, that the surtax shall not apply on the sales amount above $5,000.00 on an item of tangible personal property and on prepaid calling arrangements as defined in Section 212.05(1)(e)1a unless the statutory exemption amount set forth at Section 212.054(2)(b), Florida Statutes, is amended in which case the amended exemption amount, if any, shall be utilized in lieu of the exemption amount stated herein.~~

<u>There is hereby levied and imposed throughout the incorporated and unincorporated areas of St. Lucie County a 0.5 percent sales surtax upon all authorized taxable transactions occurring within St.</u>

Lucie County in accordance with Chapter 212, Florida Statutes.

SECTION 42-254 DISTRIBUTION OF SURTAX.

In accordance with Section 212.055(2)(c), Florida Statutes, proceeds of the sales surtax hereby imposed shall be divided and distributed among the County government and eligible municipalities based upon interlocal agreement or in the absence of Interlocal agreement, by the formula provided in Section 218.62, Florida Statutes.

SECTION 42-255 REFERENDUM ELECTION.

(1) The sales surtax levied in Section 42-253 of this ordinance shall not take effect unless and until approved by a majority of the qualified electors of the County voting in a county-wide referendum election on the surtax.

(2) The Supervisor of Elections of St. Lucie County is hereby directed to hold the referendum election on November 3, 2026, on the levy of a discretionary 0.5 percent sales surtax.

(3) The Supervisor or Elections of St. Lucie County shall cause the ballot question substantially in the following form to be placed on the ballot:

OFFICIAL BALLOT

EXTENSION OF EXISTING HALF CENT LOCAL GOVERNMENT SURTAX FOR INFRASTRUCTURE

To continue funding projects to improve local roads, reduce traffic congestion, add sidewalks and greenspaces, improve local water quality, including the Lagoon, reduce neighborhood flooding and similar uses under Florida law and seek matching funds for these purposes, shall St. Lucie County continue to levy a half-cent sales tax, for ten years, throughout the County, with expenditures reviewed by an independent citizens committee ensuring dollars are spent fairly throughout the County and its municipalities?

_____ FOR THE 0.5 CENT SALES TAX

_____ AGAINST THE 0.5 CENT SALES TAX

(4) The Referendum election shall be held at the polling places designated in each precinct in St. Lucie County and be conducted by election officials duly appointed by applicable general law. The polls will be open at the voting places from 7:00 a.m. to 7:00 p.m. on November 3, 2026. Absentee voting shall be permitted upon compliance with applicable law.

(5) The County is hereby authorized to take all actions necessary, to include but not limited, adoption of subsequent motions, resolutions and notices to place this issue for referendum and to carry out the intent of this ordinance.

SECTION 42-256 ADVERTISEMENT.

The Clerk of Circuit Court shall ensure that notice of this referendum shall be advertised in accordance with the provisions of Section 100.342, Florida Statutes. Proof of publication shall be provided to the Chairman of the Board of County Commissioners for St. Lucie County.

PART B. SEVERABILITY.

If any portion of this ordinance is for any reason held or declared to be unconstitutional, inoperative, or void, such holding shall not affect the remaining portions of this ordinance. If this ordinance or any provision thereof shall be held to be inapplicable to any person, property, or circumstance, such holding shall not affect its applicability to any other person, property, or circumstances.

PART C. FILING WITH THE DEPARTMENT OF STATE.

The Clerk be and is hereby directed forthwith to send a certified copy of this ordinance to the Bureau of Administration Code and Laws, Department of State, The Capitol, Tallahassee, Florida 32304.

PART D. EFFECTIVE DATE.

(A) The tax levied hereby shall be effective from January 1, 2029 through December 31, 2038, if approved in the referendum election to be held on November 3, 2026.

(B) This ordinance shall take effect upon filing with the Secretary of State.

PART E. ADOPTION.

After motion and second, the vote on this ordinance was as follows:

Commissioner Jamie Fowler	XXX
Commissioner Larry Leet	XXX
Commissioner James Clasby	XXX
Commissioner Erin Lowry	XXX
Commissioner Cathy Townsend	XXX

PART F. CODIFICATION.

Upon approval by the electors of the tax imposed by this ordinance, provisions of this ordinance shall be incorporated in the Code of Ordinance of St. Lucie County, Florida, and the word “ordinance” may be changed to “section”, “article”, or other appropriate word, and the sections of this ordinance may be renumbered or relettered to accomplish such intention; provided, however, that parts B through F shall not be codified. Actual chapter, article, and section numbers may be modified in codification.

RES-2026-84
REGULAR AGENDA - PLANNING & DEVELOPMENT SERVICES
DATE: **5/5/2026**
*RESOLUTION ITEM - SITE PLAN
QUASI-JUDICIAL ITEM? YES

AGENDA REQUEST

TO: **Board of County Commissioners**

PRESENTED BY: Kori Benton, Planning & Zoning Manager

SUBMITTED BY: Planning & Development Services

SUBJECT: Project Orchid - Major Site Plan on N. Rock Road - **THIS ITEM IS QUASI-JUDICIAL - ADD ON**

BACKGROUND:

The applicant has petitioned for a Major Site Plan to develop of an approximate 1,390,000 sq. ft. window manufacturing facility, with associated site improvements such as parking, landscape buffers, and stormwater ponds, at a +/-73.48 acre site within the IL, Industrial Light and IH, Industrial Heavy Zoning Districts. The property is located west of North Rock Rd, south of North Rock Rd. Extension (Access Rd.), and north of the Relief Canal, just north of the County jail. The property is located within the Urban Service Boundary (USB).

The proposal has a companion Conditional Use Permit request to develop and operate a +/-76,200 square foot metal foundry as part of the facility, at the northwest portion of the subject site, currently in the IH (Industrial Heavy) Zoning District.

The applicant has also proposed a Comprehensive Plan Future Land Use Map Amendment (Small-Scale) to create a +/- 20.85-acre subarea of the Lucie Rock Mixed Use Activity Area. This Amendment would allow for an 80-foot building height limit within established Medium and High Intensity Development Areas. Additionally, an associated Zoning Atlas Amendment proposes to rezone +/- 20.25 acres of the site from IL (Industrial, Light) to IH (Industrial, Heavy).

PREVIOUS ACTION:

On September 3, 2013, the St. Lucie County Board of County Commissioners granted approval, through Resolution No. 2013-167, the petition of Lucie Rock, LLC, for a Major Site Plan known as St. Lucie Commerce Center.

On September 17, 2013, the St. Lucie County Board of County Commissioners approved the St. Lucie Commerce Center 10-Year Agreement extending Resolution No. 2013-167 to September 17, 2023.

On October 9, 2020, PDS Order 2020-058 was approved by the St. Lucie County Planning & Development Services Director granting a statutory extension under Florida Statute Section 252.363 extending the expiration date for the Major Site Plan known as St. Lucie Commerce Center to November 24, 2025.

On October 10, 2023, PDS Order 2023-064 was approved by the St. Lucie County Planning & Development Services Director granting a statutory extension under Florida Statute Section 252.363 extending the expiration date for the Major Site Plan known as St. Lucie Commerce Center to November 24, 2029, and extended the Development Agreement term through September 17, 2027.

On April 16, 2026, the Planning and Zoning Commission held a public hearing on the companion Amendments and Conditional Use Permit requests, and after discussion voted unanimously to recommend approval of each.

FINANCIAL IMPACT:

N/A

RECOMMENDATION:

Staff recommends the Board approve the Project Orchid Major Site Plan, subject to essential Amendments to the St. Lucie Commerce Center Development Agreement and the effective date of the associated Future Land Use Map and Zoning Atlas Amendments, with conditions as contained in Resolution 2026-84, authorizing the Chair to sign documents as approved by the County Attorney.

Planning Division
MEMORANDUM

TO: Board of County Commissioners

THROUGH: Benjamin Balcer, AICP, Planning & Development Services Director

FROM: Kori Benton, AICP, Planning & Zoning Manager
Thad Crowe, AICP, Senior Planner

DATE: April 28, 2026

SUBJECT: Project Orchid Major Site Plan
Window Manufacturing Facility, Foundry, Two-story Office & Security Guard Houses, up to 1,400,000 sq. ft. (1,388,084 sq. ft.)

GENERAL INFORMATION:

Property Owner/Applicant:	MC320, LLC 5701 SW Sunshine Farms Way Palm City, FL 34990-5608
Agent:	HJA Design Studio, Patti Tobin 3500 SW Corporate Pkwy Suite 203 Palm City, FL 34990
Design & Traffic Consultant:	Kimley-Horn and Associates, Inc. 477 South Rosemary Avenue, Suite 215 West Palm Beach, FL 33401
Location:	West of N. Rock Rd., south of N. Rock Rd. Ext. (Access Rd.), and north of NSLRWCD Canal #44 (Relief Canal).
Parcel ID Numbers:	2302-342-0001-000-1, 2302-341-0001-000-8 & 2302-331-0001-000-7 2302-312-0020-000-7 *(Potential Off-site Construction Support/Burrow Pit)*
Project Size:	73.27 acres (Site Plan), 13.83 acres *(Potential Off-site Construction Support/Burrow Pit)*
Future Land Use:	MXD, Mixed Use District - Lucie Rock Mixed Use Activity Area (initially established as an extension of the Mixed-Use Orange Avenue/I-95 Activity Area), Medium and High Intensity Development Areas.
Proposed Future Land Use:	MXD, Mixed Use District - Lucie Rock Mixed Use Activity Area – proposed to be amended to create a +/- 20.85-acre subarea for an 80-foot building height.
Existing Zoning:	IH, Industrial Heavy (+/- 36.82 acres) & IL, Industrial Light (+/- 36.66 acres)
Proposed Zoning:	IH, Industrial Heavy (+/- 20.25 acres) currently zoned IL would be rezoned to IH, resulting in +/- 57.07 acres in IH and +/- 16.41 acres in IL.
Existing Use(s):	Undeveloped
Utilities:	FPUA service area, water & sewer lines are present on the west side of Rock Rd.

BACKGROUND:

The Agent, Patti Tobin of HJA Design Studio, on behalf of Applicant and Property Owner MC320, LLC, petitioned for a Major Site Plan for an approximate 1,400,000 sq. ft. glass window manufacturing complex on the subject property located west of N. Rock Rd., north of the Relief Canal. The Site Plan includes a +/- 1,283,744 sq. ft. manufacturing building, +/-76,140 sq. ft. foundry building, 27,300 sq. ft. two-story office, and two (2) 450 sq. ft. guard houses, along with support improvements on and off site. The Applicant filed companion applications as follows:

1) A Comprehensive Plan Future Land Use Map Amendment (FLUMA) that would create a +/- 20.85-acre subarea of the Lucie Rock Mixed Use Activity Area (initially established as an extension of the Mixed Use Orange Avenue/I-95 Activity Area), an area in which an 80-foot building height limit is set, within the established Medium and High Intensity Development Areas;
2) An amendment to the Official Zoning Atlas seeking to assign the IH (Industrial, Heavy) zoning district to an additional +/-20.25 acres of the overall +/-73.27-acre site, land that is currently zoned IL (Industrial, Light);
3) A Conditional Use Permit for the metal (alluminum) foundry in the IH zoning district; and
4) An Amendment to the St. Lucie Commerce Center (Lucie Rock) Development Agreement.

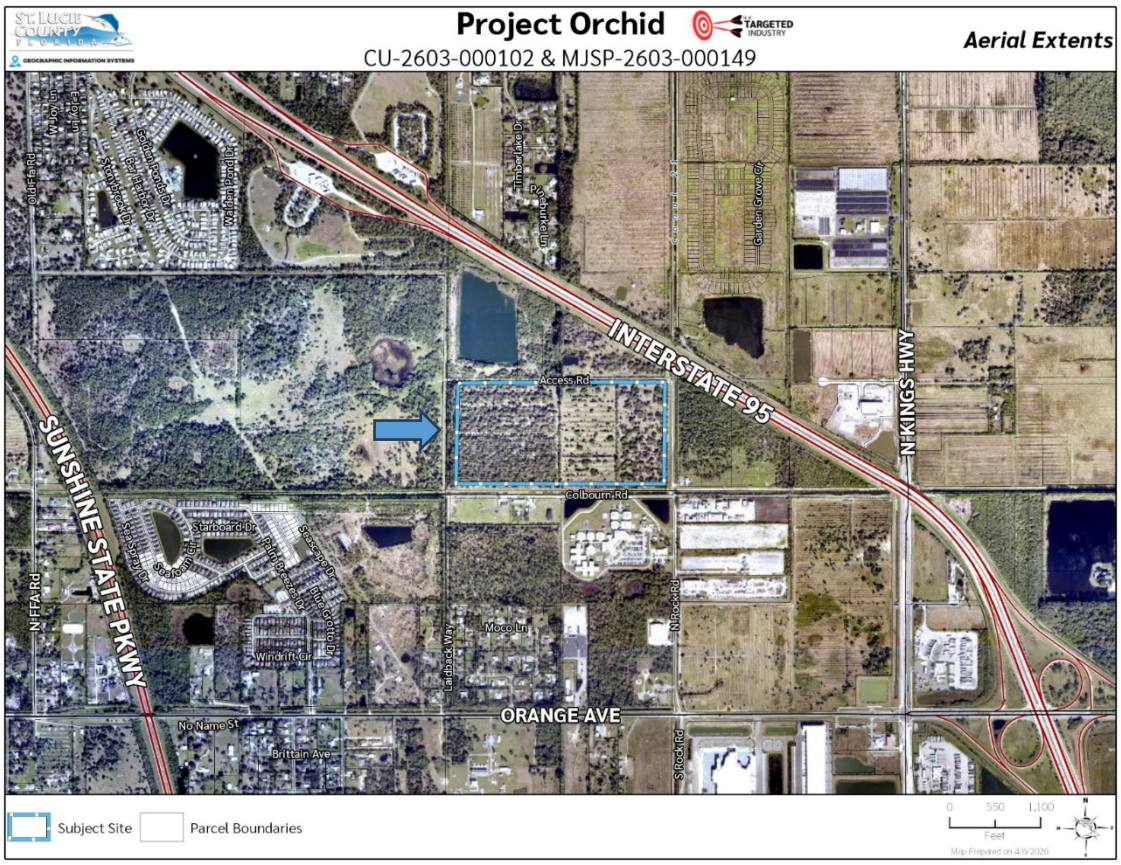

Figure 1: Aerial Map of Project Orchid Site

Glass, window and metal product manufacturing is an allowable use in the IL and IH Zoning Districts, however the foundry element is appropriately classified as under Land Development Code (LDC) Section 3.01.03.

U.7.b. (5) Primary metal industries manufacturing, provides under Standard Industrial Classification (SIC) Code 33, which requires Conditional Use approval in the IH, Zoning District.

The proposed Project Orchid site plan, highlighted in Figure 2 below, exhibits the proposed site layout, access, parking, stormwater and external operational components. The proposed on-site foundry is planned for aluminum melting and forming, to support combination with glass and assembly into finished windows. All manufacturing processes are planned to take place indoors. A two-story office building is located east of the plant, with employee parking around the office and east of the foundry. An internal driveway loops around the building, to support onsite vehicular movements, with all loading bays situated on the east façade.

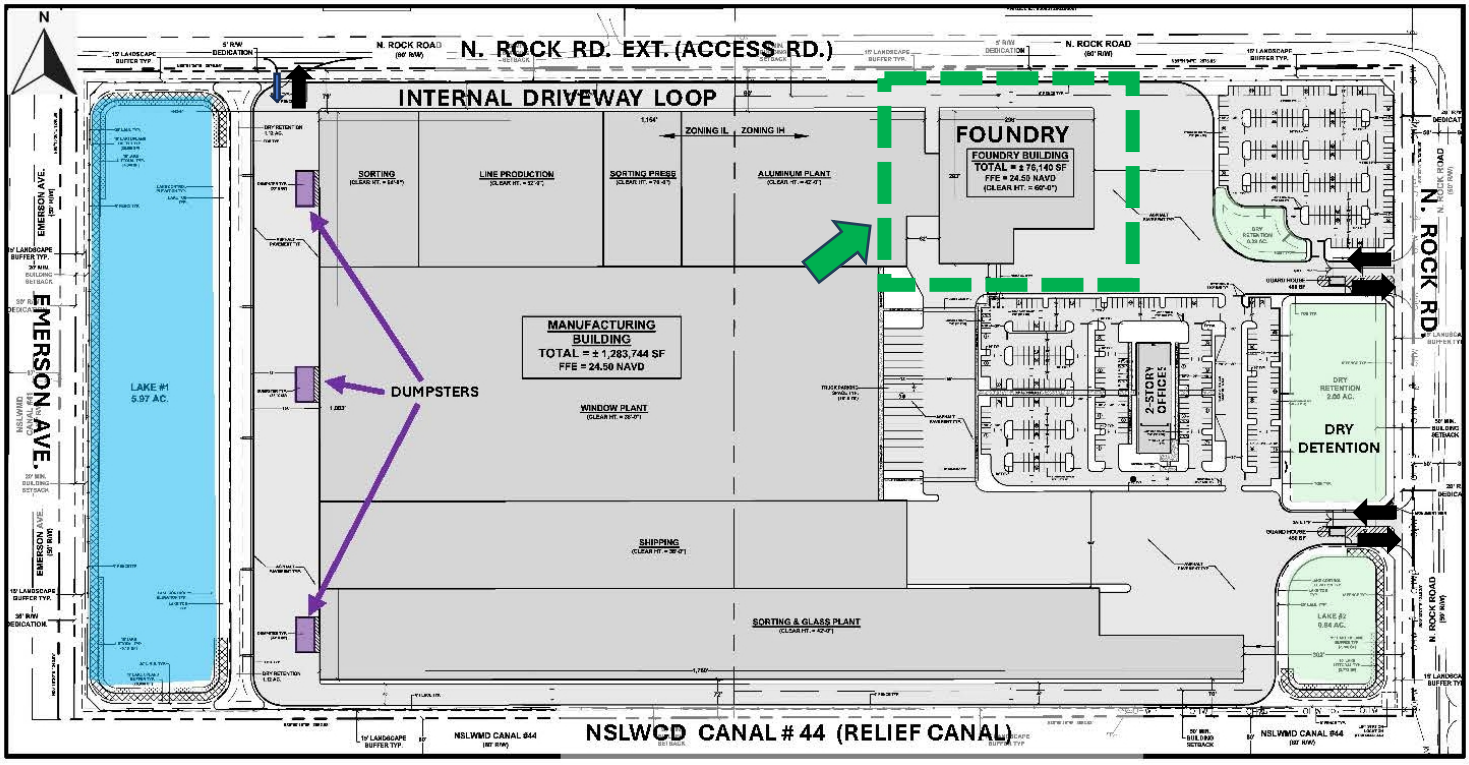

Figure 2: Site Plan Overview – Proposed Foundry Noted in Green

Table 1: Site Plan Data Excerpt

Site Calculations	Acres	SF	%
Net Developable Area	71.76 Ac.	3,125,987 sf	100%
Total Impervious Area	59.51 Ac.	2,592,199 sf	83%
Building Coverage (Includes Guard Houses)	31.55 Ac.	1,374,465 sf	44%
VUA, Other Pavement & Sidewalks	21.05 Ac.	916,952 sf	29%
Lake Surface Area (@ Control Elevation)	6.91 Ac.	300,782 sf	10%
Total Pervious Area	12.25 Ac.	533,788 sf	17%
Dry Retention Area	3.45 Ac.	150,283 sf	5%
Open Space Area	8.80 Ac.	383,505 sf	12%

Site History & Active Site Plan

On September 3, 2013, the St. Lucie County Board of County Commissioners granted approval, through Resolution No. 2013-167, for a Major Site Plan known as the St. Lucie Commerce Center, displayed in Figure 3, below. The approval included a 40-lot subdivision in the IL (Industrial, Light) and IH (Industrial, Heavy) Zoning Districts. The Major Site Plan has remained active through a 10-Year Development Agreement and a series of PDS Orders correlating with Florida Gubernatorial Executive Orders. PDS Order 2023-064 granted a 48-month Major Site Plan extension until November 24, 2029, and the Development Agreement is scheduled to expire on September 27, 2027.

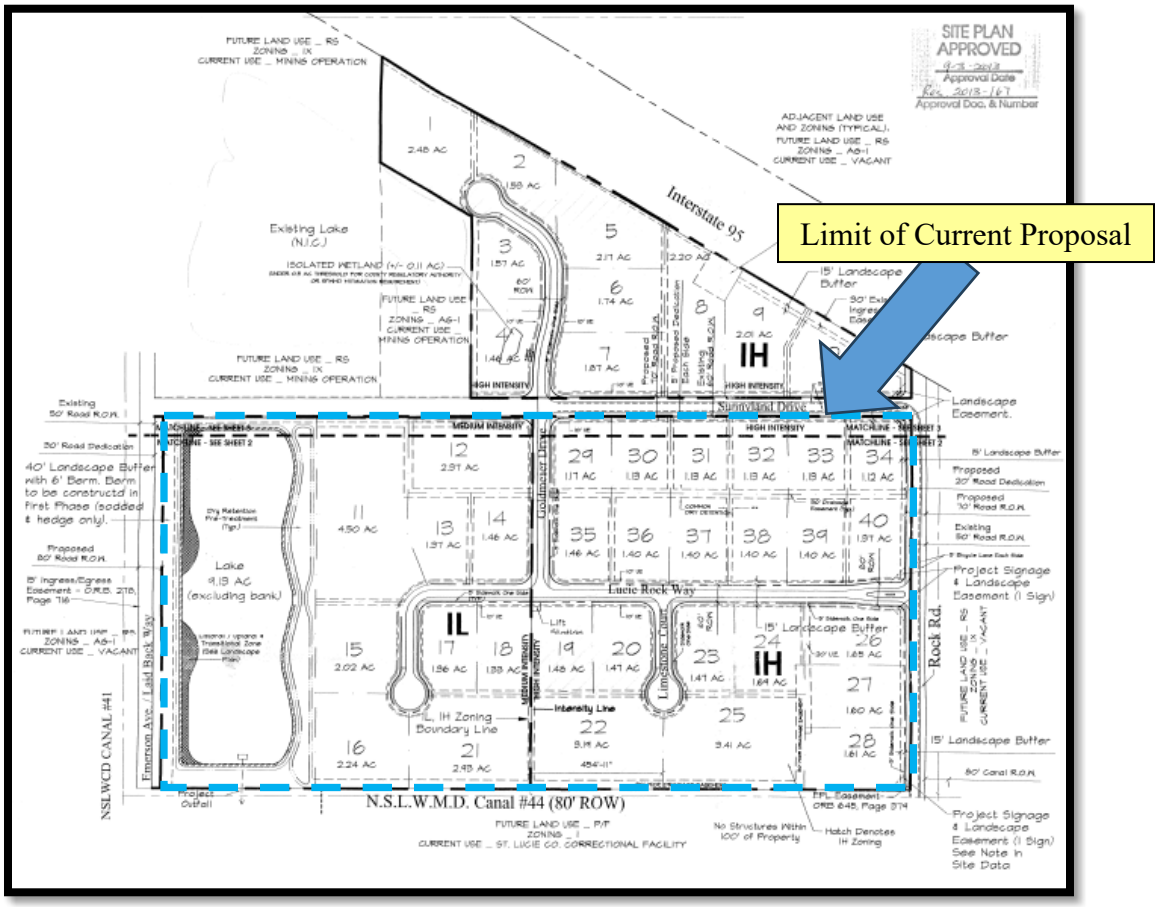

Figure 3: Active Site Plan for St. Lucie Commerce Center – Project Orchid Site Marked

Concurrent Rezoning Request Graphically Overview:

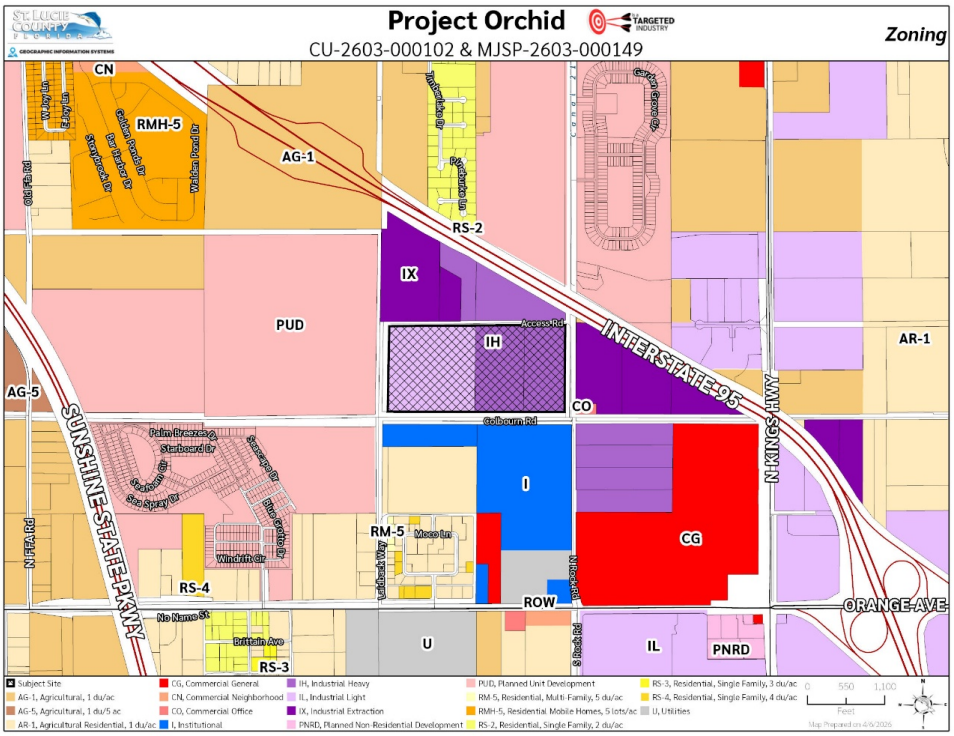

Figure 4: Current Zoning

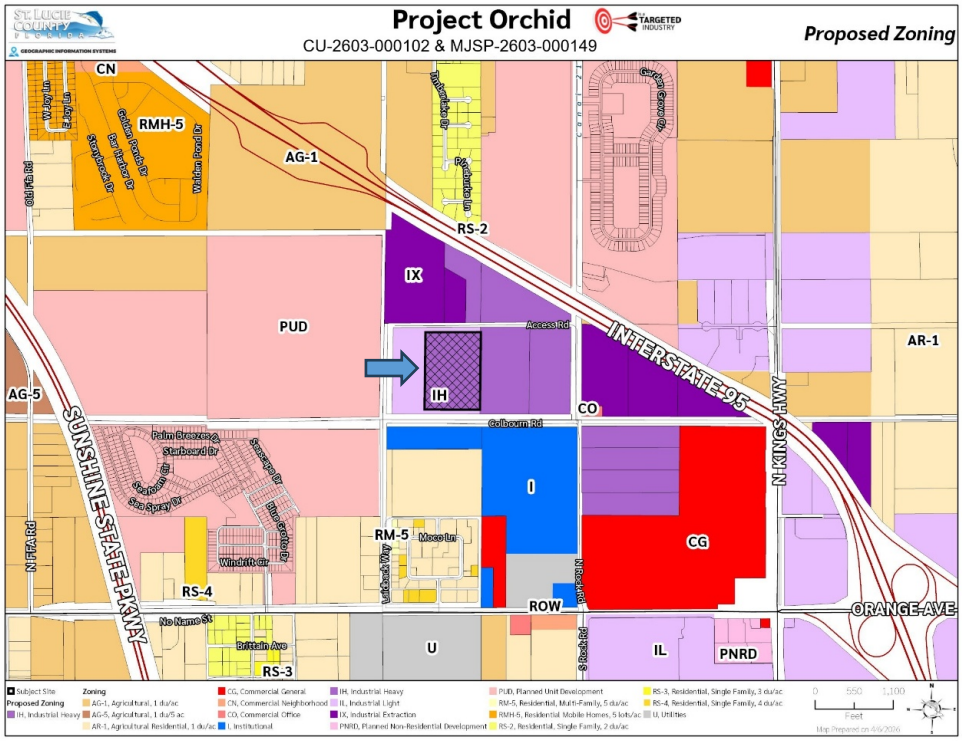

Figure 5: Proposed Zoning

****

SITE PLAN STANDARDS OF REVIEW SET FORTH IN LAND DEVELOPMENT CODE SECTION 11.02.07

The St. Lucie County Land Development Code Section 11.02.07 provides Standards for Site Plan Review. In accordance with these standards, a Major Site Plan shall be granted only if the applicant demonstrates conformance with Criteria A-F as stated and analyzed below.

A. Consistency With Local Ordinances and Comprehensive Plan.

The proposed development and uses are consistent with the general purpose, goals, objectives, and standards of this Code, the St. Lucie County Comprehensive Plan, and the Code and Compiled Laws of St. Lucie County, as proposed to be amended (companion applications), and complies with all additional standards imposed on it by the particular provisions of this Code. The associated Development Agreement, and proposed Amendment thereof, provides for essential commitments to off-site transportation and concurrency improvements to support the project and its compliance with adopted policy.

Land Development Code

Presently, the core Project Orchid site contains approximately 36.06 acres within the IH, Industrial Heavy Zoning District and approximately 37.21 acres within the IL, Industrial Light Zoning District. The companion Zoning Atlas Amendment proposes to transition an additional +/-20.25 acres into the IH Zoning District to expand building height potential for the Site Plan.

Glass, window and metal product manufacturing is an allowable use in the IL and IH Zoning Districts, but the foundry element is appropriately classified as under Land Development Code (LDC) Section 3.01.03. U.7.b. (5) Primary metal industries manufacturing, provides under Standard Industrial Classification (SIC) Code 33, which requires Conditional Use approval in the IH, Zoning District.

The purpose of the IL District is to *provide and protect an environment suitable for light manufacturing, wholesale, and warehousing activities that do not impose undesirable noise, vibration, odor, dust, or other offensive effects on the surrounding are, together with such other uses as may be necessary to and compatible with light industrial surroundings,* with the facilities planned in the IL portion of the site complying with this intent and the established height and setback criteria, as presented in Table 2, below.

Table 2: Excerpt from Table 7-10: Lot Size and Dimensional Requirements

Zoning District	Description	Min Lot Size (sf)	Min Lot Width	Min Road Frontage	Min Front Yard	Min Rear Yard	Min Side Yard	Min Side @ Corner	Max Bldg. Hgt.	Max Lot Coverage
IL	INDUSTRIAL LIGHT	20,000	100	60	25	20	10	20	50(i)	50%
IH	INDUSTRIAL HEAVY	43,560	200	60	50	40	30	50	80(i)	50%

The Site Plan proposes variable building heights for different portions of the manufacturing plant, ranging to over 70ft. as allowed in the IH Zoning District. The applicant has provided preliminary floor plans with

projected building heights, which transition across the operational space, as well as perspective renderings to provide greater context to the scale and variation in roof elevations.

The proposed Foundry is sited within a portion of the site current within the IH District. The purpose of the IH district to *"provide an environment suitable for heavy manufacturing and other activities that may impose undesirable noise, vibration, odor, dust, or other offensive effects on the surrounding area together with such other non-residential uses as may be necessary to and compatible with heavy industrial surroundings."*

While the proposed foundry use is an eligible Conditional Use within the IH Zoning District, such uses are recognized as having the potential to generate off-site impacts including noise, vibration, odor, and emissions. Accordingly, consistency with the Land Development Code and Comprehensive Plan is anticipated to be achieved through the implementation of enforceable performance standards and operational controls to ensure compatibility with surrounding and planned land uses.

Site Access is proposed via two (2) primary two-way driveways on N. Rock Road, at the eastern property line, with incorporation of secure access gates leading to the parking areas, core drive aisles and the facility's loading bays. Additional access is proposed toward the northwest corner of the facility, expected to support limited access for delivery and solid waste trucks, with the restricted access gate system required to provide adequate queuing and operational oversight to ensure no conflict points arise within the N. Rock Road Extension (Access Road) right-of-way. Corresponding roadway improvements, and provisions for sidewalks and/or bicycle lands, or payment-in-lieu of construction of such features, are integrated with the Site Plan and associated Development Agreement Adjustment.

The Plan provides parking beyond the Institute of Transportation Engineers (ITE) minimum requirements for manufacturing and office space of this scale, with 492 standard and 12 ADA spaces integrated, to serve approximately 500 employees simultaneously, with various shift cycles anticipated. The Plan integrates required landscape plantings, stormwater lake littoral plantings and an upland buffer area adjacent to the western property line to assist in a transitional area from site operations to adjacent right-of-way and private lands to the west.

Comprehensive Plan

The current Future Land Use Map (FLUM) designates these three properties and other properties to the north and southeast with the MXD (Mixed Use District) category. Comprehensive Plan Policy 1.1.1.2.H. describes the MXD future land use category as follows:

Mixed Use Development (MXD): The intent of the Mixed Use Development (MXD) designation is to identify those areas where innovative land use concepts are encouraged.

Application of this district should be with prudence, and should be only to those areas where traditional land use classifications do not afford the desired flexibility and community input in land use planning necessary to address local concerns. Candidates for this district include all I-95 interchange areas, the Treasure Coast International Airport, Community Development Districts created pursuant to Chapter 190, Florida Statutes and areas of special or unique environmental consideration that may not be appropriate for traditional land use designations.

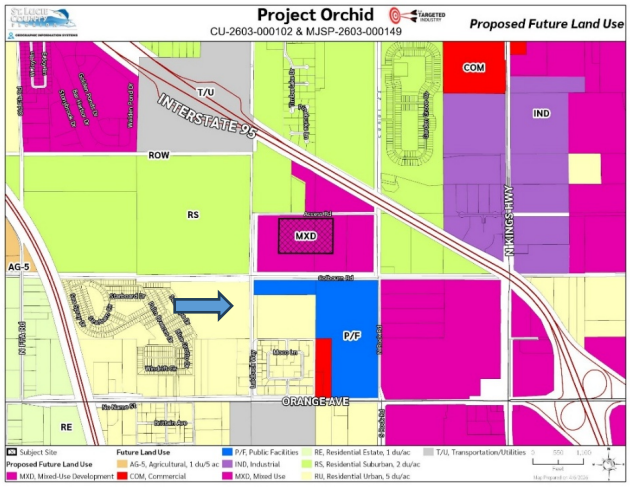

Figure 6: Proposed Future Land Use Map Amendment Area

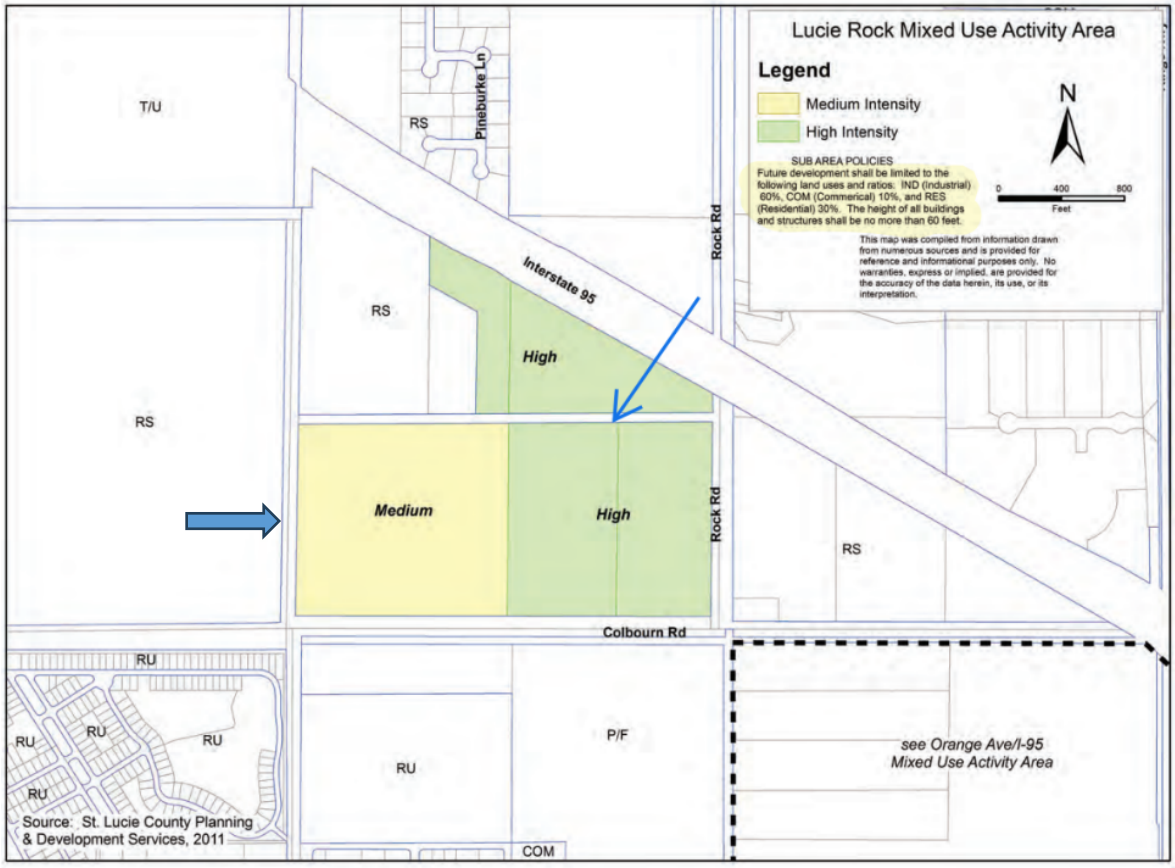
Uses within the areas classified as Mixed Use should be segregated as to intensity and indicated in the form of a concept master plan which is to be included as a part of the land use designation process.
The following criteria, in addition to those as cited in Objective 1.1.7 (PUD, PNRD & PMUD), are to be used in the development of Mixed Use areas:

- *Unless otherwise compliant with the identified intensity classification, any change in zoning shall be to the Planned Unit Development (PUD), Planned Nonresidential Development (PNRD) or Planned Mixed Use Development (PMUD), as described in the St. Lucie County Land Development Code. Those properties with compatible existing zoning designations are encouraged to develop under the PUD, PNRD or PMUD regulations.*
- *Residential development shall be regulated by the intensity district in which it is to take place. In no case should gross residential density exceed 15 du/ac.*
- *All uses shall be compatible with adjacent land uses.*

Future Land Use Category, Subarea Policies, Height & Floor Area Ratio Compliance

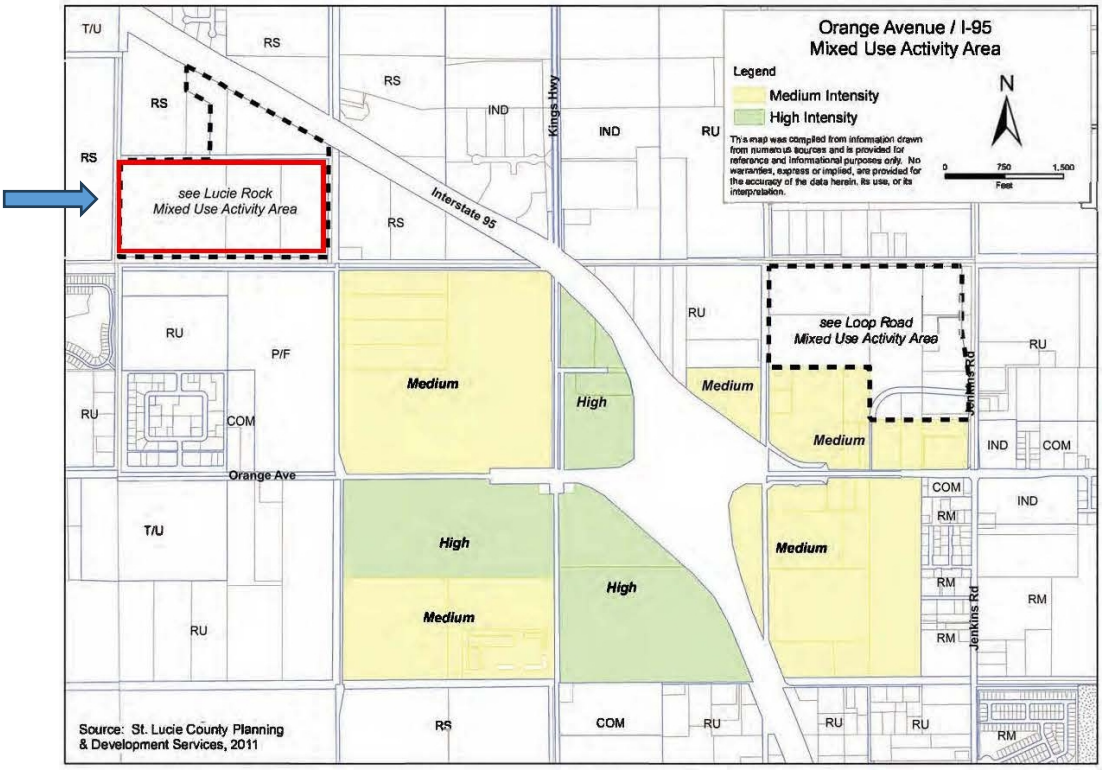
The collective site is located within the adopted Lucie Rock Mixed Use Activity Area (MUAA) (Figure 7) which was initially established as an extension of the Mixed-Use Orange Avenue/I-95 Activity Area (Figure 8, further below). The Lucie Rock MUAA currently limits height to 60 feet, however the companion Future Land Use Map Amendment would allow an 80-foot height limit within the hatched subarea which is approximately 20.85 acres, shown in Figure 9, further below.

Figure 7: Adopted Lucie Rock MUAA



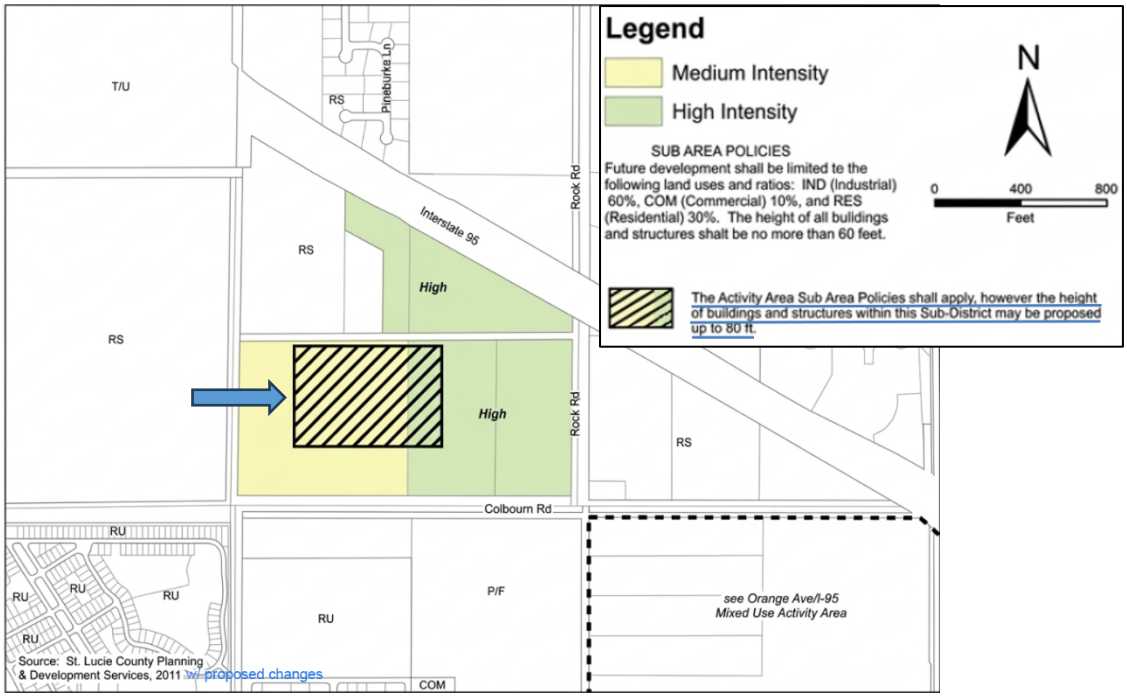
{The rest of this page is left intentionally blank}

Figure 8: Orange Avenue/I-95 MUAA



As stated, the proposed subarea within the Lucie Rock MXD, shown in the diagonal pattern in Figure 9 would allow an 80-foot building height limit; while the remainder of the Mixed Use Activity Area would retain the current adopted 60-foot height limit. The proposed Amendment does not otherwise propose to alter the underlying Medium and High Intensity designations.

Figure 9: Proposed Future Land Use Map – Introducing a New Subarea to the Lucie Rock MUAA



As provided by Comprehensive Plan Policy 1.1.1.2.H., the MXD FLU designation is intended "*to identify those areas where innovative land use concepts are encouraged. Application of this district should be with prudence, and should be only to those areas where traditional land use classifications do not afford the desired flexibility and community input in land use planning necessary to address local concerns."* Further, *"Uses within the areas classified as Mixed Use should be segregated as to intensity and indicated in the form of a concept master plan which is to be included as a part of the land use designation process.*

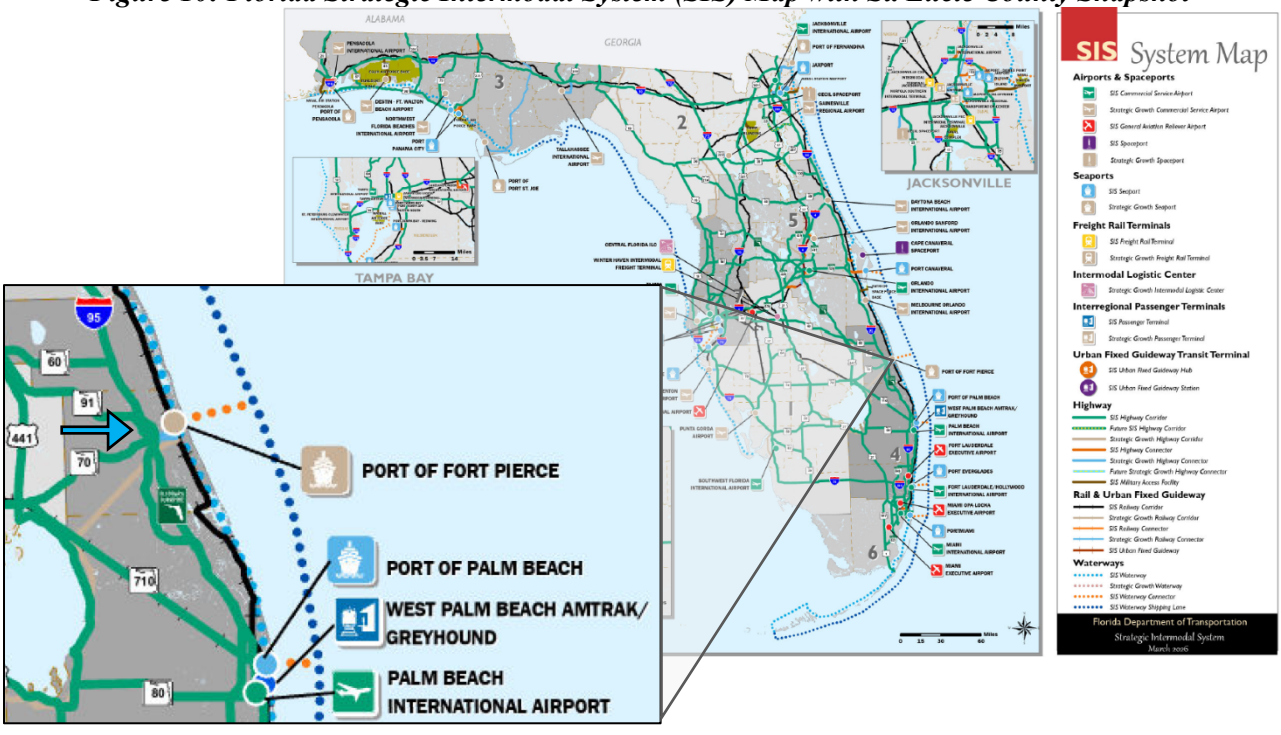
Comprehensive Plan Policy 1.1.8.4 provides density and intensity standards for Mixed Use activity areas, providing for a 0.75 Industrial Floor Area Ratio (FAR) within the High Intensity area, with a provision that Industrial and Professional Service/Office uses may receive an intensity bonus of up to 100% of the FAR, within specific use areas served by Strategic Intermodal System (SIS) facilities operating at or above the adopted level of service (LOS) and with available water service and wastewater service.

The encompassing Lucie Rock Mixed Use Activity Area Subarea policies guide that "F*uture development shall be limited to the following land uses and ratios: IND (Industrial) 60%, COM (Commercial) 10%, and RES (Residential) 30%. The height of all buildings and structures shall be no more than 60 feet.* Tracking these provisions cumulatively guides a maximum 0.9 FAR for Industrial land uses if the intensity bonus is provided where the site is demonstrated to be served by Strategic Intermodal System (SIS) facilities operating at or above the adopted level of service (LOS) and with available water service and wastewater service.

The SIS is Florida's high-priority network of transportation facilities designed to enhance the state's economic competitiveness and mobility. Established in 2003, it focuses state resources on facilities critical for interregional, interstate, and international travel. In St. Lucie County, the SIS specifically supports commerce through Interstate 95 and Florida's Ronald Reagan Turnpike. These corridors are reported to facilitate approximately 70% of all truck traffic on the State Highway System, serving as the backbone for moving goods between Florida's diverse regions and external markets.

As displayed in Figure 10, below, this interconnected system integrates these two highways with seaports, freight rail terminals and other multimodal facilities into a single network. Similar to the County, the Florida Department of Transportation (FDOT) uses Level of Service (LOS) assessments of the SIS framework to prioritize investments that reduce congestion and improve travel time reliability.

Figure 10: Florida Strategic Intermodal System (SIS) Map with St. Lucie County Snapshot



The St. Lucie County Transportation Planning Organization (TPO) publishes Traffic Count Data and LOS assessments for many roadways across the County, annually. In 2021, the last year the publications identified an LOS for Interstate 95 segments between Midway Road and Indrio Road, the registered LOS ranged from B to D, with the immediate segments serving the petition site at a LOS B. Since 2021, average daily trip volumes on these segments have increased with the last physical count secured in 2024, however no LOS rating updates have been published. Based upon the volume increases documented, it is reasonably concluded that Interstate 95, an SIS facility serving the development site, operates at or above the adopted level of service (LOS) for the immediately affected segments.

Tables 3A & 3B: Excerpts from St. Lucie County Transportation Planning Organization (TPO) Traffic Counts / LOS Publications, 2021 & 2025

Roadway Name	Location	STATION ID	AADT	Last Count Year	Pk Hr Service Capacity	AM Pk Hr Pk Dir			PM Pk Hr Pk Dir

The following Comprehensive Plan objectives and policies pertaining to economic sustainability, targeted industry support, and economic development provide support for the proposed Major Site Plan.

Future Land Use Element

> *Objective 1.1.13: Economic Sustainability. To enhance the quality of life of St. Lucie County and promote a sound and resilient local economy, St. Lucie County shall continue to work with the interested groups and agencies to increase and broaden the County's economic base while expanding existing business and industrial opportunities.*
>
> > *Policy 1.1.13.1: St. Lucie County shall actively assist to the maximum extent practical in the recruitment of clean high growth industrial activities and maintain an expedited permitting process for bona fide economic development projects, especially those within the Targeted Industry List, and for development projects located within the Foreign Trade Zone.*
> >
> > *Policy 1.1.13.4: The County shall maintain procedures and incentive tools to encourage business development and assist economic development in St. Lucie County, especially for business within the Targeted Industry List. This goal shall be further implemented by developing innovative land use codes to provide an enhanced the quality of life for St. Lucie County and promote a sound, diverse and resilient local economy.*

Economic Development Element

Goal 10.1: Support economic development in St. Lucie County as part of an overall strategy for sustainability and quality of life.

Objective 10.1.1: Develop and implement activities designed to improve the overall prosperity of St. Lucie County and its residents.

Policy 10.1.1.1 - Attract investors to help diversify the industrial base, broaden the economic tax base and strengthen the job market.

Policy 10.1.1.4 - Place a high priority on infill and redevelopment projects that are consistent with the smart growth policies of St. Lucie County.

Policy 10.1.1.6 - Continue to encourage the development of high wage, high skill, long term job creation in the County.

Policy 10.2.1.4 - Encourage the development of clusters of industries according to the adopted targeted industry list such as Manufacturing Facilities, Finance and Insurance, Information, Clean Energy, Professional, Scientific, and Technical Services, Management and Distribution, and Administrative and Support Services at appropriate locations in St. Lucie County.

B. Effect on Adjacent Properties.
Criterion B provides the following compatibility tests for Site Plan review.

Figure 11: Site Plan Rendering with Nearby Lands *(Foundry Denoted by Blue Arrow)*

1. The proposed building or use will not have an undue adverse effect upon nearby property, the character of the neighborhood, traffic conditions, parking, utility facilities, and other matters affecting the public health, safety, and general welfare.

As shown in Table 4, adjacent properties have similar intensive industrial or institutional future land use and zoning. The County Correctional Facility is to the south of the site, and a modest business office is situated to the east; other adjacent properties are undeveloped, but in the vicinity, there are similar industrial uses including a precast concrete manufacturer and an auto auction yard. While the surrounding area contains industrial and institutional uses, compatibility concerns exist with respect to the planned residential development to the west. With appropriate mitigation measures, including noise, emission, and odor controls in place, adverse impacts from the proposed development and encompassed metal foundry are not anticipated.

Table 4: Adjacent Zoning and Future Land Uses

Location		Future Land Use	Zoning	Existing Land Use
Subject Property		MXD (Mixed Use District)	IH (Industrial, Heavy, eastern half)/ IL (Industrial, Light, western half)	Undeveloped
Adjacent Parcels	***North***	MXD (Mixed Use Development), RS (Residential Suburban)	IH (Industrial, Heavy, eastern half)/ IX (Industrial, Extraction, western half)	Undeveloped, retention pond
	South	P/F (Public Facilities)	I (Institutional)	County Correctional Facility
	East	RS (Residential Suburban)	IX (Industrial Extraction) / CO (Commercial, Office)	Office/Undeveloped
	West	RS (Residential Suburban)	PUD (Sunnyland Farms Planned Unit Development – Lapsed / Newly Proposed)	Undeveloped

The proposed manufacturing use is compatible with area land use and zoning and with other similar industrial uses nearby. Staff's review emphasized potential impacts to lands planned for residential use to the west (Proposed Sunnyland Farms PUD), ensuring design and operational details provide performance standards that minimize noise, emissions, and odor impacts. The Foundry, subject of the companion Conditional Use, is located roughly a one-third mile from the proposed PUD to the west.

2. All reasonable steps have been taken to minimize any adverse effect of the proposed building or use on the immediate vicinity through building design, site design, landscaping, and screening.

Project Orchid attempts to mitigate impacts to the residential use to the west by situating the building on the eastern portion of the property and placing a 5.97-acre lake between the manufacturing building and the proposed Sunnyland Farms development to the west.

The project will comply with required landscape buffering and screening standards, including a 15-foot-wide perimeter landscape buffer. The following mitigation measures are essential to address potential noise, odor, and emissions impacts:

a. All activities occur within enclosed buildings to reduce machinery & industrial processes noise.
b. Fully enclosed air systems.
c. Protocols to support the capture & filtering of emissions before their release using adsorption, absorption, and mechanical separation with the use of chemical scrubbers, sorbent-based filters, and baghouses to trap pollutants.

3. The proposed building or use will be constructed, arranged, and operated so as not to interfere with the development and use of neighboring property, in accordance with applicable district regulations.
The Site Plan complies with applicable standards related to driveway design, site access, parking, buffering, and screening. Vehicular circulation has been designed to provide safe and efficient ingress

and egress, while parking is adequate to serve the proposed use. Required buffering and screening elements are incorporated to minimize visual and operational impacts on adjacent properties. Additionally, the layout and design of the site ensure compatibility with surrounding uses and will not interfere with the orderly development or continued use of neighboring properties.

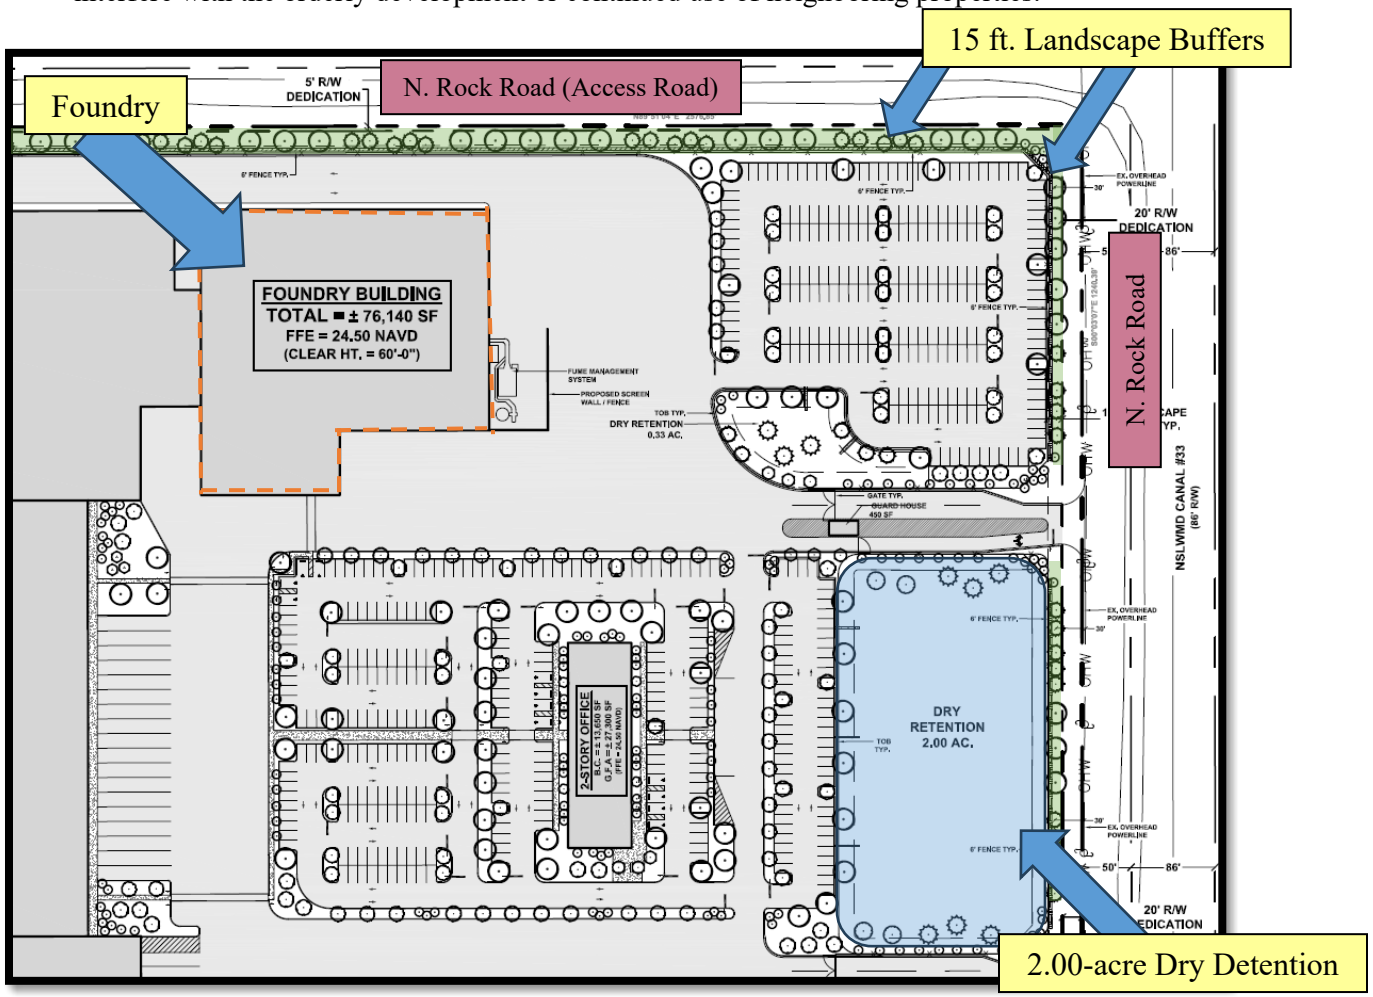

Figure 12: Snapshot from Proposed Landscape Plan for Project Orchid – Eastern Portion

The foundry is located on the northeastern side of the project near the two parking lots and 2-story office building. The circular internal drive aisle and 15 ft. landscape buffers separate the foundry from the N. Rock Road Access Road to the north.

Figures 13 and 14, below, illustrate the western boundaries of the property and the approved St. Lucie Commerce Center lake, dry detention pre-treatment area, and landscape buffer and the proposed lake, dry detention area, and landscape buffer. Project Orchid is encouraged to minimize offsite impacts through landscape buffering, screening, and building placement. Future development on the residentially zoned property to the west has also been encouraged to reduce impacts to its residents through thoughtful design, mitigation efforts, and adequate screening and buffering.

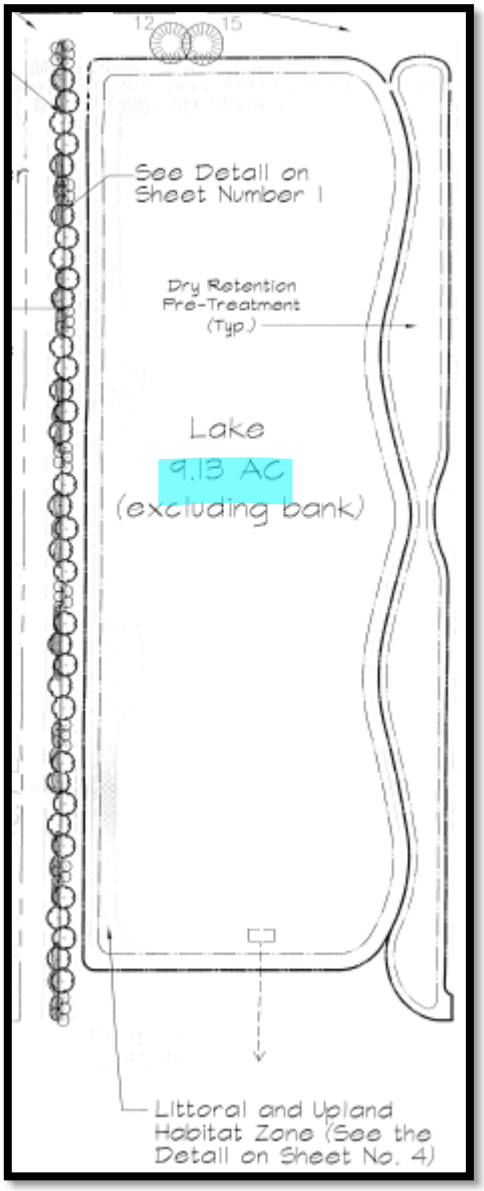

Figure 13: Snapshot from Previously Approved Landscape Plan for St. Lucie Commerce Center – Western Property Buffer

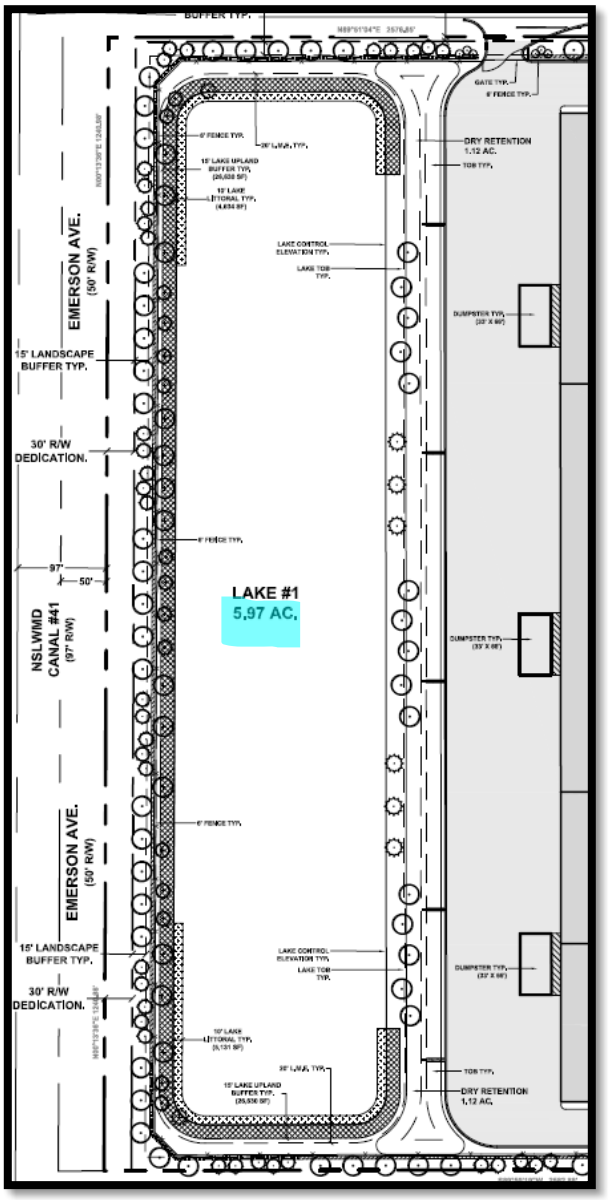

Figure 14: Snapshot from Proposed Landscape Plan for Project Orchid – Western Property Buffer

C. Adequacy of Public Facilities

The proposed Site Plan, with proposed off-site improvements which are addressed in detail within the associated Development Agreement Amendment, complies with the standards of Chapter V, Adequate Public Facilities.

Water and Wastewater
Central water and sewer are available, provided by Fort Pierce Utilities Authority (FPUA).

Transportation

The Applicant's Transportation Impact Report (TIR), using the Institute of Transportation Engineers Trip Generation Handbook, estimated the overall manufacturing facility, which includes the Foundry, would generate 6,166 weekday daily trips, 736 AM peak hour trips and 910 PM peak hour trips.

Table 5: Project Trip Generation Estimates

Source	Land Use	ITE Code	Intensity	Daily Trips	AM Peak Hour			PM Peak Hour		
					Total	In	Out	Total	In	Out
Proposed Scenario										
ITE	Manufacturing	140	1,444.000 ksf	6,166	736	552	184	910	264	646
Driveway Volumes				6,166	736	552	184	910	264	646
Net New External Trips				6,166	736	552	184	910	264	646
Proposed - Existing Net New Traffic				6,166	736	552	184	910	264	646
Radius of Development Influence:				3 miles						

Source	Land Use	Daily	AM Peak Hour	PM Peak Hour	Avg. Pass By
ITE	Manufacturing	4.27 trips/ksf	0.51 trips/ksf (75% in, 25% out)	0.63 trips/ksf (29% in, 71% out)	0.0%

The TIR determined the following roadway links are significantly impacted by the project:

Orange Avenue – From Rock Road to Kings Highway
Orange Avenue – From Kings Highway to I-95
Orange Avenue – From I-95 to Jenkins Road
Kings Highway – From Picos Road to Orange Avenue
Kings Highway – From Orange Avenue to Angle Road
Kings Highway – From Angle Road to St. Lucie Boulevard
Kings Highway – From St. Lucie Boulevard to Indrio Road
Graham Road – From Kings Highway to Jenkins Road
Rock Road – From Orange Avenue to Project Driveway

Orange Avenue from Rock Rd. to Kings Hwy. is projected to exceed roadway capacity with project traffic, therefore the Applicant would be responsible for completing improvements or providing proportionate share payments toward the widening of this link of Orange Ave. The project's contribution would be at least 39% of project costs for the eastbound direction and 27% of the cost for the westbound direction.

The intersection of Rock Road & Orange Avenue will operate acceptably with the following recommended improvements:

- Construction of an eastbound left-turn lane (245 feet)
- Extension of the existing westbound right-turn lane to 245 feet
- Construction of a southbound left-turn lane (650 feet)
- Restriping second southbound lane as a shared left/through/right turn lane
- Construction of an additional eastbound receiving lane on Orange Avenue
- Installation of a traffic signal

These improvements are expected to result in acceptable level of service (LOS) for this intersection ranging between B and D.

Access to the site is proposed via two driveways on Rock Road. The proposed driveway connections were subject to turn lane analysis using information in the FDOT Multimodal Access Management Guidebook as a reference. The analysis indicated that the southerly Driveway 1 is anticipated to require a northbound left-turn lane on Rock Rd.

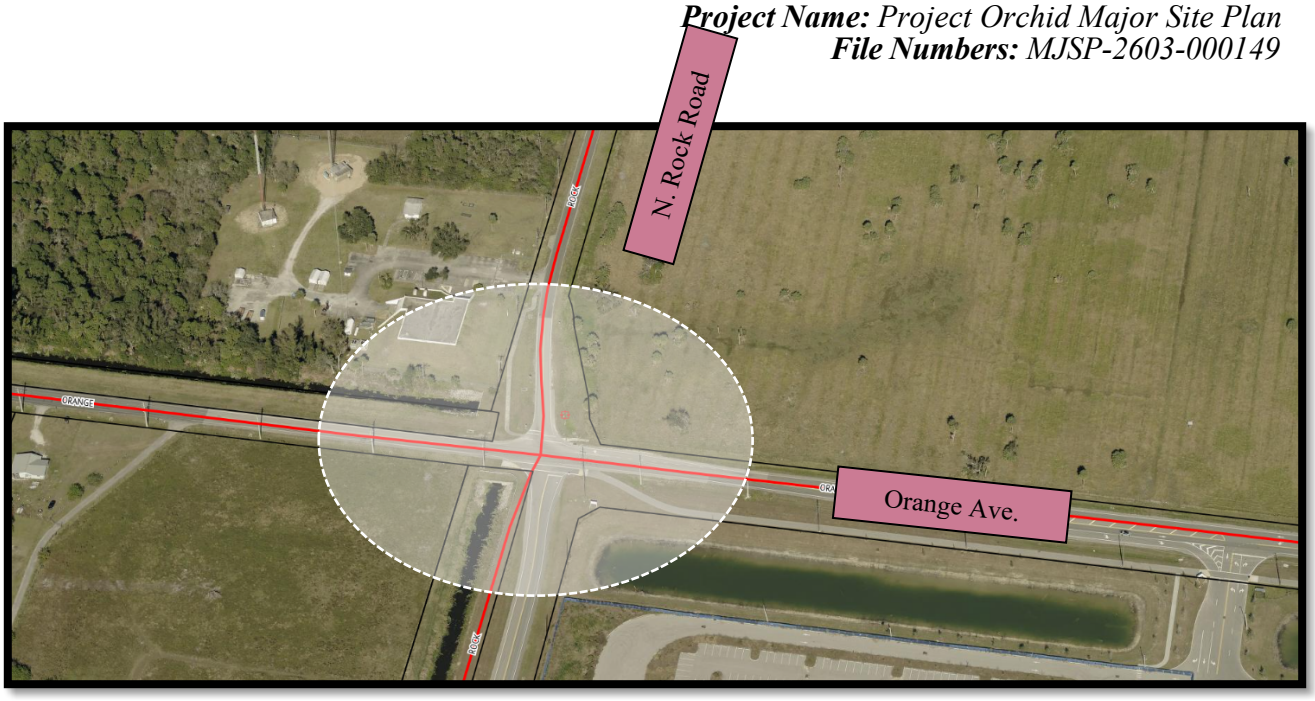

Figure 15: Intersection of Orange Ave. and N. Rock Road, Existing Conditions

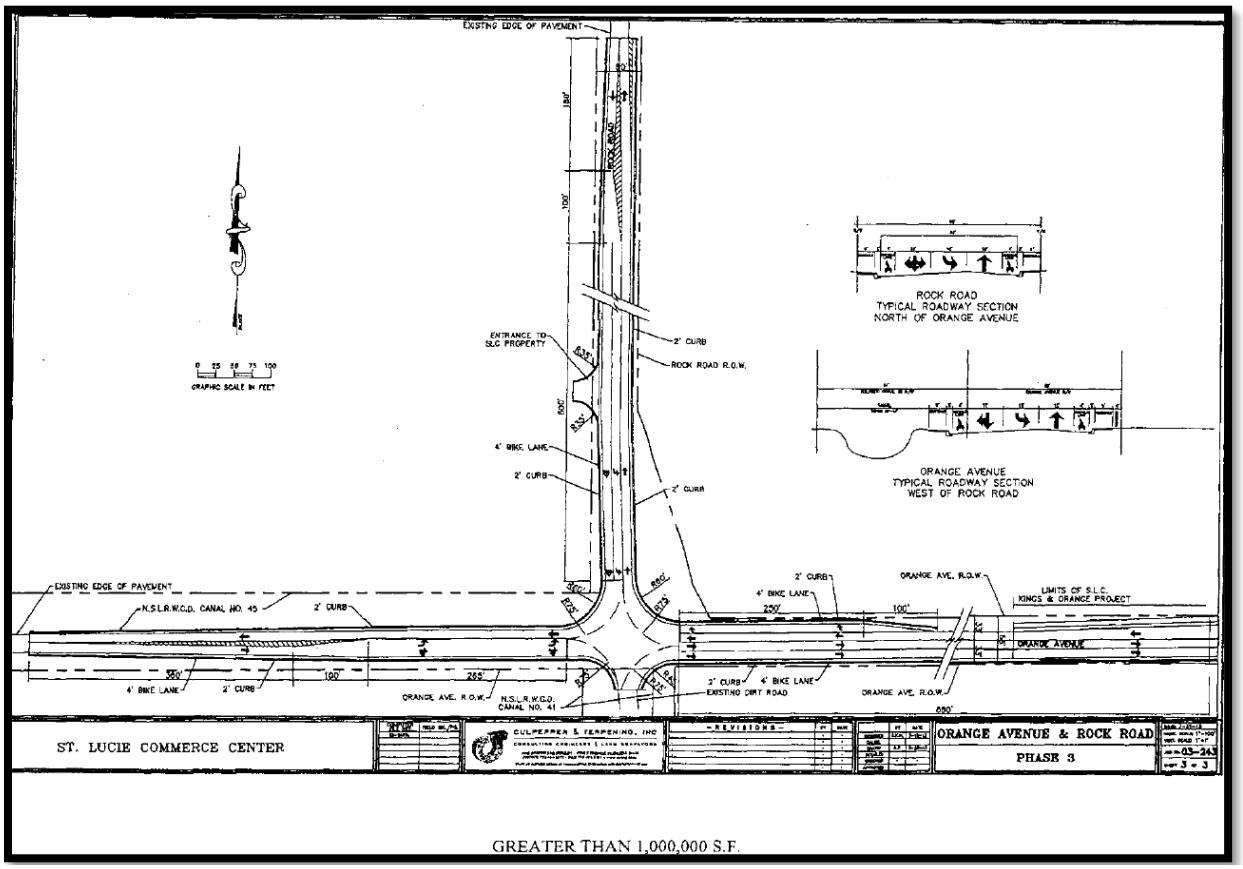

Figure 16: St. Lucie Commerce Center's Previously Committed Intersection Improvements for more than 1,000,000 sq. ft. of development

The Applicant and County Staff have collaborated to pinpoint essential updates to the proposed off-site improvements, including preliminary design for Orange Avenue between Kings Highway and Rock Road,

including the subject intersection. Revisions to the active Development Agreement are proposed to address these concurrency related matters.

Transit
The Area Regional Transit (ART) currently has no fixed service routes in this area; however, the expansion of industrial and commercial related employment along the Kings Highway and potential creation of approximately 1,000 jobs amplifies the value of further assessment of whether transit demand would support a new route or microtransit. The Site Plan provides a drop off and collection area for employee ridesharing, and similar.

Schools and Parks
The proposed industrial facility will not impact local parks or schools.

D. Adequacy of Fire Protection.

The nearest Fire Station, Fire Station #1 (Central), is currently located at 2400 Rhode Island Avenue, approximately 5.45 miles southeast of the site. Fire Station #19, located on Research Center Road, broke ground in January 2025 and is projected to be completed in mid-2026. The station will be next to the Sunshine Kitchen, approximately 2.6 miles from the site.

E. Environmental Impact

Background

The Environmental Resources Department (ERD) is in receipt of the April 3, 2026, date-stamped submittal, transmitted on April 3, 2026, from Planning and Development Services with comments due April 9, 2026. The applicant is requesting approval of a Future Land Use Map Amendment (FLUMA-2603-000040), a Rezone (RZ-2603-000050), a Conditional Use (CU-2603-000102), and a Major Site Plan (MJSP-2603-000149) for construction of the 1,390,000 SQ. FT. window manufacturing building. The vacant subject site consists of three (3) parcels (Parcel ID 230234100010008 [±16.46 ac], 230234200010001 [±19.60 ac], 230233100010007 [±37.21 ac]) totaling ±73.27 [sic] per the Property Appraiser website and ±73.48 per the applicant's data. The site is located at TBD Rock Road in Ft. Pierce and is north of and adjacent to Colbourn Road, south of I-95, east of the Florida Turnpike, and west of and adjacent to Rock Road.

Findings

An Environmental Impact Report (EIR) dated March 2026, prepared by EW Consultants, Inc Consultants, Inc., was reviewed for consistency with the Land Development Code (LDC) and Comprehensive Plan (CP). Land cover and vegetative community classifications were based on the Florida Land Use, Cover and Forms Classification System (FLUCFCS) developed by the Florida Department of Transportation. A review of historic aerial imagery indicates that the property was converted to agricultural use more than 65 years ago and was subsequently converted for the purpose of citrus production by 1985. The property does not contain any native upland habitat, and no wetlands were identified during field reconnaissance. This opinion of the absence of wetlands onsite has not yet been verified by South Florida Water Management District (SFWMD) as of the date of this report. A site review with SFWMD staff to confirm these conditions will be required as part of a Formal Wetland Determination or upon submittal of an Environmental Resource Permit (ERP) application. A review of permitting records on the SFWMD online portal did not reveal that any past or current permits exist for the subject property. As such, an application for an ERP will be required for any future proposed development.

Observations for wildlife presence and signs of utilization were made during site reconnaissance conducted beginning in January and continuing on a regular basis through the preparation of the EIR in March 2026. Several common avian species, reptiles, and mammals were observed within the property, and several others are likely to occur on a foraging or migratory basis.

The proposed development is not anticipated to result in any adverse environmental impacts as native uplands or wetlands exist onsite, nor were any listed species located onsite. Development of the project will require a vegetation removal permit issued by ERD for removal of native trees. Issuance of the vegetation removal permit will require demonstration of avoidance and minimization of impacts to native vegetation, a tree survey, and a mitigation plan for proposed impacts. A tree inventory is under way (by others) which will be provided to the project land planner for tree disposition plans. Vegetation designated to be preserved will need to meet the St. Lucie County vegetation protection standards.

Recommendation

The Environmental Resources Department has no objection to the approval of the Major Site Plan, with collective staff recommendations.

COMMUNITY PARTICIPATION MEETING

A community meeting was held at the Sunshine Kitchen on Wednesday, March 25, 2026, attended by approximately 10 citizens, a County Commissioner, and interested parties.

PLANNING & ZONING COMMISSION:
On April 16, 2026, the Planning & Zoning Commission held public hearings on the associated Future Land Use Map Amendment, Zoning Atlas Amendment and Conditional Use Permit proposals associated with this Major Site Plan and unanimously voted to forward a recommendation of approval to the Board of County Commissioners. The Commission briefly discussed the development scale and traffic impacts, particularly during construction of the facility – prior to improvements to Orange Avenue and Rock Road associated with the project. The Major Site Plan did not require specific review by the Commission.

STAFF RECOMMENDATION:
With recommended conditions, Staff finds the Major Site Plan petition to meet the Standards of Review as set forth in LDC Section 11.02.07 and is consistent with the goals, objectives, and policies of the St. Lucie County Comprehensive Plan including as the Plan as may be amended for +/-20.85 acres of the site.

Staff recommend the Board of County Commissioners evaluate and approve the proposed Major Site Plan with the following conditions of approval, many of which correlate with the companion Development Agreement Amendment:

1. The developer or successor in interest shall fulfill off-site transportation and support stormwater improvements, through construction or a proportionate share payment to the County, at the County's discretion, as follows:
    a. Prior to the first Certificate of Occupancy:
        i. Intersection of N. Rock Road & Orange Avenue:
            - Construct eastbound left-turn lane (245 ft).
            - Extend existing westbound right-turn lane to 245 ft.
            - Construct southbound left-turn lane (650 ft).
        ii. Orange Avenue (Rock Rd. to West of Kings Hwy):
            - Construct second westbound lane (~2,080 ft).
            - Construct second eastbound lane (~2,080 ft).

        iii. N. Rock Road Widening/Paving:
            - Widen road to minimum 24-foot width from Orange Ave. to the St. Lucie County Correctional Facility driveway (~1,950 ft).
            - Pave the remainder of N. Rock Road to the project's north driveway (~1,800 ft).

iv. Project Site Access:
- Construct northbound left-turn lane at the project's south driveway on N. Rock Road.

b. Completion Required Prior to Final Certificate of Occupancy (CO):
- N. Rock Road (East-West Segment): Construct a paved 24-foot minimum width roadway within the dedicated right-of-way.

c. Ongoing/Threshold-Based Obligations:
- Traffic Signal (Rock Rd. & Orange Ave.): Commencement of installation must begin within 12 months of written notice that the signal is warranted/authorized by FDOT or the County, with the developer coordinating with the County for signal timing optimization.

2. Within 12 months of Site Plan approval, the applicant, property owner, developer, successors, or assigns, shall convey to St. Lucie County, in a manner or form acceptable to the County Attorney, 5 feet of right-of-way along the frontage of the Access Road, also known as Sunnyland Drive, 30 feet of right-of-way along Emerson Avenue, and 20 feet of right-of-way along N Rock Road, as determined by the Public Works Department.
3. A Fee-in-Lieu of sidewalk is proposed by the applicant and requires approval from the Board of County Commissioners. If the agreement is not approved by the board, the sidewalk will be required to be constructed and included in the Site Development Permit plans.
4. The applicant shall implement site-specific control measures to minimize off-site impacts related to noise, vibration, and odor on adjacent properties.
5. Exterior lighting shall be downcast and hooded to minimize light trespass.
6. The western landscape area shall feature a berm and integrated opaque wall or fence, totaling 8ft., to further screen dumpster locations to minimize dumpster loading noise.
7. A Road Improvement Agreement and appropriate bond will be required for all permanent improvements within the Right-of-Way.
8. A Site Development Permit is required prior to performing site improvement activities. In accordance with the permit and Land Development Regulations, the applicant shall retain the EOR for site inspections and final certification.
9. Prior to recording of this Resolution (Development Order), the landscape plan shall be refined to comply with the Land Development Code (LDC), including but not limited to LDC 7.09.00.
10. Prior to recording of this Resolution (Development Order), the tree survey shall updated to comply with LDC 11.02.09.A.2.i.
11. Prior to issuance of a vegetation removal permit or exemption thereof, a tree mitigation plan shall be reviewed and approved by the Environmental Resources Department.
12. Prior to commencement of development, including but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, listed species surveys shall be updated as necessary per individual species-specific requirements. If any listed species impacts are found to be present as a result of these surveys, appropriate mitigative measures per state and federal agency requirements shall be provided prior to initiation of any clearing activities.
13. Prior to commencement of development, including, but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, a vegetation removal permit or exemption shall be issued by the Environmental Resources Department per LDC 6.00.03.
14. Prior to commencement of development, including, but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, monitoring reports from the certified arborist shall be provided following each root pruning event and following each relocation event to ensure best management practices (BMPs) are followed.
15. Prior to commencement of development, including, but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, monitoring reports from the certified arborist shall be provided prior to issuance of a certificate of completion/occupancy, following twelve (12) months after the last round of canopy trees has been relocated, and at the 18-month follow up inspection. Should any relocated trees die within these timeframes or beyond, the

applicant shall provide another method of tree mitigation, or a combination of methods as outlined in LDC 6.00.05.D, as tree mitigation shall be in perpetuity.

16. Prior to commencement of development, including but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, listed species surveys shall be updated as necessary per individual species-specific requirements. If any listed species impacts are found to be present as a result of these surveys, appropriate mitigative measures per state and federal agency requirements shall be provided prior to initiation of any clearing activities.
17. Prior to issuance of a certificate of occupancy, all Category I listed invasive plant species shall be eradicated from the parcel per LDC 7.09.05.

RESOLUTION No. 2026-84

A RESOLUTION OF THE BOARD OF COUNTY COMMISSIONERS OF ST. LUCIE COUNTY GRANTING A MAJOR SITE DEVELOP UP TO A 1,400,000 SQUARE FEET WINDOW MANUFACTURING FACILITY PLAN TO BE KNOWN AS PROJECT ORCHID LOCATED WEST OF NORTH ROCK ROAD, SOUTH OF THE NORTH ROCK ROAD EXTENSION (ACCESS ROAD) AND NORTH OF THE RELIEF CANAL, IN THE IL, INDUSTRIAL LIGHT AND IH, INDUSTRIAL HEAVY ZONING DISTRICTS, IN UNINCORPORATED ST. LUCIE COUNTY.

WHEREAS, the Board of County Commissioners of St. Lucie County, Florida, based on testimony and evidence, including, but not limited to the staff report, has made the following determinations:

1) MC320, LLC, and representative, Patti Tobin of HJA Design Studio, presented a petition for Major Site Plan for an approximate 1,400,000 sq. ft. glass window manufacturing complex on the subject property located west of N. Rock Rd., north of the Relief Canal. The Site Plan includes a +/-1,283,744 sq. ft. manufacturing building, +/-76,140 sq. ft. foundry building, 27,300 sq. ft. two-story office, and two (2) 450 sq. ft. guard houses, along with support improvements in the IL, (Industrial Light) and IH (Industrial, Heavy) Zoning Districts, for a property located west of N. Rock Rd., south of N. Rock Rd. Ext. (Access Rd.), and north of the NSLRWCD Relief Canal, in unincorporated St. Lucie County, Florida, as depicted on the attached map as Exhibit A and described in Part A.

2) On May 5, 2026, the Board of County Commissioners of St. Lucie County, Florida, held a public meeting and evaluated the proposal.

3) The St. Lucie County Development Review Committee has reviewed the Major Site Plan, as depicted on Exhibit C, for the project and found it to meet all technical requirements and to be consistent with the Future Land Use Map of the St. Lucie County Comprehensive Plan, subject to the conditions set forth in Part B of this Resolution.

4) The proposed project is consistent with the general purpose, goals, objectives, and standards of the St. Lucie County Land Development Code, the St. Lucie County Comprehensive Plan and the Code of Ordinances of St. Lucie County.

5) The proposed project will not have an undue adverse effect on adjacent property, the character of the neighborhood, traffic conditions, parking, utility facilities or other matters affecting the public health, safety and general welfare.

6) All reasonable steps have been taken to minimize any adverse effect of the proposed project on the immediate vicinity through building design, site design, landscaping and screening.

7) The proposed project will be constructed, arranged and operated so as not to interfere with the development and use of neighboring property, in accordance with applicable district regulations.

NOW, THEREFORE, BE IT RESOLVED by the Board of County Commissioners of St. Lucie County, Florida:

A. The property on which the Major Site Plan is being granted/denied is described as follows:

Legal Description:

Primary Site Plan Site:
PARCEL 1:
THE SOUTH ONE-HALF OF THE SOUTHWEST ONE-QUARTER OF SECTION 2, TOWNSHIP 35 SOUTH, RANGE 39 EAST, ST. LUCIE COUNTY, FLORIDA, LESS AND EXCEPT ALL RIGHTS-OF-WAY OF RECORD.

Support Temporary Construction Activity & Borrow Pit Site:
PARCEL 2:
THAT PART OF THE NE 1/4 OF THE SW 1/4 OF SECTION 2, TOWNSHIP 35 SOUTH, RANGE 39 EAST, LYING SOUTHWESTERLY OF 1-95 LESS AND EXCEPT THE EAST 93 FEET AND THE SOUTH 60 FEET FOR ROAD AND CANAL RIGHT-OF-WAY. ALL LYING AND BEING IN ST. LUCIE COUNTY, FLORIDA.

Parcel ID Number(s):
Primary Site Plan Site: 2302-342-0001-000-1 & 2302-341-0001-000-8 and 2302-331-0001-000-7
Support Temporary Construction Activity & Borrow Pit Site:
2302-312-0020-000-7

B. Pursuant to Section 11.02.04 of the St. Lucie County Land Development Code, the Major Site Plan to develop an approximate 1,400,000 sq. ft. glass window manufacturing complex on the subject property located west of N. Rock Rd., north of the Relief Canal. The Site Plan includes a +/-1,283,744 sq. ft. manufacturing building, +/-76,140 sq. ft. foundry building, 27,300 sq. ft. two-story office, and two (2) 450 sq. ft. guard houses, along with support improvements in the IL, (Industrial Light) and IH (Industrial, Heavy) Zoning Districts, as generally depicted in Exhibit C herein, as prepared by HJA Design Studio and Kimley Horn, dated April 9, 2026, is hereby approved/denied, subject to the following conditions and those imposed by the associated Development Agreement, as may be amended, governing the property:

1. The developer or successor in interest shall fulfill off-site transportation and support stormwater improvements, through construction or a proportionate share payment to the County, at the County's discretion, as follows:
    a. Prior to the first Certificate of Occupancy:
        i. Intersection of N. Rock Road & Orange Avenue:
            - Construct eastbound left-turn lane (245 ft).
            - Extend existing westbound right-turn lane to 245 ft.
            - Construct southbound left-turn lane (650 ft).
        ii. Orange Avenue (Rock Rd. to West of Kings Hwy):
            - Construct second westbound lane (~2,080 ft).
            - Construct second eastbound lane (~2,080 ft).

iii. N. Rock Road Widening/Paving:
- Widen road to minimum 24-foot width from Orange Ave. to the St. Lucie County Correctional Facility driveway (~1,950 ft).
- Pave the remainder of N. Rock Road to the project's north driveway (~1,800 ft).

iv. Project Site Access:
- Construct northbound left-turn lane at the project's south driveway on N. Rock Road.

b. Completion Required Prior to Final Certificate of Occupancy (CO):
- N. Rock Road (East-West Segment): Construct a paved 24-foot minimum width roadway within the dedicated right-of-way.

c. Ongoing/Threshold-Based Obligations:
- Traffic Signal (Rock Rd. & Orange Ave.): Commencement of installation must begin within 12 months of written notice that the signal is warranted/authorized by FDOT or the County, with the developer coordinating with the County for signal timing optimization.

2. Within 12 months of Site Plan approval, the applicant, property owner, developer, successors, or assigns, shall convey to St. Lucie County, in a manner or form acceptable to the County Attorney, 5 feet of right-of-way along the frontage of the Access Road, also known as Sunnyland Drive, 30 feet of right-of-way along Emerson Avenue, and 20 feet of right-of-way along N Rock Road, as determined by the Public Works Department.
3. A Fee-in-Lieu of sidewalk is proposed by the applicant and requires approval from the Board of County Commissioners. If the agreement is not approved by the board, the sidewalk will be required to be constructed and included in the Site Development Permit plans.
4. The applicant shall implement site-specific control measures to minimize off-site impacts related to noise, vibration, and odor on adjacent properties.
5. Exterior lighting shall be downcast and hooded to minimize light trespass.
6. The western landscape area shall feature a berm and integrated opaque wall or fence, totaling 8ft., to further screen dumpster locations to minimize dumpster loading noise.
7. A Road Improvement Agreement and appropriate bond will be required for all permanent improvements within the Right-of-Way.
8. A Site Development Permit is required prior to performing site improvement activities. In accordance with the permit and Land Development Regulations, the applicant shall retain the EOR for site inspections and final certification.
9. Prior to recording of this Resolution (Development Order), the landscape plan shall be refined to comply with the Land Development Code (LDC), including but not limited to LDC 7.09.00.
10. Prior to recording of this Resolution (Development Order), the tree survey shall updated to comply with LDC 11.02.09.A.2.i.
11. Prior to issuance of a vegetation removal permit or exemption thereof, a tree mitigation plan shall be reviewed and approved by the Environmental Resources Department.
12. Prior to commencement of development, including but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, listed species surveys shall be updated as necessary per individual species-specific requirements. If any listed species impacts are found to be present as a result of these surveys, appropriate mitigative measures per state and federal agency requirements shall be provided prior to initiation of any clearing activities.

13. Prior to commencement of development, including, but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, a vegetation removal permit or exemption shall be issued by the Environmental Resources Department per LDC 6.00.03.
14. Prior to commencement of development, including, but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, monitoring reports from the certified arborist shall be provided following each root pruning event and following each relocation event to ensure best management practices (BMPs) are followed.
15. Prior to commencement of development, including, but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, monitoring reports from the certified arborist shall be provided prior to issuance of a certificate of completion/occupancy, following twelve (12) months after the last round of canopy trees has been relocated, and at the 18-month follow up inspection. Should any relocated trees die within these timeframes or beyond, the applicant shall provide another method of tree mitigation, or a combination of methods as outlined in LDC 6.00.05.D, as tree mitigation shall be in perpetuity.
16. Prior to commencement of development, including but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, listed species surveys shall be updated as necessary per individual species-specific requirements. If any listed species impacts are found to be present as a result of these surveys, appropriate mitigative measures per state and federal agency requirements shall be provided prior to initiation of any clearing activities.
17. Prior to issuance of a certificate of occupancy, all Category I listed invasive plant species shall be eradicated from the parcel per LDC 7.09.05.

C. The approvals and authorizations granted by this Resolution shall expire on May 5, 2028 unless a building permit is secured or a site plan extension is granted in accordance with Section 11.02.06(B)(2), St. Lucie County Land Development Code, or as otherwise provided by law.

D. The developer is advised as part of this Major Site Plan approval that the property owner(s), developer, etc. including any successors in interest, shall obtain all applicable development permits and construction authorizations from the appropriate State and Federal and local regulatory agencies including, but not limited to, the United States Army Corps of Engineers, Environmental Protection Agency, the Florida Department of Environmental Protection, Florida Department of Transportation, South Florida Water Management District, and the St. Lucie County Environmental Resources, Public Works, and Building Departments prior to the commencement of any development activities on the property described in Part A. Issuance of this permit by the County does not in any way create any rights on the part of the developer to obtain a permit from a state or federal agency and does not create any liability on the part of the County for issuance of this permit if the developer fails to obtain requisite approvals or fulfill the obligations imposed by a state or federal agency or undertake actions that may result in a violation of state or federal law.

E. The conditions set forth in Part B are an integral non-severable part of the approval granted by this Resolution. If any condition set forth in Part B is determined to be invalid or unenforceable for any reason and the applicant or property owner declines to comply voluntarily with that condition, the Conditional Use approval granted by this Resolution shall become null and void.

F. A Concurrency Certificate, a copy which is attached to this Resolution as Exhibit "B" was signed by the Planning & Development Services Director on May 6, 2026.

G. This Resolution shall become effective upon the date of recording. Should the property owner, developer or authorized agent wish to appeal any condition described in Part B above, all such appeals must be filed in writing with the County Administrator within 30 days of the rendering of this Resolution, as described in Section 11.02.04(B), St. Lucie County Land Development Code. Should an appeal to this Resolution be filed, no permitting reviews or further administrative action shall take place on the processing of this development project until the appeal is resolved.

H. The approvals and authorizations granted by this Resolution are for the purpose of obtaining a Building and/or Site Development Permit from St. Lucie County.

I. A recorded copy of this Resolution shall be attached to the site plan drawings described in Part B, which plan shall be placed on file with the St. Lucie County Planning & Development Services Department Director.

J. A copy of this Resolution shall be mailed to the owner of record as identified on the application.

K. This Resolution shall be recorded in the Public Records.

L. **ADOPTION**

After the motion and second, the vote on this Resolution was as follows:

Jamie Fowler, Chair	XXX
Larry Leet, Vice-Chair	XXX
James Clasby, Commissioner	XXX
Erin Lowry, Commissioner	XXX
Cathy Townsend, Commissioner	XXX

PASSED AND DULY ADOPTED this 5th day of May, 2026.

Neighbor Community Meeting

Wednesday, March 25, 2026 | 6:00 – 7:00 PM

Sunshine Kitchen | 7550 Pruitt Research Road, Fort Pierce

Disclaimer: The images shown are preliminary and may change as the design progresses

What is Project Orchid?

- A window manufacturing company headquartered in Miami
- Designed to serve growing customer portfolio
- A modern, fully enclosed manufacturing operation using advanced technology

Disclaimer: The images shown are preliminary and may change as the design progresses

Project Location

- Located on N. Rock Road
- Approximately 73 acres
- Previously used for agricultural purposes

Disclaimer: The images shown are preliminary and may change as the design progresses

Facility Overview

- Approximately 1.4 million sq ft
- Multiple production areas within one building
- Two-story office component (27,300 sq ft)
- 504 parking spaces
- Ride share & bus drop off
- Two main access drives off Rock Rd
- One driveway off north access road
- Two interconnected lakes
- One dry retention area for stormwater
- Security perimeter fencing
- Secured access via guard booths

Disclaimer: The images shown are preliminary and may change as the design progresses

Building Design

- Modern office entrance
- Parking designed for daily activity
- Landscaped buffers & setbacks

- Approximately 60–80 feet
- Height varies based on specialized equipment needs

Disclaimer: The images shown are preliminary and may change as the design progresses

How the Facility Operates

Inside the building:

- Aluminum is melted and prepared
- Formed into components
- Combined with glass
- Assembled into finished windows

All processes take place indoors

Disclaimer: The images shown are preliminary and may change as the design progresses

Environmental Protections

- Fully enclosed air systems
- Emissions captured and filtered before release
- Closed-loop water system that recycles water

These systems are standard for modern facilities of this type.

Disclaimer: The images shown are preliminary and may change as the design progresses

Noise Expectations

- At the property line, sound levels are expected to be similar to a supermarket loading area.
- Noise is contained within the building and managed through design and buffering.

Disclaimer: The images shown are preliminary and may change as the design progresses

Water and Utilities

- Water is reused through a closed-loop system
- No continuous discharge from manufacturing processes
- Utilities have confirmed capacity to serve the site

The facility is designed to operate efficiently without placing strain on local systems.

Disclaimer: The images shown are preliminary and may change as the design progresses

What This Facility Does NOT Include

- No outdoor manufacturing processes
- No exposed production areas
- No noticeable odors
- No visible emissions

All operations are contained within the building.

Disclaimer: The images shown are preliminary and may change as the design progresses

Traffic Overview

Based on current studies:

- Approximately 6,166 trips per day
- 736 trips during morning peak
- 910 trips during evening peak

Traffic is distributed throughout the day rather than concentrated at a single time.

Disclaimer: The images shown are preliminary and may change as the design progresses

Planned Road Improvements

To support traffic flow, the project includes:

- New turn lanes at Rock Rd & Orange Ave
- Signal installation when warranted
- Additional travel lanes on Orange Ave
- Roadway widening on Rock Rd

These improvements are required as part of the development process.

Disclaimer: The images shown are preliminary and may change as the design progresses

Construction Impacts

- Construction will occur during normal working hours
- Dust and noise will be managed using best practices
- Site will be maintained safely and responsibly
- Goal is to minimize disruption during construction

Construction of the facility is expected to generate over $200 million in economic activity, supporting construction jobs and local contractors during the building phase.

Disclaimer: The images shown are preliminary and may change as the design progresses

Jobs and Economic Impact

- > 1,000 jobs over five years
- $28.50/hour - median starting wage
- $53 million – estimated annual payroll

This represents a significant long-term investment in the local community.

Disclaimer: The images shown are preliminary and may change as the design progresses

Why St. Lucie County?

This location was selected because of:

- Available industrially zoned land
- Access to workforce and training programs
- Strong infrastructure and utilities
- Proximity to major markets
- Supportive economic development environment

Disclaimer: The images shown are preliminary and may change as the design progresses

What Happens Next

- The project is currently in the development review process
- All steps include public input and oversight.

Disclaimer: The images shown are preliminary and may change as the design progresses

Project Timeline

Disclaimer: The images shown are preliminary and may change as the design progresses

Questions

We appreciate your time and input.

What questions or concerns can we address?

Disclaimer: The images shown are preliminary and may change as the design progresses

PROJECT ORCHID

THANK YOU!

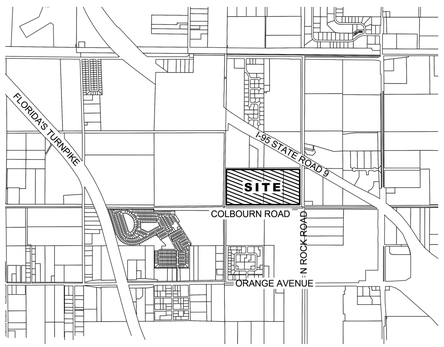
Location Map



Legal Description

THE SOUTH ONE-HALF OF THE SOUTHWEST ONE-QUARTER OF SECTION 2, TOWNSHIP 35 SOUTH, RANGE 39 EAST, ST. LUCIE COUNTY, FLORIDA, LESS AND EXCEPT ALL RIGHTS-OF-WAY OF RECORD.

CONTAINING 73.485 ACRES, MORE OR LESS.

Utilities

Water:	FPUA
Wastewater:	FPUA
Gas:	FPUA
Electric:	FPL

Drainage Statement

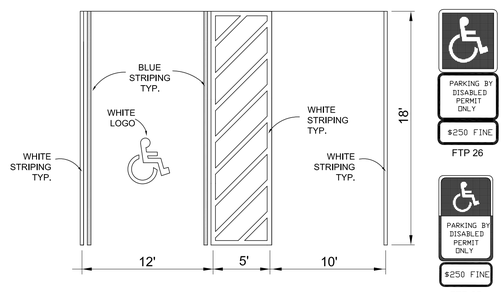
The proposed project will construct a stormwater management area that will consist of a series of interconnected dry retention and wet detention areas with associated underground piping and storm structures. The new system will maintain the general existing drainage patterns of the site. The new system will provide treatment and attenuation of stormwater runoff in accordance with St Lucie County and South Florida Water Management District prior to discharging to the North St Lucie Water Control District Canal 44 located on the southern boundary of the site. This will include a net improvement for the average annual loads of nitrogen and phosphorus. The post-development peak discharge rate shall be no greater than the pre-development conditions. No offsite flows are taken into account onsite at that time.

Flood Zone & FIRM Information

SUBJECT PROPERTY FALLS WITHIN ZONE "X", AREA OF MINIMAL FLOOD HAZARD ACCORDING TO THE NATIONAL FLOOD INSURANCE PROGRAM (NFIP) FLOOD INSURANCE RATE MAP (FIRM); COMMUNITY PANEL NO. 12111C0166J UNINCORPORATED ST. LUCIE COUNTY, COMMUNITY NO. 12285; DATED FEBRUARY 16, 2012.

Parking Space Detail

N.T.S.



NOTES:
1. TOP PORTION OF FTP 25 & 26 SHALL HAVE A REFLECTIVE BLUE BACKGROUND WITH WHITE REFLECTIVE SYMBOL AND BORDER.
2. BOTTOM PORTION SHALL HAVE A REFLECTIVE WHITE BACKGROUND WITH BLACK OPAQUE LEGEND AND BORDER
3. FTP 25 & 26 MAY BE FABRICATED ON ONE PANEL OR TWO.
4. FTP 25 IS FOR USE IN AREAS WHERE SPACE IS LIMITED

Landscape Data

Required Landscaping Adjacent to Road Right-of-Way

A strip of land at least fifteen (15) feet in depth shall be located abutting street or road right-of-way and shall be landscaped to include one (1) tree for each thirty (30) linear feet of abutting right-of-way. In addition, a hedge, wall or other durable landscaping barrier shall be placed along the interior perimeter of this required landscaped strip. Hedge shall not be less than (2) two feet in height at the time of planting.

East Property Buffer: 1,152 LF

Trees Required: (1,152 LF / 30)	= 39 Trees
Trees Provided:	= 39 Trees (34 Trees + 15 Palms @ 3:1)

North Property Buffer: 2,497 LF

Trees Required: (2,497 LF / 30)	= 83 Trees
Trees Provided:	= 83 Trees (80 Trees + 9 Palms @ 3:1)

West Property Buffer: 1,241 LF

Trees Required: (1,241 LF / 30)	= 41 Trees
Trees Provided:	= 41 Trees

South Property Buffer: 2,503 LF

Trees Required: (2,503 LF / 30)	= 84 Trees
Trees Provided:	= 84 Trees

Lake Upland Buffer Requirement

As a minimum, ten (10) square feet of such buffer shall be provided for each linear foot of wetland or deepwater habitat perimeter that lies adjacent to uplands. This upland edge habitat shall be located such that no less than fifty percent (50%) of the total shoreline is buffered by a minimum width of ten (10) feet of upland habitat.

Lake #1 Linear Footage: 2,663 LF

Area Required: (2,663 LF x 10)	26,630 sf
Area Provided:	26,630 sf
Trees Required: (26,630 sf / 900 sf)	= 30 Trees
Trees Provided:	= 30 Trees
Shrubs Required: (26,630 sf / 100 sf)	= 267 Shrubs
Shrubs Provided:	= 307 Shrubs
Groundcovers Required: (26,630 sf / 9 sf)	= 2,959 GC
Groundcovers Provided:	= 3,037 GC

Lake #2 Linear Footage: 776 LF

Area Required: (776 LF x 10)	7,760 sf
Area Provided:	7,760 sf
Trees Required: (7,760 sf / 900 sf)	= 9 Trees
Trees Provided:	= 9 Trees
Shrubs Required: (7,760 sf / 100 sf)	= 78 Shrubs
Shrubs Provided:	= 90 Shrubs
Groundcovers Required: (7,760 sf / 9 sf)	= 863 GC
Groundcovers Provided:	= 886 GC

Parking / Vehicular Use Area Interior Landscape Requirement

Vehicular use areas shall have at least one (1) square foot of interior landscaping for every eighteen (18) square feet or major fraction thereof of off-street parking and vehicular use area. Each separately landscaped area shall contain a minimum of one hundred eighty (180) square feet and shall include at least one (1) tree.

Total Vehicular Use Area: 903,490 sf

Area Required: (903,490 sf / 18 sf)	50,194 sf
Trees Required: (50,194 sf / 180 sf)	= 279 Trees
Trees Provided:	= 279 Trees (226 Trees + 159 Palms @ 3:1)

Total Required Trees:	565 Trees
Total Required Trees:	565 Trees
Required Species Mix:	5
Provided Species Mix:	9

Landscape Notes

1. Any plant materials used to satisfy the requirements of this plan shall conform to the standards of Florida No. 1 or better as given in the most recent edition of "Grades and Standards for Nursery Plants" by the Florida Dept. of Agriculture and Consumer Services, or standards equal thereto.

2. An automatic irrigation system shall be installed to ensure continued growth of all planting areas. Automatic irrigation systems shall be equipped with an automatic rain shut off device for each zone.

3. For existing or proposed utilities, no tree shall be planted where it could, at mature height, conflict with overhead power lines. Large trees [height at maturity of more than thirty (30) feet] shall be planted no closer than a horizontal distance of thirty (30) feet from the nearest overhead power line. Medium height tree [height at maturity between twenty (20) and thirty (30) feet] shall be offset at least twenty (20) feet and small trees [height at maturity of less than (20) feet] require no offset.

4. No tree, shrubs, hedges or vines shall be planted within five (5) feet of any existing or proposed utility pole, guy wire or-pad mounted transformer. Palms should be planted at a distance equal to or greater than the average front length plus two (2) feet from power lines.

5. All property lying between the right-of-way and off-street parking or other vehicular use area outside the required landscape strip shall be landscaped with at least grass or other groundcover .

6. Trees of species whose roots are known to cause damage to public roadways or other public works shall not be planted any closer than 12 ft, unless root system is completely contained with a barrier which shall have the min. dimensions of 5 ft square and 5 ft deep.

7. All plant material shall receive at least 3 inches of mulch and no cypress mulch is permitted.

8. No landscape materials other than sod grasses may be planted within a 5' radius maintenance area of any SLCUD facility such as water meters, backflow devices, fire hydrants, sanitary sewer cleanouts, manholes, air release valves, etc. Mulch beds are permitted.

9. No landscaping shall be planted in such a manner as to adversely affect utility installation, operation and maintenance.

10. All landscaping within St. Lucie County Utility Systems Department (SLCUSD) utility easements shall comply with SLCUSD technical specifications, policies, and codes.

11. Trees placed within ten (10') feet of underground utilities shall include a root barrier product to protect the utilities.

12. It shall be the responsibility of the property owner to maintain all landscaping along the outside edge of any wall or opaque fence consistent with the requirements of this Code.

13. Landscaping 3ft in all directions from the base of the proposed signage shall be provided in accordance with LDC 9.02.01.D.6.

14. Tree & Shrub locations are conceptual and may be adjusted based on final utility layout.

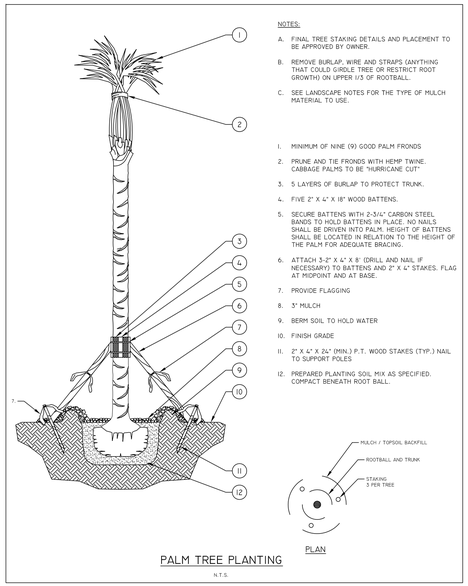
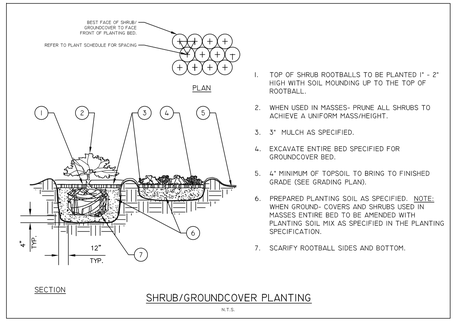
Landscape Details



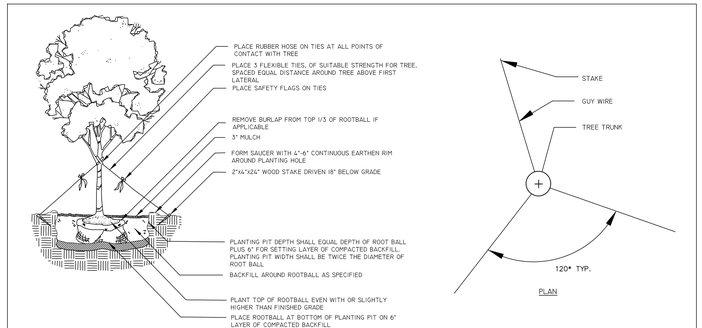
PALM TREE PLANTING

N.T.S.



SHRUB/GROUNDCOVER PLANTING

N.T.S.



TREE PLANTING DETAIL

N.T.S.

Landscape Notes

1. Any plant materials used to satisfy the requirements of this plan shall conform to the standards of Florida No. 1 or better as given in the most recent edition of "Grades and Standards for Nursery Plants" by the Florida Dept. of Agriculture and Consumer Services, or standards equal thereto.

2. An automatic irrigation system shall be installed to ensure continued growth of all planting areas. Automatic irrigation systems shall be equipped with an automatic rain shut off device for each zone.

3. For existing or proposed utilities, no tree shall be planted where it could, at mature height, conflict with overhead power lines. Large trees [height at maturity of more than thirty (30) feet] shall be planted no closer than a horizontal distance of thirty (30) feet from the nearest overhead power line. Medium height tree [height at maturity between twenty (20) and thirty (30) feet] shall be offset at least twenty (20) feet and small trees [height at maturity of less than (20) feet] require no offset.

4. No tree, shrubs, hedges or vines shall be planted within five (5) feet of any existing or proposed utility pole, guy wire or-pad mounted transformer. Palms should be planted at a distance equal to or greater than the average front length plus two (2) feet from power lines.

5. All property lying between the right-of-way and off-street parking or other vehicular use area outside the required landscape strip shall be landscaped with at least grass or other groundcover .

6. Trees of species whose roots are known to cause damage to public roadways or other public works shall not be planted any closer than 12 ft, unless root system is completely contained with a barrier which shall have the min. dimensions of 5 ft square and 5 ft deep.

7. All plant material shall receive at least 3 inches of mulch and no cypress mulch is permitted.

8. No landscape materials other than sod grasses may be planted within a 5' radius maintenance area of any SLCUD facility such as water meters, backflow devices, fire hydrants, sanitary sewer cleanouts, manholes, air release valves, etc. Mulch beds are permitted.

9. No landscaping shall be planted in such a manner as to adversely affect utility installation, operation and maintenance.

10. All landscaping within St. Lucie County Utility Systems Department (SLCUSD) utility easements shall comply with SLCUSD technical specifications, policies, and codes.

11. Trees placed within ten (10') feet of underground utilities shall include a root barrier product to protect the utilities.

12. It shall be the responsibility of the property owner to maintain all landscaping along the outside edge of any wall or opaque fence consistent with the requirements of this Code.

13. Landscaping 3ft in all directions from the base of the proposed signage shall be provided in accordance with LDC 9.02.01.D.6.

14. Tree & Shrub locations are conceptual and may be adjusted based on final utility layout.

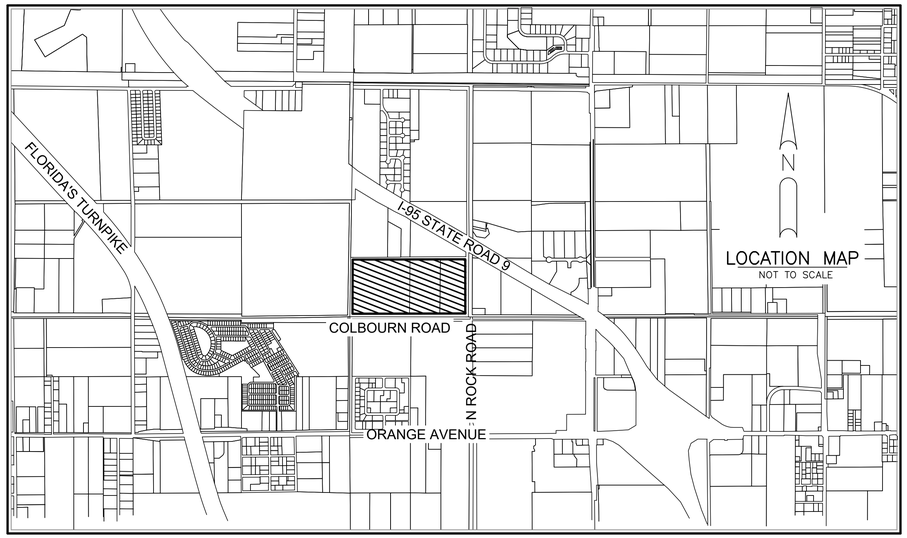
BOUNDARY TOPOGRAPHIC

LAND LYING IN SECTION THE SOUTH ONE-HALF OF THE
SOUTHWEST ONE-QUARTER OF SECTION 2, TOWNSHIP 35 SOUTH,
RANGE 39 EAST, ST. LUCIE COUNTY, FLORIDA



LOCATION MAP
NOT TO SCALE

DESCRIPTION:

THE SOUTH ONE-HALF OF THE SOUTHWEST ONE-QUARTER OF SECTION 2, TOWNSHIP 35 SOUTH, RANGE 39 EAST, ST. LUCIE COUNTY, FLORIDA, LESS AND EXCEPT ALL RIGHTS-OF-WAY OF RECORD.

CONTAINING 73.485 ACRES, MORE OR LESS.

SURVEY NOTES:

1. LAST DATE OF FIELD DATA ACQUISITION FOR THIS SURVEY IS JANUARY 13, 2026.
2. THIS SURVEY MAP AND REPORT OR THE COPIES THEREOF ARE NOT VALID WITHOUT THE SIGNATURE AND THE ORIGINAL SEAL OF A FLORIDA LICENSED SURVEYOR AND MAPPER.
3. ALL MEASUREMENTS ARE IN ACCORDANCE WITH THE UNITED STATES STANDARD FEET. FIELD LOCATIONS DEPICTED ON THIS SURVEY WERE OBTAINED USING REAL TIME KINEMATIC (RTK) GPS METHODS WITH AN EXPECTED ACCURACY OF +/- 0.05'. ALL PROPERTY CORNERS WERE DOUBLE OCCUPIED FOR REDUNDANT MEASUREMENTS.
4. ADDITIONS OR DELETIONS TO SURVEY MAPS OR REPORTS BY OTHER THAN THE SIGNING PARTY OR PARTIES IS PROHIBITED WITHOUT WRITTEN CONSENT OF THE SIGNING PARTY OR PARTIES.
5. THE DESCRIPTION OF THE LAND CONTAINED IN THIS SURVEY WAS PROVIDED BY THE CLIENT.
6. BEARINGS SHOWN HEREON ARE BASED ON GRID NORTH, AND ARE REFERENCED TO THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983, 2011 ADJUSTMENT. THE BEARING BASIS FOR THIS SURVEY IS BASED ON A MEASURED NORTH LINE OF CANA; NO. 44, SAID LINE BEARS S 89°50'19" W AND ALL OTHER BEARINGS ARE RELATIVE THERETO. ALL MEASUREMENTS ARE IN ACCORDANCE WITH THE UNITED STATES STANDARD FEET. FIELD LOCATIONS DEPICTED ON THIS SURVEY WERE OBTAINED USING REAL TIME KINEMATIC (RTK) GPS METHODS.
7. THE VERTICAL DATUM REFERENCES THE NORTH AMERICAN VERTICAL DATUM (NAVD) OF 1988 AND IS IN THE U.S. SURVEY FOOT UNIT OF MEASUREMENT.
8. ELEVATIONS SHOWN HEREON ARE REFERENCED TO THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88), AS ESTABLISHED BY THE NATIONAL GEODETIC SURVEY (NGS) CONTROL POINT DESIGNATION "I95 K 14", PDI AF7282 HAVING A PUBLISHED ELEVATION OF 16.46' (NAVD88) A FOUND FDOT SURVEY DISK SET IN A CONCRETE HEADWALL STAMPED BM I95 K 14.
9. SUBJECT PROPERTY FALLS WITHIN ZONE "X", AREA OF MINIMAL FLOOD HAZARD ACCORDING TO THE NATIONAL FLOOD INSURANCE PROGRAM (NFIP) FLOOD INSURANCE RATE MAP (FIRM); COMMUNITY PANEL NO. 12111C0160J UNINCORPORATED ST. LUCIE COUNTY, COMMUNITY NO. 12285; DATED FEBRUARY 16, 2012.
10. THERE ARE NOT GAPS, GORES OR HIATUSES, THE TRACTS ARE CONTIGUOUS ALONG THEIR BOUNDARIES.
11. ALL BEARING AND DISTANCES ARE MEASURED BETWEEN FOUND MONUMENTATION. THE BOUNDARY SURVEY IS A RETRACEMENT SURVEY TO FOLLOW IN THE FOOTSTEPS OF THE PREVIOUS SURVEYOR AND BASED ON THE SURVEYS OF CULPEPPER & TERPENING, INC. DATED 11/04/05 WITH A LAST REVISION DATE OF 4/30/13 HAVING A JOB NUMBER 03-243.

SURVEYOR'S CERTIFICATE:

I HEREBY CERTIFY THAT THE ATTACHED BOUNDARY SURVEY OF THE HEREON DESCRIBED PROPERTY IS TRUE AND CORRECT TO THE BEST OF MY KNOWLEDGE AND BELIEF AS SURVEYED UNDER MY DIRECTION ON JANUARY 13. 2026 I FURTHER CERTIFY THAT THIS BOUNDARY SURVEY MEETS THE STANDARDS OF PRACTICE SET FORTH IN CHAPTER 5J-17.050, 5J-17.051, 5J-17.052, FLORIDA ADMINISTRATIVE CODE, ADOPTED BY THE FLORIDA BOARD OF PROFESSIONAL SURVEYORS AND MAPPERS, PURSUANT TO FLORIDA STATUTES 472.027, AS AMMENDED AND CHAPTERS 177.041 AND 177.061, FLORIDA STATUTES. THE FIELDWORK WAS COMPLETED ON JANUARY 13, 2026.

FUTURE LAND USE ELEMENT
GOALS, OBJECTIVES AND POLICIES

Goal 1.1: Ensure the highest quality living environment possible, through a mixture of land uses reflecting the needs and desires of the local residents and how they want their community to develop. The goal shall be implemented by strictly enforced building, zoning and development codes based on objectives and policies that will enhance St. Lucie County's natural and man-made resources while minimizing any damage or threat of degradation to the health, safety and welfare of the county's citizens, native wildlife and environment, through incompatible land uses.

Objective 1.1.1: *Land Use*. Maintain the Future Land Use Map land with the following use designations to portray the future development patterns of St. Lucie County.

Policy 1.1.1.1 - The following land use designations/intensities, as indicated on the Future Land Use Maps are provided as the pattern for the future development of the area within unincorporated St. Lucie County.

Future Land Use Designation		Residential Density	Max Height[4] (For Buildings)	Max Lot Coverage (For Buildings)
AG-5	Agriculture-5	1 du/5 acres (0.2 du/1 acre)	-	-
AG-2.5	Agriculture-2.5	1 du/2.5 acres (0.4 du/1 acre)	-	-
RE	Residential Estate	1 du/a acre	-	-
RS	Residential Suburban	2 du/1 acre	-	-
RU	Residential Urban	5 du/1 acre	-	-
RM	Residential Medium	9 du/ 1 acre	-	-
RH	Residential High	15 du/ 1 acre	-	-
R/C	Residential/Conservation	1 du/5 acres (0.2 du/1 acre)	-	-
Cpub	Conservation-Public	0 du[1]	20 ft	5-10%
COM	Commercial	0 du[1,5]	60 ft[3]	40—50%
IND	Industrial	0 du[1]	80 ft	40—50%
P/F	Public Facilities	0 du[1]	80 ft	40—50%
T/U	Transportation/Utilities	0 du[1]	40 ft[6]	40—50%
MXD	Mixed Use Development	0.2-15 du/acre[2,5]	80 ft	40—50%
H	Historic	0 du[1]	40 ft	40—50%
SD	Special District	0.2-15 du/acre	80 ft	40—50%
TVC	Towns, Villages, & Countryside	Variable pursuant to special areas plan. See TVC Element Goals, Objectives, and Policies. 1-9 du/acre	-	-

Notes:	
1	Residential uses permitted under specific conditions only. Refer to Zoning/Land Development Code for special restrictions in individual zoning districts.
2	Maximum Densities subject to compliance with intensity with intensity plans for each mixed use area, as set forth in Policy 1.1.8.4
3	For motel or hotel uses, the building spacing formula as identified in the Land Development Code shall be used to establish maximum building height, unless otherwise stipulated in the Hutchinson Island Building Height Overlay Zone section of the Land Development Code, or unless otherwise restricted by Code or Ordinance of the County.
4	Unless otherwise stipulated in the Hutchinson Island Height Overlay Zone section in the Land Development Code
5	Motels/hotels shall be allowed up to 36 units/acre.
6	The height of the Treasure Coast Airport shall be regulated by the Airport Zone Height Limitations established in Section 4.00.03, of the Land Development Code, as reviewed and approved by the Federal Aviation Administration (FAA).

and restrictions as set forth in the Land Development Code.

Medium density residential land uses can act as a transition between the lower intensity RU areas and the more intense land use designations. Zoning applications within the RM land use area include single-family, multifamily, or PD zoning.

G. Residential High (RH)
Areas designated Residential High (RH) are intended to accommodate high density development, not to exceed 15 dwelling units per gross acre. In order to develop at this intensity, it must be possible to connect into a central water and wastewater service facility, and the subject property must be located in an area of the County which has available all urban services and facilities including fire protection, police, recreation, roadways, and schools.

Limited nonresidential uses may be appropriate, in accordance with applicable standards and restrictions as set forth in the Land Development Code.

H. Mixed Use Development (MXD)
The intent of the Mixed Use Development (MXD) designation is to identify those areas where innovative land use concepts are encouraged. Application of this district should be with prudence, and should be only to those areas where traditional land use classifications do not afford the desired flexibility and community input in land use planning necessary to address local concerns. Candidates for this district include all I-95 interchange areas, the Treasure Coast International Airport, Community Development Districts created pursuant to Chapter 190, Florida Statutes and areas of special or unique environmental consideration that may not be appropriate for traditional land use designations.

Uses within the areas classified as Mixed Use should be segregated as to intensity and indicated in the form of a concept master plan which is to be included as a part of the land use designation process. The following criteria, in addition to those as cited in Objective 1.1.7 (PUD, PNRD & PMUD), are to be used in the development of Mixed Use areas:

- Unless otherwise compliant with the identified intensity classification, any change in zoning shall be to the Planned Unit Development (PUD), Planned Non-Residential Development (PNRD) or Planned Mixed Use Development (PMUD), as described in the St. Lucie County Land Development Code. Those properties with compatible existing zoning designations are encouraged to develop under the PUD, PNRD or PMUD regulations.
- Residential development shall be regulated by the intensity district in which it is to take place. In no case should gross residential density exceed 15 du/ac.
- All uses shall be compatible with adjacent land uses.

I. Special District (SD)
The intent of the Special District (SD) designation is to identify those areas where specific uses or combinations of uses are anticipated. SD designated areas include previously approved Community Development Districts, areas for which a site specific development plan or concept has been granted, or areas which by their location have specific issues and concerns for their development.

Residential densities within an area designated as a Special District are limited to what the current land use designation authorizes. Any increase over the present designation may be considered only through the Plan Amendment process.

Policy 1.1.8.4 - The following use density and intensity standards shall be used for the purpose of this plan for the Mixed Use activity areas:

1. *High* Intensity development areas may include the following types of land uses:	
Residential	5 to 15 du/acres
Institutional	1.5 FAR *
Professional Service/Office	1.5 FAR *
General Commercial	1.0 FAR *
Public Service/Utility	0.5 FAR *
Industrial	0.75 FAR *
* FAR = Floor Area Ratio	
2. *Medium* Intensity development areas may include the following types of land uses:	
Residential	5 to 9 du/acres
Institutional	1.0 FAR *
Professional Service/Office	1.0 FAR *
General Commercial	0.75 FAR *
Public Service/Utility	0.25 FAR *
Industrial	0.5 FAR *
* FAR = Floor Area Ratio	
3. *Low* Intensity development areas may include the following types of uses:	
Residential	not to exceed 5 du/acres
Institutional	0.5 FAR *
Professional Service/Office	0.5 FAR *
General Commercial	0.5 FAR *
Public Service/Utility	0.25 FAR *
Industrial	0.5 FAR
* FAR = Floor Area Ratio	
4. Specific Use Areas: Areas with special or unique local character may be included within the Mixed Use Designation. These areas, because of conditions unique or peculiar to them alone, have been limited to specific activities and zoning options as set forth in the activity area plans described in Policy 1.1.8.3. Any zoning application not consistent with this policy must be accompanied by a corresponding Comprehensive Plan Amendment indicating the change in intensity classification.	
Application of the Specific Use Area designation is to be made to those areas recognized by the County as suitable for alternative land use as the full spectrum of community services become available. This designation would serve to prevent the unplanned or premature development of such areas until all services were provided for and are consistent with the Future Land Use development philosophy of St. Lucie County.	
The terminology used in the Specific Use designation identifies the type of permitted activity, maximum zoning density or maximum zoning intensity. Each Mixed Use Activity area will identify the type of Special Use areas in the legends of each area.	
Industrial and Professional Service/Office uses may receive an intensity bonus of up to 100% of the FAR, within specific use areas served by Strategic Intermodal System (SIS) facilities operating at or above the adopted level of service (LOS) and with available water service and wastewater service.

High Intensity
SUB AREA POLICIES
Future development shall be limited te the foliowing land uses and ratios: IND (Industrial) 60%, COM (Commercial) 10%, and RES (Residential) 30%. The height of all bulidings and structures shalt be no more than 60 feet.
The Activity Area Sub Area Policies shall apply, however the height of buildings and structures within this Sub-District may be proposed up to 80 ft.

3.01.03. - Zoning Districts.

U. *IH INDUSTRIAL, HEAVY.*

1. *Purpose.* The purpose of this district is to provide an environment suitable for heavy manufacturing and other activities that may impose undesirable noise, vibration, odor, dust, or other offensive effects on the surrounding area together with such other non-residential uses as may be necessary to and compatible with heavy industrial surroundings. The number in "( )" following each identified use corresponds to the SIC Code reference described in Section 3.01.02(B). The number 999 applies to a use not defined under the SIC Code but may be further defined in Section 2.00.00 of this Code.

2. *Permitted Uses.* Any use permitted in the Industrial Light (IL) zoning district:

   a. Agricultural services. (07)

   b. Construction services:

      (1) Building construction - general contractor. (15)

      (2) Other construction - general contractors. (16)

      (3) Construction - special trade contractors. (17)

   c. Docks and boathouses (private). (999)

   d. Engineering services. (871)

   e. Manufacturing:

      (1) Food and kindred products. (20)

      (2) Tobacco products. (21)

      (3) Textile mill products. (22)

      (4) Apparel and other finished products. (23)

      (5) Lumber and wood products, except furniture. (24)

      (6) Furniture and fixtures. (25)

      (7) Printing and publishing and allied industries. (27)

      (8) Chemicals and allied products:

      (a) Drugs. (283)

      (b) Soap, detergents and cleaning preparations; perfumes, cosmetics and other toilet preparations. (284)

      (c) Agricultural chemicals. (287)

      (9) Rubber and misc. plastic products. (30)

      (10) Leather and leather products. (31)

      (11) Glass:

      (a) Flat glass. (321)

      (b) Glass and glassware - pressed or blown. (322)

      (c) Glass products - made of purchased glass. (323)

      (12) Fabricated metal products (except ammunition and ordnance). (34)

      (13) Industrial/commercial machinery and computer equipment. (35)

(14) Electronic and other electrical equipment and components, except computer equipment. (36)

(15) Transportation equipment. (37)

(16) Measuring, analyzing and controlling instruments. (38)

(17) Misc. manufacturing industries:

(a) Jewelry, silverware, and platedware. (391)
(b) Musical instruments and parts. (393)
(c) Dolls, toys, games and sporting goods. (394)
(d) Pens, pencils and other office and artists' materials. (395)
(e) Costume jewelry, costume novelties, and notions. (396)
(f) Brooms and brushes. (3991)
(g) Signs and advertising displays. (3993)
(h) Morticians goods. (3995)
(i) Manufacturing industries, NIC. (3999)

(18) Paper and allied products:

(a) Paperboard containers and boxes. (265)
(b) Converted paper and paperboard products. (267)

f. Local and suburban transit. (41)
g. Water transportation. (44)
h. Transportation services. (47)
i. Communications. (48)
j. Motor freight transportation and warehousing. (42)
k. Motion pictures. (78)
l. Membership organizations. (86)
m. Personal and business services. (72)
n. Research, development, and testing services. (873)
o. Repair services:
    (1) Automotive and automotive parking. (75)
    (2) Electrical. (762)
    (3) Watch, clock and jewelry repair. (763)
    (4) Reupholstery and furniture repair. (764)
    (5) Misc. repairs and services. (769)
p. Retail trade:
    (1) Lumber and other building materials. (521)
    (2) Paint, glass and wallpaper. (523)
    (3) Hardware. (525)
    (4) Nurseries, lawn and garden supplies. (526)

(5) Mobile home dealers. (527)

(6) Automotive/boat/RV/motorcycle dealers. (55)

(7) Gasoline service. (55)

(8) Furniture and furnishings. (57)

q. Telecommunication towers - subject to the standards of Section 7.10.23. (999)

r. Wholesale trade - durable goods:

(1) Motor vehicle and automotive equipment. (501)

(2) Furniture and home furnishings. (502)

(3) Lumber and other building materials. (503)

(4) Professional and commercial equipment/supplies. (504)

(5) Metals and minerals, except petroleum. (505)

(6) Electrical goods. (506)

(7) Hardware, plumbing and heating equipment, and supplies. (507)

(8) Machinery, equipment, and supplies. (508)

(9) Misc. durable goods:

(a) Sporting and recreational goods. (5091)

(b) Toys and hobby goods. (5092)

(c) Jewelry, watches, precious stones and metals. (5094)

(d) Durable goods NEC. (5099)

s. Wholesale trade - nondurable goods:

(1) Paper and paper products. (511)

(2) Drugs. (512)

(3) Dry goods and apparel. (513)

(4) Groceries and related products. (514)

(5) Farm products - raw materials. (515)

(6) Chemicals, and allied products. (516)

(7) Beer, wine, and distilled alcoholic beverages. (518)

(8) Misc. nondurable goods:

(a) Farm supplies. (5191)

(b) Books, periodicals, and newspapers. (5192)

(c) Flowers, nursery stock and florists' supplies. (5193)

(d) Tobacco/tobacco products. (5194)

(e) Paints, varnishes and supplies. (5198)

(f) Nondurable goods, NEC. (5199)

t. Mobile food vendors. (999)

3. *Lot Size Requirements.* Lot size requirements shall be in accordance with Section 7.04.00.

4. *Dimensional Regulations.* Dimensional requirements shall be in accordance with Section 7.04.00.

5. *Offstreet Parking and Loading Requirements.* Offstreet parking and loading requirements are subject to Section 7.06.00.

6. *Landscaping Requirements.* Landscaping requirements are subject to Section 7.09.00.

7. *Conditional Uses:*

   a. Airport, landing and takeoff fields - general aviation. (4581)

   b. Manufacturing:

      (1) Paper and allied products. (26)

      (2) Chemicals and allied products. (28)

      (3) Petroleum refining and related products. (29)

      (4) Stone, clay, glass and concrete products. (32)

      (5) Primary metal industries. (33)

      (6) Ammunition and ordinance. (348)

   c. Natural or manufactured gas storage and distribution points. (492)

   d. Scrap, waste and land clearing and yard trash recycling operations - subject to the provisions of Section 7.10.12.

   e. Warehousing and storage services - stockyards. (999)

   f. Wholesale trade - nondurable goods:

      (1) Petroleum and petroleum products. (999)

8. *Accessory Uses.* Accessory uses are subject to the requirements of Section 8.00.00, and include the following:

   a. Co-generation facilities. (999)

   b. Fueling facilities. (999)

   c. Industrial wastewater disposal. (999)

   d. One (1) detached single-family dwelling or mobile home, for on-site security purposes per property. (999)

   e. Retail:

      (1) Bottled gas. (999)

      (2) Fuel oil. (999)

      (3) Gasoline service stations. (999)

      (4) Retail trade accessory to the primary manufacturing or wholesaling use. (999)

   f. Solar energy systems, subject to the requirements of Section 7.10.28.

3.01.03. - Zoning Districts.

T. *IL INDUSTRIAL, LIGHT.*

1. *Purpose.* The purpose of this district is to provide and protect an environment suitable for light manufacturing, wholesale, and warehousing activities that do not impose undesirable noise, vibration, odor, dust, or other offensive effects on the surrounding are, together with such other uses as may be necessary to and compatible with light industrial surroundings. The number in "( )" following each identified use corresponds to the SIC Code reference described in Section 3.01.02(B). The number 999 applies to a use not defined under the SIC Code but may be further defined in Section 2.00.00 of this Code.

2. *Permitted Uses:*

   a. Business services. (73)

   b. Communications - including telecommunication towers - subject to the standards of Section 7.10.23. (48)

   c. Construction services:

      (1) Building construction - general contractors. (15)

      (2) Other construction - general contractors. (16)

      (3) Construction - special trade contractors. (17)

   d. Engineering, architectural and surveying services. (871)

   e. Commercial fishing. (091)

   f. Laundry, cleaning and garment services. (721)

   g. Local and suburban transit. (41)

   h. Manufacturing:

      (1) Food and kindred products. (20)

      (2) Tobacco products. (21)

      (3) Textile mill products. (22)

      (4) Apparel and other finished products. (23)

      (5) Furniture and fixtures. (25)

      (6) Printing, publishing and allied industries. (27)

      (7) Drugs. (283)

      (8) Leather and leather products. (31)

      (9) Glass:

      (a) Flat glass. (321)

      (b) Glass and glassware - pressed or blown. (322)

      (c) Glass products - made of purchased glass. (323)

      (10) Fabricated metal prod. - except machinery and transport. equip.:

      (a) Metal cans and shipping containers. (341)

      (b) Cutlery, handtools and general hardware. (342)

      (c) Heating equipment, except electric and warm air, and plumbing fixtures. (343)

      (d) Fabricated structural metal products. (344)

(e) Coating, engraving and allied services. (347)

(f) Miscellaneous fabricated metal products:

(1) Wire products. (3495)

(2) Misc. fabricated wire products. (3496)

(3) Metal foil and leaf. (3497)

(4) Fabricated metal products - NEC. (3499)

(11) Industrial/commercial machinery and computer equipment:

(a) Metalworking machinery and equipment. (354)

(b) Special industry machinery, except metalworking machinery. (355)

(c) General industrial machinery and equipment. (356)

(d) Computers and office equipment. (357)

(12) Electronic and other electrical equipment and components, except computer equipment:

(a) Household appliances. (363)

(b) Electric lighting and wiring equipment. (364)

(c) Household audio and video equipment. (365)

(d) Communications equipment. (366)

(e) Electronic components and accessories. (367)

(f) Misc. electrical machinery equipment and supplies. (369)

(13) Measuring, analyzing and controlling instruments. (38)

(14) Photographic, medical and optical goods. (38)

(15) Watches and clocks. (38)

(16) Misc. manufacturing industries:

(a) Jewelry, silverware, and platedware. (391)

(b) Musical instruments and parts. (393)

(c) Dolls, toys, games and sporting goods. (394)

(d) Pens, pencils, and other office and artists' materials. (395)

(e) Costume jewelry, costume novelties, and notions. (396)

(f) Brooms and brushes. (3991)

(g) Signs and advertising displays. (3993)

(h) Morticians goods. (3995)

(i) Manufacturing industries, NEC. (3999)

(17) Plastic products - fabrication, molding, cutting, extrusion, and injection processing. (308)

i. Marinas. (4493)

j. Millwork and structural wood members. (243)

k. Motion pictures. (78)

l. Motor freight transportation and warehousing. (42)

m. Repair services:
    (1) Automotive and automotive parking. (75)
    (2) Electrical. (762)
    (3) Watch, clock and jewelry repair. (763)
    (4) Reupholstery and furniture repair. (764)
    (5) Misc. repairs and services. (769)
n. Retail trade:
    (1) Lumber and other building materials. (521)
    (2) Paint, glass and wallpaper. (523)
    (3) Hardware. (525)
    (4) Nurseries, lawn and garden supplies. (526)
    (5) Mobile home dealers. (527)
    (6) Automotive/boat/RV/motorcycle dealers. (55)
    (7) Gasoline service. (55)
    (8) Furniture and furnishings. (57)
o. Research, development, and testing services. (873)
p. Ship, boat building and repairing - less than forty-five (45) feet. (373)
q. Sorting, grading and packaging services - citrus/vegetables. (0723)
r. Vocational schools. (824)
s. Wholesale trade - durable goods:
    (1) Motor vehicle and automotive equipment. (501)
    (2) Furniture and home furnishings.(502)
    (3) Lumber and other building materials. (503)
    (4) Professional and commercial equipment/supplies. (504)
    (5) Metals and minerals except petroleum. (505)
    (6) Electrical goods. (506)
    (7) Hardware, plumbing and heating equipment, and supplies. (507)
    (8) Machinery, equipment, and supplies. (508)
    (9) Misc. durable goods:
        (a) Sporting and recreational goods. (5091)
        (b) Toys and hobby goods. (5092)
        (c) Jewelry, watches, precious stones and metals. (5094)
        (d) Durable goods NEC. (5099)
t. Wholesale trade - nondurable goods:
    (1) Paper and paper products. (511)
    (2) Drugs. (512)
    (3) Dry goods and apparel. (513)

(4) Groceries and related products. (514)

(5) Farm products - raw materials. (515)

(6) Chemicals, and allied products. (516)

(7) Beer, wine, and distilled alcoholic beverages. (518)

(8) Misc. nondurable goods:

(a) Farm supplies. (5191)

(b) Books, periodicals and newspapers. (5192)

(c) Flowers, nursery stock and florists' supplies. (5193)

(d) Tobacco/tobacco products. (5194)

(e) Paints, varnishes and supplies. (5198)

(f) Nondurable goods, NEC. (5199)

u. Mobile food vendors. (999)

v. Single-family detached dwelling units provided that the single-family dwelling unit is located on an existing lot or parcel or record, as further defined in this Code, that was existing on or before August 1, 1990. (999)

w. Kennels. Allowed as a permitted use only when the property is surrounded by industrial uses or zoning and is five hundred (500) feet or more from residential uses or zoning. All distance requirements shall be measured from the nearest point of the existing home or area of single-family zoning to the nearest point of the proposed kennel.

x. Landscape and horticultural services. (078)

y. Personal services. (72)

3. *Lot Size Requirements.* Lot size requirements shall be in accordance with Section 7.04.00.

4. *Dimensional Regulations.* Dimensional requirements shall be in accordance with Section 7.04.00.

5. *Offstreet Parking and Loading Requirements.* Offstreet parking and loading requirements are subject to Section 7.06.00.

6. *Landscaping Requirements.* Landscaping requirements are subject to Section 7.09.00.

7. *Conditional Uses:*

a. Airports, landing and takeoff fields - general aviation. (4581)

b. Manufacturing:

(1) Cut stone and stone products. (328)

(2) Motorcycles, bicycles, and parts. (375)

(3) Wood containers, wood buildings and mobile homes. (244/245)

c. Ship, boat building and repairing (excluding ship or boat salvaging) - forty-five (45) to one hundred fifty (150) feet. (373)

d. Wholesale:

(1) Petroleum bulk stations and terminals.

e. Scrap and waste materials - subject to the provisions of Section 7.10.12.A.

f. Kennels. (0752) Other than those permitted under Section 3.01.03 T.2.w. of the Land Development Code.

8. *Accessory Uses.* Accessory uses are subject to the requirements of Section 8.00.00 and include the following:

   a. Co-generation facilities. (999)

   b. Fueling facilities. (999)

   c. Industrial wastewater disposal. (999)

   d. One detached single-family dwelling or mobile home for on-site security purposes per property. (999)

   e. Retail trade accessory to the primary manufacturing or wholesaling use. (999)

   f. Solar energy systems, subject to the requirements of Section 7.10.28.

INTRODUCTION

Kimley-Horn and Associates, Inc. has been retained to conduct a traffic impact analysis for the Project Orchid site. The site is located on the west side of Rock Road, north of Orange Avenue, in St. Lucie County, Florida. The proposed project would develop the vacant site into a 1,444,000 square-foot manufacturing facility, with a mix of foundry, warehouse, and office uses to support the production of goods. **Figure 1** illustrates the site location and project trip assignment, which is reflective of a Treasure Coast Regional Planning Model (TCRPM) run to determine the site's distribution. The project site plan is included in Appendix A.

This document presents the methodology used and the findings of the traffic impact analysis. The analysis was conducted in accordance with the requirements published by the St. Lucie County TPO in the document, *Standardized Traffic Impact Studies (TIS) Methodology and Procedures.* A buildout year of 2031 was analyzed for the proposed development.

PROJECT TRAFFIC

Project traffic used in this analysis is defined as the vehicle trips expected to be generated by the project, and the distribution and assignment of that traffic over the study roadway network.

Existing and Proposed Land Uses

The site is currently vacant and is proposed to be developed with 1,444,000 square feet of manufacturing use.

Trip Generation

The trip generation potential for the proposed development program was calculated using trip generation rates and equations published by the Institute of Transportation Engineers' (ITE) *Trip Generation Report, 12th Edition*. As indicated in Table 1, the proposed development is projected to generate 6,166 net new external daily trips, 736 net new external AM peak hour trips (+552 inbound, +184 outbound), and an additional 910 net new external PM peak hour trips (+264 inbound, +646 outbound).

Table 1: Trip Generation Calculations

Source	Land Use	ITE Code	Intensity	Daily Trips	AM Peak Hour			PM Peak Hour		
					Total	In	Out	Total	In	Out
Proposed Scenario										
ITE	Manufacturing	140	1,444.000 ksf	6,166	736	552	184	910	264	646
Driveway Volumes				**6,166**	**736**	**552**	**184**	**910**	**264**	**646**
Net New External Trips				**6,166**	**736**	**552**	**184**	**910**	**264**	**646**
Proposed - Existing Net New Traffic				**6,166**	**736**	**552**	**184**	**910**	**264**	**646**
Radius of Development Influence:				**3 miles**						

Source	Land Use	Daily	AM Peak Hour	PM Peak Hour	Avg. Pass By
ITE	Manufacturing	4.27 trips/ksf	0.51 trips/ksf (75% in, 25% out)	0.63 trips/ksf (29% in, 71% out)	0.0%

Traffic Distribution and Assignment

Based on the St. Lucie County Standardized Traffic Impact Studies (TIS) Methodology and Procedures, the radius of development influence is 3 miles. Traffic distribution is the pairing of trip ends from the subject site with other land uses in the area. A projected traffic distribution was developed using Treasure Coast Regional Planning Model, Version 5 (TCRPM5) modeled distributions.

Figure 1 illustrates the proposed roadway link assignment. Using these percentages, project traffic was then assigned to the surrounding roadway network projected to be in place by 2031.

SIGNIFICANCE CALCULATIONS AND LINK ANALYSIS

The study roadway links were defined as the roadways upon which the project traffic has an impact of 5% or higher of the level of service capacity of the roadway links which are not directly accessed by the project and 1% or higher of the level of service capacity of the directly accessed roadway links. Significance was determined on a peak hour, peak direction (PHPD) basis using the project's PM peak hour outbound trips because this represents the highest trip generation on a PHPD basis. Existing traffic volumes were obtained from the *St. Lucie County Traffic Counts and Level of Service Report* for 2025 and FDOT count stations. For links on which capacity was not published in the *St. Lucie County Traffic Counts and Level of Service Report*, facility capacity was obtained from FDOT 2023 Quality Level of Service Handbook. **Table 2** summarizes the project percent impact as a percentage of the service volume capacity for the PM peak hour. As shown in **Table 2**, the following roadway links were determined to be significantly impacted by project traffic:

- Orange Avenue – From Rock Road to Kings Highway
- Orange Avenue – From Kings Highway to I-95
- Orange Avenue – From I-95 to Jenkins Road
- Kings Highway – From Picos Road to Orange Avenue
- Kings Highway – From Orange Avenue to Angle Road
- Kings Highway – From Angle Road to St. Lucie Boulevard
- Kings Highway – From St. Lucie Boulevard to Indrio Road
- Graham Road – From Kings Highway to Jenkins Road
- Rock Road – From Orange Avenue to Project Driveway

Therefore, further capacity analysis is required on these roadway links.

Capacity Analysis

The future traffic volumes on each significantly impacted roadway identified in **Table 2** were evaluated based on capacities established in Table 2. Existing traffic volumes were obtained from the *St. Lucie County LOS Report* for 2025 and FDOT count stations. In order to grow existing volumes for future background conditions, the greater of two volumes was added:

- A two and one half percent (2.5%) growth rate compounded annually.
- A one percent nominal growth rate compounded annually, in addition to traffic from committed projects in the surrounding area.

Table 3 summarizes the capacity analysis on these significantly impacted links on a peak hour, peak directional basis. Because the project's PM peak hour outbound trips represent the peak hour, peak direction of the proposed development, these trips were utilized in the roadway link analysis.

*Count data at the intersection of Rock Road & Orange Avenue used.

As shown in **Table 3**, Orange Avenue from Rock Road to Kings Highway is projected to be over capacity with the addition of project traffic. This facility will require the following improvements to meet the adopted LOS D standards:

- Widening of Orange Avenue from Rock Road to Kings Highway from 2L to 4L.

Therefore, the proposed development is responsible for the proportionate share of these improvements. To determine the percentage the proposed development is responsible for, the following methodology was followed:

- Project Traffic along Orange Avenue from Rock Road to Kings Highway:
  - Eastbound: 627 vehicles
  - Westbound: 256 vehicles
- Current Capacity of the Roadway Segment
  - Directional: 1,070 vehicles
  - Two-way: 1,950 vehicles
- Capacity of 4L Undivided Segment
  - Directional: 2,765 vehicles
  - Two-way: 5,026 vehicles
- **Proportionate Share Calculation 1**: (627+256) / (5,026-1,950) = **29%**
- **Proportionate Share Calculation 2**:
  - Eastbound: Full cost
  - Westbound (AM Peak Hour): (1255-1070) / (2,765 – 1,070) = 11%
  - Total proportionate share of improvement: **56%**

Two calculations were performed to determine the proportionate share of the improvements attributable to the proposed development. The first calculation evaluated project-generated trips during the PM peak hour in the eastbound and westbound directions and divided them by the increase in two-way roadway service capacity, resulting in a proportionate share of 29% for the roadway widening.

The second calculation considered the full cost of improvements in the eastbound direction while determining the share for the westbound approach. AM peak hour westbound project trips were added to projected future volumes in the westbound direction and compared to the existing directional roadway service capacity; this difference was then divided by the increase in service capacity needed to determine the proportionate share. This resulted in 11% for the westbound approach, which, when combined with the full cost of the eastbound direction, yields a total proportionate share of 56% for the conversion from a two-lane roadway to four lanes.

Therefore, the proportionate share of improvements attributable to the proposed development is 56% of the road widening of Orange Avenue from Rock Road to Kings Highway from a 2-lane roadway to a 4-lane roadway.

INTERSECTION ANALYSIS

Operation conditions at the following intersections were analyzed using *Synchro 12* software and the *HCM 2000* Edition methodology [(1)]:

- Kings Highway & Orange Avenue
- I-95 Northbound Ramps & Orange Avenue
- I-95 Southbound Ramps & Orange Avenue
- Jenkins Road & Orange Avenue
- Kings Highway & Okeechobee Boulevard
- Rock Road & Orange Avenue
- Kings Highway & Angel Road
- Kings Highway & St Lucie Boulevard
- Kings Highway & Graham Road

(1) ***HCM 2000 Edition was used for this analysis since there were several intersections that had nonstandard phasing which cannot be analyzed by HCM 7th Edition methodology.***

Data Collection

Baseline traffic counts were collected during the AM peak period (7:00 AM – 9:00 AM) and the PM peak hour (4:00 PM – 6:00 PM) at the studied intersections. The turning movement counts were collected on February 3, 2026, March 27, 2025, September 3, 2025, January 14, 2026, March 11, 2026, and March 24, 2026. Turning movement counts for the following intersections were taken from the Hope Commercial traffic study:

- I-95 Northbound Ramps & Orange Avenue
- I-95 Southbound Ramps & Orange Avenue

Existing Conditions:

This analysis scenario provides a baseline evaluation of current conditions, based upon traffic volume data collected at the study intersections. Existing counts collected outside of peak season have been adjusted for peak season using Peak Season Correction Factors (PSCF) published by FDOT. The existing volumes used in the analysis are shown in **Figure 2**.

Future Background Conditions (2031)

This analysis scenario includes the baseline traffic volumes adjusted to future year conditions without the project by applying the greater of two options:

- An annually compounding background growth rate of 2.5% ***or***
- A one percent (1%) nominal growth rate compounded annually, in addition to committed traffic in the surrounding area.

The future background condition volumes are shown in **Figure 3**.

Future Total Conditions (2031)

This analysis scenario uses the Future Background Conditions (2031) volumes as a baseline and adds new project traffic generated by the proposed development. The Future Total Conditions (2031) volumes assume an estimated fully built out condition in the year 2031. The net change in trip generation potential that was calculated for the site was distributed across the transportation network using the trip distribution illustrated in **Figure 4**. The resulting project traffic volumes are shown in **Figure 5**. **Figure 6** illustrates the resulting Future Total volumes.

Synchro summaries for Existing Conditions, Future Background Conditions (2031), and Future Total Conditions (2031) are shown in **Table 4, Table 5**, and **Table 6,** respectively.

As shown in the tables, the following intersections operate at LOS E and F during the peak hours under future total conditions:

- Kings Highway & Orange Avenue (LOS F - AM and PM peak hours)
- Kings Highway & Okeechobee Boulevard (LOS E – AM and PM peak hours)
- Rock Road & Orange Avenue (LOS F – AM and PM peak hours)
- Kings Highway & Angle Road (LOS F – AM and PM peak hours)
- Kings Highway & Graham Road (LOS F – AM and PM peak hours)

Signalization at the intersection of Rock Road & Orange Avenue is recommended based on the anticipated delays associated with the southbound movements.

The deficiencies at the intersections of Kings Highway & Orange Avenue, Kings Highway & Okeechobee Boulevard, Kings Highway & Angle Road, and Kings Highway & Graham Road are projected to occur under background conditions without the addition of project traffic.

According to Florida State Statute 163.3180, because the facility identified on the page exceeds its respective threshold under background conditions, and because the improvements required to address future background conditions will also provide sufficient capacity for the proposed project traffic, the project is not responsible for the proportionate share of these improvements.

Signal optimization can be performed at the intersection of Kings Highway & Orange Avenue, Kings Highway & Okeechobee Boulevard, and Kings Highway & Angle Road to reduce delays. **Table 7** shows the results of the signal optimization at these intersections.

Signalization at Rock Road and Orange Avenue

As previously mentioned, signalization of the intersection of Rock Road & Orange Avenue is recommended based on the anticipated delays under two-way stop control conditions. A signal warrant analysis was conducted at this intersection and is summarized later in this report. Operational conditions at the intersection of Rock Road & Orange Avenue were analyzed under signalized conditions utilizing *Synchro 12* software and the *HCM 2000* Methodology.

It should be noted that, in order for the intersection to operate acceptably, the following improvements will be needed:

- Construction of an eastbound left-turn lane
- Construction of a southbound left-turn lane
- Restriping second southbound lane as a shared left/through/right turn lane
- Construction of an additional eastbound receiving lane on Orange Avenue
- Installation of a traffic signal

Table 8 summarizes the Synchro summary for the Rock Road & Orange Avenue intersection under signalized conditions. As shown in the table below, the intersection of Rock Road & Orange Avenue is anticipated to operate at LOS B and C during the AM and PM peak hour, respectively.

Table 8: Signalization at Rock Road & Orange Avenue Synchro Summary

#	Intersection	Control Type	Movement	AM Peak Hour		PM Peak Hour	
				Delay (s)	LOS	Delay (s)	LOS
6	Rock Road & Orange Avenue	Signalized	EB	24.4	C	32.7	C
			WB	9.9	A	20.5	C
			NB	37.3	D	40.9	D
			SB	32.3	C	34.1	C
			Overall	**17.5**	**B**	**28.7**	**C**

95th Percentile Queues

As requested, a 95th percentile queue analysis was conducted to evaluate the required storage lengths for the eastbound left turn lane and the westbound right turn lane at the intersection of Rock Road & Orange Avenue. *Synchro 12* software and the *HCM 2000* methodology were used to determine the results of the analysis. **Table 9** summarizes the future total queue lengths at Rock Road & Orange Avenue. As shown in the following table, the 95th percentile eastbound left-turn queue is anticipated to be 18 feet, and the 95th percentile westbound right-turn lane queue is anticipated to be 25 feet.

Table 9: Turn Lane Length Evaluation at Orange Avenue & Rock Road

#	Intersection	Movement	Storage	Future - Build	
				95th Percentile Queue (AM) (feet)	95th Percentile Queue (PM) (feet)
6	Rock Road & Orange Avenue	EBL	-	17	13
		WBL	-	38	20
		WBR	110	22	25
		SBL	-	154	538

Turn Lane Length Evaluation

A review of the turn lane lengths at the intersection of Rock Road & Orange Avenue was conducted to determine the recommended turn bay lengths for the eastbound left-turn lane and the westbound right-turn lane. As previously mentioned, the 95th percentile queue anticipated for the westbound right-turn lane is 25 feet, and the 95th percentile eastbound left-turn lane queue is 17 feet.

Guidance on deceleration lane length is provided in Chapter 212 of the FDOT Design Manual. The posted speed limit along Orange Avenue is 45 miles per hour. As outlined in Exhibit 212-1 of the FDOT Design Manual, the total deceleration length for a design speed of 45 miles per hour is 185 feet, plus the queue length. To account for heavy vehicle traffic, it is recommended that a queue length of 60 feet be added to the deceleration length, although the 95th percentile queues were lower.

Therefore, it is recommended that the eastbound left-turn lane and the westbound right-turn lane have a total length of 245 feet, consisting of 195 feet of storage and 50 feet of transition each.

SITE CIRCULATION AND TURN LANE REQUIREMENTS

Future total driveway volumes were determined by applying the distribution referenced in **Figure 1** to the proposed future trip generation potential of the site. The resulting driveway trip assignment is shown in **Figure 7** while driveway volumes are illustrated in **Figure 8.** Access to the site is proposed via two driveway connections along Rock Road.

Driveway	Location	Description
Driveway 1	Rock Road	Full-Access
Driveway 2	Rock Road	Full-Access

Turn Lane Analysis

The proposed driveway connections were subject to turn lane analysis using information in the FDOT *Multimodal Access Management Guidebook* as a reference.

Driveway 1: Left-Turn Lane Evaluation

The FDOT *Multimodal Access Management Guidebook* provides guidance related to left turn lanes at unsignalized intersections and driveways. These standards are based on the National Cooperative Highway Research Program (NCHRP) Report 457. Future Total Conditions (2031) volumes were compared to Figure 2-5a of the NCHRP Report 457. The results of the analysis are shown below:

Driveway 1 Northbound Left Turn Lane (AM Peak Hour)

Following are the parameters for analysis for this turn lane:

- Opposing Volume: 83 vehicles/hour
- Advancing Volume: 552 vehicles/hour
- Left Turn Percentage of Advancing Volume: 55%
- Speed Limit of Major Road: 25 miles per hour

Comparing the results with Figure 2-5a of the NCRHP Report 457, the plotted point for the left-turn volume is above the reference curve, therefore, a northbound left turn lane is warranted at this driveway.

Driveway 2: Left-Turn Lane Evaluation

The FDOT *Multimodal Access Management Guidebook* provides guidance related to left turn lanes at unsignalized intersections and driveways. These standards are based on the National Cooperative Highway Research Program (NCHRP) Report 457. Future Total Conditions (2031) volumes were compared to Figure 2-5a of the NCHRP Report 457. The results of the analysis are shown below:

Driveway 2 Northbound Left Turn Lane (AM Peak Hour)

Following are the parameters for analysis for this turn lane:

- Opposing Volume: 0 vehicle/hour
- Advancing Volume: 248 vehicle/hour
- Left Turn Percentage of Advancing Volume: 100%
- Speed Limit of Major Road: 25 miles per hour

Comparing the results with Figure 2-5a of the NCRHP Report 457, the plotted point for the left-turn volume is below the reference curve, therefore, a left turn lane is not warranted at this driveway.

SIGNAL WARRANT ANALYSIS

An analysis of signal warrant criteria at the intersection of Rock Road & Orange Avenue was performed to evaluate future traffic projections on the approaches of Rock Road & Orange Avenue with respect to applicable signal warrant criteria.

Existing Conditions

The intersection of Rock Road & Orange Avenue currently operates as a four-legged unsignalized intersection. The major street, Orange Avenue, is a 2-lane undivided east/west roadway with a posted speed limit of 45 miles per hour. The minor street, Rock Road, is a 2-lane undivided north/south roadway with a posted speed limit of 25 miles per hour.

Data Collection

12-hour continuous roadway count data were collected at the intersection of Rock Road & Orange Avenue on Wednesday, January 14, 2026, on all approach legs of the intersection.

Future Total Conditions (2031) Volume Development

Roadway count data at the intersection of Orange Avenue & Rock Road were not taken during the peak season and therefore a peak season correction factor of 1.10 was applied. These volumes were then grown to reflect year 2031 background conditions using a nominal 2.5% growth rate compounded annually.

Signal Warrant Analysis

To perform the analyses, the volume warrant criteria contained in Chapter 4C of the 2009 *Manual on Uniform Traffic Control Devices*, *11th Edition* (MUTCD) were considered.

A two-lane approach was assumed for the major street (Orange Avenue) approach and the minor street (Rock Road) for the purposes of comparison to the warrants contained in the *MUTCD*. For this analysis, right turn volumes were adjusted by a 50% reduction. Warrants applicable for use at this location were identified.

The analysis indicates that the criteria for warrant 1B and 2 are satisfied and therefore signalization of the intersection of Rock Road & Orange Avenue is warranted. Signal warrant summary forms are included in Appendix I for reference.

CONCLUSION

Kimley-Horn and Associates, Inc. has been retained to conduct a traffic impact analysis for the Project Orchid site. The site is located on the west side of Rock Road, north of Orange Avenue, in St. Lucie County, Florida. The proposed project would develop the vacant site into 1,444,000 square feet of Manufacturing facility, with a mix of foundry, warehouse, and office uses to support the production of goods. The proposed buildout date is the end of 2031.

Based on the results of the traffic impact analysis, the roadway segment of Orange Avenue from Rock Road to Kings Highway is anticipated to be overcapacity due to the addition of project traffic. The roadway segment will require widening from a 2L facility to a 4L undivided facility. A calculation was performed to determine the development's proportionate share of the widening. The calculation indicated that the proposed development would be responsible for 56% of the costs to widen the roadway from 2L facility to 4L undivided facility.

Operational conditions at the study intersections indicated that the study intersections will operate acceptably with addition of project traffic with the exception of Kings Highway & Orange Avenue, Kings Highway & Okeechobee Boulevard, Rock Road & Orange Avenue, Kings Highway & Angle Road, and Kings Highway & Graham Road. The deficiency at the intersections of Kings Highway & Orange Avenue, Kings Highway & Okeechobee Boulevard, Kings Highway & Angle Road, and Kings Highway & Graham Road are projected to occur under background conditions without the addition of project traffic and therefore are not due to the addition of traffic from the development.

The intersection of Rock Road & Orange Avenue will operate acceptably with the following recommended improvements:

- Construction of an eastbound left-turn lane (245 feet)
- Extension of the existing westbound right-turn lane to 245 feet
- Construction of a southbound left-turn lane (650 feet)
- Restriping second southbound lane as a shared left/through/right turn lane
- Construction of an additional eastbound receiving lane on Orange Avenue
- Installation of a traffic signal

An analysis of signal warrant criteria at the intersection of Rock Road & Orange Avenue was performed to evaluate future traffic projections on the approaches of Rock Road & Orange Avenue with respect to applicable signal warrant criteria. The analysis indicates that the criteria for warrant 1B, and 2 are satisfied upon buildout of the project and therefore signalization of the intersection of Rock Road & Orange Avenue is warranted.

Access to the site is proped via two driveways on Rock Road. The proposed driveway connections were subject to turn lane analysis using information in the FDOT Multimodal Access Management Guidebook as a reference. The analysiis indicated that Driveway 1 is anticipated to require a northbound left-turn lane.

* **NOTE:** A six digit number in the "STATION ID" column identifies segment counted by FDOT.
Peak hour data is not available for locations on State roads due to differences in data availability, LOS Methodologies, and service level thresholds.
Please refer to FDOT sources for detailed data on FDOT traffic counts.

* Volumes shown were adjusted using FDOT Seasonal Factors
* AADT = Annual Average Daily Traffic (volumes for both directions where applicable)

* **NOTE:** If the Last Count Year is older than the year of the report, the AADT is projected from historical traffic count data.

* **NOTE:** A six digit number in the "STATION ID" column identifies segment counted by FDOT.
Peak hour data is not available for locations on State roads due to differences in data availability, LOS Methodologies, and service level thresholds.
Please refer to FDOT sources for detailed data on FDOT traffic counts.

* Volumes shown were adjusted using FDOT Seasonal Factors
* AADT = Annual Average Daily Traffic (volumes for both directions where applicable)

* **NOTE:** If the Last Count Year is older than the year of the report, the AADT is projected from historical traffic count data.

TRAFFIC IMPACT ANALYSIS

PREPARED FOR:
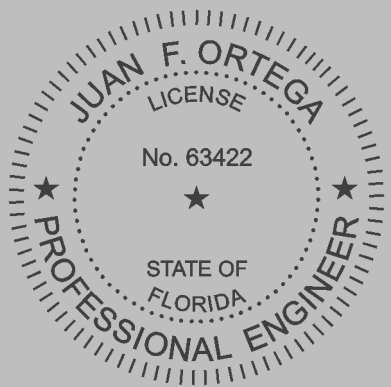
DREAM FINDERS HOMES, LLC

Prepared by:

JFO GROUP INC
COA Number 32276
6671 W Indiantown Road
Suite 50-324
Jupiter, FL 33458



June 14, 2024

This item has been electronically signed and sealed by Dr. Juan F. Ortega, PE on June 14, 2024, using a Digital Signature. Printed copies of this document are not considered signed and sealed and the signature must be verified on any electronic copies.

2. TRIP GENERATION

Project traffic potentially generated by the proposed project was calculated using the Institute of Transportation Engineers (ITE) publication *Trip Generation Manual, 11th Edition*. When fitted curve equations were not available, weighted average rates were used. Similarly, when data plots had at least 20 data points and a fitted curve equation with an R^2 of at least 0.75, fitted curve equations were used. Exhibit 3 includes an excerpt from the ITE Trip Generation manual for the trip generation rates used in this analysis.

Table 1 shows the rates used in order to determine the trip generation for Daily, AM, and PM peak hour conditions. As part of a conservative analysis and for simplification purposes, no traffic credit was taken for vested uses on the subject site.

Table 1: Trip Generation Rates

Land Use	ITE Code	Daily	AM Peak Hour			PM Peak Hour		
			In	Out	Total	In	Out	Total
Single Family Detached	210	LN(T)=0.92 LN(X)+2.68	26%	74%	LN(T)=0.91 LN(X)+0.12	63%	37%	LN(T)=0.94 LN(X)+0.27
Townhomes	220	T = 6.41(X) + 75.31	24%	76%	T = 0.31(X) + 22.85	63%	37%	T = 0.43(X) + 20.55

According to Table 2, the net Daily, AM and PM peak hour trips potentially generated due to the planned development are 3,367, 215 (54 In/161 Out) and 282 (178 In/104 Out) trips respectively.

Table 2: Trip Generation

Land Use	Intensity	Daily Traffic	AM Peak Hour			PM Peak Hour		
			In	Out	Total	In	Out	Total
Single Family	130 DUs	1,285	25	70	95	80	47	127
Townhomes	313 DUs	2,082	29	91	120	98	57	155
Net Proposed Traffic		***3,367***	***54***	***161***	***215***	***178***	***104***	***282***

MEMORANDUM

TO: St. Lucie County Growth Management

FROM: William Blazak, Sr. Project Manager

DATE: April 2006

Re: Traffic Impact Report

The following Traffic impact report was prepared for the Creekside PUD. The Creekside Addition will utilize the same entrances as previously approved with the Creekside PUD.

It is important to note that the Traffic Impact Report recognizes the 40 additional units that the Creekside Addition will add to the already approved Creekside PUD.

The 40 additional units were openly discussed with the Board of County Commissioners, St. Lucie County Road and Bridge Department and the Growth Management Division with all in agreement that the Creekside PUD with a total of 840 units, complied with concurrency requirements with regard to traffic impacts.

TRIP GENERATION

Trip generation is based on Institute of Transportation Engineering's (ITE) manual, *Trip Generation Manual (11th Edition)*.

Proposed Use

- 955 dwelling units (DU) Single Family Detached (ITE Land Use 210)
- 758 dwelling units (DU) Multi-family Housing (Low-Rise) (ITE Land Use 220)

The proposed development will generate the following net new external and cumulative driveway trips:

- 12,979 daily, 839 AM peak hour (207 in/632 out), and 1,175 PM peak hour (740 in/435 out) trips.

Table 1 presents the project's trip generation.

Table 1. Trip Generation

Land Use	Intensity		Daily Trips	AM Peak Hour			PM Peak Hour		
				Total	In	Out	Total	In	Out
Proposed Traffic									
Single Family Detached	955	DU	8,045	581	145	436	829	522	307
Multi-family Housing (Low-rise)	758	DU	4,934	258	62	196	346	218	128
NET CHANGE IN TRIPS (FOR THE PURPOSES OF CONCURRENCY)			**12,979**	**839**	**207**	**632**	**1,175**	**740**	**435**
NET CHANGE IN DRIVEWAY VOLUMES			**12,979**	**839**	**207**	**632**	**1,175**	**740**	**435**

Note: Trip generation was calculated using the following data:

Land Use	ITE Code	Unit	Daily Rate	Pass-by Rate	AM Peak Hour		PM Peak Hour	
					in/out	Rate	in/out	Equation
Single Family Detached	210	DU	Ln(T) = 0.92 Ln(X) + 2.68	0%	25/75	Ln(T) = 0.91 Ln(X) + 0.12	63/37	Ln(T) = 0.94 Ln(X) + 0.27
Multi-family Housing (Low-rise)	220	DU	T = 6.41(X) + 75.31	0%	24/76	T = 0.31(X) + 22.85	63/37	T = 0.43(X) + 20.55

TRAFFIC ASSIGNMENT

The distributed net proposed trips for the project were assigned to the roadway network within the radius of influence. The project assignments are illustrated in Figure 3A and Figure 3B for Scenarios 1 and 2, respectively. Figure 3C (Scenario 1) shows the intersection assignment. Figure 3D (Scenario 2) shows the projected assignment if Road G connects to Kings Highway.

Revised August 15, 2025
Revised May 28, 2025
February 27, 2025

This item has been electronically signed and sealed by Dr. Juan F. Ortega, PE on August 15, 2025, using a Digital Signature. Printed copies of this document are not considered signed and sealed and the signature must be verified on any electronic copies.

2. TRIP GENERATION

Project traffic potentially generated by the proposed project was calculated using the Institute of Transportation Engineers (ITE) publication *Trip Generation Manual, 11th Edition*. When fitted curve equations were not available, weighted average rates were used. Similarly, when data plots had at least 20 data points and a fitted curve equation with an R^2 of at least 0.75, fitted curve equations were used. Exhibit 3 includes an excerpt from the ITE Trip Generation manual for the trip generation rates used in this analysis.

Table 1 shows the rates used in order to determine the trip generation for Daily, AM, and PM peak hour conditions. As part of a conservative analysis and for simplification purposes, no traffic credit was taken for vested uses on the subject site.

Table 1: Trip Generation Rates

Land Use	ITE Code	Daily Trip Gen.	AM Peak Hour			PM Peak Hour		
			In	Out	Total	In	Out	Total
Warehousing	150	T=1.58(X)+38.29	77%	23%	0.17	28%	72%	0.18
Small Office Building	712	14.39	82%	18%	1.67	34%	66%	2.16

According to Table 2, the net Daily, AM and PM peak hour trips potentially generated due to the planned development are 143, 12 (9 In/3 Out) and 14 (5 In/9 Out) trips respectively.

Table 2: Trip Generation

Land Use	Intensity	Daily Traffic	AM Peak Hour			PM Peak Hour		
			In	Out	Total	In	Out	Total
Warehousing	17,975 SF	67	2	1	3	1	2	3
Small Office Building	5,300 SF	76	7	2	9	4	7	11
Net Proposed Traffic		***143***	***9***	***3***	***12***	***5***	***9***	***14***

1. The Publix at Indrio Commons project trips were calculated per the Trip Generation table provided in Appendix G and distributed based on Figure 1 due to the proximity to the Indrio Road Development project.
2. The Cabo Rio RV Resort project trips were obtained from the Cabo Rio RV Resort Traffic Impact Study by Pinder Troutman Consulting, Inc. dated March 17, 2021.
3. The Sugar Sand Apartment project trips were obtained from the Sugar Sand Apartment Traffic Analysis by O'Rourke Engineering & Planning dated June 20, 2022.
4. The Indrio Pines project trips were obtained from the Indrio Pines Concurrency Traffic Analysis by O'Rourke Engineering & Planning dated September 16, 2021.
5. The Indrio Woods and Kings Highway Self Storage project trips were obtained from the 7075 Indrio Road Traffic Study by WGI dated April 12, 2024.
6. Feeder Road Self Storage project trips were not included, as fewer than 18 trips are proposed per day, per the Feeder Road Self Storage Traffic Statement by Abraham Chabab, Inc. dated June 5, 2023.

1. The Publix at Indrio Commons project trips were calculated per the Trip Generation table provided in Appendix G and distributed based on Figure 1 due to the proximity to the Indrio Road Development project.
2. The Cabo Rio RV Resort project trips were obtained from the Cabo Rio RV Resort Traffic Impact Study by Pinder Troutman Consulting, Inc. dated March 17, 2021.
3. The Sugar Sand Apartment project trips were obtained from the Sugar Sand Apartment Traffic Analysis by O'Rourke Engineering & Planning dated June 20, 2022.
4. The Indrio Pines project trips were obtained from the Indrio Pines Concurrency Traffic Analysis by O'Rourke Engineering & Planning dated September 16, 2021.
5. The Indrio Woods and Kings Highway Self Storage project trips were obtained from the 7075 Indrio Road Traffic Study by WGI dated April 12, 2024.
6. Feeder Road Self Storage project trips were not included, as fewer than 18 trips are proposed per day, per the Feeder Road Self Storage Traffic Statement by Abraham Chabab, Inc. dated June 5, 2023.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

APPENDIX G: DRIVEWAY 1 TURN LANE EVALUATIONS

Figure 2 - 5. Guideline for determining the need for a major-road left-turn bay at a two-way stop-controlled intersection.

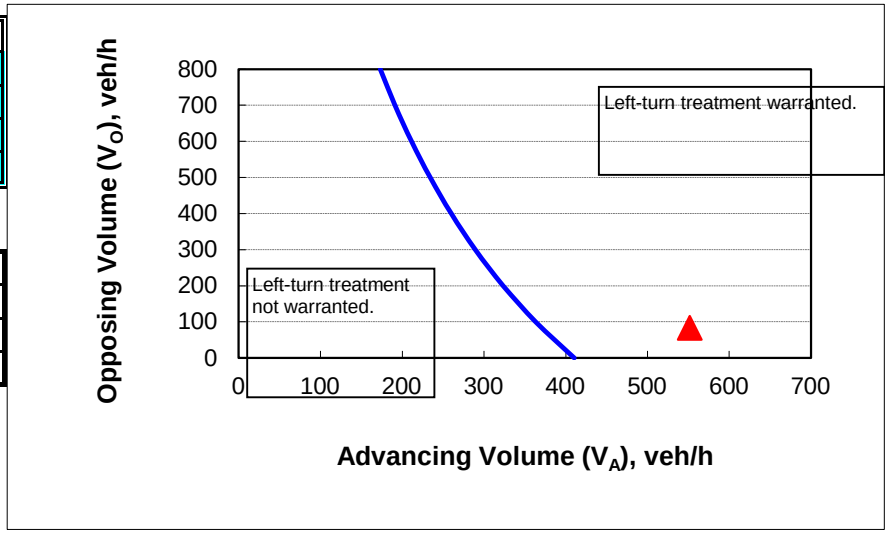
2-lane roadway (English)

INPUT

Variable	Value
85th percentile speed, mph:	25
Percent of left-turns in advancing volume (V_A), %:	55%
Advancing volume (V_A), veh/h:	552
Opposing volume (V_O), veh/h:	83

OUTPUT

Variable	Value
Limiting advancing volume (V_A), veh/h:	371
Guidance for determining the need for a major-road left-turn bay:	
Left-turn treatment warranted.	



CALIBRATION CONSTANTS

Variable	Value
Average time for making left-turn, s:	3.0
Critical headway, s:	5.0
Average time for left-turn vehicle to clear the advancing lane, s:	1.9

APPENDIX H: DRIVEWAY 2 TURN LANE EVALUATIONS

Figure 2 - 5. Guideline for determining the need for a major-road left-turn bay at a two-way stop-controlled intersection.

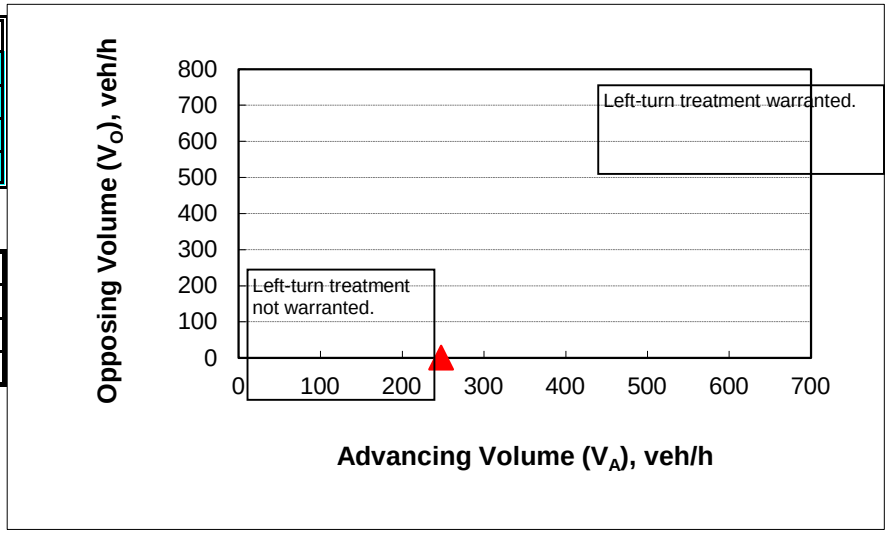
2-lane roadway (English)

INPUT

Variable	Value
85th percentile speed, mph:	25
Percent of left-turns in advancing volume (V_A), %:	99%
Advancing volume (V_A), veh/h:	248
Opposing volume (V_O), veh/h:	1

OUTPUT

Variable	Value
Limiting advancing volume (V_A), veh/h:	2049
Guidance for determining the need for a major-road left-turn bay:	
Left-turn treatment NOT warranted.	



CALIBRATION CONSTANTS

Variable	Value
Average time for making left-turn, s:	3.0
Critical headway, s:	5.0
Average time for left-turn vehicle to clear the advancing lane, s:	1.9

APPENDIX I: SIGNAL WARRANT SUMMARY

TRAFFIC SIGNAL WARRANT ANALYSIS

City/County:	St. Lucie County	85th-percentile speed on the major street exceeds 40 mph? (Y or N)	Y
State:	Florida	Isolated community with a population of less than 10,000? (Y or N)	N
Date:	1/20/2026	Apply 56% warrant to Warrant 1, Combination Warrant? (Y or N)	Y
Major Street:	Orange Avenue	Approach Lanes - Major? (1 or 2)	2
Minor Street:	Rock Road	Approach Lanes - Minor? (1 or 2)	2

Dear Property Owner,

Re: Invitation to Neighborhood Community Meeting – Proposed Project on Rock Road

Foundry Commercial Developer is in the early stages of planning a proposed development on property located on the west side of Rock Road, just north of the St. Lucie County Jail. The site is about 3,000 feet from the intersection of Rock Road and Orange Avenue. A location map is attached for your reference.

Project Orchid will include a new 1.4 million square foot window manufacturing facility along with a 27,300 square foot office building.

Because you live or own property nearby, we want to share information directly with you and provide an opportunity to learn more about the project as plans are taking shape. At this time, the project is in the programming and concept design phase, and no final approvals have been granted.

You are invited to attend a Neighborhood Community Meeting:

March 25, 2026
6:00 – 7:00 PM
Sunshine Kitchen
7550 Pruitt Research Road in Fort Pierce

The purpose of the meeting is to:

- Provide an overview of the proposed development
- Share preliminary site plans and project information
- Explain the anticipated review process
- Listen to questions, feedback, and concerns from nearby property owners

SURVEY NOTES:

1. THIS SURVEY OR REPRODUCTIONS THEREOF ARE NOT VALID WITHOUT THE SIGNATURE AND THE ORIGINAL SEAL, OR THE AUTHENTICATED ELECTRONIC SIGNATURE AND SEAL OF A FLORIDA LICENSED PROFESSIONAL SURVEYOR AND MAPPER.
2. SURVEY MAP OR THE COPIES THEREOF ARE NOT VALID WITHOUT THE SIGNATURE AND THE ORIGINAL SEAL OF A FLORIDA LICENSED PROFESSIONAL LAND SURVEYOR.
3. LANDS SHOWN HEREON WERE ABSTRACTED BY COMMONWEALTH LAND TITLE INSURANCE COMPANY, COMMITMENT NUMBER: 12889656, REVISION NUMBER: 1:2/18/2026 ISSUING OFFICE FILE NUMBER: G26-004, COMMITMENT DATE: 02/05/2026 AT 05:00 PM. SCHEDULE B-SECTION II EXCEPTIONS WERE REVIEWED BY THIS OFFICE AND ALL PLOTTABLE EXCEPTIONS ARE SHOWN HEREON.
4. ALL MEASUREMENTS ARE IN ACCORDANCE WITH THE UNITED STATES STANDARD FEET. FIELD LOCATIONS DEPICTED ON THIS SURVEY WERE OBTAINED USING REAL TIME KINEMATIC (RTK) GPS METHODS WITH AN EXPECTED ACCURACY OF +/– 0.05'. ALL PROPERTY CORNERS WERE DOUBLE OCCUPIED FOR REDUNDANT MEASUREMENTS.
5. ADDITIONS OR DELETIONS TO SURVEY MAPS OR REPORTS BY OTHER THAN THE SIGNING PARTY OR PARTIES IS PROHIBITED WITHOUT WRITTEN CONSENT OF THE SIGNING PARTY OR PARTIES.
6. THE DESCRIPTION OF THE LAND CONTAINED IN THIS SURVEY WAS PROVIDED BY THE CLIENT AND MATCHES THE DESCRIPTION IN THE TITLE COMMITMENT.
7. BEARINGS SHOWN HEREON ARE BASED ON GRID NORTH, AND ARE REFERENCED TO THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983, 2011 ADJUSTMENT. THE BEARING BASIS FOR THIS SURVEY IS BASED ON A MEASURED NORTH LINE OF CANAL NO. 44, SAID LINE BEARS S 89°50'19" W AND ALL OTHER BEARINGS ARE RELATIVE THERETO. ALL MEASUREMENTS ARE IN ACCORDANCE WITH THE UNITED STATES STANDARD FEET. FIELD LOCATIONS DEPICTED ON THIS SURVEY WERE OBTAINED USING REAL TIME KINEMATIC (RTK) GPS METHODS.
8. THE VERTICAL DATUM REFERENCES THE NORTH AMERICAN VERTICAL DATUM (NAVD) OF 1988 AND IS IN THE U.S. SURVEY FOOT UNIT OF MEASUREMENT.
9. ELEVATIONS SHOWN HEREON ARE REFERENCED TO THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88), AS ESTABLISHED BY THE NATIONAL GEODETIC SURVEY (NGS) CONTROL POINT DESIGNATION "195 K 14", PDI AF7282 HAVING A PUBLISHED ELEVATION OF 16.46' (NAVD88) A FOUND FDOT SURVEY DISK SET IN A CONCRETE HEADWALL STAMPED BM 195 K 14.
10. SUBJECT PROPERTY FALLS WITHIN ZONE "X", AREA OF MINIMAL FLOOD HAZARD ACCORDING TO THE NATIONAL FLOOD INSURANCE PROGRAM (NFIP) FLOOD INSURANCE RATE MAP (FIRM); COMMUNITY PANEL NO. 12111C0160J UNINCORPORATED ST. LUCIE COUNTY, COMMUNITY NO. 12285; DATED FEBRUARY 16, 2012.
11. THERE ARE NOT GAPS, GORES OR HIATUSES, THE TRACTS ARE CONTIGUOUS ALONG THEIR BOUNDARIES..
12. THE SURVEY SKETCH SHOWN HEREON DOES NOT NECESSARILY CONTAIN ALL OF THE INFORMATION OBTAINED OR DEVELOPED BY THE UNDERSIGNED SURVEYOR IN HIS FIELD WORK, OFFICE WORK OR RESEARCH.
13. REVISIONS SHOWN HEREON DO NOT REPRESENT A "SURVEY UPDATE" UNLESS OTHERWISE NOTED.
14. ALL DATES SHOWN WITHIN THE REVISIONS BLOCK HEREON ARE FOR INTEROFFICE FILING USE ONLY AND IN NO WAY AFFECT THE DATE OF THE FIELD SURVEY STATED HEREIN.
15. IT IS A VIOLATION OF RULE 5J-17 OF THE FLORIDA ADMINISTRATIVE CODE TO ALTER THIS SURVEY WITHOUT THE EXPRESS PRIOR WRITTEN CONSENT OF THE SURVEYOR. ADDITIONS AND/OR DELETIONS MADE TO THE FACE OF THIS SURVEY WILL MAKE THIS SURVEY INVALID.
16. THE OWNERSHIP OF FENCES, PERIMETER WALLS AND/OR HEDGES SHOWN HEREON ARE NOT KNOWN AND THUS ARE NOT LISTED AS ENCROACHMENTS. FENCES, HEDGES AND/OR PERIMETER WALLS ARE SHOWN IN THEIR RELATIVE POSITION TO THE BOUNDARY.
17. THE SUBJECT PROPERTY HEREON IS CONTIGUOUS, HAVING NO HIATUS, GAPS OR GORES.
18. AT THE TIME OF THIS SURVEY THERE WAS NO OBSERVABLE SURFACE EVIDENCE OF EARTH MOVING WORK OR BUILDING CONSTRUCTION.
19. AT THE TIME OF THE SURVEY THERE WAS NO EVIDENCE OF PROPOSED CHANGES IN STREET RIGHT-OF-WAY LINES OR EVIDENCE OF RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIRS.
20. AT THE TIME OF THIS SURVEY THERE WERE NO BUILDINGS EXISTING ON THE SURVEYED PROPERTY.
21. AT THE TIME OF THIS SURVEY THERE WAS NO PARKING ON THE SUBJECT PROPERTY.
22. AT THE TIME OF THIS SURVEY, THERE WAS NO OBSERVED EVIDENCE OF THE SITE BEING USED AS A SOLID WASTE DUMP, SUMP OR SANITARY LANDFILL.
23. AT THE TIME OF THE SURVEY THERE WERE NO WETLANDS MARKED BY OTHERS. THIS SURVEYOR DID NOT PERFORM A WETLAND DELINEATION, JURISDICTIONAL DETERMINATION, OR FIELD VERIFICATION OF SAID WETLANDS.
24. ALL BEARING AND DISTANCES ARE MEASURED BETWEEN FOUND MONUMENTATION. THE BOUNDARY SURVEY IS A RETRACEMENT SURVEY TO FOLLOW IN THE FOOTSTEPS OF THE PREVIOUS SURVEYOR AND BASED ON THE SURVEYS OF CULPEPPER & TERPENING, INC. DATED 11/04/05 WITH A LAST REVISION DATE OF 4/30/13 HAVING A JOB NUMBER 03-243

COMMONWEALTH LAND TITLE INSURANCE COMPANY

PLAN SNAPSHOT REPORT (CU-2603-000102)

Existing Uses	There is a small office building to the east, county jail to the south, and vacant land to the north, east and west.
Environmental Impacts	Outside of possible fumes and noise, no environmental impacts are anticipated. And those impacts are currently being analyzed.

Changed Condition	The proposed use as a window manufacturer requires the use of a foundry to make the customized window frames.
Additional Information	The project is 1,290,00 Sf and ultimately will operate 24 hours/day. There are expected to be 1,005 employees. Trip generation is included in the Traffic Impact Analysis. The applicant is currently analyzing the noise, light, hazardous substances and the effects of the equipment utilized. This analysis will be provided at a later date.

Anticipated Impacts	The proposed use as a foundry will not adversely impact existing or future public buildings. The foundry encompasses less than 6% of the total building area.

ENVIRONMENTAL RESOURCES FINAL REPORT

TO:	Thad Crowe & Kori Benton, Planning & Development Services Department
THROUGH:	Amy E. Griffin, Environmental Resources Director
FROM:	Aimee L. Cooper, Environmental Regulations Manager
DATE:	April 10, 2026
SUBJECT:	Project Orchid CU-2603-000102 MJSP-2603-000149

Background

The Environmental Resources Department (ERD) is in receipt of the March 5, 2026, date-stamped submittal, transmitted on March 5, 2026, from Planning and Development Services with comments due March 20, 2026. The applicant is requesting approval of a Future Land Use Map Amendment (FLUMA-2603-000040), a Rezone (RZ-2603-000050), a Conditional Use (CU-2603-000102), and a Major Site Plan (MJSP-2603-000149) for construction of the 1,390,000 SF window manufacturing building. The vacant subject site consists of three (3) parcels (Parcel ID 230234100010008 [±16.46 ac], 230234200010001 [±19.60 ac], 230233100010007 [±37.21 ac]) totaling ±73.27 [*sic*] per the Property Appraiser website and ±73.48 per the applicant's data. The site is located at TBD Rock Road in Ft. Pierce and is north of and adjacent to Colbourn Road, south of I-95, east of the Florida Turnpike, and west of and adjacent to Rock Road.

Findings

The preliminary landscape plan and tree mitigation plan are currently under review and will be finalized for the May 5, 2026, Board of County Commission meeting.

An Environmental Impact Report (EIR) dated March 2026, prepared by EW Consultants, Inc Consultants, Inc., was reviewed for consistency with the Land Development Code (LDC) and Comprehensive Plan (CP). Land cover and vegetative community classifications were based on the Florida Land Use, Cover and Forms Classification System (FLUCFCS) developed by the Florida Department of Transportation. A review of historic aerial imagery indicates that the property was converted to agricultural use more than 65 years ago and was subsequently converted for the purpose of citrus production by 1985. The property does not contain any native upland habitat, and no wetlands were identified during field reconnaissance. This opinion of the absence of wetlands onsite has not yet been verified by South Florida Water Management District (SFWMD) as of the date of this report. A site review with SFWMD staff to confirm these conditions will be required as part of a Formal Wetland Determination or upon submittal of an Environmental Resource Permit (ERP) application. A review of permitting records on the SFWMD online portal did not reveal that any past or current permits exist for the subject property. As such, an application for an Environmental Resource Permit (ERP) will be required for any future proposed development. The property is comprised of several different land cover types with the predominate land cover types:

- Abandoned Groves, Citrus (±70.6 ac, FLUCFCS 224) that are no longer in production. The network of ridges, furrows, and ditches were constructed for the purpose of drainage and irrigation of the former citrus grove remains. Invasive plant species including Brazilian pepper, carrotwood, old-world climbing fern, downy rose myrtle, strawberry guava, Caesar weed, smut grass, and cogangrass are present throughout and are the dominant

coverage in some areas. Native tree species meeting mitigation threshold including live oak, laurel oak, and cabbage palm are also present within the abandoned grove portions of the property;

- Ditches (±2.1 ac, FLUCFCS 510) are present within the central and eastern portions of the property. Vegetation present within the ditches includes a variety of native, nuisance, and non-native species including jointed spike rush, cattail, and Peruvian primrose willow, respectively;
- Australina Pine (±0.8 ac, FLUCFCS 437) dominates a portion of the property where the occurrence of other plant species in this area is sparse and consists of scattered ruderal shrubs and ground cover.

Observations for wildlife presence and signs of utilization were made during site reconnaissance conducted beginning in January and continuing on a regular basis through the preparation of the EIR in March 2026. Several common avian species, reptiles, and mammals were observed within the property and several others are likely to occur on a foraging or migratory basis. The survey methodologies used for determining the status of state and/or federally listed wildlife species occurrence on the site followed generally accepted protocols as specified in state and Federal guidance documents. The geographic range of the property and its associated habitats, vegetative cover types, and natural or disturbed status were the primary considerations in assessing the potential occurrence of listed species. Pedestrian and vehicular surveys were employed to assess the relative quality and wildlife utilization of the property. In addition, the protected species evaluations and survey methodologies have been, and will continue to be, addressed on a species-specific basis in accordance with Florida Fish and Wildlife Conservation Commission (FWC) and U.S. Fish and Wildlife Service (FWS) protocols and techniques relative to the species under consideration:

- The subject property is located within the consultation area of the Audubon's crested caracara and the portions of the abandoned citrus groves that contain sparse occurrences of trees provide suitable foraging habitat for this species. The property also contains mature cabbage palms that provide caracara with preferred nesting structures. Although no crested caracara or caracara nests were observed during field reconnaissance, in order to verify the absence of this species, a crested caracara nesting season survey is currently under way. The nesting season survey was initiated on January 1, 2026, and in accordance with FWS guidelines, will continue through April 2026. A caracara nesting season survey report documenting the findings of the nesting season survey will be provided under separate cover following the completion of the survey. Bald eagles, while no longer listed, remain protected under the Bald and Golden Eagle Protection Act. The property does not contain mature slash pines that are large enough to provide nesting opportunities, and no bald eagles or bald eagle nests were observed during field reconnaissance.
- The Florida sandhill crane is a State-designated Threatened species that is relatively common within the region. The preferred nesting habitat for this species is freshwater marsh habitat which does not occur onsite and no sandhill cranes or sandhill crane nests were observed during field reconnaissance.
- The onsite ditches provide potential foraging opportunities for listed wading bird species and one of these species, the State-designated Threatened little blue heron was observed during field reconnaissance. Other listed wading bird species that are likely to forage on the property include the tricolored heron and roseate spoonbill, although neither of these species have been observed during field reconnaissance.
- As of March 9, 2026, the wood stork is no longer listed as a federally threatened species by FWS. As of the date of March 2026, it is not currently clear whether the wood stork will remain protected at the state level by FWC. Regardless, no wood storks were observed during the January and February 2026 site reconnaissance, and the property does not provide suitable nesting habitat due to the absence of naturally forested wetlands.
- The Florida burrowing owls are listed as Threatened by the State of Florida and the portions of the site with only sparse occurrences of canopy trees and palms provide potentially suitable habitat for this species; however, no Florida burrowing owls or burrowing owl burrows were observed during field reconnaissance, and the occurrence of this species is unlikely.
- The Florida scrub-jay is a Federally threatened species that inhabits xeric oak and scrubby flatwoods habitats along sandy ridges and dunes. The subject property does not contain any suitable habitat for this species, and no Florida scrub-jays were observed or heard during field reconnaissance.

- In January and February 2026, habitat reconnaissance surveys were conducted by a licensed gopher tortoise agent (#GTA-14-00024I) to identify the occurrence of gopher tortoises, their burrows, or indicators of their presence. The habitat surveys were conducted in accordance with FWC Gopher Tortoise Permitting Guidelines (revised April 2023). No gopher tortoises, gopher tortoise burrows, or indicators of the presence of gopher tortoises were observed during the representative habitat survey conducted in January and February 2026. Although no gopher tortoises or gopher tortoise burrows were observed, a 100% habitat survey for this species will need to be conducted prior to the commencement of any land development activities. A gopher tortoise relocation permit will be required should any potentially occupied gopher tortoise burrows be identified that cannot be avoided by development within a radius of at least 25' from the burrow entrance.
- The eastern indigo snake is a secretive species that ranges widely over a diversity of upland and wetland habitats and is known to occur in the region. No eastern indigo snakes have been observed during multiple site visits and the absence of any significant gopher tortoise population indicates that indigo snakes are unlikely to occur. Regardless, standardized and specific construction awareness and notification procedures will need to be implemented for the protection of this species during site development.
- The Florida pine snake inhabits areas that feature well-drained sandy soils with moderate to open canopy. According to the FFWCC publicly available database, the subject site is located within the distribution area for this species. The property does not contain any pine flatwoods habitat suitable for this species and no Florida pine snakes were observed, thus the potential for their occurrence is considered low. The Florida bonneted bat is listed as endangered by the U.S. Fish and Wildlife Service (USFWS). This species preferred habitat for roosting and nesting includes a variety of forested habitats and man-made structures which do not occur on site. The property is located outside of the designated consultation area for this species, thus its potential for occurrence is considered low. No bonneted bats were observed during site reconnaissance conducted in January and February 2026.

Development of the project shall require an approved landscape plan and a vegetation removal permit issued by ERD for removal of native trees. Issuance of the vegetation removal permit shall demonstrate avoidance and minimization of impacts to native vegetation, a tree survey, and a tree mitigation plan for proposed impacts. A tree inventory is under way (by others) which will be provided for tree disposition plans. Native vegetation designated to be preserved shall meet the St. Lucie County vegetation protection standards.

Recommendation

The Environmental Resources Department has no objection to the approval of the CU or MJSP applications with the conditions detailed below.

Conditions of Approval

1. Prior to final site plan approval/Board of County Commission hearing, the landscape plan shall comply with the Land Development Code (LDC), including but not limited to LDC 7.09.00.
2. Prior to final site plan approval/Board of County Commission hearing, the tree survey shall comply with LDC 11.02.09.A.2.i.
3. Prior to final site plan approval/Board of County Commission hearing, a tree mitigation plan shall be approved by the Environmental Resources Department.
    a. The St. Lucie County LDC requires all native canopy tree mitigation to be quantified at the 2:1 ratio, (2" diameter at breast height (DBH) shall be replaced for every 1" DBH impacted). Examples of the following tree mitigation ratios:
        i. Native tree onsite relocation receives 1.5:1 relocation/preservation credit, which is deficient of the required mitigation of 2:1 tree mitigation requirement. Using a 30" DBH native tree as an example, there is a relocation credit at 1.5:1 ratio results with 30 x 1.5 = 45" DBH, leaving 15" DBH of required tree mitigation to be made up from the required 60" DBH.
        ii. Native tree preservation in place receives 2:1 preservation credit.

2. Prior to commencement of development, including but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, listed species surveys shall be updated as necessary per individual species-specific requirements. If any listed species impacts are found to be present as a result of these surveys, appropriate mitigative measures per state and federal agency requirements shall be provided prior to initiation of any clearing activities.
3. Prior to commencement of development, including, but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, a vegetation removal permit or exemption shall be issued by the Environmental Resources Department per LDC 6.00.03.
4. Prior to commencement of development, including, but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, monitoring reports from the certified arborist shall be provided following each root pruning event and following each relocation event to ensure best management practices (BMPs) are followed.
5. Prior to commencement of development, including, but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, monitoring reports from the certified arborist shall be provided prior to issuance of a certificate of completion/occupancy, following twelve (12) months after the last round of canopy trees has been relocated, and at the 18-month follow up inspection. Should any relocated trees die within these timeframes or beyond, the applicant shall provide another method of tree mitigation, or a combination of methods as outlined in LDC 6.00.05.D, as tree mitigation shall be in perpetuity.
6. Prior to commencement of development, including but not limited to clearing, filling, excavation, grading, or planting of vegetation, as defined in LDC 2.00.00, listed species surveys shall be updated as necessary per individual species-specific requirements. If any listed species impacts are found to be present as a result of these surveys, appropriate mitigative measures per state and federal agency requirements shall be provided prior to initiation of any clearing activities.
7. Prior to issuance of a certificate of occupancy, all Category I listed invasive plant species shall be eradicated from the parcel per LDC 7.09.05.

PROJECT ORCHID

Environmental Impact Report

Prepared For:

Foundry Commercial

Prepared By:

EW Consultants, Inc.

March 2026

1000 SE Monterey Commons Boulevard, Suite 208 • Stuart, FL 34996 772-287-8771 • Fax 772-287-2988
www.ewconsultants.com

Purpose and Intent

This report has been prepared in support of a proposed industrial development on a 73.48 +/- acre property referred to as Project Orchid. The subject property is located north of and adjacent to Colbourn Road, south of I-95, east of the Florida Turnpike, and west of and adjacent to Rock Road. The northern and eastern boundary of the property are defined by Rock Road. This report has been prepared in accordance with Section 11.02.09.A.5 "Environmental Impact Report" of the St. Lucie County Land Development Code.

Introduction

The subject 73.48 +/- acre property covered by this Environmental Impact Report is located within Section 2, Township 35 South, Range 39 East within unincorporated St. Lucie County, Florida. A Location Map (Figure 1), USGS Quad Map (Figure 2), and Aerial Photo (Figure 3) depicting the property boundaries and the immediate surrounding area are provided in the Appendix.

Property Description

The property is comprised of several different land cover types with the predominate land cover type being abandoned citrus groves that are no longer in production. The property also contains several man-made agricultural conveyance ditches that were constructed for the purpose of drainage and irrigation of the former citrus groves. Native species including cabbage palm and laurel oak have naturally colonized throughout the property as have non-native invasive species, predominantly Brazilian pepper and Australian pine. A review of historic aerial imagery indicates that the property was converted to agricultural use more than 65 years ago and was subsequently converted for the purpose of citrus production by 1985. The property does not contain any native upland habitat, and no wetlands were identified during field reconnaissance conducted for this Environmental Impact Report.

Soils

A Custom Soils Resource Report for the subject property is provided in the Appendix. This report, prepared by the United States Department of Agriculture (USDA) Natural Resource Conservation Service (NRCS) provides complete descriptions of all soil types within the Project Orchid property along with acreage summaries and soil descriptions.

Natural Communities and Land Cover

The following is a summary of the land cover types and vegetative communities found on the subject site. Land cover and vegetative community classifications are mapped based on the Florida Land Use, Cover and Forms Classification System (FLUCFCS) developed by the Florida Department of Transportation. Field reconnaissance and aerial imagery interpretation were employed in the mapping of the vegetative communities on the subject property. The vegetative community descriptions include discussions of potential wildlife habitat provided by the various resources present in those communities. Detailed observations and occurrences of wildlife are discussed in subsequent sections of this report.

The FLUCFCS classifications observed on the site are described below. A Land Cover Map of the observed vegetative community types is included as Figure 4 in the Appendix of this report. The land cover types on the property are described as follows:

224 – Abandoned Groves –

This is the predominant land cover type on the subject property and includes the portions of the property that were previously converted for the purpose of citrus production that are no longer in operation. The network of ridges, furrows, and ditches were constructed for the purpose of drainage and irrigation of the former citrus grove remains. Non-native invasive plant species including Brazilian pepper, carrotwood, old-world climbing fern, downy rose myrtle, strawberry guava, Caesar weed, smut grass, and cogan grass are present throughout and are the dominant coverage in some areas. Native species including live oak, laurel oak, and cabbage palm are also present within the abandoned grove portions of the property.

437 – Australian Pine –

There is a portion of the property where the vegetation cover is dominated by non-native invasive Australian pine trees. As generally occurs in areas that are dominated by Australian pines, the occurrence of other plant species in this area is sparse and consists of scattered ruderal shrubs and ground cover.

510 – Ditches –

There are several conveyance ditches present within the central and eastern portions of the property. Vegetation present within the ditches includes a variety of native, non-native, and nuisance species including jointed spike rush, Peruvian primrose willow, and cattail.

Wildlife

Non-listed Wildlife

Observations for wildlife presence and signs of utilization were made during site reconnaissance conducted beginning in January and and continuing on a regular basis through the preparation of this report in March 2026. Several common avian species were observed within the property and several others are likely to occur on a foraging or migratory basis.

The following non-listed avian species have been observed during site reconnaissance of the property: mourning dove, eastern meadowlark, American crow, black vulture, red-shoulder hawk, swallow tailed kite, and cattle egret. Several species of wading birds including great egret, white ibis, and little blue heron were also observed both in transit and forging within the on site agricultural ditches.

Direct observation and signs of utilization by mammals were observed during the site reconnaissance including raccoon, coyote, feral hog, and rodents.

Reptile observations included soft-shell turtle, black racer snake, and southern leopard frog.

Listed Species Inventory and Evaluation –

The survey methodologies used for determining the status of state and/or federally listed wildlife species occurrence on the site followed generally accepted protocols as specified in state and Federal guidance documents. The geographic range of the property and its associated habitats, vegetative cover types, and natural or disturbed status were the primary considerations in assessing the potential occurrence of listed species.

Pedestrian and vehicular surveys were employed to assess the relative quality and wildlife utilization of the property. In addition, the protected species evaluations and survey methodologies have been, and will continue to be, addressed on a species-specific basis in accordance with Florida Fish and Wildlife Conservation Commission (FFWCC) and U.S. Fish and Wildlife Service (USFWS) protocols and techniques relative to the species under consideration.

The state and/or federally listed wildlife species with potential to occur on the subject site are summarized in the following table. Likelihood of occurrence has been indicated based on species-specific evaluations and best professional judgement and noted as either observed during site review or likelihood of occurrence as high, medium, or low.

Table 1. Known and Potentially Occurring Listed Faunal Species

Common Name	Scientific Name	Preferred Habitat	Sampling Method	Occurrence*	Listed Status
					State/Federal
American alligator	*Alligator mississippiensis*	Wetland and aquatic habitat	Pedestrian and vehicular transects	M	FT/SA
Audubon's crested caracara	*Caracara cheriway*	Dry prairie, open rangeland	Pedestrian and vehicular transects	M	FT
Bald eagle	*Haliaeetus leucocephalus*	Nest in tall trees (usually pine) near coasts, rivers, lakes and wetlands	Pedestrian and vehicular transects	L	No longer listed Nest trees protected
Eastern indigo snake	*Drymarchon corais couperi*	A diversity of upland/low land habitat	Pedestrian and vehicular transects	M	FT
Florida bonneted bat	*Eumops floridanus*	A diversity of forested habitats	Acoustic and roost surveys	L	FE
Florida burrowing owl	*Athene cunicularia*	Sandhills, ruderal communities, dry prairies	Pedestrian and vehicular transects	M	ST
Florida pine snake	*Pituophis melanoleucus mugitus*	Well drained sandy soils, moderate to open pine canopy	Pedestrian and vehicular transects	L	ST
Florida sandhill crane	*Grus canadensis pratensis*	Breed in emergent palustrine wetlands; forage in pastures/prairies	Pedestrian and vehicular transects; aerial nest survey	L	ST
Florida scrub-jay	*Aphelocoma coerulescens*	Xeric oak scrub and scrubby flatwoods on sandy ridges and dunes	Pedestrian and vehicular transects	L	FT
Gopher tortoise	*Gopherus polyphemus*	Sandhills, xeric oak scrub, sand pine scrub, scrubby flatwoods; agricultural lands	Burrow survey 100% of suitable habitat	M	ST
Little blue heron	*Egretta caerulea*	Breeding: marshes, swamps, ponds, estuaries, rivers; nest in shrubs and small trees	Pedestrian and vehicular transects	[1]O	ST
Red-cockaded woodpecker	*Picoides borealis*	Mature pine woodlands	Pedestrian and vehicular transects	L	FE
Reddish egret	*Egretta rufescens*	Breeding: marshes, swamps, ponds, estuaries, rivers; nest in shrubs and small trees	Pedestrian and vehicular transects	L	ST

Common Name	Scientific Name	Preferred Habitat	Sampling Method	Occurrence*	Listed Status
Roseate spoonbill	*Ajaia ajaja*	Breeding: marshes, swamps, ponds, estuaries, rivers; nest in shrubs and small trees	Pedestrian and vehicular transects	M	ST
Southeast American kestrel	*Falco sparverius paulus*	Sandhill and open rangeland nest in cavities of dead trees and abandoned woodpecker nests	Pedestrian and vehicular transects	L	ST
Tricolored heron	*Egretta tricolor*	Breeding: marshes, swamps, ponds, nest in shrubs and small trees	Pedestrian and vehicular transects	M	ST
Wood stork	*Mycteria americana*	Estuarine or freshwater wetlands; nest in tops of trees in cypress or mangrove swamps	Pedestrian and vehicular transects	M	No longer Federally listed

O* = Observed; [1] Observed transient ; [2] Observed nesting and/or resident
Probability of Occurrence: H= High probability; M= Medium; L= Low;

FE = Federally-designated Endangered; FT = Federally-designated Threatened; FXN = Federally-designated Threatened Nonessential Experimental Population; FT(S/A) = Federally-designated Threatened species due to similarity of appearance; ST = State-designated Threatened; SSC = State Species of Special Concern

The American alligator is listed as Federally Threatened due to similarity of appearance with the American crocodile and alligators are relatively common throughout the region in wetland and aquatic systems. Although no alligators were observed during field reconnaissance, there remains a moderate chance of occurrence of alligators within the on site agricultural ditches.

The subject property is located within the consultation area of the Audubon's crested caracara and the portions of the abandoned citrus groves that contain sparse occurrences of trees provide suitable foraging habitat for this species. The property also contains mature cabbage palms that provide caracara with preferred nesting structures. Although no crested caracara or caracara nests were observed during field reconnaissance, in order to verify the absence of this species, a crested caracara nesting season survey is currently under way. The nesting season survey was initiated on January 1, 2026 and, in accordance with U.S. Fish and Wildlife Service (USFWS) guidelines, will continue through April 2026. A caracara nesting season survey report documenting the findings of the nesting season survey will be provided under separate cover following the completion of the survey.

Bald eagles, while no longer listed, remain protected under the Bald and Golden Eagle Protection Act. The property does not contain mature slash pines that are large enough to provide nesting opportunities and no bald eagles or bald eagle nests were observed during field reconnaissance.

The eastern indigo snake is a secretive species that ranges widely over a diversity of upland and wetland habitats and is known to occur in the region. No eastern indigo snakes have been observed during multiple site visits and the absence of any significant gopher tortoise population indicates that indigo snakes are unlikely to occur. Regardless, standardized and specific construction awareness and notification procedures will need to be implemented for the protection of this species during site development.

The Florida bonneted bat is listed as endangered by the U.S. Fish and Wildlife Service (USFWS). This species preferred habitat for roosting and nesting includes a variety of forested habitats and man-made structures which do not occur on site. The property is located outside of the designated consultation area for this species, thus its potential for occurrence is considered low. No bonneted bats were observed during site reconnaissance conducted in January and February 2026.

Florida burrowing owls are listed as Threatened by the State of Florida and the portions of the site with only sparse occurrences of canopy trees and palms provide potentially suitable habitat for this species. However, no Florida burrowing owls or burrowing owl burrows were observed during field reconnaissance and the occurrence of this species is unlikely.

The Florida pine snake inhabits areas that feature well-drained sandy soils with moderate to open canopy. According to the FFWCC publicly available database, the subject site is located within the distribution area for this species. The property does not contain any pine flatwoods habitat suitable for this species and no Florida pine snakes were observed, thus the potential for their occurrence is considered low.

The Florida sandhill crane is a State-designated Threatened species that is relatively common within the region. The preferred nesting habitat for this species is freshwater marsh habitat which does not occur onsite and no sandhill cranes or sandhill crane nests were observed during field reconnaissance.

The Florida scrub-jay is a Federally threatened species that inhabits xeric oak and scrubby flatwoods habitats along sandy ridges and dunes. The subject property does not contain any suitable habitat for this species and no Florida scrub-jays were observed or heard during field reconnaissance.

In January and February 2026, habitat reconnaissance surveys were conducted by Jason Hahner (Licensed Gopher Tortoise Agent #GTA-14-00024I) to identify the occurrence of gopher tortoises, their burrows, or indicators of their presence. The habitat surveys were conducted in accordance with Florida Fish and Wildlife Conservation Commission (FFWCC) Gopher Tortoise Permitting Guidelines (revised April 2023).

No gopher tortoises, gopher tortoise burrows, or indicators of the presence of gopher tortoises were observed during the representative habitat survey conducted in January and February 2026. Although no gopher tortoises or gopher tortoise burrows were observed, a 100% habitat survey for this species will need to be conducted prior to the commencement of any land development activities. A gopher tortoise relocation permit will be required should any potentially occupied gopher tortoise burrows be identified that cannot be avoided by development within a radius of at least 25-feet from the burrow entrance.

The on site ditches provide potential foraging opportunities for listed wading bird species and one of these species, the State-designated Threatened little blue heron was observed during field reconnaissance. Other listed wading bird species that are likely to forage on the property include the tricolored heron and roseate spoonbill, although neither of these species have been observed during field reconnaissance.

As of March 9, 2026, the wood stork is no longer listed as a federally threatened species by the U.S. Fish and Wildlife Service (USFWS). As of the date of this report (March 2026), it is not currently clear whether the wood stork will remain protected at the state level by Florida Fish and Wildlife Conservation Commission (FFWCC). Regardless, no wood storks were observed during the January and February 2026 site reconnaissance and the property does not provide suitable nesting habitat due to the absence of naturally forested wetlands.

Impact Summary

Uplands –

Development of the project will require a vegetation removal permit issued by St. Lucie County for removal of native trees. Issuance of the vegetation removal permit will require demonstration of avoidance and minimization of impacts to native vegetation, a tree survey, and a mitigation plan for proposed impacts. A tree inventory is under way (by others) which will be provided to the project land planner for tree disposition plans. Vegetation designated to be preserved will need to meet the St. Lucie County vegetation protection standards.

Wetlands –

A review of permitting records on the South Florida Water Management District (SFWMD) online web portal did not reveal that any past or current permits exist for the subject property. As such, an application for an Environmental Resource Permit (ERP) will be required for any future proposed development.

The opinion of the absence of wetlands on site has not yet been verified by SFWMD as of the date of this report (March 2026). A site review with SFWMD staff to confirm these conditions will be required as part of a Formal Wetland Determination or upon submittal of an Environmental Resource Permit (ERP) application.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: St. Lucie County, Florida
Survey Area Data: Version 19, Aug 29, 2025

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jan 18, 2022—Jan 30, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Sunshine Kitchen | 7550 Pruitt Research Road, Fort Pierce

Disclaimer: The images shown are preliminary and may change as the design progresses.

What is Project Orchid?

- A window manufacturing company headquartered in Miami
- Designed to serve growing customer portfolio
- A modern, fully enclosed manufacturing operation using advanced technology

Disclaimer: The images shown are preliminary and may change as the design progresses

Project Location

- Located on N. Rock Road
- Approximately 73 acres
- Previously used for agricultural purposes

Disclaimer: The images shown are preliminary and may change as the design progresses

Facility Overview

- Approximately 1.4 million sq ft
- Multiple production areas within one building
- Two-story office component (27,300 sq ft)
- 504 parking spaces
- Ride share & bus drop off
- Two main access drives off Rock Rd
- One driveway off north access road
- Two interconnected lakes
- One dry retention area for stormwater
- Security perimeter fencing
- Secured access via guard booths

Disclaimer: The images shown are preliminary and may change as the design progresses

Building Design

- Modern office entrance
- Parking designed for daily activity
- Landscaped buffers & setbacks

- Approximately 60–80 feet
- Height varies based on specialized equipment needs

Disclaimer: The images shown are preliminary and may change as the design progresses

How the Facility Operates

Inside the building:

- Aluminum is melted and prepared
- Formed into components
- Combined with glass
- Assembled into finished windows

All processes take place indoors

Disclaimer: The images shown are preliminary and may change as the design progresses

Environmental Protections

- Fully enclosed air systems
- Emissions captured and filtered before release
- Closed-loop water system that recycles water

These systems are standard for modern facilities of this type.

Disclaimer: The images shown are preliminary and may change as the design progresses

Noise Expectations

- At the property line, sound levels are expected to be similar to a supermarket loading area.
- Noise is contained within the building and managed through design and buffering.

Disclaimer: The images shown are preliminary and may change as the design progresses

Water and Utilities

- Water is reused through a closed-loop system
- No continuous discharge from manufacturing processes
- Utilities have confirmed capacity to serve the site

The facility is designed to operate efficiently without placing strain on local systems.

Disclaimer: The images shown are preliminary and may change as the design progresses

What This Facility Does NOT Include

- No outdoor manufacturing processes
- No exposed production areas
- No noticeable odors
- No visible emissions

All operations are contained within the building.

Disclaimer: The images shown are preliminary and may change as the design progresses

Traffic Overview

Based on current studies:

- Approximately 6,166 trips per day
- 736 trips during morning peak
- 910 trips during evening peak

Traffic is distributed throughout the day rather than concentrated at a single time.

Disclaimer: The images shown are preliminary and may change as the design progresses

Planned Road Improvements

To support traffic flow, the project includes:

- New turn lanes at Rock Rd & Orange Ave
- Signal installation when warranted
- Additional travel lanes on Orange Ave
- Roadway widening on Rock Rd

These improvements are required as part of the development process.

Disclaimer: The images shown are preliminary and may change as the design progresses

Construction Impacts

- Construction will occur during normal working hours
- Dust and noise will be managed using best practices
- Site will be maintained safely and responsibly
- Goal is to minimize disruption during construction

Construction of the facility is expected to generate over $200 million in economic activity, supporting construction jobs and local contractors during the building phase.

Disclaimer: The images shown are preliminary and may change as the design progresses

Jobs and Economic Impact

- > 1,000 jobs over five years
- $28.50/hour - median starting wage
- $53 million – estimated annual payroll

This represents a significant long-term investment in the local community.

Disclaimer: The images shown are preliminary and may change as the design progresses

Why St. Lucie County?

This location was selected because of:

- Available industrially zoned land
- Access to workforce and training programs
- Strong infrastructure and utilities
- Proximity to major markets
- Supportive economic development environment

Disclaimer: The images shown are preliminary and may change as the design progresses

What Happens Next

- The project is currently in the development review process
- All steps include public input and oversight.

Disclaimer: The images shown are preliminary and may change as the design progresses

Project Timeline

Disclaimer: The images shown are preliminary and may change as the design progresses

Questions

We appreciate your time and input.

What questions or concerns can we address?

Disclaimer: The images shown are preliminary and may change as the design progresses

PROJECT ORCHID

THANK YOU!
